Chapter 1

Introduction

1.1 Basics

Koha is the first free and open source software library automation package (ILS). Development is sponsored by libraries of varying types and sizes, volunteers, and support companies from around the world.

Learn more about Koha by visiting the official Koha website: <http://koha-community.org>

1.2 Recommendations

Full system recommendations can be found on the official Koha wiki along with the developer documentation: <http://wiki.koha-community.org>

When working in the Koha staff client it is strongly recommended that you use the Firefox browser. Koha's staff client is not supported in Internet Explorer and has not yet been fully optimized for Google Chrome.

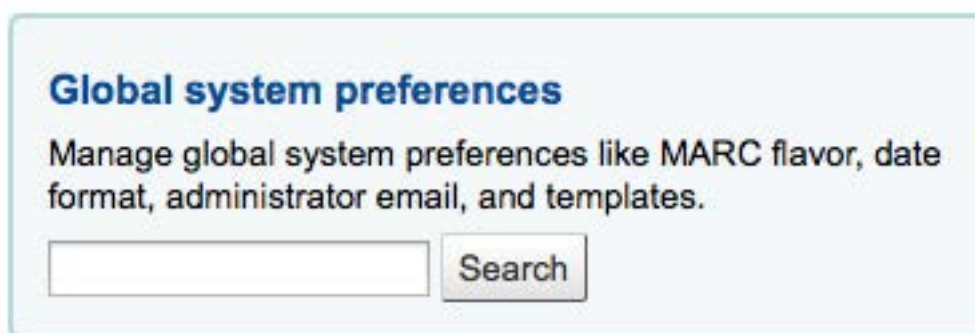

Chapter 2

Administration

2.1 Global System Preferences

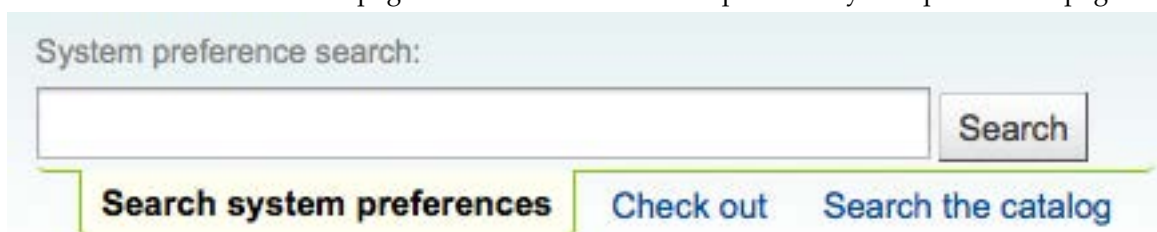

Global system preferences control the way your Koha system works in general. Set these preferences before anything else in Koha.

- *Get there:* More > Administration > Global System Preferences

Global system preferences
Manage global system preferences like MARC flavor, date format, administrator email, and templates.

System preferences can be searched (using any part of the preference name or description) using the search box on the 'Administration' page or the search box at the top of each system preferences page.

System preference search:

[Search system preferences](#) [Check out](#) [Search the catalog](#)

When editing preferences a '(modified)' tag will appear next to items you change until you click the 'Save All' button:

TagsModeration (modified)	Require <input type="button" value="v"/> that tag
TagsShowOnDetail	Show <input type="text" value="10"/> tags on
TagsShowOnList	Show <input type="text" value="6"/> tags on

[Cancel](#)

After saving your preferences you'll get a confirmation message telling you what preferences were saved:

Each section of preferences can be sorted alphabetically by clicking the small down arrow to the right of the word 'Preference' in the header column

▼ Policy

Preference
AcqCreateItem
CurrencyFormat
gist

If the preference refers to monetary values (like **maxoutstanding**) the currency displayed will be the default you set in your **Currency and Exchange Rate** administration area. In the examples to follow they will all read USD for U.S. Dollars.

2.1.1 Acquisitions

Get there: More > Administration > Global System Preferences > Acquisitions

2.1.1.1 Policy

2.1.1.1.1 AcqCreateItem Default: placing an order

Asks: Create an item when ____.

Values:

- cataloging a record
- placing an order
- receiving an order

Description:

- This preference lets you decide when you'd like to create an item record in Koha. If you choose to add an item record when 'placing an order' then you will enter item information in as you place records in your basket. If you choose to add the item when 'receiving an order' you will be asked for item record information when you're receiving orders in acquisitions. If you choose to add the item when 'cataloging a record' then item records will not be created in acquisitions at all, you will need to go to the cataloging module to add the items.

2.1.1.1.2 AcqViewBaskets Default: created by staff member

Asks: Show baskets ____

Values:

- created by staff member
- from staff member's branch
- in system, regardless of owner

Description:

- When in acquisitions this preference allows you to control whose baskets you can see when looking at a vendor. The default value of 'created by staff member' makes it so that you only see the baskets you created. Choosing to see baskets 'from staff member's branch' will show you the baskets created by anyone at the branch you're logged in at. Finally, you can choose to set this preference to show you all baskets regardless of who created it ('in system, regardless of owner). Regardless of which value you choose for this preference, superlibrarians can see all baskets created in the system.

2.1.1.1.3 **BasketConfirmations** Default: always ask for confirmation

Asks: When closing or reopening a basket, ___.

Values:

- always ask for confirmation
- do not ask for confirmation

Descriptions:

- This preference adds the option to skip confirmations on closing and reopening a basket. If you skip the confirmation, you do not create a new basket group.

2.1.1.1.4 **CurrencyFormat** Default: 360,000.00 (US)

Asks: Display currencies using the following format ___

Values:

- 360,000.00 (US)
- 360 000,00 (FR)

2.1.1.1.5 **gist** Default: 0

Asks: The default tax rate is ___

Description:

- This preference will allow the library to define a default Goods and Services Tax rate. The default of value of 0 will disable this preference.

TIP

Enter this value as a number (.06) versus a percent (6%).

2.1.1.1.6 **UniqueItemFields** Default: barcode

Asks: ___ (space-separated list of fields that should be unique for items, must be valid SQL fields of **items** table)

Description:

- If this preference is left blank when adding items in acquisitions there will be no check for uniqueness. This means that a duplicate barcode can be created in acquisitions which will cause errors later when checking items in and out.

2.1.1.2 **Printing**

2.1.1.2.1 **OrderPdfFormat** Default: pdfformat::layout2pages

Asks: Use ___ when printing basket groups.

2.1.2 Administration

These preferences are general settings for your system.

Get there: More > Administration > Global System Preferences > Administration

2.1.2.1 CAS Authentication

The Central Authentication Service (CAS) is a single sign-on protocol for the web. If you don't know what this is, leave these preferences set to their defaults.

2.1.2.1.1 AllowPKIAuth Default: no

Asks: Use ___ field for SSL client certificate authentication

Values:

- no
- the common name
- the email address

2.1.2.1.2 casAuthentication Default: Don't use

Asks: ___ CAS for login authentication.

2.1.2.1.3 casLogout Default: Don't logout

Asks: ___ of CAS when logging out of Koha.

2.1.2.1.4 casServerUrl Asks: The CAS Authentication Server can be found at ___

2.1.2.2 Interface options

These preference are related to your Koha interface

2.1.2.2.1 DebugLevel Default: lots of

Asks: Show ___ debugging information in the browser when an internal error occurs.

Values:

- lots of - will show as much information as possible
- no - will only show basic error messages
- some - will show only some of the information available

Description:

- This preference determines how much information will be sent to the user's screen when the system encounters an error. The most detail will be sent when the value level is set at 2, some detail will be sent when the value is set at 1, and only a basic error message will display when the value is set at 0. This setting is especially important when a system is new and the administration is interested in working out the bugs (errors or problems) quickly. Having detailed error messages makes quick fixes more likely in problem areas.

2.1.2.2.2 delimiter Default: semicolons

Asks: Separate columns in an exported report file with ___ by default.

Values:

- #'s
- backslashes
- commas
- semicolons

- slashes
- tabs

Description:

- This preference determines how reports exported from Koha will separate data. In many cases you will be able to change this option when exporting if you'd like.

2.1.2.2.3 KohaAdminEmailAddress This is the default 'From' address for emails unless there is one for the particular branch, and is referred to when an internal error occurs.

Asks: Use ___ as the email address for the administrator of Koha.

Description:

- This preference allows one email address to be used in warning messages set to the OPAC. If no email address is set for the branch this address will receive messages from patrons regarding modification requests, purchase suggestions, and questions or information regarding overdue notices. It is recommended that a email address that can be accessed by multiple staff members be used for this purpose so that if one librarian is out the others can address these requests. This email address can be changed when needed.

2.1.2.2.4 noItemTypeImages Default: Show

Asks: ___ itemtype icons in the catalog.

Values:

- Shows
- Don't show

Description:

- This preference allows the system administrator to determine if users will be able to set and see an **item type icon** the catalog on both the OPAC and the Staff Client. The images will display in both the OPAC and the Staff Client/Intranet. If images of item types are disabled, text labels for item types will still appear in the OPAC and Staff Client.

2.1.2.2.5 virtualshelves Default: Allow

Asks: ___ staff and patrons to create and view saved lists of books.

Values:

- Allow
- Don't Allow

Description:

- This preference controls whether the lists functionality will be available in the staff client and OPAC. If this is set to "Don't allow" then no one will be able to save items to public or private lists.

2.1.2.3 Login options

These preferences are related to logging into your Koha system

2.1.2.3.1 AutoLocation Default: Don't require

Asks: ___ staff to log in from a computer in the IP address range specified by their library (if any).

- Set IP address range in the library administration area
 - *Get there:* More > Administration > Basic Parameters > **Libraries & Groups**

Values:

- Don't require

- Require

Description:

- This preference protects the system by blocking unauthorized users from accessing the staff client program and settings. Authorized and unauthorized users are determined by their computer's IP addresses. When the preference is set to 'Require', IP authorization is in effect and unauthorized IP addresses will be blocked. This means that staff cannot work from home unless their IP address has been authorized. When set to 'Don't require', anyone with a staff client login will have access no matter which IP address they are using.

2.1.2.3.2 **IndependantBranches** Default: Don't prevent

Asks: ___ staff (but not superlibrarians) from modifying objects (holds, items, patrons, etc.) belonging to other libraries.

Values:

- Don't prevent
- Prevent

Description:

- This preference should only be used by library systems which are sharing a single Koha installation among multiple branches but are considered independent organizations, meaning they do not share material or patrons with other branches and do not plan to change that in the future. If set to 'Prevent' it increases the security between library branches by: prohibiting staff users from logging into another branch from within the staff client, filtering out patrons from patron searches who are not a part of the login branch conducting the search, limiting the location choices to the login branch when adding or modifying an item record, preventing users from other branch locations from placing holds or checking out materials from library branches other than their own, and preventing staff from editing item records which belong to other library branches. All of these security safeguards can be overridden only by the superlibrarian, the highest level of privileges.

IMPORTANT

It is important that this value be set before going live and that it NOT be changed

2.1.2.3.3 **insecure** Default: Don't allow

Asks: ___ staff to access the staff client without logging in.

Values:

- Allow
- Don't allow

Description:

- This preference controls whether or not authentication (user login) will be required to gain access to the staff client. If set to 'Allow', all authentication is bypassed. If set to 'Don't allow' authentication (login) on the staff client is required.

IMPORTANT

Setting this to 'Allow' is dangerous, and should not be done in production environments.

2.1.2.3.4 SessionStorage Default: in the MySQL database

Asks: Store login session information ___

Values:

- as temporary files
- in the MySQL database
- in the PostgreSQL database

-

IMPORTANT

PostgreSQL is not yet supported

Description:

- This preference allows administrators to choose what format session data is stored in during web sessions.

2.1.2.3.5 timeout Default: 12000000

Asks: Automatically log out users after ___ seconds of inactivity.

Description:

- This preference sets the length of time the Staff Client or OPAC accounts can be left inactive before re-logging in is necessary. The value of this preference is in seconds. At this time, the amount of time before a session times out must be the same for both the Staff Client and the OPAC.

2.1.2.4 Search Engine**2.1.2.4.1 SearchEngine****IMPORTANT**

This preference is highly experimental and should not be changed from the default value in a production environment.

Default: Zebra

Asks: ___ is the search engine used.

Values:

- Solr
- Zebra

Description:

- This preference will be used to control which search engine Koha uses for catalog searches in the OPAC and the staff client.

2.1.3 Authorities*Get there:* More > Administration > Global System Preferences > Authorities

2.1.3.1 General

2.1.3.1.1 AuthDisplayHierarchy Default: Don't display

Asks: ___ broader term/narrower term hierarchies when viewing authorities.

Values:

- Display

 United States

 Pennsylvania

 Philadelphia (Pa.)

Authority #1060 (Geographic Name)

Used in 0 record(s)

0
 1
 5
 7

151 ## - HEADING--GEOGRAPHIC NAME
a Geographic name Philadelphia (Pa.)

- Don't display

Description:

- If your authority records includes 5xx fields with linked references to broader and/or narrower see also references this preference will turn on a display of those authorities at the top of the record.

2.1.3.1.2 AutoCreateAuthorities Default: do not generate

Asks: When editing records, ___ authority records that are missing.

Values:

- do not generate
- generate

IMPORTANT

BiblioAddsAuthorities must be set to "allow" for this to have any effect

Description:

- When this and **BiblioAddsAuthorities** are both turned on, automatically create authority records for headings that don't have any authority link when cataloging. When BiblioAddsAuthorities is on and AutoCreateAuthorities is turned off, do not automatically generate authority records, but allow the user to enter headings that don't match an existing authority. When BiblioAddsAuthorities is off, this has no effect.

2.1.3.1.3 BiblioAddsAuthorities Default: allow

Asks: When editing records, ___ them to automatically create new authority records if needed, rather than having to reference existing authorities.

Values:

- allow
 - This setting allows you to type values in the fields controlled by authorities and then adds a new authority if one does not exist
- don't allow
 - This setting will lock the authority controlled fields, forcing you to search for an authority versus allowing you to type the information in yourself.

2.1.3.1.4 dontmerge Default: Don't

Asks: ___ automatically update attached biblios when changing an authority record.

Values:

- Do
- Don't

Description:

- This preference tells Koha how to handle changes to your Authority records. If you edit an authority record and this preference is set to 'Do' Koha will update all of the bib records linked to the authority with the new authority record's data. If this is set to "Don't" then Koha won't edit bib records when changes are made to authorities.

IMPORTANT

If this is set to merge you will need to ask your administrator to enable the [merge_authorities.pl cronjob](#).

2.1.3.1.5 MARCAuthorityControlField008 Default: || aca|| aabn | a | a d

Asks: Use the following text for the contents of MARC authority control field 008 position 06-39 (fixed length data elements).

IMPORTANT

Do not include the date (position 00-05) in this preference, Koha will calculate automatically and put that in before the values in this preference.

Description:

- This preference controls the default value in the 008 field on Authority records. It does not effect bibliographic records.

2.1.3.1.6 UseAuthoritiesForTracings Default: Don't use

Asks: ___ authority record numbers instead of text strings for searches from subject tracings.

Values:

- Don't use

- Search links look for subject/author keywords (example: opac-search.pl?q=su:Business%20networks)
- Use
 - Search links look for an authority record (example: opac-search.pl?q=an:354)

Description:

- For libraries that have authority files, they may want to make it so that when a link to an authorized subject or author is clicked on the OPAC or staff client it takes the searcher only to a list of results with that authority record. Most libraries do not have complete authority files and so setting this preference to 'Don't use' will allow searchers to click on links to authors and subject headings and perform a keyword search against those fields, finding all possible relevant results instead.

2.1.3.2 Linker

These preference will control how Koha links bibliographic records to authority records. All bibliographic records added to Koha after these preferences are set will link automatically to authority records, for records added before these preferences are set there is a script (`misc/link_bibs_to_authorities.pl`) that your system administrator can run to link records together.

2.1.3.2.1 CatalogModuleRelink Default: Do not

Asks: ___ automatically relink headings that have previously been linked when saving records in the cataloging module.

Values:

- Do
- Do not

Description:

- Longtime users of Koha don't expect the authority and bib records to link consistently. This preference makes it possible to disable authority relinking in the cataloging module only (i.e. relinking is still possible if `link_bibs_to_authorities.pl` is run). Note that though the default behavior matches the previous behavior of Koha (retaining links to outdated authority records), it does not match the intended behavior (updating biblio/authority link after bibliographic record is edited). Libraries that want the intended behavior of authority control rather than the way Koha used to handle linking should set `CatalogModuleRelink` to 'Do'. Once setting this to 'Do' the following preferences can also be set.

2.1.3.2.2 LinkerKeepStale Default: Do not

Asks: ___ keep existing links to authority records for headings where the linker is unable to find a match.

Values:

- Do
- Do not

Description:

- When set to 'Do', the linker will never remove a link to an authority record, though, depending on the value of `LinkerRelink`, it may change the link.

2.1.3.2.3 LinkerModule Default: Default

Asks: Use the ___ linker module for matching headings to authority records.

Values:

- Default

- Retains Koha’s previous behavior of only creating links when there is an exact match to one and only one authority record; if the **LinkerOptions** preference is set to ‘broader_headings’, it will try to link headings to authority records for broader headings by removing subfields from the end of the heading
- First match
 - Creates a link to the first authority record that matches a given heading, even if there is more than one authority record that matches
- Last match
 - Creates a link to the last authority record that matches a given heading, even if there is more than one record that matches

Description:

- This preference tells Koha which match to use when searching for authority matches when saving a record.

2.1.3.2.4 **LinkerOptions** Asks: Set the following options for the authority linker ___

IMPORTANT

This feature is experimental and shouldn’t be used in a production environment until further expanded upon.

Description:

- This is a pipe separated (|) list of options. At the moment, the only option available is "broader_headings." With this option set to "broader_headings", the linker will try to match the following heading as follows:

```
=600 10$aCamins-Esakov, Jared$xCoin collections$vCatalogs$vEarly works to ↔
1800.
```

First: Camins-Esakov, Jared--Coin collections--Catalogs--Early works to 1800

Next: Camins-Esakov, Jared--Coin collections--Catalogs

Next: Camins-Esakov, Jared--Coin collections

Next: Camins-Esakov, Jared (matches! if a previous attempt had matched, it would not have tried this)

2.1.3.2.5 **LinkerRelink** Default: Do

Asks: ___ relink headings that have previously been linked to authority records.

Values:

- Do
- Do not

Description:

- When set to ‘Do’, the linker will confirm the links for headings that have previously been linked to an authority record when it runs, correcting any incorrect links it may find. When set to ‘Do not’, any heading with an existing link will be ignored, even if the existing link is invalid or incorrect.

2.1.4 Cataloging

Get there: More > Administration > Global System Preferences > Cataloging

2.1.4.1 Display

2.1.4.1.1 authoritysep Default: --

Asks: Separate multiple displayed authors, series or subjects with ____.

2.1.4.1.2 hide_marc Default: Display

Asks: ____ MARC tag numbers, subfield codes and indicators in MARC views.

Values:

- Display -- shows the tag numbers on the cataloging interface

A screenshot of a MARC cataloging interface. At the top, there are four tabs labeled 0, 1, 2, and 3. Tab 0 is selected. Below the tabs, the following MARC tags are displayed with their descriptive text and input fields:

- 000 - LEADER
- 005 - DATE AND TIME OF LA
- 006 - FIXED-LENGTH DATA E
- 007 - PHYSICAL DESCRIPTIC
- 008 - FIXED-LENGTH DATA E
- 020 - ISBN + -
- 024 - OTHER STAND/

- Don't display -- shows just descriptive text when cataloging

A screenshot of a MARC cataloging interface showing descriptive text for tags. At the top, there are five tabs labeled 0, 1, 2, 3, and 4. Tab 0 is selected. Below the tabs, the following descriptive text is displayed:

- LEADER
- DATE AND TIME OF LATEST TRANS,
- FIXED-LENGTH DATA ELEMENTS--A
- PHYSICAL DESCRIPTION FIXED FIE
- FIXED-LENGTH DATA ELEMENTS--G
- ISBN + -
- OTHER STANDARD IDENTIFIER + -

2.1.4.1.3 IntranetBiblioDefaultView Default: ISBD form

Asks: By default, display biblio records in ____

Values:

- ISBD form -- displays records in the staff client in the old card catalog format
 - See [ISBD](#) preference for more information

- Labelled MARC form -- displays records in the staff client in MARC with text labels to explain the different fields
- MARC form -- displays records in the staff client in MARC
- normal form -- visual display in the staff client (for the average person)

Description:

- This setting determines the bibliographic record display when searching the catalog on the staff client. This setting does not affect the display in the OPAC which is changed using the **BiblioDefaultView** preference under the OPAC preference tab. This setting changes the look of the record when first displayed. The MARC and ISBD views can still be seen by clicking in the sidebar.

2.1.4.1.4 ISBD Default: **MARC21 Default Appendix** or **UNIMARC Default Appendix**

Asks: Use the following as the ISBD template:

Description:

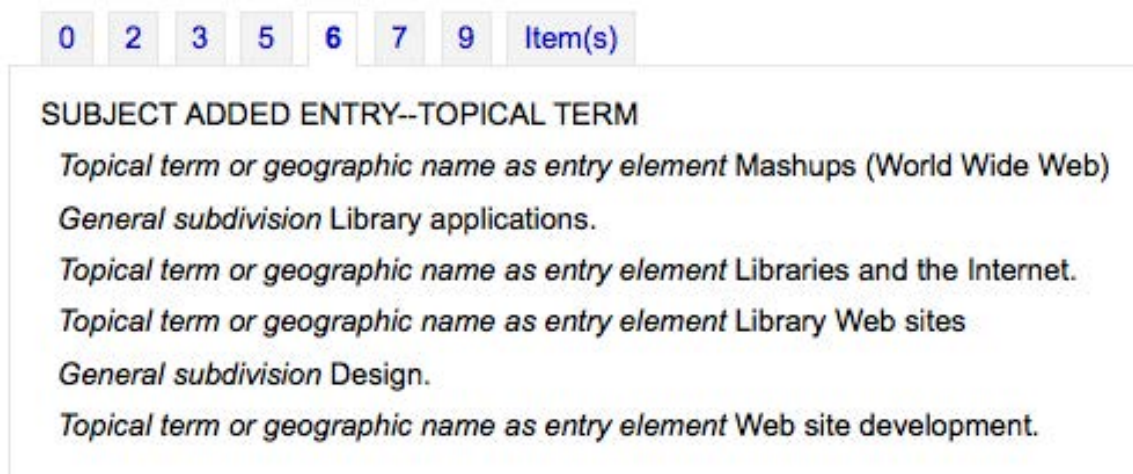

- This determines how the ISBD information will display. Elements in the list can be reordered to produce a different ISBD view. ISBD, the International Standard Bibliographic Description, was first introduced by IFLA (International Federation of Library Associations) in 1969 in order to provide guidelines for descriptive cataloging. The purpose of ISBD is to aid the international exchange of bibliographic records for a variety of materials.

2.1.4.1.5 LabelMARCView Default: Don't

Asks: ___ collapse repeated tags of the same type into one tag entry.

Values:

- Do -- will combine all identical tag numbers under one heading in the MARC view in the OPAC and Staff Client

- Don't -- will list all of the tags individually in the MARC view in the OPAC and Staff Client

0	2	3	5	6	7	9	Item(s)
---	---	---	---	---	---	---	---------

SUBJECT ADDED ENTRY--TOPICAL TERM
Topical term or geographic name as entry element Mashups (World Wide Web)
 General subdivision Library applications.

SUBJECT ADDED ENTRY--TOPICAL TERM
Topical term or geographic name as entry element Libraries and the Internet.

SUBJECT ADDED ENTRY--TOPICAL TERM
Topical term or geographic name as entry element Library Web sites
 General subdivision Design.

SUBJECT ADDED ENTRY--TOPICAL TERM
Topical term or geographic name as entry element Web site development.

2.1.4.1.6 OpacSuppression and OpacSuppressionByIPRange OpacSuppression Default: Don't hide

Asks: ___ items marked as suppressed from OPAC search results. Restrict the suppression to IP addresses outside of the IP range ___

OpacSuppression Values:

- Don't hide
 - Will show items in OPAC search results if they are marked suppressed
- Hide
 - Will not show items in OPAC search results if they're marked as suppressed

Description:

- These preferences control hiding of bib records from display in the OPAC. Each bib record you want to hide from the OPAC simply needs to have the 942\$n field set to 1. The indexer then hides it from display in OPAC but will still display it in the Staff Client. If you want to further control suppression you can set an IP address range to still show suppressed items to. Define a range like 192.168.. If you don't want to limit suppression in this way, leave the IP field blank.

TIP

An **authorized value** for 942\$n field should be set to eliminate errors. One example would be to create an authorized value titled SUPPRESS with a value of 0 for don't suppress and 1 for suppress.

IMPORTANT

If this preference is set to 'hide' and you have the 942n field set to 1, it will hide the entire bib record - not just an individual item.

IMPORTANT

You must have the Suppress index set up in Zebra and at least one suppressed item, or your searches will be broken.

2.1.4.1.7 URLLinkText Default: Online Resource

Asks: Show ___ as the text of links embedded in MARC records.

Description:

- If the 856 field does not have a subfield 3 or y defined, the OPAC will say 'Click here to access online.' If you would like the field to say something else enter that in this field.

2.1.4.1.8 UseControlNumber Default: Don't use

Asks: ___ record control number (\$w subfields) and control number (001) for linking of bibliographic records.

Values:

- Don't use
 - When clicking on links to titles that appear next to 'Continues' and 'Continued by' in the detail display Koha will perform a title search
- Use
 - When clicking on links to titles that appear next to 'Continues' and 'Continued by' in the detail display Koha will perform a control number (MARC field 001) search

IMPORTANT

Unless you are going in and manually changing 773\$w to match your rigorously-defined bibliographic relationships, you should set this preference to "Don't use" and instead set **EasyAnalyticalRecords** to "Display"

Description:

- If you have a serial called "Journal of Interesting Things" which has a separate record from when it was called "Transactions of the Interesting Stuff Society," you could add linking fields to indicate the relationship between the two records. UseControlNumber allows you to use your local accession numbers for those links. In MARC21, the relevant sections of the two records might look like this:

```
=001    12345
=110    2_ $aInteresting Stuff Society.
=245    10$aTransactions of the Interesting Stuff Society.
=785    00$aInteresting Stuff Society$tJournal of Interesting Things. ↔
        $w12346

=001    12346
=110    2_ $aInteresting Stuff Society.
=245    10$aJournal of Interesting Things.
=780    00$aInteresting Stuff Society$tTransactions of the Interesting ↔
        Stuff Society.$w12345
```

With UseControlNumber set to 'Use', the 78x links will use the Control Numbers is subfield \$w, instead of doing a title search on "Journal of Interesting Things" and "Transactions of the Interesting Stuff Society" respectively.

2.1.4.2 Interface

2.1.4.2.1 advancedMARCeditor Default: Don't display

Asks: ___ descriptions of fields and subfields in the MARC editor.

Description:

- This preference determines whether or not MARC field names will be present when editing or creating MARC records.

Values:

- Display

The screenshot shows a MARC editor interface with a row of buttons labeled 0 through 7. Below the buttons, the following field names are displayed:

- 000 - LEADER**
- 005 - DATE AND TIME OF LATEST TRANSACTION -**
- 006 - FIXED-LENGTH DATA ELEMENTS--ADDITIONAL MATERIAL CI**
- 007 - PHYSICAL DESCRIPTION FIXED FIELD--GENERAL INFORMA'**
- 008 - FIXED-LENGTH DATA ELEMENTS--GENERAL INFORMATION**

- Don't display

The screenshot shows a MARC editor interface with a row of buttons labeled 0 through 3. Below the buttons, the following field names are displayed:

- 000 -**
- 005 - -**
- 006 - + -**
- 007 - + -**
- 008 -**

2.1.4.2.2 DefaultClassificationSource Default: Dewey Decimal System

Asks: Use ___ as the default classification source.

Values:

- ANSCR (Sound Recordings)
- Dewey Decimal Classification
- Library of Congress Classification
- Other/Generic Classification Scheme
- SuDoc Classification (U.S. GPO)
- Universal Decimal Classification

2.1.4.2.3 EasyAnalyticalRecords Default: Don't Display

Asks: ___ easy ways to create analytical record relationships

Values:

- Display
- Don't Display

IMPORTANT

If you decide to use this feature you'll want to make sure that your **UseControlNumber** preference is set to "Don't use" or else the "Show analytics" links in the staff client and the OPAC will be broken.

Description:

- An analytic entry in a catalog is one that describes a part of a larger work that is also described in the catalog. In bibliographic cataloging, analytic entries may be made for chapters in books or special issues of articles in periodicals. In archival cataloging, analytic entries may be made for series or items within a collection. This feature in Koha allows for an easy way of linking analytic entries to the host records, and this system preference adds several new menu options to the staff cataloging detail pages to allow that to happen.

2.1.4.3 Record Structure

2.1.4.3.1 AlternateHoldingsField & AlternateHoldingsSeparator Asks: Display MARC subfield ___ as holdings information for records that do not have items, with the subfields separated by ___.

Description:

- Sometimes libraries migrate to Koha with their holding info in the 852 field (OCLC holdings information field) and choose not to transfer that information into the 952 (Koha holdings information field) because they don't plan on circulating those items. For those libraries or other libraries that have data in the 852 fields of their records that they want to display, these preferences let you choose to display holdings info from a field other than the 952 field. The AlternateHoldingsField preference can contain multiple subfields to look in; for instance 852abhi would look in 852 subfields a, b, h, and i.
- With AlternateHoldingsField set to 852abhi and AlternateHoldingsSeparator set to a space the holdings would look like the following:

2.1.4.3.2 autoBarcode Default: generated in the form <branchcode>yymm0001

Asks: Barcodes are ___

Values:

- generated in the form <branchcode>yymm0001
- generated in the form <year>-0001
- <year>-0002. generated in the form 1, 2, 3
- incremental EAN-13 barcodes

- not generated automatically

Description:

- This setting is for libraries wishing to generate barcodes from within Koha (as opposed to scanning in pre-printed barcodes or manually assigning them). The default behavior makes it so that when you click in the barcode field (952\$p in MARC21) it will populate with the automatic barcode you have chosen. If you would rather it only enter an automatic barcode when you click on the plugin (the ... to the right of the field) you can change the plugin used for that field in the framework. Set the plugin for 952\$p (if using MARC21 or equivalent field mapped to items.barcode in your local MARC format) for your frameworks to barcode_manual.pl instead of barcode.pl. Learn more about editing frameworks under the [MARC Bibliographic Frameworks](#) section of this manual.

2.1.4.3.3 DefaultLanguageField008 Asks: Fill in the default language for field 008 Range 35-37 ____.

Description:

- This preference will allow you to set the language for your 008 field by default. If this is left empty it will default to English (eng). See the [MARC Code List for Languages](#) for additional values for this preference.

2.1.4.3.4 item-level_itypes Default: specific item

Asks: Use the item type of the ____ as the authoritative item type (for determining circulation and fines rules, etc).

Values:

- biblio record
- specific item

Description:

- This preference determines whether the item type Koha uses for issuing rules will be an attribute of the bibliographic record or the item record. Most libraries refer to the item record for item types. It also determines if the item type icon appears on the OPAC search results. If you have the preference set to 'biblio record' then Koha displays the item type icon on the search results to the left of the result info.

The screenshot shows a search results page with a toolbar at the top containing 'Select All', 'Clear All', 'Highlight', 'Add to:', 'Save', 'Place Hold', and a 'Relevance' dropdown menu. Two search results are displayed:

1.  **The Tale of Peter Rabbit [electronic resource]**
by Potter, Beatrix . -- Project Gutenberg

Type:  Book; Format: available online 

Publisher: Salt Lake City : Project Gutenberg Literary Archive Foundation, 2005.

Online Access: [Click here to access a downloadable ebook.](#)

Availability: No copies available

Log in to add tags.

Actions:  Add to Cart
2.  **Harry Potter and the goblet of fire [sound recording]**
by Rowling, J. K ; Dale, Jim .

Type:  Sound; Literary form: fiction ; Audience: Juvenile;

Publisher: New York : Listening Library, p2000.

Online Access: [Contributor biographical information](#) | [Publisher description](#)

Availability: **Copies available for loan: Nicole's Library [SDB 62002] (1).**

Tags: [magic](#) (11) [wizards](#) (11)

Actions:  Place Hold  Add to Cart

2.1.4.3.5 itemcallnumber Default: 082ab

Asks: Map the MARC subfield to an item's callnumber.

TIP

This can contain multiple subfields to look in; for instance 082ab would look in 082 subfields a and b.

Description:

- This setting determines which MARC field will be used to determine the call number that will be entered into item records automatically (952\$o). The value is set by providing the MARC field code (050, 082, 090, 852 are all common) and the subfield codes without the delimiters (\$a, \$b would be ab).

Examples:

- Dewey: 082ab or 092ab; LOC: 050ab or 090ab; from the item record: 852hi

2.1.4.3.6 marcflavour Default: MARC21

Asks: Interpret and store MARC records in the ___ format.

Description:

- This preference defines global MARC style (MARC21 or UNIMARC) used for encoding. MARC21 is the standard style for the US, Canada and Britain. UNIMARC is a variation of MARC21 that is used in France, Italy, Russia, and many other countries.

Values:

- MARC21
- UNIMARC

2.1.4.3.7 MARCOrgCode Default: OST

Asks: Fill in the MARC organization code ___ by default in new MARC records (leave blank to disable).

Description:

- The MARC Organization Code is used to identify libraries with holdings of titles and more.

Learn more and find your library's code on the [MARC Code list for Organizations](#) or in Canada on the [Canadian Symbols Directory](#).

2.1.4.3.8 NewItemsDefaultLocation Asks: When items are created, give them the temporary location of ___ (should be a location code, or blank to disable).

2.1.4.3.9 PrefillItem Default: the new item is not prefilled with last created item values.

Asks: When a new item is added ___

Values:

- the new item is not prefilled with last created item values.
- the new item is prefilled with last created item values.

Description:

- This preference controls the behavior used when adding new items. Using the options here you can choose to have your next new item prefill with the values used in the last item was added to save time typing values or to have the item form appear completely blank. Using [SubfieldsToUseWhenPrefill](#) you can control specifically which fields are prefilled.

2.1.4.3.10 SubfieldsToUseWhenPrefill Asks: Define a list of subfields to use when prefilling items

IMPORTANT

Separate values with a space.

Description:

- When the **PrefillItem** preference is set to prefill item values with those from the last added item, this preference can control which fields are prefilled (and which are not). Enter a space separated list of fields that you would like to prefill when adding a new item.

2.1.4.3.11 z3950NormalizeAuthor & z3950AuthorAuthFields Defaults: Don't copy & 701,702,700

Asks: ___ authors from the UNIMARC ___ tags (separated by commas) to the correct author tags when importing a record using Z39.50.

Description for z3950NormalizeAuthor:

- This preference allows for 'Personal Name Authorities' to replace authors as the bibliographic authority. This preference should only be considered by libraries using UNIMARC.

Values for z3950NormalizeAuthor:

- Copy
- Don't copy

Description for z3950AuthorAuthFields:

- This preference defines which MARC fields will be used for 'Personal Name Authorities' to replace authors as the bibliographic authorities. This preference only applies to those using UNIMARC encoding. The MARC fields selected here will only be used if 'z3950NormalizeAuthor' is set to "Copy". The default field are 700, 701, and 702.

2.1.4.4 Spine Labels**2.1.4.4.1 SpineLabelAutoPrint** Default: don't

Asks: When using the quick spine label printer, ___ automatically pop up a print dialog.

Values:

- do
- don't

2.1.4.4.2 SpineLabelFormat Default: <itemcallnumber><copynumber>

Asks: Include the following fields on a quick-printed spine label: (Enter in columns from the biblio, biblioitems or items tables, surrounded by < and >.)

2.1.4.4.3 SpineLabelShowPrintOnBibDetails Default: Don't display

Asks: ___ buttons on the bib details page to print item spine labels.

Values:

- Display

Item type	Location	Collection	Call Number	Status	Last seen	Barcode	Publication Details	Spine Label
Books	Centerville General Stacks	Non Fiction	020.285/4678	Available	12/28/2009	898739894		Print Label

- Don't display

2.1.5 Circulation

Get there: More > Administration > Global System Preferences > Circulation

2.1.5.1 Checkin Policy

2.1.5.1.1 BlockReturnOfWithdrawnItems Default: Block

Asks: ___ returning of items that have been withdrawn.

Values:

- Block
- Don't block

Description:

- This preference controls whether and item with a withdrawn status (952\$0 in MARC21) can be checked in or not.

2.1.5.2 Checkout Policy

2.1.5.2.1 AgeRestrictionMarker Asks: Restrict patrons with the following target audience values from checking out inappropriate materials: ___

Description:

- This preference defines certain keywords that will trigger Koha to restrict checkout based on age. These restrictions can be overridden by the [AgeRestrictionOverride](#) preference. Enter in this field a series of keywords separated by bar (|) with no spaces. For example PG|R|E|EC|Age| will look for PG followed by an age number, R followed by an age number, Age followed by an age number, and so on. These values can appear in any MARC field, but Library of Congress recommends the 521\$a (Target Audience Note). Whatever field you decide to use you must map the word agerestriction in the biblioitems table to that field in the [Koha to MARC Mapping](#). When cataloging you can enter values like PG 13 or E 10 in the 521\$a and Koha will then notify circulation librarians that the material may not be recommended for the patron based on their age.

IMPORTANT

You must map the word agerestriction in the biblioitems table to the MARC field where this information will appear via the [Koha to MARC Mapping](#) administration area.

2.1.5.2.2 AgeRestrictionOverride Default: Don't allow

Asks: ___ staff to check out an item with age restriction.

Values:

- Allow

Please confirm checkout

- Age restriction PG 13. Check out anyway?
- The patron has a debt of 32.45

✓ Yes, Check Out (Y)

✗ No, Don't Check Out (N)

- Don't allow

- Age restriction PG 13.

Description:

- When the **AgeRestrictionMarker** preference is set, Koha will try to warn circulation librarians before checking out an item that might have an age restriction listed in the MARC record. This preference asks if you would like the staff to be able to still check out these items to patrons under the age limit.

2.1.5.2.3 AllFinesNeedOverride Default: Require

Asks: ___ staff to manually override all fines, even fines less than **noissuescharge**.

Values:

- Don't require
- Require

Description:

- This preference let's you decide if you want to always be warned that the patron has fines when checking out. If you have it set to 'Require' then no matter how much money the patron owes a message will pop up warning you that the patron owes money.

2.1.5.2.4 AllowFineOverride Default: Don't allow

Asks: ___ staff to manually override and check out items to patrons who have more than **noissuescharge** in fines.

Values:

- Allow
- Don't allow

Description:

- This preference lets you decide if you staff can check out to patrons who owe more money than you usually let them carry on their account. If set to 'Allow' staff will be warned that the patrons owes money, but it won't stop the staff from checking out to the patron.

2.1.5.2.5 AllowItemsOnHoldCheckout Default: Don't allow

Asks: ___ checkouts of items reserved to someone else. If allowed do not generate RESERVE_WAITING and RESERVED warning. This allows self checkouts for those items.

Values:

- Allow
- Don't allow

IMPORTANT

This system preference relates only to SIP based self checkout, not Koha's web based self checkout.

Description:

- When this preference is set to 'Allow' patrons will be able to use your external self check machine to check out a book to themselves even if it's on hold for someone else. If you would like Koha to prevent people from checking out books that are on hold for someone else set this preference to "Don't allow."

2.1.5.2.6 AllowNotForLoanOverride Default: Allow

Asks: ___ staff to override and check out items that are marked as not for loan.

Values:

- Allow
- Don't allow

Description:

- This parameter is a binary setting which controls the ability of staff (patrons will always be prevented from checking these items out) to check out items that are marked as "not for loan". Setting it to "Allow" would allow such items to be checked out, setting it to "Don't allow" would prevent this. This setting determines whether items meant to stay in the library, such as reference materials, and other library resources can be checked out by patrons.

2.1.5.2.7 AllowRenewalLimitOverride Default: Allow

Asks: ___ staff to manually override the renewal limit and renew a checkout when it would go over the renewal limit.

Values:

- Allow
- Don't allow

Description:

- This preference is a binary setting which controls the ability of staff to override the limits placed on the number of times an item can be renewed. Setting it to "Allow" would allow such limits to be overridden, setting it to "Don't allow" would prevent this. This is a preference in which if it is set to "allow" it would allow the library staff to use their judgment for overriding the renew limit for special cases, setting it to "Don't allow" prevents an opportunity for abuse by the library staff.

2.1.5.2.8 AllowReturnToBranch Default: to any library

Asks: Allow materials to be returned to ___

Values:

- either the library the item is from or the library it was checked out from.
- only the library the item is from.
- only the library the item was checked out from.
- to any library.

Description:

- This preference lets the library system decide how they will accept returns. Some systems allow for items to be returned to any library in the system (the default value of this preference) others want to limit item returns to only specific branches. This preference will allow you to limit item returns (checkins) to the branch(es) set in the value.

2.1.5.2.9 AutomaticItemReturn Default: Do

Asks: ___ automatically transfer items to their home branch when they are returned.

Values:

- Do
- Don't

Description:

- This preference is a binary setting which determines whether an item is returned to its home branch automatically or not. If set to "Don't", the staff member checking an item in at a location other than the item's home branch will be asked whether the item will remain at the non-home branch (in which case the new location will be marked as a holding location) or returned. Setting it to "Do" will ensure that items checked in at a branch other than their home branch will be sent to that home branch.

2.1.5.2.10 CircControl Default: the library the item is from

Asks: Use the checkout and fines rules of ____

Values:

- the library the item is from
 - The **circulation and fines policies** will be determined by the library that owns the item
- the library the patron is from
 - The **circulation and fines policies** will be determined the patron's home library
- the library you are logged in at
 - The **circulation and fines policies** will be determined by the library that checked the item out to the patron

2.1.5.2.11 HomeOrHoldingBranch Default: the library the item was checked out from

Asks: Use the checkout and fines rules of ____

Values:

- the library the item is from
- the library the item was checked out from

IMPORTANT

It is not recommend that this setting be changed after initial setup of Koha because it will change the behavior of items already checked out.

Description:

- If **IndependantBranches** is set to 'Prevent' and **CircControl** is set to 'the library the item is from' this preference decides whether the library holding the item (holding library on the item record) may check the item out to its own patron or if it must immediately send the item back to the owning location (home library on the item record).

IMPORTANT

This preference does nothing unless the **IndependantBranches** preference is set to 'Prevent'.

2.1.5.2.12 HomeOrHoldingBranchReturn Default: the library the item is from

Asks: On checkin route the returned item to ____

Values:

- the library the item is from
- the library item was checked out from

Description:

- This preference will control where Koha prompts you to return the checked in item to. The value in this preference is overridden by any values you have related to item returns and floating collections in the **Circulation and Fine Rules**.

2.1.5.2.13 InProcessingToShelvingCart Default: Don't move

Asks: ___ items that have the location PROC to the location CART when they are checked in.

Values:

- Don't move
- Move

2.1.5.2.14 IssuingInProgress Default: Don't prevent

Asks: ___ patrons from checking out an item whose rental charge would take them over the limit.

Values:

- Don't prevent
- Prevent

Description:

- This preference determines if a patron can check items out if there is an overdue fine on the account and any of the materials the patron wishes to check out will potentially tip the account balance over the maximum fines policy the library has in place.

Example: Your library has a \$5 limit set for 'fines' (ie, after incurring \$5 in fines, a patron can no longer check out items). A patron comes to the desk with 5 items to check out (4 books and a video) The patron has \$4 in charges already on their account. One of the videos has a rental charge of \$1, therefore making the total fines on the patron's account suddenly \$5 (the limit).

2.1.5.2.15 IssueLostItem Default: display a message

Asks: When issuing an item that has been marked as lost, ___.

Values:

- display a message

This item has been lost with a status of "Lost".

- do nothing
 - This option will just check the item out without notifying you that the item was marked lost.
- require confirmation

Please confirm checkout

- This item has been lost with a status of "Lost". Check out anyway?

✓ Yes, Check Out (Y)

✗ No, Don't Check Out (N)

Description:

- This preference lets you define how library staff are notified that an item with a lost status is being checked out. This will help staff mark items as 'available' if you choose to 'display a message' or 'require confirmation.' If you choose to 'do nothing,' there will be no notification that the item being checked out is marked as 'lost.'

2.1.5.2.16 maxoutstanding Default: 5

Asks: Prevent patrons from making holds on the OPAC if they owe more than ___ USD in fines.

2.1.5.2.17 noissuescharge Default: 5

Asks: Prevent patrons from checking out books if they have more than ___ USD in fines.

Description:

- This preference is the maximum amount of money owed to the library before the user is banned from borrowing more items. This also coincides with **maxoutstanding** that limits patrons from placing holds when the maximum amount is owed to the library.

2.1.5.2.18 OverduesBlockCirc Default: Ask for confirmation

Asks: ___ when checking out to a borrower that has overdues outstanding

Values:

- Ask for confirmation
 - Will not let you check an item out to patrons with overdues until a librarian confirms that it is okay
- Block
 - Block all patrons with overdue items from being able to check out
- Don't block
 - Allow all patrons with overdue items to continue to check out

2.1.5.2.19 OverdueNoticeBcc Asks: Send all notices as a BCC to this email address ___

This preference makes it so that a librarian can get a copy of every notice sent out to patrons.

TIP

If you'd like more than one person to receive the blind copy you can simply enter in multiple email addresses separated by commas.

TIP

The name of this preference is misleading, it does not only send overdues, but all notices to the BCC address.

2.1.5.2.20 PrintNoticesMaxLines Asks: Include up to ___ item lines in a printed overdue notice.

NOTE

If the number of items is greater than this number, the notice will end with a warning asking the borrower to check their online account for a full list of overdue items.

TIP

Set to 0 to include all overdue items in the notice, no matter how many there are.

IMPORTANT

This preference only refers to the print notices, not those sent via email.

2.1.5.2.21 **RenewalPeriodBase** Default: the old due date of the checkout

Asks: When renewing checkouts, base the new due date on ____

Values:

- the old due date of the checkout
- the current date

2.1.5.2.22 **ReturnBeforeExpiry** Default: Don't require

Asks: ____ patrons to return books before their accounts expire (by restricting due dates to before the patron's expiration date).

Values:

- Don't require
- Require

Description:

- This is preference may prevent a patron from having items checked out after their library card has expired. If this is set to "Require", then a due date of any checked out item can not be set for a date which falls after the patron's card expiration. If the setting is left "Don't require" then item check out dates may exceed the expiration date for the patron's library card.

2.1.5.2.23 **ReturnToShelvingCart** Default: Don't move

Asks: ____ all items to the location CART when they are checked in.

Values:

- Don't move
- Move

2.1.5.2.24 **TransfersMaxDaysWarning** Default: 3

Asks: Show a warning on the "Transfers to Receive" screen if the transfer has not been received ____ days after it is sent.

Description:

- The TransferMaxDaysWarning preference is set at a default number of days. This preference allows for a warning to appear after a set amount of time if an item being transferred between library branches has not been received. The warning will appear in the **Transfers to Receive** report.

2.1.5.2.25 **UseBranchTransferLimits & BranchTransferLimitsType** Defaults: Don't enforce & collection code

Asks: ____ branch transfer limits based on ____

UseBranchTransferLimits Values:

- Don't enforce
- Enforce

BranchTransferLimitsType Values:

- collection code

- item type

BranchTransferLimitsType Description:

- This parameter is a binary setting which determines whether items are transferred according to item type or collection code. This value determines how the library manager is able to restrict what items can be transferred between the branches.

2.1.5.2.26 useDaysMode Default: Don't include

Asks: Calculate the due date using ____.

Values:

- circulation rules only.
- the calendar to push the due date to the next open day.
- the calendar to skip all days the library is closed.

Description:

- This preference controls how scheduled library closures affect the due date of a material. The 'the calendar to skip all days the library is closed' setting allows for a scheduled closure not to count as a day in the loan period, the 'circulation rules only' setting would not consider the scheduled closure at all, and 'the calendar to push the due date to the next open day' would only effect the due date if the day the item is due would fall specifically on the day of closure.

Example:

- The library has put December 24th and 25th in as closures on the calendar. A book checked out by a patron has a due date of December 25th according to the circulation and fine rules. If this preference is set to 'circulation rules only' then the item will remain due on the 25th. If the preference is set to 'the calendar to push the due date to the next open day' then the due date will be December 26th. If the preference is set to 'the calendar to skip all days the library is closed' then the due date will be pushed to the 27th of December to accommodate for the two closed days.

The calendar is defined on a branch by branch basis. To learn more about the calendar, check out the '[Calendar & Holidays](#)' section of this manual.

2.1.5.2.27 UseTransportCostMatrix Default: Don't use

Asks: ____ Transport Cost Matrix for calculating optimal holds filling between branches.

Values:

- Don't use
- Use

Description:

- If the system is configured to use the [Transport cost matrix](#) for filling holds, then when attempting to fill a hold, the system will search for the lowest cost branch, and attempt to fill the hold with an item from that branch first. Branches of equal cost will be selected from randomly. The branch or branches of the next highest cost shall be selected from only if all the branches in the previous group are unable to fill the hold.

The system will use the item's current holding branch when determining whether the item can fulfill a hold using the Transport Cost Matrix. This behaviour will be overruled if the [AutomaticItem-Return](#) system preference is enabled.

2.1.5.3 Fines Policy

2.1.5.3.1 **finesModuleCalendar** Default: not including the days the library is closed

Asks: Calculate fines based on days overdue ____

Values:

- directly
- not including the days the library is closed

Description:

- This preference will determine whether or not fines will be accrued during instances when the library is closed. Examples include holidays, library in-service days, etc. Choosing "not including the days the library is closed" setting will enable Koha to access its **Calendar** module and be considerate of dates when the library is closed. To make use of this setting the administrator must first access Koha's calendar and mark certain days as "holidays" ahead of time.

The calendar is defined on a branch by branch basis. To learn more about the calendar, check out the '**Calendar & Holidays**' section of this manual.

2.1.5.3.2 **finesModuleMode** Default: Calculate (but only for mailing to the admin)

Asks: ____ fines

Values:

- Calculate (but only for mailing to the admin)
- Calculate and charge
- Don't calculate

IMPORTANT

Requires that you have the fines cron job running (misc/cronjobs/fines.pl)

2.1.5.4 Holds Policy

2.1.5.4.1 **AllowHoldDateInFuture** Default: Allow

Asks: ____ hold requests to be placed that do not enter the waiting list until a certain future date.

Values:

- Allow
- Don't allow

2.1.5.4.2 **AllowHoldsOnDamagedItems** Default: Allow

Asks: ____ hold requests to be placed on damaged items.

Values:

- Allow
- Don't allow

Description:

- This parameter is a binary setting which controls whether or not hold requests can be placed on items that are marked as "damaged" (items are marked as damaged by editing subfield 4 on the item record). Setting this value to "Don't allow" will prevent anyone from placing a hold on such items, setting it to "Allow" will allow it. This preference is important because it determines whether or not a patron can place a request for an item that might be in the process of being repaired or not in good condition. The library may wish to set this to "Don't allow" if they were concerned about their patrons not receiving the item in a timely manner or at all (if it is determined that the item is beyond repair). Setting it to "Allow" would allow a patron to place a hold on an item and therefore receive it as soon as it becomes available.

2.1.5.4.3 AllowHoldPolicyOverride Default: Allow

Asks: ___ staff to override hold policies when placing holds.

Values:

- Allow
- Don't allow

Description:

- This preference is a binary setting which controls whether or not the library staff can override the circulation and fines rules as they pertain to the placement of holds. Setting this value to "Don't allow" will prevent anyone from overriding, setting it to "Allow" will allow it. This setting is important because it determines how strict the libraries rules for placing holds are. If this is set to "Allow", exceptions can be made for patrons who are otherwise normally in good standing with the library, but there is opportunity for the staff to abuse this function. If it is set to "Don't allow", no abuse of the system is possible, but it makes the system entirely inflexible in respect to holds.

2.1.5.4.4 AllowOnShelfHolds Default: Allow

Asks: ___ hold requests to be placed on items that are not checked out.

Values:

- Allow
- Don't Allow

Description:

- This preference is a binary setting which controls the ability of patrons to place holds on items that are not currently checked out. Setting it to "Don't allow" allows borrowers to place holds on items that are checked out but not on items that are on the shelf (or assumed available in the library), setting it to "Allow" allows borrowers to place holds on any item that is available for loan whether it is checked out or not. This setting might be set to "Allow" if the library system is a multi branch system and patrons used the hold system to request items from other libraries, or if the library wanted to allow users to place holds on items from home through the OPAC. Setting it to "Don't allow" would enforce a first come, first served standard.

2.1.5.4.5 AutoResumeSuspendedHolds Default: Allow

Asks: ___ suspended holds to be automatically resumed by a set date.

Values:

- Allow
- Don't allow

Description:

- If this preference is set to 'Allow' then all suspended holds will be able to have a date at after which they automatically become unsuspended. If you have this preference set to 'Allow' you will also need the **Unsuspend Holds** cron job running.

IMPORTANT

The holds will become unsuspending the date after that entered by the patron.

2.1.5.4.6 `canreservefromotherbranches` Default: Allow

Asks: ___ a user from one library to place a hold on an item from another library

Description:

- This preference is a binary setting which determines whether patrons can place holds on items from other branches. If the preference is set to "Allow" patrons can place such holds, if it is set to "Don't allow" they cannot. This is an important setting because it determines if users can use Koha to request items from another branch. If the library is sharing an installation of Koha with other independent libraries which do not wish to allow interlibrary borrowing it is recommended that this parameter be set to "Don't allow".

Values:

- Allow
- Don't allow (with **independent branches**)

2.1.5.4.7 `decreaseLoanHighHolds`, `decreaseLoanHighHoldsDuration` and `decreaseLoanHighHoldsValue`

Asks: ___ the reduction of loan period to ___ days for items with more than ___ holds.

`decreaseLoanHighHolds` default: Don't enable

`decreaseLoanHighHolds` values: Don't enable

- Enable

Description:

- These preferences let you change the loan length for items that have many holds on them. This will not effect items that are already checked out, but items that are checked out after the `decreaseLoanHighHoldsValue` is met will only be checked out for the number of days entered in the `decreaseLoanHighHoldsDuration` preference.

Please confirm checkout

- High demand item. Loan period shortened to 2 days (due 10/13/2012 00:00). Check out anyway?

✓ Yes, Check Out (Y)

✗ No, Don't Check Out (N)

2.1.5.4.8 `DisplayMultiPlaceHold` Default: Don't enable

Asks: ___ the ability to place holds on multiple biblio from the search results

Values:

- Don't enable
- Enable

2.1.5.4.9 `emailLibrarianWhenHoldIsPlaced` Default: Don't enable

Asks: ___ sending an email to the Koha administrator email address whenever a hold request is placed.

Values:

- Don't enable

- Enable

Description:

- This preference enables Koha to email the library staff whenever a patron requests an item to be held. While this function will immediately alert the librarian to the patron's need, it is extremely impractical in most library settings. In most libraries the hold lists are monitored and maintained from a separate interface. That said, many libraries that allow on shelf holds prefer to have this preference turned on so that they are alerted to pull an item from the shelf.

IMPORTANT

In order for this email to send you must have a **notice** template with the code of HOLD-SPLACED

IMPORTANT

This notice will only be sent if the **process_message_queue.pl cronjob** being run periodically to send the messages.

2.1.5.4.10 ExpireReservesMaxPickUpDelay Default: Don't allow

Asks: ___ holds to expire automatically if they have not been picked by within the time period specified in **ReservesMaxPickUpDelay**

Values:

- Allow
- Don't allow

Description:

- If set to 'allow' this will cancel holds that have been waiting for longer than the number of days specified in the **ReservesMaxPickUpDelay** system preference. Holds will only be cancelled if the **Expire Holds cron job** is running.

2.1.5.4.11 ExpireReservesMaxPickUpDelayCharge Default: 0

Asks: If using **ExpireReservesMaxPickUpDelay**, charge a borrower who allows his or her waiting hold to expire a fee of ___ USD

Description:

- If you are expiring holds that have been waiting too long you can use this preference to charge the patron for not picking up their hold. If you don't charge patrons for items that aren't picked up you can leave this set to the default which is 0. Holds will only be cancelled and charged if the **Expire Holds cron job** is running.

2.1.5.4.12 maxreserves Default: 50

Asks: Patrons can only have ___ holds at once.

2.1.5.4.13 OPACAllowHoldDateInFuture Default: Allow

Asks: ___ patrons to place holds that don't enter the waiting list until a certain future date.

Values:

- Allow
 - **AllowHoldDateInFuture** must also be enabled for this to work
- Don't allow

2.1.5.4.14 OPACAllowUserToChooseBranch Default: Allow

Asks: ___ a user to choose the branch to pick up a hold from.

Values:

- Allow
- Don't allow

Description:

- Changing this preference will not prevent staff from being able to transfer titles from one branch to another to fill a hold, it will only prevent patrons from saying they plan on picking a book up at a branch other than their home branch.

2.1.5.4.15 ReservesControlBranch Default: item's home library

Asks: Check the ___ to see if the patron can place a hold on the item.

Values:

- item's home library.
- patron's home library.

2.1.5.4.16 ReservesMaxPickUpDelay Default: 7

Asks: Mark a hold as problematic if it has been waiting for more than ___ days.

Description:

- This preference (based on calendar days, not the **Koha holiday calendar**) puts an expiration date on an item a patron has on hold. After this expiration date the staff will have the option to release the unclaimed hold which then may be returned to the library shelf or issued to the next patron on the item's hold list. Items that are 'expired' by this preference are moved to the 'Holds Over' tab on the **'Holds Awaiting Pickup'** report.

2.1.5.4.17 ReservesNeedReturns Default: Don't automatically

Asks: ___ mark holds as found and waiting when a hold is placed specifically on them and they are already checked in.

Values:

- Automatically
- Don't automatically

Description:

- This preference refers to 'item specific' holds where the item is currently on the library shelf. This preference allows a library to decide whether an 'item specific' hold is marked as "Waiting" at the time the hold is placed or if the item will be marked as "Waiting" after the item is checked in. This preference will tell the patron that their item is 'Waiting' for them at their library and ready for check out.

2.1.5.4.18 StaticHoldsQueueWeight & RandomizeHoldsQueueWeight StaticHoldsQueueWeight Default: 0

RandomizeHoldsQueueWeight Default: in that order

Asks: Satisfy holds from the libraries ___ (as branchcodes, separated by commas; if empty, uses all libraries) ___

RandomizeHoldsQueueWeight Values:

- in random order
 - If StaticHoldsQueueWeight is left at the default Koha will randomize all libraries, otherwise it will randomize the libraries listed.
- in that order

- If `StaticHoldsQueueWeight` is left at the default then this will use all of your branches in alphabetical order, otherwise it will use the branches in the order that you entered them in the `StaticHoldsQueueWeight` preference.

Descriptions:

- These preferences control how the **Holds Queue report** is generated using a **cron job**.

If you do not want all of your libraries to participate in the on-shelf holds fulfillment process, you should list the libraries that *do* participate in the process here by inputting all the participating library's branchcodes, separated by commas (e.g. "MPL,CPL,SPL,BML" etc.).

By default, the holds queue will be generated such that the system will first attempt to hold fulfillment using items already at the pickup library if possible. If there are no items available at the pickup library to fill a hold, `build_holds_queue.pl` will then use the list of libraries defined in `StaticHoldsQueueWeight`. If `RandomizeHoldsQueueWeight` is disabled (which it is by default), the script will assign fulfillment requests in the order the branches are placed in the `StaticHoldsQueueWeight` system preference.

For example, if your system has three libraries, of varying sizes (small, medium and large) and you want the burden of holds fulfillment to be on larger libraries before smaller libraries, you would want `StaticHoldsQueueWeight` to look something like "LRG,MED,SML".

If you want the burden of holds fulfillment to be spread out equally throughout your library system, simply enable `RandomizeHoldsQueueWeight`. When this system preference is enabled, the order in which libraries will be requested to fulfill an on-shelf hold will be randomized each time the list is regenerated.

Leaving `StaticHoldsQueueWeight` empty is contraindicated at this time. Doing so will cause the `build_holds_queue` script to ignore `RandomizeHoldsQueueWeight`, causing the script to request hold fulfillment not randomly, but by alphabetical order.

IMPORTANT

The **Transport Cost Matrix** takes precedence in controlling where holds are filled from, if the matrix is not used then Koha checks the `StaticHoldsQueueWeight`. To use the **Transport Cost Matrix** simply set your `UseTransportCostMatrix` preference to 'Use'

2.1.5.4.19 SuspendHoldsIntranet Default: Allow

Asks: ___ holds to be suspended from the intranet.

Values:

- Allow
- Don't allow

Description:

- The holds suspension feature can be turned on and off in the staff client by altering this system preference. If this is set to 'allow' you will want to set the **AutoResumeSuspendedHolds** system preference.

2.1.5.4.20 SuspendHoldsOpac Default: Allow

Asks: ___ holds to be suspended from the OPAC.

Values:

- Allow
- Don't allow

Description:

- The holds suspension feature can be turned on and off in the OPAC by altering this system preference. If this is set to 'allow' you will want to set the **AutoResumeSuspendedHolds** system preference.

2.1.5.5 Interface

2.1.5.5.1 AllowAllMessageDeletion Default: Don't allow

Asks: ___ staff to delete messages added from other libraries.

Values:

- Allow
- Don't allow

2.1.5.5.2 CircAutocompl Default: Try

Asks: ___ to automatically fill in the member when entering a patron search on the circulation screen.

Description:

- This preference is a binary setting which determines whether auto-completion of fields is enabled or disabled for the circulation input field. Setting it to "Try" would enable a staff member to begin typing a name or other value into the field and have a menu pop up with suggestions for completing it. Setting it to "Don't try" would disable this feature. This preference can make staff members' jobs easier or it could potentially slow down the page loading process.

Values:

- Don't try
- Try

2.1.5.5.3 CircAutoPrintQuickSlip Default: open a print quick slip window

Asks: When an empty barcode field is submitted in circulation ___

Values:

- clear the screen
- open a print quick slip window

Description:

- If this preference is set to open a quick slip for printing it will eliminate the need for the librarian to click the print button to generate a checkout receipt for the patron they're checking out to. If the preference is set to clear the screen then "checking out" an empty barcode will clear the screen of the patron you were last working with.

2.1.5.5.4 FilterBeforeOverdueReport Default: Don't require

Asks: ___ staff to choose which checkouts to show before running the overdues report.

Description:

- Koha's overdue report shows you all of the overdue items in your library system. If you have a large library system you'll want to set this preference to 'Require' to force those running the report to first limit the data generated to a branch, date range, patron category or other such filter. Requiring that the report be filtered before it's run prevents your staff from running a system heavy report and slowing down other operations in the system.

Filter On:

Date due:

From:
 

To:
 

Name or cardnumber:

Patron category:

Patron flags:

Driver's License:

Home Branch:

Item type:

Library of the patron:

Sort By:

Show any items currently checked out:

Values:

- Don't require
- Require

2.1.5.5.5 FineNotifyAtCheckin Default: Don't notify

Asks: ___ librarians of overdue fines on the items they are checking in.

Values:

- Don't notify

- Notify

Description:

- With this preference set to 'Notify' all books that have overdue fines owed on them will pop up a warning when checking them in. This warning will need to be acknowledged before you can continue checking items in. With this preference set to 'Don't notify,' you will still see fines owed on the patron record, you just won't have an additional notification at check in.

2.1.5.5.6 DisplayClearScreenButton Default: Show

Asks: ___ a button to clear the current patron from the screen on the circulation screen.

Values:

- Don't show

Checking out to Nicole Engard (9876543457)
 Enter item barcode:

 Specify due date (MM/DD/YYYY):
 Remember for session:

- Show

Checking out to Nicole Engard (9876543457)
 Enter item barcode:

 Specify due date (MM/DD/YYYY):
 Remember for session:

2.1.5.5.7 ExportRemoveFields Asks: The following fields should be excluded from the patron check-out history CSV or iso2709 export ___

Description:

- This space separated list of fields (e.g. 100a 245b) will automatically be excluded when exporting the patron's current checkout history.

1 Checkout(s) 5 Hold(s)

Due date	Title	Item type	Checked out on	Checked out from	Call no	Charge	Price	Renew select all none	Check in select all none	Export select all none	
Previous checkouts											
09/12/2012 23:59	Harry Potter and the deathly hallows, by Rowling, J. K. 2345043236	Book on CD	08/23/2012 11:37	Nicole's Library	PZ7.R79835 Hajd 2007b	0.00		1 <input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Totals:							89.00	0.00	Renewal due date: <input type="text"/>		
Forgive fines on return: <input type="checkbox"/>											

Override renewal limit: Renew or Return checked items Renew all

Don't export fields : 100a Export checkouts

2.1.5.5.8 ExportWithCsvProfile Asks: Use the ___ CSV profile when exporting patron checkout history

Description:

- Use this preference to define which **CSV profile** should be used when exporting patron's current checkout data. Enter the CSV Profile name as the value for this preference. If this preference is left blank you will not be able to export the patron's current checkout summary.

Override renewal limit: Renew or Return checked items

Don't export fields : 100a

Export checkouts

ISO2709 with items

ISO2709 without items

CSV

2.1.5.5.9 HoldsToPullStartDate Default: 2

Asks: Set the default start date for the Holds to pull list to ___ day(s) ago.

Description:

- The **Holds to Pull** report in circulation defaults to filtering holds placed 2 days ago. This preference allows you to set this default filter to any number of days.

2.1.5.5.10 itemBarcodeInputFilter Default: Don't filter

Asks: ___ scanned patron barcodes.

Values:

- Convert from CueCat format
- Convert from Libsuite8 form
- Don't filter
- EAN-13 or zero-padded UPC-A from
- Remove spaces from
- Remove the first number from T-prefix style
 - This format is common among those libraries migrating from Follett systems

2.1.5.5.11 NoticeCSS Asks: Include the stylesheet at ___ on Notices.

IMPORTANT

This should be a complete URL, starting with http://

Description:

- If you would like to style your notices with a consistent set of fonts and colors you can use this preference to point Koha to a stylesheet specifically for your notices.

2.1.5.5.12 numReturnedItemsToShow Default: 20

Asks : Show the ___ last returned items on the checkin screen.

2.1.5.5.13 previousIssuesDefaultSortOrder Default: earliest to latest

Asks: Sort previous checkouts on the circulation page from ___ due date.

Values:

- earliest to latest
- latest to earliest

2.1.5.5.14 RecordLocalUseOnReturn Default: Don't record

Asks: ___ local use when an unissued item is checked in.

Values:

- Don't record
- Record

Description:

- When this preference is set to "Don't record" you can record local use of items by checking items out to the statistical patron. With this preference set to "Record" you can record local use by checking out to the statistical patron and/or by checking in a book that is not currently checked out.

2.1.5.5.15 soundon Default: Don't enable

Asks: ___ circulation sounds during checkin and checkout in the staff interface.

Values:

- Don't enable
- Enable

IMPORTANT

This feature is not supported by all browsers. Requires an HTML5 compliant browser.

2.1.5.5.16 SpecifyDueDate Default: Allow

Asks: ___ staff to specify a due date for a checkout.

Due dates are calculated using your circulation and fines rules, but staff can override that if you allow them to specify a due date at checkout.

Description:

- This preference allows for circulation staff to change a due date from the automatic due date to another calendar date. This option would be used for circumstances in which the due date may need to be decreased or extended in a specific circumstance. The "Allow" setting would allow for this option to be utilized by staff, the "Don't allow" setting would bar staff from changing the due date on materials.

Values:

- Allow

- Don't allow

2.1.5.5.17 todaysIssuesDefaultSortOrder Default: latest to earliest

Asks: Sort today's checkouts on the circulation page from ___ due date.

Values:

- earliest to latest
- latest to earliest

2.1.5.5.18 UpdateTotalIssuesOnCirc Default: Do not

Asks: ___ update a bibliographic record's total issues count whenever an item is issued

Values:

- Do

IMPORTANT

This increases server load significantly; if performance is a concern, use the **cron job** to update the total issues count instead.

- Do not

Description:

- Koha can track the number of times and item is checked out and store that on the item record in the database. This information is not stored by default. Setting this preference to 'Do' will tell Koha to track that info everytime the item is checked out in real time. Otherwise you could use the **cron job** to have Koha update that field nightly.

2.1.5.5.19 UseTablesortForCirc Default: Don't enable

Asks: ___ the sorting of current patron checkouts on the circulation screen.

Values:

- Don't enable
- Enable

IMPORTANT

Enabling this function may slow down circulation time for patrons with many checkouts.

2.1.5.5.20 WaitingNotifyAtCheckin Default: Don't notify

Asks: ___ librarians of waiting holds for the patron whose items they are checking in.

Values:

- Don't notify
- Notify

Dorothy Gale has 1 hold(s) waiting for pickup.
[Check out to this patron.](#)

Checked-In items

Due Date	Title	Author	Barcode	Shelving Location	Call Number	Type	Patron	Note
08/06/2011	All through the night /	Bunn, T. Davis,	3100000013110	Processing Center	AF Bunn	CIRC AF	Gale, Dorothy (J)	

Description:

- When checking in books you can choose whether or not to have a notice pop up if the patron who returned the book has a hold waiting for pick up. If you choose 'Notify' for WaitingNotifyAtCheckin then every time a hold is found for the patron who had the book out last a message will appear on your check in screen.

2.1.5.6 Self Checkout

2.1.5.6.1 AllowSelfCheckReturns Default: Don't allow

Asks: ___ patrons to return items through web-based self checkout system.

Values:

- Allow
- Don't allow

Description:

- This preference is used to determine if you want patrons to be allowed to return items through your self check machines. By default Koha's self check interface is simply for checking items out.

2.1.5.6.2 AutoSelfCheckAllowed, AutoSelfCheckID & AutoSelfCheckPass

IMPORTANT

Most libraries will want to leave this set to 'Don't allow.' This preference turns off the requirement to log into the self checkout machine with a staff username and password by storing the username and password for automatic login.

AutoSelfCheckAllowed Default: Don't allow

Asks: ___ the web-based self checkout system to automatically login with this staff login ___ and this password ___ .

AutoSelfCheckAllowed Values:

- Allow
- Don't allow

AutoSelfCheckID Value:

- The username of a staff patron with 'circulate' **permissions**.

AutoSelfCheckPass Value:

- The password of a staff patron with 'circulate' **permissions**.

2.1.5.6.3 SelfCheckHelpMessage Asks: Include the following HTML in the Help page of the web-based self checkout system

Description:

- Clicking the 'Help' link in the top right of the self checkout interface opens up a three step process for using the self check interface. Adding HTML to this system preference will print that additional help text above what's already included.

2.1.5.6.4 SelfCheckoutByLogin Default: Barcode

Asks: Have patrons login into the web-based self checkout system with their ___

Values:

- Barcode

Nicole's Library Self Checkout System

Self Checkout

Please enter your card number:

© Nicole C. Engard
[Home](#) | [Contact](#) | [Privacy](#)

- Username and password

Nicole's Library Self Checkout System

Self Checkout

Please login with your username and password

Username: Password:

Description:

- This preference lets you decide how your patrons will log in to the self checkout machine. Barcode is the patron's card number and their username and password is set using the opac/staff username and password fields on the patron record.

2.1.5.6.5 SelfCheckTimeout Default: 120

Asks: Time out the current patron's web-based self checkout system login after ___ seconds.

Description:

- After the machine is idle for the time entered in this preference the self check out system will log out the current patron and return to the starting screen.

2.1.5.6.6 ShowPatronImageInWebBasedSelfCheck Default: Don't show

Asks: ___ the patron's picture (if one has been added) when they use the web-based self checkout.

Values:

- Don't show
- Show

2.1.5.6.7 WebBasedSelfCheck Default: Don't enable

Asks: ___ the web-based self checkout system.

Values:

- Don't enable
- Enable

Enabling this preference will allow access to the **self checkout** module in Koha.

2.1.6 Creators

These preferences have to do with creating content.

Get there: More > Administration > Global System Preferences > Creators

2.1.6.1 Patron Cards

These preferences are in reference to the **Patron Card Creator** tool.

2.1.6.1.1 ImageLimit Asks: Limit the number of creator images stored in the database to ___ images.

2.1.7 Enhanced Content

Get there: More > Administration > Global System Preferences > Enhanced Content

IMPORTANT

Always read the terms of service associated with external data sources to be sure that you are using the products within the allowed limits.

TIP

You cannot have more than one service for cover images (including local cover images) set up. If you set up more than one you will get multiple cover images. Instead choose only one source for cover images.

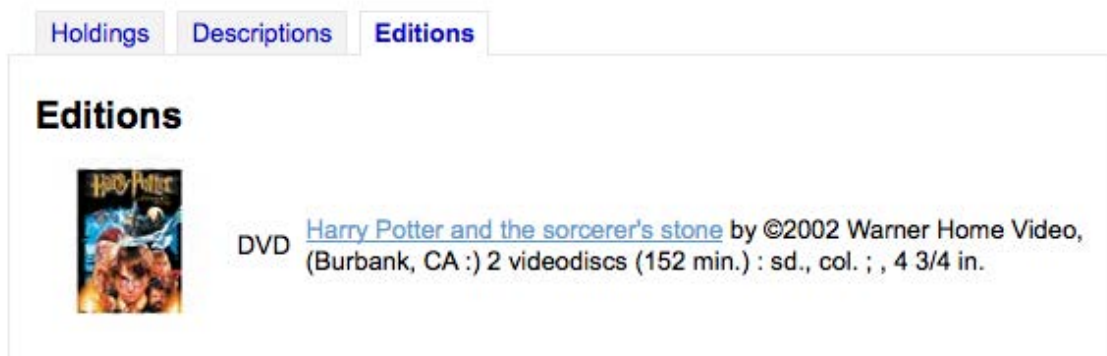

2.1.7.1 All

2.1.7.1.1 FRBRizeEditions Default: Don't show

Asks: ___ other editions of an item on the staff client

Values:

- Don't show
- Show

Description:

- Using the rules set forth in the Functional Requirements for Bibliographic records, this option, when enabled, pulls all editions of the same title available in your collection regardless of material type. Items will appear under an 'Editions' tab on the detail page for the title in question.. According to *Libraries Unlimited's Online Dictionary for Library and Information Science* (<http://lu.com/-odlis/>), FRBRizing the catalog involves collating MARC records of similar materials. FRBRization brings together entities (sets of Works, Expressions, or Manifestations), rather than just sets of Items. It can aid patrons in selecting related items, expressions, and manifestations that will serve their needs. When it is set to "Show", the OPAC will query one or more ISBN web services for associated ISBNs and display an Editions tab on the details pages. Once this preference is enabled, the library must select one of the ISBN options (**ThingISBN** and/or **XISBN**). This option is only for the Staff Client; the **OPACFRBRizeEditions** option must be enabled to have the Editions tab appear on the OPAC.

IMPORTANT

Requires that you turn on one or more of the ISBN services (**ThingISBN** and/or **XISBN**)

2.1.7.1.2 OPACFRBRizeEditions Default: Don't show

Asks: ___ other editions of an item on the OPAC.

Description:

- Using the rules set forth in the Functional Requirements for Bibliographic records, this option, when enabled, pulls all editions of the same title available in your collection regardless of material type. Items will appear under an 'Editions' tab on the detail page for the title in question.. According to *Libraries Unlimited's Online Dictionary for Library and Information Science* (<http://lu.com/-odlis/>), FRBRizing the catalog involves collating MARC records of similar materials. FRBRization brings together entities (sets of Works, Expressions, or Manifestations), rather than just sets of Items. It can aid patrons in selecting related items, expressions, and manifestations that will serve their needs. When it is set to "Show", the OPAC will query one or more ISBN web services for associated ISBNs and display an Editions tab on the details pages. Once this preference is enabled, the library must select one of the ISBN options (**ThingISBN** and/or **XISBN**). This option is only for the OPAC; the **FRBRizeEditions** option must be turned "On" to have the Editions tab appear on the Staff Client.

Values:

- Don't show
- Show

2.1.7.2 Amazon

2.1.7.2.1 AmazonAssocTag Asks: Put the associate tag ___ on links to Amazon.

TIP

This can net your library referral fees if a patron decides to buy an item after clicking through to Amazon from your site.

Description:

- An Amazon Associates Tag allows a library to earn a percentage of all purchases made on Amazon when a patron accesses Amazon's site via links on the library's website. More information about the Amazon Associates program is available at Amazon's Affiliate Program's website, <https://affiliate-program.amazon.com/>. Before a tag can be obtained, however, the library must first apply for an Amazon Web Services (AWS) account. Applications are free of charge and can be made at <http://aws.amazon.com>. Once an AWS account has been established, the library can then obtain the Amazon Associates Tag.

Sign up at: <https://affiliate-program.amazon.com/>

2.1.7.2.2 AmazonCoverImages Default: Don't show

Asks: ___ cover images from Amazon on search results and item detail pages on the staff interface.

Values:

- Don't show
- Show

Description:

- This preference makes it possible to either allow or prevent Amazon cover images from being displayed in the Staff Client. Cover images are retrieved by Amazon, which pulls the content based on the first ISBN number in the item's MARC record. Amazon offers this service free of charge. If the value for this preference is set to "Show", the cover images will appear in the Staff Client, and if it is set to "Don't show", the images will not appear. Finally, if you're using Amazon cover images, all other cover image services must be disabled. If they are not disabled, they will prevent AmazonCoverImages from functioning properly.

2.1.7.2.3 AmazonLocale Default: American

Asks: Use Amazon data from its ___ website.

Value:

- American
- British
- Canadian
- French
- German
- Japanese

2.1.7.2.4 OPACAmazonCoverImages Default: Don't show

Asks: ___ cover images from Amazon on search results and item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- This preference makes it possible to either allow or prevent Amazon cover images from being displayed in the OPAC. Cover images are retrieved by Amazon, which pulls the content based on the first ISBN number in the item's MARC record. Amazon offers this service free of charge. If the value for this preference is set to "Show", the cover images will appear in the OPAC, and if it is set to "Don't show", the images will not appear. Finally, if you're using Amazon cover images, all other cover image services must be disabled. If they are not disabled, they will prevent AmazonCoverImages from functioning properly.

2.1.7.3 Babelthèque

2.1.7.3.1 Babeltheque Default: Don't

Asks: ___ include information (such as reviews and citations) from Babelthèque in item detail pages on the OPAC.

Description:

- This preference makes it possible to display a Babeltheque tab in the OPAC, allowing patrons to access tags, reviews, and additional title information provided by Babeltheque. The information which Babeltheque supplies is drawn from the French language-based [Babelio.com](http://www.babelio.com), a French service similar to LibraryThing for Libraries. More information about Babeltheque is available through its website, <http://www.babeltheque.com>. Libraries that wish to allow access to this information must first register for the service at <http://www.babeltheque.com>. Please note that this information is only provided in French.

Values:

- Do

The screenshot shows a book page with the following elements:

- Navigation tabs: Exemplaires (1), Notes, commentaires, Les commentaires des lecteurs d'Amazon : Babelthèque
- Note moyenne des lecteurs**: 4.19/5 (sur 254 notes) with 5 stars.
- Critiques sur ce livre**: 30 critiques sur ce livre ([tout lire](#)), [Ajouter une critique](#)
- Citations de ce livre**: 5 citations de ce livre ([tout lire](#)), [Ajouter une citation](#)
- Étiquettes sur ce livre**:
 - [adapté](#) [adapté au cinéma](#) [amitié](#) [amour](#)
 - [auteur français](#) [collocation](#) [cuisine](#)
 - [france](#) [français](#) [gavalda](#)
 - [littérature contemporaine](#)
 - [littérature francophone](#)
 - [littérature française](#)

- Don't

2.1.7.3.2 Babeltheque_url_js Asks: ___ Defined the url for the Babeltheque javascript file (eg. <http://www.babeltheque.com/>)

2.1.7.3.3 Babeltheque_url_update Asks: ___ Defined the url for the Babeltheque update periodically (eg. <http://www.babeltheque.com/.../file.csv.bz2>).

2.1.7.4 Baker & Taylor

IMPORTANT

This is a pay service, you must contact Baker & Taylor to subscribe to this service before setting these options.

2.1.7.4.1 BakerTaylorEnabled Default: Don't add

Asks: ___ Baker and Taylor links and cover images to the OPAC and staff client. This requires that you have entered in a username and password (which can be seen in image links).

Values:

- Add
- Don't add

Description:

- This preference makes it possible to display Baker & Taylor content (book reviews, descriptions, cover images, etc.) in both the Staff Client and the OPAC. Libraries that wish to display Baker & Taylor content must first register and pay for this service with Baker & Taylor (<http://www.btol.com>). If Baker & Taylor content is enabled be sure to turn off other cover and review services to prevent interference.

IMPORTANT

To use this you will need to also set the **BakerTaylorUsername & BakerTaylorPassword** system preferences

2.1.7.4.2 BakerTaylorBookstoreURL Asks: Baker and Taylor "My Library Bookstore" links should be accessed at `https:// __ isbn`

Description:

- Some libraries generate additional funding for the library by selling books and other materials that are purchased from or have been previously leased from Baker & Taylor. These materials can be accessed via a link on the library's website. This service is often referred to as "My Library Bookstore." In order to participate in this program, the library must first register and pay for the service with Baker & Taylor. Additional information about this and other services provided by Baker & Taylor is available at the Baker & Taylor website, <http://www.btol.com>. The BakerTaylorBookstoreURL preference establishes the URL in order to link to the library's Baker & Taylor-backed online bookstore, if such a bookstore has been established. The default for this field is left blank; if no value is entered, the links to My Library Bookstore will remain inactive. If enabling this preference, enter the library's Hostname and Parent Number in the appropriate location within the URL. The "key" value (key=) should be appended to the URL, and `https://` should be prepended.

This should be filled in with something like `koha.mylibrarybookstore.com/MLB/actions/searchHandler.do?nextPage=L`

TIP

Leave it blank to disable these links.

IMPORTANT

Be sure to get this information from Baker & Taylor when subscribing.

2.1.7.4.3 BakerTaylorUsername & BakerTaylorPassword Asks: Access Baker and Taylor using username `__` and password `__`

Descriptions:

- This setting is only applicable if the library has a paid subscription to the external Content Café service from Baker & Taylor. Use the box provided to enter in the library's Content Café username and password. Also, ensure that the **BakerTaylorBookstoreURL** and **BakerTaylorEnabled** settings are properly set. The Content Café service is a feed of enhanced content such as cover art, professional reviews, and summaries that is displayed along with Staff Client/OPAC search results. For more information on this service please see the Baker & Taylor website: <http://www.btol.com>

IMPORTANT

Be sure to get this information from Baker & Taylor when subscribing.

2.1.7.5 Google

2.1.7.5.1 GoogleJackets Default: Don't add

Asks: ___ cover images from Google Books to search results and item detail pages on the OPAC.

Values:

- Add
- Don't add

Description:

- This setting controls the display of applicable cover art from the free Google Books database, via the Google Books API. Please note that to use this feature, all other cover services should be turned off.

2.1.7.6 LibraryThing

LibraryThing for Libraries is a pay service. You must first contact LibraryThing directly for pricing and subscription information. Learn more at <http://www.librarything.com/forlibraries>. Also, for further configuration instructions please see the LibraryThing Wiki: <http://www.librarything.com/wiki/-index.php/Koha>

2.1.7.6.1 ThingISBN Default: Don't use

Asks: ___ the ThingISBN service to show other editions of a title

Values:

- Don't use
- Use

Description:

- Set to 'Use' to display an "Editions" tab on the item's detail page. Editions are listed, complete with cover art (if you have one of the cover services enabled) and bibliographic information. The feed comes from LibraryThing's ThingISBN web service. This is a free service to non-commercial sites with fewer than 1,000 requests per day.

IMPORTANT

Requires **FRBRizeEditions** and/or **OPACFRBRizeEditions** set to 'show'

IMPORTANT

This is separate from Library Thing for Libraries and does not have a cost associated with it.

2.1.7.6.2 LibraryThingForLibrariesEnabled Default: Don't show

Asks: ___ reviews, similar items, and tags from Library Thing for Libraries on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- This setting is only applicable if the library has a paid subscription to the external LibraryThing for Libraries service. This service can provide patrons with the display of expanded information on catalog items such as book recommendations. It also can offer advanced features like tagged browsing, patron written reviews, and a virtual library display accessed from the details tab.

IMPORTANT

If this is set to 'show' you will need to enter a value in the '**LibraryThingForLibrariesID**' system preference.

2.1.7.6.3 LibraryThingForLibrariesID Asks: Access Library Thing for Libraries using the customer ID ___

Description:

- This setting is only applicable if the library has a paid subscription to the external LibraryThing for Libraries service. Use the box provided to enter in the library's LibraryThing for Libraries ID as provided to the library by LibraryThing. The ID number is a series of numbers in the form ###-#####, and can be found on the library's account page at LibraryThing for Libraries. This service can provide patrons with the display of expanded information on catalog items such as book recommendations and cover art. It also can offer advanced features like tagged browsing, patron written reviews, and a virtual library display accessed from the details tab.

2.1.7.6.4 LibraryThingForLibrariesTabbedView Default: in line with bibliographic information

Asks: Show Library Thing for Libraries content ___

Values:

- in line with bibliographic information
- in tabs

Description:

- This setting is only applicable if the library has a paid subscription to the external LibraryThing for Libraries service. This service can provide patrons with the display of expanded information on catalog items such as book recommendations and cover art. It also can offer advanced features like tagged browsing, patron written reviews, and a virtual library display accessed from the details tab.

2.1.7.7 Local Cover Images**2.1.7.7.1 AllowMultipleCovers** Default: Don't allow

Asks: ___ multiple images to be attached to each bibliographic record.

Values:

- Allow
- Don't allow

Description:

- If this preference is set to 'Allow' then you can upload multiple images that will appear in the images tab on the bib record in the OPAC and the staff client. This preference requires that either one or both **LocalCoverImages** and **OPACLocalCoverImages** are set to 'Display.'

2.1.7.7.2 LocalCoverImages Default: Don't display

Asks: ___ local cover images on intranet search and details pages.

Values:

- Display
- Don't display

Description:

- Setting this preference to 'Display' allows you to upload your own cover images to bib records and display them on the detail page in the staff client. At this time the cover will only show under the 'Images' tab on the holdings table on the detail display, not next to the title at the top left or on the search results.

2.1.7.7.3 OPACLocalCoverImages Default: Don't display

Asks: ___ local cover images on OPAC search and details pages.

Values:

- Display
- Don't display

Description:

- Setting this preference to 'Display' allows you to upload your own cover images to bib records and display them on the detail page and search results in the OPAC.

2.1.7.8 Novelist Select

Novelist Select is not a free service. Contact your Ebsco representative to get your log in information to embed this content in the OPAC.

IMPORTANT

Novelist Select does not include cover images for the search results and bibliographic detail pages. You can choose any other cover image service for this content or you can contract with Ebsco to get access to the **Baker & Taylor Content Cafe** for an added fee.

2.1.7.8.1 NovelistSelectEnabled Default: Don't add

Asks: ___ Novelist Select content to the OPAC.

Values:

- Add
- Don't add

IMPORTANT

Enabling this requires that you have entered in a user profile and password in the **NovelistSelectProfile & NovelistSelectPassword** preferences

Description:

- Novelist Select from Ebsco is a subscription service that can provide additional content in the OPAC.

2.1.7.8.2 NovelistSelectProfile & NovelistSelectPassword Asks: Access Novelist Select using user profile ___ and password ___.**IMPORTANT**

This information will be visible if someone views the source code on your OPAC.

Description:

- Novelist Select from Ebsco is a subscription service that can provide additional content in the OPAC.

2.1.7.8.3 NovelistSelectView Default: in an OPAC tab

Asks: Display Novelist Select content ___

Description:

- Novelist Select provides a lot of content, for that reason you have four choices of where to display this content. The default view is in a tab in the holdings table.

2.1.7.9 OCLC

2.1.7.9.1 xISBN Default: Don't use

Asks: ___ the OCLC xISBN service to show other editions of a title

Description:

- Set to 'Use' to display an "Editions" tab on the item's detail page. Editions are listed, complete with cover art and bibliographic information. The feed comes from OCLC's xISBN web service. The feed limit for non-commercial sites is 1000 requests per day.

Values:

- Don't use
- Use

IMPORTANT

Requires **FRBRizeEditions** and/or **OPACFRBRizeEditions** set to 'show'

2.1.7.9.2 OCLCAffiliateID

Asks: Use the OCLC affiliate ID ___ to access the xISBN service.

Description:

- This setting is only applicable if the library has an OCLC Affiliate ID. This allows WorldCat searching in the OPAC via the XISBN programming interface. Simply enter the library's OCLC Affiliate ID in the box provided. Please note that using this data is only necessary if **FRBRizeEditions** and/or **OPACFRBRizeEditions** and **XISBN** settings are enabled. For more information on this service please visit the OCLC website: <http://www.worldcat.org/affiliate/default.jsp>.

IMPORTANT

Unless you have signed up for an ID with OCLC, you are limited to 1000 requests per day. Available at: <http://www.worldcat.org/affiliate/webservices/xisbn/app.jsp>

2.1.7.9.3 XISBNDailyLimit

Default: 999

Asks: Only use the xISBN service ___ times a day.

IMPORTANT

Unless you have signed up for an ID with OCLC, you are limited to 1000 requests per day. Available at: <http://www.worldcat.org/affiliate/webservices/xisbn/app.jsp>

2.1.7.10 Open Library

2.1.7.10.1 OpenLibraryCovers

Default: Don't add

Asks: ___ cover images from Open Library to search results and item detail pages on the OPAC.

Values:

- Add
- Don't add

Description:

- This setting controls the display of applicable cover art from the free Open Library database, via the Open Library API. Please note that to use this feature, all other cover services should be turned off.

2.1.7.11 Syndetics

Syndetics is a pay service. You must first contact Syndetics directly for pricing and subscription information.

2.1.7.11.1 SyndeticsEnabled Default: Don't use

Asks: ___ content from Syndetics.

Values:

- Don't use
- Use

Description:

- When this option is enabled any of the Syndetics options can be used.

IMPORTANT

Requires that you enter your **SyndeticsClientCode** before this content will appear.

2.1.7.11.2 SyndeticsClientCode Asks: Use the client code ___ to access Syndetics.

Description:

- Once the library signs up for Syndetics' services, Syndetics will provide the library with an access code. (Visit the Syndetics homepage at <http://www.bowker.com/syndetics/> for more information.) This is the code that must be entered to access Syndetics' subscription services. Syndetics is a paid subscription service. This value must be entered before **SyndeticsEditions** can be enabled. If the code is lost, corrupted, or forgotten, a new one can be obtained from <http://www.bowker.com/-syndetics/>.

IMPORTANT

You will need to get your client code directly from Syndetics.

2.1.7.11.3 SyndeticsCoverImages & SyndeticsCoverImageSize SyndeticsCoverImages Default: Don't show

SyndeticsCoverImageSize Default: medium

Asks: ___ cover images from Syndetics on search results and item detail pages on the OPAC in a ___ size.

Descriptions:

- When enabled, **SyndeticsCoverImages**, allows libraries to display Syndetics' collection of full-color cover images for books, videos, DVDs and CDs on their OPAC. For each book or item that comes up during a user search, the cover image for that title will be displayed. Since these cover images come in three sizes, the optimum size must be selected using the **SyndeticsCoverImageSize** preference after **SyndeticsCoverImages** are enabled. Syndetics cover images come in two sizes: mid-size (187 x 187 pixels), and large (400 x 400 pixels). Syndetics is a paid subscription service. The **SyndeticsClientCode** must be entered and the **SyndeticsEnabled** option must be activated before this service can be used. Other cover image preferences should also be disabled to avoid interference.

SyndeticsCoverImages Values:

- Don't show
- Show

SyndeticsCoverImageSize Values:

- medium
- large

2.1.7.11.4 SyndeticsAuthorNotes Default: Don't show

Asks: ___ notes about the author of a title from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- When this option is set to "Show", Syndetics provides notes and short author biographies for more than 300,000 authors, in both fiction and nonfiction. With this option enabled the library can display Syndetics Author Notes on the OPAC. According to the Syndetics Solutions website (<http://www.bowker.com/syndetics/>), Author Notes include lists of contributors for many multi-author texts and compilations. The **SyndeticsClientCode** must be entered and the **SyndeticsEnabled** option must be activated before this service can be used.

2.1.7.11.5 SyndeticsAwards Default: Don't show

Asks: ___ information from Syndetics about the awards a title has won on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- When this option is set to "Show", Syndetics provides its clients with a list of awards that any title has won. With this service enabled the library can display those awards for each book on its website. For each book or item that comes up during a user search, the list of awards for that title will be displayed. When a user clicks on a given award, information about that award is presented along with a list of the other titles that have won that award. If the user clicks on any title in the list, they will see holdings information about that title in their region. This option is a paid subscription service. The **SyndeticsClientCode** must be entered and the **SyndeticsEnabled** option must be activated before this service can be used.

2.1.7.11.6 SyndeticsEditions Default: Don't show

Asks: ___ information about other editions of a title from Syndetics on item detail pages on the OPAC

Description:

- When enabled this option shows information on other editions of a title from Syndetics on the item detail pages of the OPAC. Syndetics is a paid subscription service. The **SyndeticsClientCode** must be entered and the **SyndeticsEnabled** option must be activated before this service can be used.

Values:

- Don't show
- Show

IMPORTANT

Requires **OPACFRBRizeEditions** set to 'show'

2.1.7.11.7 SyndeticsExcerpt Default: Don't show

Asks: ___ excerpts from of a title from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- This preference allows Syndetics to display excerpts given to them from selected publishers. The excerpts are available from prominently reviewed new titles, both fiction and non-fiction. The excerpts include poems, essays, recipes, forwards and prefaces. Automatic links provided by the ISBNs within local MARC records are required to integrate Syndetics secured, high-speed Internet servers to the library OPACs. For more information see (<http://www.bowker.com/syndetics/>).

2.1.7.11.8 SyndeticsReviews Default: Don't show

Asks: ___ reviews of a title from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- Syndetics Reviews is an accumulation of book reviews available from a variety of journals and serials. The reviews page displays colored images of reviewed books dust jackets, partnered with the names of the journal or serial providing the review. Clicking on an icon opens a window revealing the book title, author's name, book cover icon and the critic's opinion of the book. Automatic links provided by the ISBNs within local MARC records are required to integrate Syndetics secured, high-speed Internet servers to the library OPACs. For more information see (<http://www.bowker.com/syndetics/>).

2.1.7.11.9 SyndeticsSeries Default: Don't show

Asks: ___ information on other books in a title's series from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- Each fiction title within a series is linked to the complete series record. The record displays each title in reading order and also displays the publication order, if different. Alternate series titles are also displayed. Automatic links provided by the ISBNs within local MARC records are required to integrate Syndetics secured, high-speed Internet servers to the library OPACs. For more information see (<http://www.bowker.com/syndetics/>).

2.1.7.11.10 SyndeticsSummary Default: Don't show

Asks: ___ a summary of a title from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- Providing more than 5.6 million summaries and annotations derived from book jackets, edited publisher copy, or independently written annotations from Book News, Inc. Covering fiction and non-fiction, this summaries option provides annotations on both trade and scholarly titles. For more information see (<http://www.bowker.com/syndetics/>).

2.1.7.11.11 SyndeticsTOC Default: Don't show

Asks: ___ the table of contents of a title from Syndetics on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- This preference allows staff and patrons to review the Table of Contents from a wide variety of publications from popular self-help books to conference proceedings. Specific Information access is the main purpose for this option, allowing patrons guidance to their preferred section of the book. Special arrangements with selected book services is used to obtain the table of contents for new publications each year. Automatic links provided by the ISBNs within local MARC records are required to integrate Syndetics secured, high-speed Internet servers to the library OPACs. For more information see (<http://www.bowker.com/syndetics/>).

2.1.7.12 Tagging**2.1.7.12.1 TagsEnabled** Default: Allow

Asks: ___ patrons and staff to put tags on items.

Values:

- Allow
- Don't allow

Description:

- Set to 'Allow' enable tagging. A tag is metadata, a word added to identify an item. Tags allow patrons to classify materials on their own. TagsEnabled is the main switch that permits the tagging features. TagsEnable must be set to 'Allow' to allow for other tagging features.

2.1.7.12.2 TagsModeration Default: Don't require

Asks: ___ that tags submitted by patrons be reviewed by a staff member before being shown.

Values:

- Don't require
- Require

Description:

- When set to 'Require,' all tags to be first filtered by the tag moderator. Only approved tags will be visible to patrons. When set to 'Don't require' tags will bypass the tag moderator and patrons' tags to be immediately visible. When this preference is enabled the moderator, a staff member, would approve the tag in the Staff Client. The moderator will have the option to approve or reject each pending tag suggestion.

When moderation is required all tags go through the tag moderation tool before becoming visible.

- *Get there:* More > Tools > **Tags**

2.1.7.12.3 TagsShowOnList Default: 6

Asks: Show ___ tags on search results on the OPAC.

TIP

Set the value to 0 (zero) to turn this feature off.

2.1.7.12.4 TagsInputOnList Default: Allow

Asks: ___ patrons to input tags on search results on the OPAC.

Values:

- Allow

Tags: [library](#) (9) [data](#) (3) [libraries](#) (5) [mashups](#) (2) New tag:

- Don't allow

2.1.7.12.5 TagsShowOnDetail Default: 10

Asks: Show ___ tags on item detail pages on the OPAC.

TIP

Set the value to 0 (zero) to turn this feature off.

2.1.7.12.6 TagsInputOnDetail Default: Allow

Asks: ___ patrons to input tags on item detail pages on the OPAC.

Values:

- Allow

Tags from this library: [library](#) (9) [data](#) (3) [libraries](#) (5) [mashups](#) (2) New:

- Don't allow

2.1.7.12.7 TagsExternalDictionary Asks: Allow tags in the dictionary of the ispell executable ___ on the server to be approved without moderation.

Description:

- The dictionary includes a list of accepted and rejected tags. The accepted list includes all the tags that have been pre-allowed. The rejected list includes tags that are not allowed. This preference identifies the "accepted" dictionary used. Ispell is an open source dictionary which can be used as a list of accepted terms. Since the dictionary allows for accurately spelled obscenities, the libraries policy may dictate that modifications are made to the Ispell dictionary if this preference is use. For more information about Ispell <http://www.gnu.org/software/ispell/ispell.html>. Enter the path on your server to a local ispell executable, used to set \$Lingua::Ispell::path.

2.1.8 I18N/L10N

These preferences control your Internationalization and Localization settings.

Get there: More > Administration > Global System Preferences > I18N/L10N

2.1.8.1 CalendarFirstDayOfWeek

Default: Sunday

Asks: Use ___ as the first day of week in the calendar.

Values:

- Monday
- Sunday

Description:

- Using this preference you can control what day shows as the first day of the week in the calendar pop ups throughout Koha and on the Calendar tool. If you change this preference and don't see a change in your browser try clearing your cache since it makes changes to the Javascript on these pages.

2.1.8.2 dateformat

Default: mm/dd/yyyy

Asks: Format dates like ____

Values:

- dd/mm/yyyy
- mm/dd/yyyy
- yyyy/mm/dd

Description:

- This preference controls how the date is displayed. The options are the United States method, mm/dd/yyyy (04/24/2010), the metric method, dd/mm/yyyy (24/04/2010) or ISO, which is the International Standard of Organization, yyyy/mm/dd (2010/04/24). The International Standard of Organization would primarily be used by libraries with locations in multiple nations that may use different date formats, to have a single display type, or if the library would be in a region that does not use the United States or metric method. More information regarding the ISO date format can be found at http://www.iso.org/iso/iso_catalogue.htm.

2.1.8.3 language

Default: English

Asks: Enable the following languages on the staff interface

Values:

- English

To install additional languages you need to run misc/translation/install-code.pl. For example, to install French you would run the following command *install-code.pl fr-FR* to make the templates, once they exist and are in the right place then they will show up as an option in this preference.

2.1.8.4 opalanguages

Default: English

Asks: Enable the following languages on the OPAC

Values:

- English

To install additional languages you need to run misc/translation/install-code.pl. For example, to install French you would run the following command *install-code.pl fr-FR* to make the templates, once they exist and are in the right place then they will show up as an option in this preference.

2.1.8.5 opalanguagesdisplay

Default: Don't allow

Asks: ____ patrons to select their language on the OPAC.

Values:

- Allow

Languages: English || Français | Deutsch | Español

- Don't allow

2.1.9 Local Use

These preferences are defined locally.

Get there: More > Administration > Global System Preferences > Local Use

TIP

Sometimes preferences which are either new or outdated will appear in this tab, if you didn't add any preferences to this tab then it's best to ignore preferences listed here.

2.1.10 Logs

Logs keep track of transaction on the system. You can decide which actions you want to log and which you don't using these preferences.

Get there: More > Administration > Global System Preferences > Logs

2.1.10.1 AuthoritiesLog

Default: Don't log

Asks: ___ changes to authority records.

Values:

- Don't log
- Log

2.1.10.2 BorrowersLog

Default: Log

Asks: ___ changes to patron records.

Values:

- Don't log
- Log

2.1.10.3 CataloguingLog

Default: Don't log

Asks: ___ any changes to bibliographic or item records.

Values:

- Don't log
- Log

IMPORTANT

Since this occurs whenever a book is cataloged, edited, or checked in or out it can be very resource intensive - slowing down your system.

2.1.10.4 FinesLog

Default: Log

Asks: ___ when overdue fines are charged or automatically forgiven.

Values:

- Don't log
- Log

2.1.10.5 IssueLog

Default: Log

Asks: ___ when items are checked out.

Values:

- Don't log
- Log

2.1.10.6 LetterLog

Default: Log

Asks: ___ when an automatic claim notice is sent.

Values:

- Don't log
- Log

TIP

This log tracks all notices that go to patrons including the overdue notices.

2.1.10.7 ReturnLog

Default: Log

Asks: ___ when items are returned.

Values:

- Don't log
- Log

2.1.10.8 SubscriptionLog

Default: Log

Asks: ___ when serials are added, deleted or changed.

Values:

- Don't log
- Log

2.1.11 OPAC

Get there: More > Administration > Global System Preferences > OPAC

2.1.11.1 Appearance

These preferences control how things appear in the OPAC.

2.1.11.1.1 **AuthorisedValueImages** Default: Don't show

Asks: ___ images for authorized values (such as lost statuses and locations) in search results and item detail pages on the OPAC.

Values:

- Don't show
- Show

Get there: More > Administration > **Authorized Values**

2.1.11.1.2 **BiblioDefaultView** Default: in simple form

Asks: By default, show bib records ___

Values:

- as specified in the ISBD template.
 - See **ISBD** preference for more information
- in simple form.
- in their MARC format.

Description:

- This preference determines the level of bibliographic detail that the patron will see on the OPAC detail page. The simple form displays the graphical interface; MARC format displays the MARC21 cataloging view; ISBD displays the ISBD (International Standard Bibliographic Description, AACR2) view.

2.1.11.1.3 **COinSinOPACResults** Default: Include

Asks: ___ COinS / OpenURL / Z39.88 in OPAC search results.

Values:

- Don't include
 - If you choose not to include COinS on the search results, it will still be loaded on the individual bibliographic records.
- Include
 - Enabling this feature will slow OPAC search response times.

Description:

- COinS stands for ContextObjects in Spans. COinS is a method to embed bibliographic metadata in the HTML code of web pages. This allows bibliographic software to publish machine-readable bibliographic items and client reference management software (such as Zotero) to retrieve bibliographic metadata. The metadata can also be sent to an OpenURL resolver. This allows, for instance, searching for a copy of a book in one's own library.

2.1.11.1.4 DisplayOPACIconsXSLT Default: Don't show

Asks: On pages displayed with XSLT stylesheets on the OPAC, ___ icons for itemtype and authorized values.

IMPORTANT

OPACXSLTResultsDisplay and/or **OPACXSLTDetailsDisplay** must be set to use an XSLT stylesheet for this to show (default or custom)

Values:

- Don't show
- Show

Type:  Book; Format: print bibliography  ; Literary form: not fiction

TIP

See the [XSLT Icon Guide](#) for more information on these icons.

2.1.11.1.5 hidelostitems Default: Don't show

Asks: ___ lost items on search and detail pages.

Description:

- Items that are marked lost by the library can either be shown or not shown on the OPAC. By setting the value to "Don't show," the lost item is not shown on the OPAC. By setting the value "Show," the lost item is shown on the OPAC for patrons to view with a status of 'lost.'

Values:

- Don't show
- Show

 Books	Fairview General Stacks	Non Fiction	Z674.75.W68 L52 2009(Browse Shelf)	Item lost
---	----------------------------	-------------	---	-----------

2.1.11.1.6 LibraryName Asks: Show ___ as the name of the library on the OPAC.**TIP**

This value will appear in the title bar of the browser

TIP

Edit '[opacheader](#)' if you'd like to add a library name above your search box on the OPAC

2.1.11.1.7 OpacAddMastheadLibraryPulldown Default: Don't add

Asks: ___ a library select pulldown menu on the OPAC masthead.

Values:

- Add

- Don't Add

2.1.11.1.8 OPACBaseURL Asks: The OPAC is located at http:// ___

Description:

- This preference is looking for the URL of your public catalog (OPAC). Once it is filled in Koha will use it to generate permanent links in your RSS feeds, for your social network share buttons and in your staff client when generating links to bib records in the OPAC.

IMPORTANT

This must be filled in with the URL of your public catalog for RSS, unAPI, and search plugins to work.

IMPORTANT

This must be filled in with the URL of your public catalog to show 'OPAC View' links from bib records in the staff client:

Library mashups : exploring new ways to deliver library data /

- **Additional Authors:**
 - [Engard, Nicole C.,--1979-](#)
- **Published by:** [Information Today, Inc.,](#) (Medford, N.J. :)
- **Description:** p. cm.
- **OPAC View:** [Open in new window](#)

2.1.11.1.9 opaccolorstylesheet Asks: Include the additional CSS stylesheet ___ to override specified settings from the default stylesheet.

Description:

- The preference can look for stylesheets in the template directory for your OPAC language, for instance: /koha-tmpl/opac-tmpl/prog/en/css. If you upload a custom file, opac-mystyles.css to this directory, you can specify it by entering opac-mystyles.css in your opaccolorstylesheet system preference. This adds your custom stylesheet as a linked stylesheet alongside the OPAC's default CSS files. This method is preferable because linked stylesheets are cached by the user's browser, meaning upon repeat visits to your site the user's browser will not have to re-download the stylesheet, instead using the copy in the browser's cache.
- If you would rather, you can upload your CSS to another server and enter the full URL pointing to it's location remember to begin the URL with http://

TIP

Leave this field blank to disable it

NOTE

This file will add a linked CSS, not replace the existing default CSS.

2.1.11.1.10 opaccredits Asks: Include the following HTML in the footer of all pages in the OPAC:

TIP

Click the 'Click to edit; link to enter HTML to appear at the bottom of every page in the OPAC

opaccredits

Include the following HTML in the footer of all pages in the OPAC:

```
<center>© Nicole C. Engard<br><a href="">Home</a> | <a href="">Contact</a> | <a href="">Privacy</a></center>
```

© Nicole C. Engard
[Home](#) | [Contact](#) | [Privacy](#)

Description:

- This setting is for credits that will appear at the bottom of your OPAC pages. Credits traditionally encompass copyright information, last date updated, hyperlinks or other information represented in an HTML format. This is static information and any updates must be entered manually.

Learn more in the [OPAC Editable Regions](#) section.

2.1.11.11 OPACDisplay856uAsImage Default: Neither details or results page

Asks: Display the URI in the 856u field as an image on: ____

Values:

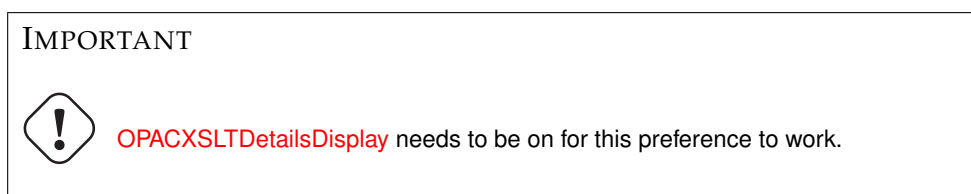

- Both results and details pages

-

- Detail page only

-

No cover image available

Normal View
MARC View
ISBD View

iPod Touch

Type: Visual Material

Description: 1 iPod .

Item type	Location	Call Number	Status
 Mixed Materials	Fairview		Available

- Neither details or results page
- Results page only

IMPORTANT

Not yet implemented

Description:

- In addition to this option being set, the corresponding XSLT option must be turned on. Also, the corresponding 856q field must have a valid MIME image extension (e.g., "jpg") or MIME image type (i.e. starting with "image/"), or the generic indicator "img" entered in the field. When all of the requirements are met, an image file will be displayed instead of the standard link text. Clicking on the image will open it in the same way as clicking on the link text. When you click on the image it should open to full size, in the current window or in a new window depending on the value in the system pref [OPACURLOpenInNewWindow](#).

856 ? - URL/ELECTRONIC LOCATION AND ACCESS +-

▲ q	Electronic format type	img
▲ u	Uniform Resource Identifier	http://farm3.static.flickr.com/2428/3679388149_efc2fc9b5a.jpg

2.1.11.1.12 OpacExportOptions Default: bibtext | dc | marcxml | marc8 | utf8 | marcstd | mods | ris

Asks: List export options that should be available from OPAC detail page separated by | : ____
 Description:

- In the OPAC on the right of each bib record there is a menu that allows for saving the record in various formats. This patch will allow you to define which options are in the pull down menu. Available options are: BIBTEX (bibtext), Dublin Core (dc), MARCXML (marcxml), MARC-8 encoded MARC (marc8), Unicode/UTF-8 encoded MARC (utf8), Unicode/UTF-8 encoded MARC without local use -9xx, x9x, xx9- fields and subfields (marcstd), MODS (mods), and RIS (ris).

2.1.11.1.13 OpacFavicon Asks: Use the image at ____ for the OPAC's favicon.

IMPORTANT

This should be a complete URL, starting with http://

TIP

Turn your logo into a favicon with the [Favicon Generator](#).

Description:

- The favicon is the little icon that appears next to the URL in the address bar in most browsers. The default value for this field (if left blank) is the small 'K' in the Koha logo.

2.1.11.1.14 opacheader Asks: Include the following HTML in the header of all pages in the OPAC

<p><code>opacheader</code></p>	<p>Include the following HTML in the header of all pages in the OPAC: <code><h2>Nicole's Koha Library</h2></code></p>
--------------------------------	--

TIP

This value will appear above the main content of your page

**TIP**

Edit '**LibraryName**' if you'd like to edit the contents of the <title> tag

Learn more in the [OPAC Editable Regions](#) section.

2.1.11.1.15 OpacHighlightedWords Default: Don't highlight
Asks: ___ words the patron searched for in their search results.
Values:

- Don't highlight
- Highlight

2.1.11.1.16 OpacKohaUrl Default: Don't show
Values:

- Don't show
- Show

Description:

- When this preference is set to 'Show' text will appear in the bottom right of the OPAC footer stating 'Powered by Koha' and linking to the official Koha website.

Powered by Koha

2.1.11.1.17 opacstylesheet Default: opac.css
Asks: Use the CSS stylesheet /css/ ___ on all pages in the OPAC, instead of the default
Description:

- This setting's function is to point to the *.css file used to define the OPAC layout. A *.css file is a cascading stylesheet which is used in conjunction with HTML to set how the HTML page is formatted and will look on the OPAC. There are two stylesheets that come with the system; opac.css and opac2.css. A custom stylesheet may also be used. The stylesheets listed in the opacstylesheet preference are held on the Koha server.

TIP

Leave this field blank to disable it and let Koha use the default file instead

2.1.11.1.18 OpacMaintenance Default: Don't show

Asks: ___ a warning that the OPAC is under maintenance, instead of the OPAC itself.

NOTE

this shows the same warning as when the database needs to be upgraded, but unconditionally.

Description:

- This preference allows the system administrator to turn off the OPAC during maintenance and display a message to users. When this preference is switched to "Show" the OPAC is not usable. The text of this message is not editable at this time.

Values:

- Don't show
- Show
 - When this preference is set to show the maintenance message the ability to search the OPAC is disabled and a message appears

Nicole's Koha Library**System Maintenance**

The Nicole's Library Catalog is offline for system maintenance. We'll be back soon! If you have any questions, please contact the [Site Administrator](#)

© Nicole C. Engard
[Home](#) | [Contact](#) | [Privacy](#)

2.1.11.1.19 OpacMainUserBlock Default: Welcome to Koha... <hr>

Asks: Show the following HTML in its own column on the main page of the OPAC

Description:

- HTML entered in this field will appear in the center of the main page of your OPAC

The screenshot shows a library catalog interface. At the top, there is a search bar with the text "Library Catalog" and a "Go" button. Below the search bar are links for "Advanced Search" and "Tag Cloud". The main content area is titled "New & Upcoming Titles" and features three book covers: "Kindred in death" by J. D. Robb, "City at the end of time" by Greg Bear, and "Interrogative mood" by Padgett Powell. To the right, there are promotional banners for "See Our Newest DVDs", "New Audio Books", and "Featured this week" which includes the book "A RELIABLE WIFE" by ROBERT GOOLBECK. A link "See the whole New and Upcoming Titles list" is located below the book covers.

How can you help the library?

- Use the library and [let us know what you think](#).
- [Donate money, ideas, or materials](#).
- [Volunteer!](#)
- Tell your friends and neighbors what you're reading or watching. And remind them that the library is free!

Learn more in the [OPAC Editable Regions](#) section.

2.1.11.1.20 OpacMainUserBlockMobile Asks: Show the following HTML in its own column on the main page of the OPAC (mobile version)

Description:

- This content will display below the search boxes when viewing the OPAC on a mobile device as long as the **theme** you're using has a mobile version.

2.1.11.1.21 OPACMobileUserCSS Asks: Include the following CSS for the mobile view on all pages in the OPAC

Description:

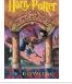

- This CSS will be used when your OPAC is viewed on a mobile device as long as the **theme** you're using has a mobile version.

2.1.11.1.22 OPACMySummaryHTML Asks: Include a "Links" column on the "my summary" tab when a user is logged in to the OPAC, with the following HTML (leave blank to disable).

Description:

- In this preference you can enter HTML that will appear on the 'Checked Out' tab on the 'My Summary' section when logged in to the OPAC. The placeholders {BIBLIONUMBER}, {TITLE}, {ISBN} and {AUTHOR} will be replaced with information from the displayed record. This can be used to enter in 'share' links for social networks or generate searches against other library catalogs.

3 Item(s) Checked Out

	Title	Call No.	Due	Renew	Fines	Links
	Harry Potter and the sorcerer's stone Rowling, J. K.	PZ7.R79835 Har 1999ab	05/01/2011	<input type="checkbox"/> Renew (2 of 2 renewals remaining)	No	 
	Picture perfect Picoult, Jodi,	PS3566.I372 P49 2002	05/01/2011	<input type="checkbox"/> Renew (2 of 2 renewals remaining)	No	 
	Harry Potter and the sorcerer's stone Rowling, J. K.	PZ7.R79835 Har 1998	05/01/2011	<input type="checkbox"/> Renew (2 of 2 renewals remaining)	No	 

Sample Data:

```
<p><a href="http://www.facebook.com/sharer.php?u=http://YOUROPAC.ORG/cgi-bin/koha ←
/opac-detail.pl?biblionumber={BIBLIONUMBER}">Share on Facebook</a>
<br />TITLE: {TITLE}
<br />AUTHOR: {AUTHOR}
<br />ISBN: {ISBN}
<br />BIBLIONUMBER: {BIBLIONUMBER}</p>
```

2.1.11.1.23 OpacNav Default: Important links here.

Asks: Show the following HTML on the left hand column of the main page and patron account on the OPAC (generally navigation links)

- **Graphic Novels**
- **Browse Recently Added Titles**
- **List of Magazine Titles**
- **List of DVD Titles**
- **New York Times Best Seller Lists**
- **Publishers Weekly Best Seller Lists**
- **Bookmobile**
- **Teen Blog**

Learn more in the [OPAC Editable Regions](#) section.

2.1.11.1.24 OpacNavBottom Asks: Show the following HTML on the left hand column of the main page and patron account on the OPAC, after **OpacNav**, and before patron account links if available:

Description: When a patron is logged in to their account they see a series of tabs to access their account information. **OpacNav** appears above this list of tabs and OpacNavBottom will appear below them. When not on the patron account pages the HTML in OpacNavBottom will just appear right below **OpacNav**.

Your personal account information can be found above.

2.1.11.1.25 OpacNavRight Asks: Show the following HTML in the right hand column of the main page under the main login form.

Description: HTML entered in this preference will appear on the right hand side of the OPAC under the log in form. If the log in form is not visible this content will move up on the right column.

2.1.11.1.26 OPACNoResultsFound No Default

Asks: Display this HTML when no results are found for a search in the OPAC

This HTML will display below the existing notice that no results were found for your search.

No Results Found!

No results match your search for "**kw,wrld: 32456756453212sdsda**" in Catalog. 

2.1.11.1.27 OpacPublic Default: Enable

Asks: ___ Koha OPAC as public. Private OPAC requires authentication before accessing the OPAC.

Values:

- Don't enable
- Enable

Description:

- This preference determines if your OPAC is accessible and searchable by anyone or only by members of the library. If set to 'Don't enable' only members who are logged into the OPAC can search. Most libraries will leave this setting at its default of 'Enable' to allow their OPAC to be searched by anyone and only require login for access to personalized content.

2.1.11.1.28 OPACResultsSidebar Asks: Include the following HTML under the facets in OPAC search results

Description:

- The HTML entered in this preference will appear on the search results pages below the list of facets on the left side of the screen.

2.1.11.129 OPACSearchForTitleIn Default: `Other Libraries (WorldCat) Other Databases (Google Scholar) Online Stores (Bookfinder.com)`

Asks: Include a "More Searches" box on the detail pages of items on the OPAC, with the following HTML (leave blank to disable)

NOTE

The placeholders {BIBLIONUMBER}, {CONTROLNUMBER}, {TITLE}, {ISBN}, {ISSN} and {AUTHOR} will be replaced with information from the displayed record.

TIP

You can use this field to add social networking share links by using code similar to this

```
</ul></div></div><div class="detailtagcell">
<script
src="http://connect.facebook.net/en_US/all.js#xfbml=1"></
script><fb:like
href="http://opac.mylibrary.tld/bib/{BIBLIONUMBER}" show_faces
="true"
width="450" font=""></fb:like>
<div><a href="http://twitter.com/share" class="twitter-share-
button"
data-url="http://opac.mylibrary.tld/bib/{BIBLIONUMBER}" data-
text="I'm reading
this" data-count="horizontal">Tweet</a><script type="text/
javascript"
src="http://platform.twitter.com/widgets.js"></script></div></
div><div><div><ul>
```

The starting `` is necessary to break out of the 'Search for this Title In' pull down menu

2.1.11.130 OPACShowBarcode Default: Don't show

Asks: ___ the item's barcode on the holdings tab.

Values:

- Don't show

Holdings (1)		Title notes	Comments (1)		
Item type	Location	Collection	Call number	Status	Date due
Books	Nicole's Library	Library & Information Science	Z678 .G668 2004 (Browse shelf)	Available	

- Show

Holdings (1)		Title notes	Comments (1)			
Item type	Location	Collection	Call number	Status	Date due	Barcode
Books	Nicole's Library	Library & Information Science	Z678 .G668 2004 (Browse shelf)	Available		18236167

Description:

- This preference allows you to control whether patrons can see items' barcodes in the OPAC.

2.1.11.1.31 OPACShowCheckoutName Default: Don't show

Asks: ___ the name of the patron that has an item checked out on item detail pages on the OPAC.

Values:

- Don't show
- Show

Description:

- This preference allows all patrons to see who has the item checked out if it is checked out. In small corporate libraries (where the OPAC is behind a firewall and not publicly available) this can be helpful so coworkers can just contact the patron with the book themselves. In larger public and academic libraries setting this to 'Show' would pose serious privacy issues.

2.1.11.1.32 OpacShowFiltersPulldownMobile Default: Show

Asks: ___ the search filters pulldown on the mobile version of the OPAC.

Values:

- Don't show
- Show

Description:

- This preference controls whether patrons can choose a search type when viewing the OPAC on mobile devices. If this is set to 'Don't show' then all searches will be keyword searches. This preference assumes that you're using a **theme** with a mobile version.

2.1.11.1.33 OPACShowHoldQueueDetails Default: Don't show any hold details

Asks: ___ to patrons in the OPAC.

Values:

- Don't show any hold details
- Show holds

Holdings (1)		Title notes	Subscriptions	Comments (0)		
Item type	Location	Call number	Vol info	Status	Date due	Item holds
Reference	Centerville		Issue 6 : 2012	Available		
Total holds: 3 (priority 3)						

- Show holds and priority level
- Show priority level

Hello, **Nicole Engard** ([Click here](#) if you're not Nicole Engard)

Checked Out	Overdue	Fines	Holds		
Holds (2 total)					
Title	Placed On	Pick Up Location	Priority	Status	Modify
The Baltimore book:	10/31/2009	Fairview	2	Pending	Cancel
Library mashups :	10/31/2009	Fairview	1	Pending	Cancel

- `opacuserlogin` needs to be set to 'allow'

2.1.11.134 OpacShowLibrariesPulldownMobile Default: Show

Asks: ___ the libraries pulldown on the mobile version of the OPAC.

Values:

- Don't show
- Show

Description:

- This preference controls whether the library selector pull down shows when viewing the OPAC on a mobile device as long as the `theme` you're using has a mobile version.

2.1.11.135 OpacShowRecentComments Default: Don't show

Asks: ___ a link to recent comments in the OPAC masthead.

Values:

- Don't show
- Show

Description:

- If you have chosen to allow comments in your OPAC by setting `reviewson` to 'Allow' you can include a link to the recent comments under the search box at the top of your OPAC with this preference.

2.1.11.136 OPACShowUnusedAuthorities Default: Show

Asks: ___ unused authorities in the OPAC authority browser.

Values:

- Do not show
- Show

IMPORTANT

Requires that the **OpacAuthorities** preference is set to 'Allow'

Description:

- When patrons search your authority file via the OPAC they will see all authorities in your system even if you don't have them linked to any bibliographic records. This preference lets you determine what the default behavior is when searching authorities via the OPAC. If you choose 'Do not show' it will only show patrons authority records that are linked to bib records in the search results. Otherwise the system will show all authority records even if they aren't linked to records.

2.1.11.1.37 opacsmallimage Asks: Use the image at ___ in the OPAC header, instead of the Koha logo. If this image is a different size than the Koha logo, you will need to customize the CSS.

Description:

- The opacsmallimage system pref is a little tricky to deal with because you really have to tweak some CSS at the same time. The default CSS defines a region just large enough to display the Koha logo, and if your logo doesn't match the Koha logo's dimensions (120 pixels wide by 38 pixels high), it won't display correctly.

IMPORTANT

This should be a complete URL, starting with http://

2.1.11.1.38 OpacStarRatings Default: no

Asks: Show star-ratings on ___ pages.

Values:

- no
- only details

 Normal view
 MARC view
 ISBD view

Library mashups : exploring new ways to deliver library data /

[Preview](#)

by [Engard, Nicole C.](#)

Type:  Book

Publisher: Medford, N.J. : [Information Today, Inc.](#), c2009 .

Edition: 1st .

Description: xvii, 334 p. : ill., maps ; 23 cm .

ISBN: 9781573873727 (pbk.) ; 1573873721 (pbk.).

Subject(s): [Mashups \(World Wide Web\) -- Library applications](#) | [Libraries and the Internet](#) | [Library Web sites -- Design](#) | [Web site development](#) | [Libraries](#) | [Internet](#) | [Library Science](#)

2. [Mashing Up Multiple Web Feeds Using Yahoo! Pipes](#) by Fagan, Jody Condit . No cover image available

Type:  Book

Availability: No copies available

New tag:

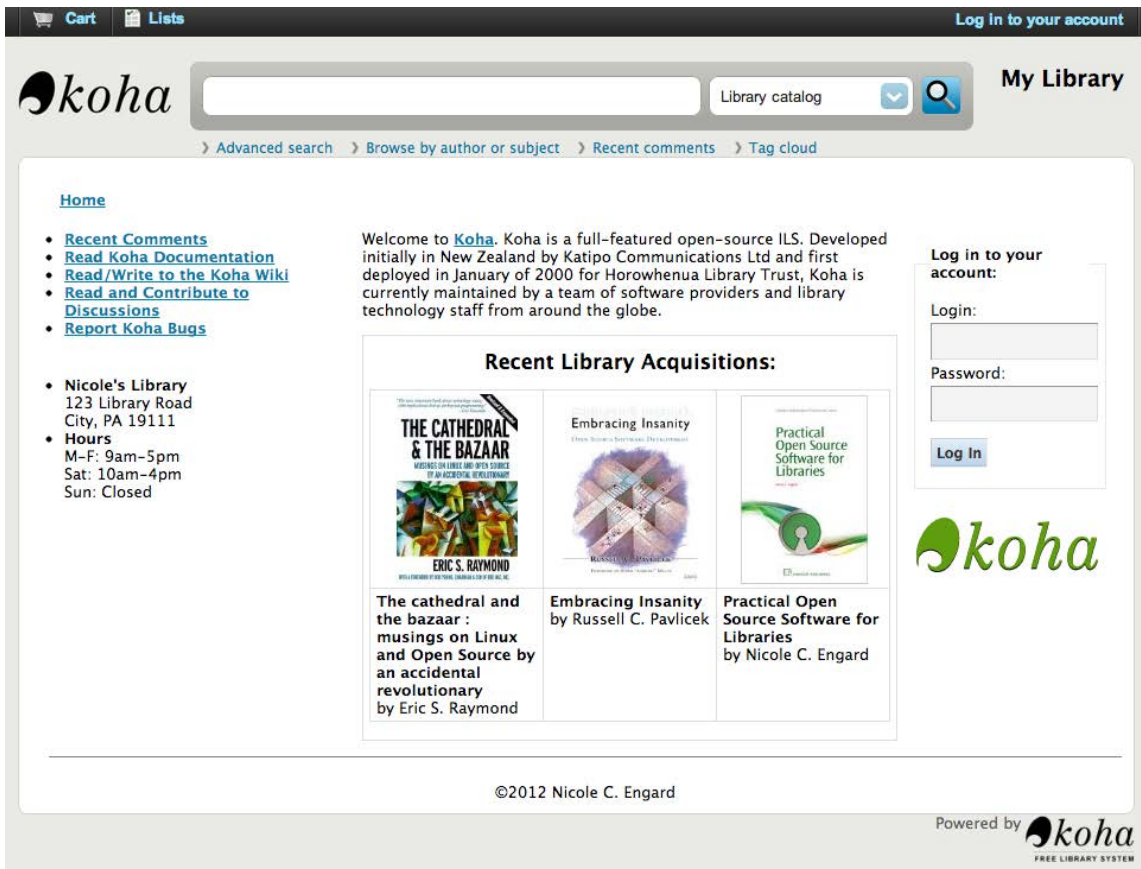

Actions:  Place hold  Save to Lists  Add to cart

Description:

- Star ratings are a way for your patrons to leave ratings without having to leave a full review. Patrons who are not logged in will only be able to see the stars, once logged in patrons can click on the stars on the details page to leave their own rating. Clicking on the stars on the search results will not submit a rating.

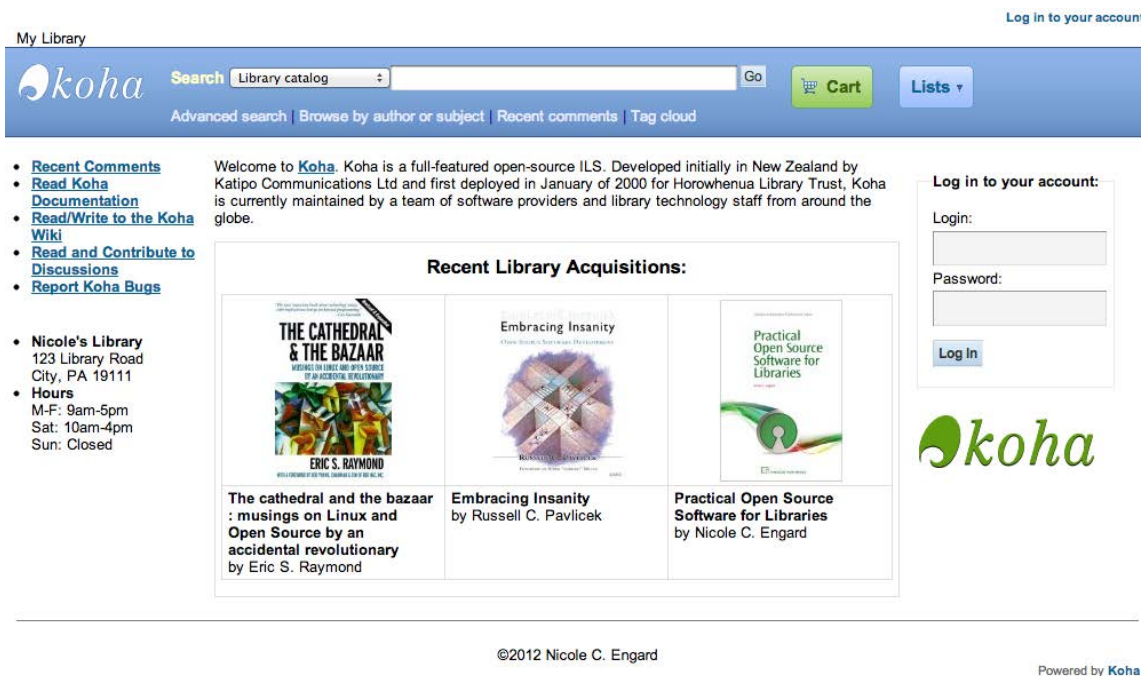

2.1.11.1.39 **opacthemes** Default: prog
 Asks: Use the ___ theme on the OPAC.
 Values:

- CCSF

This theme comes with a mobile version.

- prog

This is the original Koha 3.x theme and does not come with a mobile version.

2.1.11.1.40 OPACURLOpenInNewWindow Default: don't

Asks: When patrons click on a link to another website from your OPAC (like Amazon or OCLC), ___ open the website in a new window.

Values:

- do
- don't

Description:

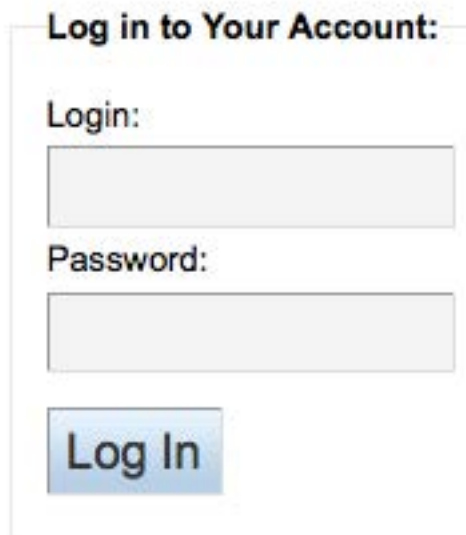

- This preference determines if URLs in the OPAC will open in a new window or not. When clicking on a link in the OPAC, a patron does not need to worry about navigating away from their search results.

2.1.11.141 OPACUserCSS Asks: Include the following CSS on all pages in the OPAC

Description:

- OPACUserCSS allows the administrator to enter styles that will overwrite the OPAC's default CSS as defined in 'opaclayoutstylesheet' or 'opacstylesheet'. Styles may be entered for any of the selectors found in the default style sheet. The default stylesheet will likely be found at http://your_koha_address/opac-tmpl/prog/en/css/opac.css. Unlike [opaccolorstylesheet](#) and [opaclayoutstylesheet](#) this preference will embed the CSS directly on your OPAC pages.

2.1.11.142 opacuserjs Asks: Include the following JavaScript on all pages in the OPAC

<p>opacuserjs</p>	<p>Include the following JavaScript on all pages in the OPAC:</p> <pre>\$(document).ready(function(){ \$("label[for='userid']").html("Card Number: "); \$("label[for='password']").html("PIN: "); });</pre>
-------------------	---

The image shows a login form with the following elements:

- Title: **Log in to Your Account:**
- Label: **Card Number:**
- Input field: A rectangular text box for entering the card number.
- Label: **PIN:**
- Input field: A rectangular text box for entering the PIN.
- Button: A blue button with the text **Log In**.

Description:

- This preference allows the administrator to enter JavaScript or JQuery that will be embedded across all pages of the OPAC. Administrators may use this preference to customize some of the interactive sections of Koha, customizing the text for the login prompts, for example. Sample JQuery scripts used by Koha libraries can be found on the wiki: http://wiki.koha-community.org/wiki/-JQuery_Library.

2.1.11.1.43 OPACXSLTDetailsDisplay Default: default

Asks: Display OPAC details using XSLT stylesheet at ____

Values:

- leave empty to not use the XSLT stylesheet
 - In previous versions of Koha this was the setting that read 'normally'
- enter "default" for the default one
- put a path to define a XSLT file
 - ex: /path/to/koha/and/your/stylesheet.xml
 - If in a multi-language system you can enter {langcode} in the path to tell Koha to look in the right language folder
 - * ex: /home/koha/src/koha-tmpl/opac/prog/{langcode}/xslt/OpacDetail.xml
 - * ex. <http://mykohaopac.org/{langcode}/stylesheet.xml>
- put an URL for an external specific stylesheet
 - ex: <http://mykohaopac.org/stylesheet.xml>

Description:

- XSLT stylesheets allow for the customization of the details shows on the screen when viewing a bib record. This preference will allow you either use the default look that comes with Koha or design your own stylesheet.

2.1.11.1.44 OPACXSLTResultsDisplay Default: default

Asks: Display OPAC results using XSLT stylesheet at ____

Values:

- leave empty to not use the XSLT stylesheet
 - In previous versions of Koha this was the setting that read 'normally'

- enter "default" for the default one
- put a path to define a XSLT file
 - ex: /path/to/koha/and/your/stylesheet.xml
 - If in a multi-language system you can enter {langcode} in the path to tell Koha to look in the right language folder
 - * ex: /home/koha/src/koha-tmpl/opac/prog/{langcode}/xslt/OpacDetail.xml
 - * ex. http://mykohaopac.org/{langcode}/stylesheet.xml
- put an URL for an external specific stylesheet
 - ex: http://mykohaopac.org/stylesheet.xml

Description:

- XSLT stylesheets allow for the customization of the details shows on the screen when viewing the search results. This preference will allow you either use the default look that comes with Koha or design your own stylesheet.

2.1.11.2 Features

2.1.11.2.1 numSearchRSSResults Default: 50

Asks: Display ___ search results in the RSS feed.

Description:

- By default the RSS feed that is automatically generated for every search results page will list 50 items. This can sometimes be too much for some RSS feed readers and for some people this isn't enough. This preference allows you to adjust this number to show the best number of results for your patrons.

2.1.11.2.2 OpacAuthorities Default: Allow

Asks: ___ patrons to search your authority records.

Description:

- This preference displays the link on the OPAC for the authority search (titled 'Browse by Subject'). By setting the preference to "Allow" patrons can use this search link of the OPAC.

IMPORTANT

While labeled 'Browse' it is important to note that this is in fact an authority search, not an authority browse.

The screenshot shows a search interface for a library catalog. At the top, there is a search bar with the text 'Search Library Catalog' and a dropdown arrow. Below the search bar, there are several navigation links: 'Advanced Search | Browse by Subject | Tag Cloud | Most Popular | Purch'. The main part of the interface is an 'Authority search' form. It contains the following fields and options:

- Search: :** A dropdown menu with 'Default' selected.
- Main entry (\$a only):** A dropdown menu with 'contains' selected, followed by an empty text input field.
- Main entry:** A dropdown menu with 'contains' selected, followed by an empty text input field.
- Anywhere:** A dropdown menu with 'contains' selected, followed by an empty text input field.
- Order by:** A dropdown menu with 'Heading Ascendant' selected.

A blue 'Submit' button is located at the bottom left of the form. To the left of the form, there is a warning icon (an exclamation mark inside a diamond shape) and a vertical line indicating a sidebar or menu.

Values:

- Allow
 - A link labeled 'Browse by Subject' will appear at the top of your OPAC under the search box

- Don't allow

2.1.11.2.3 opacbookbag Default: Allow

Asks: ___ patrons to store items in a temporary "Cart" on the OPAC.

Values:

- Allow
- Don't allow

Description:

- This preference allows the user to temporarily save a list of items found on the catalog. By using the Book Bag, or Cart, the user can print out or email a list of items found. The user does not need to be logged in. This list is temporary and will be emptied, or cleared, at the end of the session.

2.1.11.2.4 OpacBrowser**IMPORTANT**

This preference only applies to French systems at this time.

Default: Don't allow

Asks: ___ patrons to browse subject authorities on OPAC

Values:

- Allow
- Don't allow

IMPORTANT

run the **Authorities Browser Cron Job** to create the browser list

2.1.11.2.5 OpacBrowseResults Default: enable

Asks: ___ browsing and paging search results from the OPAC detail page.

Values:

- disable
- enable

Description:

- This preference will control the option to return to your results and/or browse them from the detail page in the OPAC.

2.1.11.2.6 OpacCloud**IMPORTANT**

This preference only applies to French systems at this time.

Default: Don't show

Asks: ___ a subject cloud on OPAC

Values:

- Don't show
- Show

IMPORTANT

run the **Authorities Browser Cron Job** to create the browser list

2.1.11.2.7 OPACFinesTab Default: Allow

Asks: ___ patrons to access the Fines tab on the My Account page on the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow

2.1.11.2.8 OpacPasswordChange Default: Allow

Asks: ___ patrons to change their own password on the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow

IMPORTANT

Enabling this will break LDAP authentication.

2.1.11.2.9 OPACPatronDetails Default: Allow

Asks: ___ patrons to notify the library of changes to their contact information from the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow

Description:

- If patrons are allowed to notify the library of changes an email will be sent to the library administration email address with the changes. Lines that start with the field name in all caps are the lines that the patron made changes to.

2.1.11.2.10 OPACpatronimage Default: Don't show

Asks: ___ patron images on the patron information page in the OPAC.

Values:

- Don't show
- Show

Description:

- If **patronimages** is set to allow the upload of patron images via the staff client, then setting this preference to 'show' will show the patron what image you have on file for them when they view their personal information on their account in the OPAC.

2.1.11.2.11 OpacTopissue Default: Don't allow

Asks: ___ patrons to access a list of the most checked out items on the OPAC.

Values:

- Allow
 - A link to 'Most Popular' will appear at the top of your OPAC

- Don't allow

Description:

- This preference allows the administrator to choose to show the "Most Popular" link at the top of the OPAC under the search box. The "Most Popular" page shows the top circulated items in the library, as determined by the number of times a title has been circulated. This allows users to see what titles are popular in their community. It is recommended that you leave this preference set to 'Don't allow' until you have been live on Koha for a couple of months, otherwise the data that it shows will not be an accurate portrayal of what's popular in your library.

Refine your search

Show the top
10 titles

From:
All branches

Limit to:
All item types

Acquired in the last:
12 months

The 10 most checked-out item types at all locations in the past 12 months

Title	Itemtype	Checkouts
Library mashups : - Information Today, Inc.,	Books	13
The thriving library : Block, Marylaine, - Information Today,	Books	12
Computers in libraries. - Meckler,	Books	2
Harry Potter and the chamber of secrets. - Scholastic,	Books	2

2.1.11.2.12 opacuserlogin Default: Allow

Asks: ___ patrons to log in to their accounts on the OPAC.

Values:

- Allow
- Don't allow
 - The OPAC will still be searchable if patrons can't log in, this just disables the patron account access via the OPAC

2.1.11.2.13 QuoteOfTheDay Default: Disable

Asks: ___ Quote of the Day display on OPAC home page

Values:

- Disable
- Enable

Description:

- This feature will allow you to enter a series of quotes that will then show on the OPAC homepage in random order. To add/edit quotes, visit the [Quote of the Day Editor](#) under Tools.

2.1.11.2.14 RequestOnOpac Default: Allow

Asks: ___ patrons to place holds on items from the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow

2.1.11.2.15 reviewson Default: Allow

Asks: ___ patrons to make comments on items on the OPAC.

Values:

- Allow
 - Patrons comments/reviews all require moderation before they appear in the OPAC
 - **opacuserlogin** needs to be set to 'Allow'
- Don't allow

Description:

- This button allows the patrons to submit comments on books they have read via the OPAC. If this preference is set to "Allow" reviews are first sent to the staff client for staff approval before the review is displayed in the OPAC. The staff member who reviews and approves comments may find the pending comments on the **Comments** tool. The staff member can then choose to approve or delete the comments.

2.1.11.2.16 ShowReviewer Default: full name

Asks: Show ___ of commenter with comments in OPAC.

Values:

- first name
- first name and last initial
- full name
- last name
- no name
- username

Description:

- If you would like to protect your patron's privacy in the OPAC you can choose to hide their names or parts of their names from any of the comments they leave on bib records in your system. **reviewson** needs to be set to 'Allow' for this to preference to come in to play

2.1.11.2.17 ShowReviewerPhoto Default: Show

Asks: ___ reviewer's photo beside comments in OPAC.

Values:

- Hide
- Show

- **reviewson** needs to be set to 'Allow' and **ShowReviewer** needs to be set to 'Show' for this to preference to come in to play

Description:

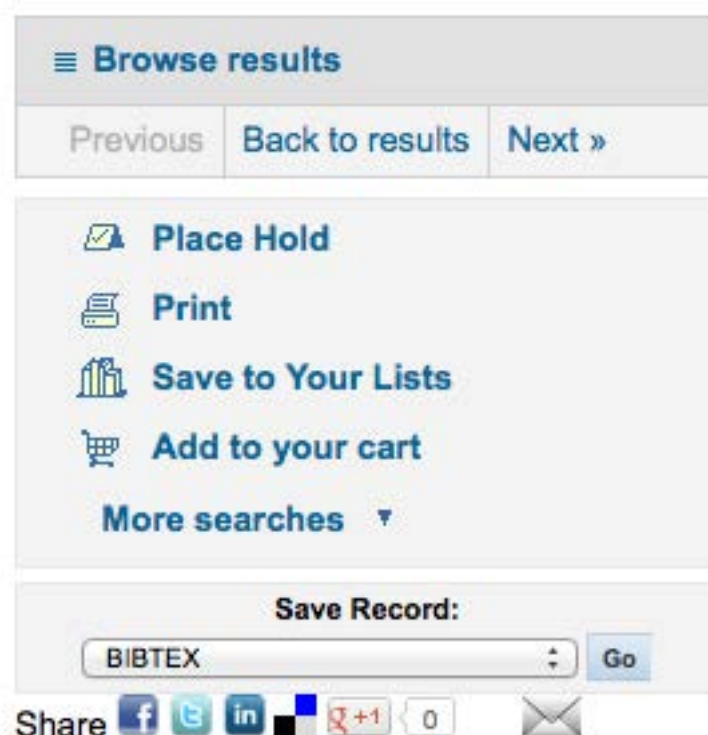

- This system preference allows libraries to show avatars next to patron's comments in the OPAC. These avatars are pulled from the **Libravatar** library, an open source powered product that allows Internet users to choose a small icon to display next to their name on various different websites. The library has no control over the images the patron chooses to display.

2.1.11.2.18 SocialNetworks Default: Disable

Asks: ___ social network links in opac detail pages

Values:

- Disable
- Enable

Description:

- This preference will enable a line of social network share buttons below the right hand column on the detail pages of records in the OPAC.

IMPORTANT

In order for these share buttons to work when clicked you must have filled in your **OPACBaseURL** preference.

2.1.11.2.19 suggestion Default: Allow

Asks: ___ patrons to make purchase suggestions on the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow' unless **AnonSuggestions** is set to 'allow'
- Don't allow

2.1.11.3 Policy**2.1.11.3.1 AllowPurchaseSuggestionBranchChoice** Default: Don't allow

Asks: ___ patrons to select branch when making a purchase suggestion

Values:

- Allow
- Don't allow

Description:

- If your library system lets patrons make purchase suggestions for a specific branch you can set this preference to 'Allow' to add a branch selection option to the purchase suggestion form.

2.1.11.3.2 OpacAllowPublicListCreation Default: Allow

Asks: ___ opac users to create public lists

Values:

- Allow
- Don't allow

Description:

- Public lists are visible to anyone who visits your OPAC. With this preference you can control whether or now patrons are allowed to create these public lists. If this is set to "Don't allow" then only staff will be able to create public lists.

IMPORTANT

This preference will only be taken in to account if you have **virtualshelves** set to 'Allow'

2.1.11.3.3 OpacAllowSharingPrivateLists**IMPORTANT**

This feature is not active yet but will be released soon

Default: Don't allow

Asks: ___ opac users to share private lists with other patrons.

Values:

- Allow
- Don't allow

Description:

- This feature will add the option for patrons to share their lists with other patrons.

2.1.11.3.4 OPACFineNoRenewals Default: 99999

Asks: Only allow patrons to renew their own books on the OPAC if they have less than ___ USD in fines

TIP

Leave this field blank to disable

IMPORTANT

To allow renewals in the OPAC, **opacuserlogin** needs to be set to 'allow'

2.1.11.3.5 OpacHiddenItems Asks: Allows to define custom rules for hiding specific items at opac.**TIP**

See docs/opac/OpacHiddenItems.txt in your Koha install directory for more information

Description:

- In this field you can enter criteria for items you would like to hide from display in the OPAC. This field takes any combination of item fields (from the items table in the Koha database) for blocking. For example a value of:

```
itype: [07, 10]
location: [STAFF, ISO]
```

Will block items with an itype code of 07 or 10 as well as items that have a shelving location of STAFF or ISO.

In items my items.itype 07 is defined in Item Types Administration as Staff Assigned My items.itype 10 in Item Types is Archival Copy The locations STAFF and ISO are in Authorized Values for category=LOC STAFF means it's assigned to the staff reading room and ISO means it is in the isolation room.

2.1.11.3.6 OPACItemHolds Default: Allow

Asks: ___ patrons to place holds on specific items in the OPAC.

Values:

- Allow
 - Patrons can place holds on specific items as well as the next available item.
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow
 - If this is disabled, users can only put a hold on the next available item.

2.1.11.3.7 OpacRenewalAllowed Default: Don't allow

Asks: ___ patrons to renew their own books on the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow
 - Staff will still be able to renew items for patrons via the staff client

Description:

- This preference allows the administration to choose if patrons can renew their checked out materials via their checked out history in the OPAC. It allows patrons to renew their materials without having to contact the library or having to return to the library.

2.1.11.3.8 OpacRenewalBranch Default: the branch the item was checked out from

Asks: Use ___ as branchcode to store in the statistics table

Values:

- NULL
- 'OPACRenew'
- the item's home branch
- the patron's home branch
- the branch the item was checked out from

Description:

- This value is used in the statistics table to help with reporting. The statistics table in Koha keeps track of all checkouts and renewals, this preference defines which branch is entered in to the table when a patron renews an item for themselves via the OPAC.

2.1.11.3.9 OPACViewOthersSuggestions Default: Don't show

Asks: ___ purchase suggestions from other patrons on the OPAC.

Values:

- Don't show
- Show
 - **opacuserlogin** needs to be set to 'allow'

2.1.11.3.10 SearchMyLibraryFirst Default: Don't limit

Asks: ___ patrons' searches to the library they are registered at.

Values:

- Don't limit
 - Searching the OPAC will show results from all libraries
 - If you're a one branch system, choose 'Don't limit'
- Limit
 - Patrons will still be able to search other libraries via the Advanced search page - but will be limited to searches for their library only from the basic search box
 - **opacuserlogin** needs to be set to 'allow'

2.1.11.3.11 singleBranchMode Default: Don't allow

Asks: ___ patrons to select their branch on the OPAC.

Values:

- Allow
 - **opacuserlogin** needs to be set to 'allow'
- Don't allow

Description:

- This preference is for libraries that have branches but do not want to share their items among other branches within their system. If the preference is set to "Don't allow" then holdings will be shown for all branches within a system. On the "Home" screen of the OPAC users have the choice of narrowing down results by item location. Setting this preference to "Allow" will display only one branch's holdings.

2.1.11.4 Privacy**2.1.11.4.1 AnonSuggestions** Default: Don't allow

Asks: ___ patrons that aren't logged in to make purchase suggestions.

IMPORTANT

If set to 'Allow', suggestions are connected to the **AnonymousPatron**

Values:

- Allow
- Don't allow

2.1.11.4.2 AnonymousPatron Default: 0

Asks: Use borrowernumber ___ as the Anonymous Patron (for anonymous suggestions and reading history)

TIP

Before setting this preference **create a patron** to be used for all anonymous suggestions and/or reading history items. This patron can be any type and should be named something to make it clear to you that they're anonymous (ex. Anonymous Patron).

2.1.11.4.3 EnableOpacSearchHistory Default: Keep

Asks: ___ patron search history in the OPAC.

Values:

- Don't keep
- Keep

2.1.11.4.4 OPACPrivacy Default: Don't allow

Asks: ___ patrons to choose their own privacy settings for their reading history.

IMPORTANT

This requires **opacreadinghistory** set to 'Allow' and **AnonymousPatron** to be set to your anonymous patron's borrowernumber.

Values:

- Allow
- Don't allow

2.1.11.4.5 opacreadinghistory Default: Allow

Asks: ___ patrons to see what books they have checked out in the past.

IMPORTANT

Enabling this will make it so that patrons can view their circulation history in the OPAC unless you have OPACPrivacy set to 'Allow.'

IMPORTANT

This data is stored in the system regardless of your choice, unless your patrons have chosen to never have their reading history kept.

2.1.11.5 Shelf Browser**2.1.11.5.1 OPACShelfBrowser** Default: Show

Asks: ___ a shelf browser on item details pages, allowing patrons to see what's near that item on the shelf.

Values:

- Don't show
- Show

Item type	Location	Collection	Call Number	Status	Date Due
Books	Fairview General Stacks	Fiction	Ref LB 2337.2 .C36 2000(Browse Shelf)	Checked out	06/26/2010
Books	Main General Stacks	Fiction	Ref LB 2337.2 .C36 2000(Browse Shelf)	In transit from Fairview to Main since 09/09/2010	
Books	Fairview General Stacks	Fiction	Ref LB 2337.2 .C36 2000(Browse Shelf)	Available	

Description:

- This preference allows patrons to view what is located on the shelf near the item they looked up. The shelf browser option appears on the details page to the right of each items' call number. Clicking the 'Browse Shelf' link allows for a virtual shelf browsing experience via the OPAC and lets patrons see other books that may relate to their search and items that sit on the shelf near the item they are looking at.

IMPORTANT

This uses up a fairly large amount of resources on your server, and should be avoided if your collection has a large number of items.

2.1.11.5.2 ShelfBrowserUsesCcode Default: Don't use

Asks: ___ the item collection code when finding items for the shelf browser.

Values:

- Don't use
- Use

Description:

- If your library uses collection codes then you might want the shelf browser to take into consideration what collection the books belong to when populating the virtual shelf browser.

2.1.11.5.3 ShelfBrowserUsesHomeBranch Default: Use

Asks: ___ the item home branch when finding items for the shelf browser.

Values:

- Don't use
- Use

Description:

- If you have a multiple branch system you may want to make sure that Koha takes into consideration what branch owns the books when populating the virtual shelf browser for accuracy.

2.1.11.5.4 ShelfBrowserUsesLocation Default: Use

Asks: ___ the item location when finding items for the shelf browser.

Values:

- Don't use
- Use

Description:

- If your library uses shelving locations then you might want the shelf browser to take into consideration what shelving location the books belong to when populating the virtual shelf browser.

2.1.12 Patrons

Get there: More > Administration > Global System Preferences > Patrons

2.1.12.1 AddPatronLists

Default: specific categories

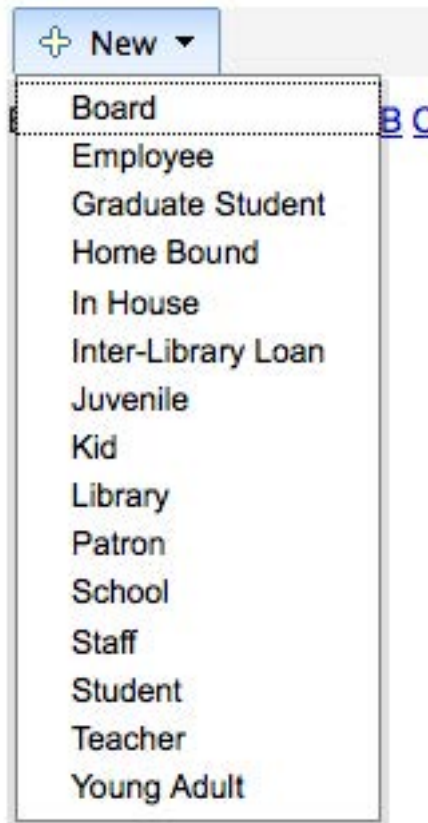

Asks: List ___ under the new patron menu.

Values:

- general patron types

- specific categories

2.1.12.2 AutoEmailOpacUser

Default: Don't send

Asks: ___ an email to newly created patrons with their account details.

Description:

- AutoEmailOpacUser allows library users to be notified by email of their account details when a new account is opened at the email address specified in the [AutoEmailPrimaryAddress](#) preference. The email contains the username and password given to or chosen by the patron when signing up for their account and can be customized by editing the [ACCTDETAILS](#) notice.

Values:

- Don't send
- Send

2.1.12.3 AutoEmailPrimaryAddress

Default: alternate

Asks: Use ___ patron email address for sending out emails.

Values:

- alternate
- first valid
- home
- work

Description:

- If you choose 'first valid' as the value for AutoEmailPrimaryAddress the system will check the email fields in this order: home, work, then alternate. Otherwise the system will use the email address you specify.

2.1.12.4 autoMemberNum

Default: Do

Asks: ___ default the card number field on the patron addition screen to the next available card number

Values:

- Do
 - If the largest currently used card number is 26345000012941, then this field will default to 26345000012942 for the next patron

- Don't

Description:

- This preference determines if the patron's barcode is automatically calculated. This prevents the person setting up the library card account from having to assign a number to the new card. If set to 'Do' the system will calculate a new patron barcode by adding 1 to the maximum barcode already present in the database.

2.1.12.5 BorrowerMandatoryField

Default: surname | cardnumber | barcode

Asks: The following database columns must be filled in on the patron entry screen: ___

Description:

- This preference enables the system administrator to choose which fields your library would like required for patron accounts. Enter field names separated by | (bar). This ensures that basic information is included in each patron record. If a patron leaves one of the required fields blank an error message will issue and the account will not be created.

IMPORTANT

Separate columns with |

TIP

For help with field names, ask your system administrator or [view the database structure](#) associated with the borrowers table.

2.1.12.6 borrowerRelationship

Default: father | mother

Asks: Guarantors can be the following of those they guarantee ___

Description:

- This preference enables the system administrator to define valid relationships between a guarantor (usually a parent) & a guarantee (usually a child). Defining values for this field does not make the guarantor field required when adding a guarantee type patron. This preference creates a drop down list identifying the relationship of the guarantor to the guarantee. To disable the ability to add children types in Koha you can leave this field blank.

IMPORTANT

Input multiple choices separated by |

2.1.12.7 BorrowerRenewalPeriodBase

Default: current date

Asks: When renewing borrowers, base the new expiry date on ____

Values:

- current date.
- current membership expiry date.

Description:

- This preference controls what the patron's new expiration date will be when you renew their card. Using the 'current date' will add the subscription period to today's date when calculating the new expiration date. Using 'current membership expiry date' will add the subscription period to the old expiration date for the patron when renewing their account.

2.1.12.8 BorrowersTitles

Default: Mr | Mrs | Miss | Ms

Asks: Borrowers can have the following titles ____

Description:

- This preference allows the staff to choose the titles that can be assigned to patrons. The choices present as a drop down list when creating a patron record.

IMPORTANT

Input multiple choices separated by |

2.1.12.9 BorrowerUnwantedField

Asks: The following database columns will not appear on the patron entry screen: ____

Description:

- This preference enables the system administrator to choose which fields your library doesn't need to see on the patron entry form. Enter field names separated by | (bar).

IMPORTANT

Separate columns with |

TIP

For help with field names, ask your system administrator or [view the database structure](#) associated with the borrowers table.

2.1.12.10 checkdigit

Default: Don't

Asks: ___ check and construct borrower card numbers in the Katipo style.

Values:

- Do
- Don't

IMPORTANT

This overrides `autoMemberNum` if on.

2.1.12.11 EnableBorrowerFiles

Default: Don't

Asks: ___ enable the ability to upload and attach arbitrary files to a borrower record.

Values:

- Do
- Don't

Description:

- When enabled this will add a 'Files' tab to the left of the patron detail page where you can view and upload files to the patron record.

2.1.12.12 EnhancedMessagingPreferences

Default: Allow

Asks: ___ patrons to choose which notices they receive and when they receive them.

Values:

- Allow
- Don't allow

IMPORTANT

This only applies to certain kinds of notices, overdue notices will be sent based on the library's rules, not the patron's choice.

Description:

- These messages are in addition to the overdue notices that the library sends. The difference between these notices and overdues is that the patron can opt-in and out of these. Setting this preference to 'Allow' will allow patrons to choose to receive any one of the following messages:
 - Item Checkout : A notice that lists all the of the items the patron has just checked out, this is an electronic form of the checkout receipt
 - Item Due : A notice on the day and item is due back at the library
 - Hold Filled : A notice when you have confirmed the hold is waiting for the patron
 - Item Checkin : A notice that lists all the of the items the patron has just checked in
 - Advanced Notice : A notice in advance of the patron's items being due (The patron can choose the number of days in advance)

2.1.12.13 ExtendedPatronAttributes

Default: Enable

Asks: ___ searching, editing and display of custom attributes on patrons.

Values:

- Don't enable
- Enable
 - Define attributes in Koha administration
 - Get there: More > Administration > **Patron Attribute Types**

Description:

- Patron attributes are library-defined custom fields that can be applied to patron records.

TIP

Use custom attributes for fields that the default patron record does not support such as driver's license number or student ID number.

2.1.12.14 intranetreadinghistory

Default: Allow

Asks: ___ staff to access a patron's checkout history

IMPORTANT

If you have the **OPACPrivacy** preference set to 'Allow' and the patron has decided to not have their history kept staff will only see currently checked out items.

Values:

- Allow
- Don't allow

IMPORTANT

This data is stored in the system regardless of your choice.

2.1.12.15 MaxFine

Default: 9999

Asks: The late fine for all checkouts will only go up to ___ USD.

Description:

- This preference controls the default cap on fines accrued by the patron. Leaving this preference blank means that there is no cap on the amount of fines a patron can accrue. If you'd like, single item caps can be specified in the [circulation rules matrix](#).

2.1.12.16 memberofinstitution

Default: Don't

Asks: ___ allow patrons to be linked to institutions

Values:

- Do
- Don't

IMPORTANT

In order to allow this, the library must have Institution patrons to link members to

2.1.12.17 minPasswordLength

Default: 3

Asks: Login passwords for staff and patrons must be at least ___ characters long.

IMPORTANT

This applies to both the staff login and the patron OPAC login.

2.1.12.18 NotifyBorrowerDeparture

Default: 30

Asks: Show a notice that a patron is about to expire ___ days beforehand.

Description:

- When the patron attempts to check out materials, a warning will appear in the check out window of the Staff Client telling the librarian that the patrons account is about to expire.

IMPORTANT

This notice will appear on the patron's record in the staff client.

2.1.12.19 patronimages

Default: Allow

Asks: ___ images to be uploaded and shown for patrons on the staff client.

Values:

- Allow
- Don't allow

2.1.12.20 PatronsPerPage

Default: 20

Asks: By default, show ___ results per page in the staff client.

2.1.12.21 SMSSendDriver

Asks: Use the SMS::Send:: ___ driver to send SMS messages.

Some examples of values are:

- SMS::Send::Us::Ipipi
- SMS::Send::US::TMobile
- SMS::Send::US::Verizon

Additional values can be found here: <http://search.cpan.org/search?query=sms%3A%3Asend&mode=all>

IMPORTANT

Only drivers available as Perl modules will work in this preference, so make sure a Perl module is available before choosing an SMS service.

Once a driver is entered in the preference an option will appear in the staff client and the OPAC on the patron messaging form to choose to receive messages as SMS

Patron messaging preferences

	Days in advance	SMS	Email	Digests only?	Do not notify
Advance notice	0 ▾	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Item checkout	-	<input type="checkbox"/>	<input checked="" type="checkbox"/>	-	<input type="checkbox"/>
Hold filled	-	<input type="checkbox"/>	<input type="checkbox"/>	-	<input type="checkbox"/>
Item due	-	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Item check-in	-	<input type="checkbox"/>	<input checked="" type="checkbox"/>	-	<input type="checkbox"/>

SMS number:

IMPORTANT

You must allow **EnhancedMessagingPreferences** for this to work.

2.1.12.22 StatisticsFields

Default: location | itype | ccode

Asks: Show the following fields from the items database table as columns on the statistics tab on the patron record: ____

Statistics

location ▾	itype ▾	ccode ▾	Total checkouts as of yesterday ▾	Today's checkouts ▾	Today's checkins ▾	Total checkouts ▾
	BK		2	0	0	2
LIV	BK	LIS	1	1	0	2
TOTAL			3	1	0	4

IMPORTANT

Enter the values separated by bars (|)

Description:

- This preference lets you set which fields will show on the patron record on the Statistics tab.

2.1.12.23 TalkingTechItivaPhoneNotification

Default: Disable

Asks: ____ patron phone notifications using Talking Tech i-tiva (overdues, predues and holds notices currently supported).

Values:

- Disable
- Enable

Description:

- To learn more about setting up this third party product view the [Talking Tech Appendix](#).

IMPORTANT

Requires that you have [EnhancedMessagingPreferences](#) set to Allow to use.

2.1.12.24 uppercasesurnames

Default: Don't

Asks: ___ store and display surnames (last names) in upper case.

Values:

- Do
- Don't

2.1.13 Searching

Get there: More > Administration > Global System Preferences > Searching

2.1.13.1 Features

2.1.13.1.1 IncludeSeeFromInSearches Default: Don't include

Asks: ___ *see from* (non-preferred form) headings in bibliographic searches.

Values:

- Don't include
- Include

Description:

- When this preference is set to include the search engine indexer will insert *see from* headings from authority records into bibliographic records when indexing, so that a search on an obsolete term will turn up relevant records. For example when you search for cookery (the old term) you get titles with the heading of cooking (the new term).

IMPORTANT

You will need to reindex your bibliographic database when changing this preference.

2.1.13.1.2 OpacGroupResults Default: Don't use

Asks: ___ PazPar2 to group similar results on the OPAC.

Values:

- Don't use
- Use

IMPORTANT

This requires that **PazPar2** is set up and running.

2.1.13.1.3 QueryAutoTruncate Default: automatically

Asks: Perform wildcard searching (where, for example, Har would match Harry and harp) ___ (The * character would be used like so: Har* or *logging.)

Values:

- automatically
- only if * is added

Description:

- This setting allows for searches to be automatically truncated or for additional characters to be added to the end of a search string. When set to "automatically" the search string automatically ends with a wildcard function. For example, a search for the word "invent" with auto truncation enabled will also retrieve results for inventor, invention, inventory, etc. If you don't want this to happen automatically you can still perform wildcard searches manually by adding an asterisk (*). Typing "invent*" even with auto truncation disabled will retrieve the same inventor, invention, inventory results. Auto truncation bypasses the necessity to type long search strings in their entirety.

2.1.13.1.4 QueryFuzzy Default: Try

Asks: ___ to match similarly spelled words in a search (for example, a search for flang would also match flange and fang)

Values:

- Don't try
- Try

Description:

- This preference enables "fuzzy" searching, in which the search engine returns results that are similar to, but not exactly matching, the word or words entered by the user. This preference enables the search function to compensate for slightly misspelled names or phrases.

IMPORTANT

Requires that **UseICU** set to 'Not using'

2.1.13.1.5 QueryStemming Default: Try

Asks: ___ to match words of the same base in a search

Values:

- Don't try
- Try
 - A search for enabling would also match enable and enabled

Description:

- This preference enables word stemming. Stemming allows the search function to return multiple versions of the same word, as well as related terms (i.e., both fish and fishing would be returned).

2.1.13.1.6 QueryWeightFields Default: Enable

Asks: ___ ranking of search results by relevance

Values:

- Disable
- Enable

2.1.13.1.7 TraceCompleteSubfields Default: Force

Asks: ___ subject tracings in the OPAC and Staff Client to search only for complete-subfield matches.

Values:

- Don't force
 - Searches for subject keywords (example: opac-search.pl?q=su:World%20Wide%20Web)
- Force
 - Searches for complete subject fields (example: opac-search.pl?q=su,complete-subfield:World%20Wide%20Web)

Description:

- When TraceCompleteSubfields is set to "force," clicking on links in non-authority controlled subject tracings will only find other records where the entire subfields match. Leaving it at "don't force" does a keyword search of the subject indexes.

IMPORTANT

This preference assumes that you're using XSLT stylesheets as set in the **OPACXSLTDe-tailsDisplay** preference.

2.1.13.1.8 TraceSubjectSubdivisions Default: Include

Asks: ___ subdivisions for searches generated by clicking on subject tracings.

Values:

- Don't include
 - Searches for subject keywords (example: opac-search.pl?q=su,complete-subfield:%22Web%20sites%22)
- Include
 - Searches for complete subject fields (example: opac-search.pl?q=(su,complete-subfield:%22Web%20sites%22)%20subfield:%22Design.%22)

Description:

- When TraceSubjectSubdivisions is set to "Include," if you click on a subject with subdivisions (subfields other than 'a') they will be searched along with the subject heading (subfield 'a'). To have only the subject heading (subfield 'a') searched, set this preference to "Don't include."

IMPORTANT

This preference assumes that you're using XSLT stylesheets as set in the [OPACXSLTDetailsDisplay](#) preference.

2.1.13.1.9 UseICU Default: Not using

Asks: ___ ICU Zebra indexing.

Values:

- Not using
- Using

Description:

- ICU is a set of code libraries providing Unicode and Globalization support for software applications. What this means is ICU Zebra indexing is only necessary if you use non-roman characters in your cataloging. If using ICU Zebra indexing you will want to not use [QueryFuzzy](#).

IMPORTANT

This setting will not affect Zebra indexing, it should only be used to tell Koha that you have activated ICU indexing if you have actually done so, since there is no way for Koha to figure this out on its own.

IMPORTANT

Talk to your system administrator when changing this preference to make sure that your system is set up properly for this to work.

2.1.13.2 Results Display**2.1.13.2.1 defaultSortField & defaultSortOrder** defaultSortField Default: author

defaultSortOrder Default: ascending

Asks: By default, sort search results in the staff client by ___, ___

Description:

- These preferences set the default sort field and sort order for searches on the staff side. Regardless of your choice, the other sort options are still available in the drop down list on the advanced search page.

defaultSortField Values:

- author
- call number

- date added
- date of publication
- relevance
- title
- total number of checkouts

defaultSortOrder Values:

- ascending
- descending
- from A to Z
- from Z to A

2.1.13.2.2 **displayFacetCount** Default: Don't show

Asks: ___ facet counts.

Description:

- This preference lets you decide if you show how many times a facet is used in your search results in the OPAC and the staff client. The relevance of these numbers highly depends on the value of the **maxRecordsForFacets** preference. Showing these numbers can potentially effect the performance of your searching, so test your system with different values for this preference to see what works best.

Values:

- Don't show
- Show

2.1.13.2.3 **FacetLabelTruncationLength** Default: 20

Asks: Truncate facets length to ___ characters, in OPAC/staff interface.

Description:

- In the OPAC and the staff client your facets are cut off at 20 characters by default. Depending on your layout this may be too many or two few letters, this preference lets you decide what number is best for your library's design.

2.1.13.2.4 **maxItemsInSearchResults** Default: 20

Asks: Show up to ___ items per biblio in the search results

Description:

- This preference will let you set how many results display by default when a search is run on the Staff Client.

2.1.13.2.5 maxRecordsForFacets Default: 20

Asks: Build facets based on ___ records from the search results.

Description:

- By default Koha only bases facets on the first page of results (usually 20 results). This preference lets you tell Koha to based the facet descriptions and numbers on any number of search results returned. The higher this number the longer it will take for your search results to return, so test with various different values to find the best balance for your library.

2.1.13.2.6 numSearchResults Default: 20

Asks: By default, show ___ results per page in the staff client.

2.1.13.2.7 OPACdefaultSortField & OPACdefaultSortOrder OPACdefaultSortField Default: relevance

OPACdefaultSortOrder Default: ascending

Asks: By default, sort search results in the OPAC by ___, ___

Description:

- These preferences set the default sort field and sort order for searches on the OPAC. Regardless of your choice, the other sort options are still available in the drop down list on the advanced search page.

OPACdefaultSortField Values:

- author
- call number
- date added
- date of publication
- relevance
- title
- total number of checkouts

OPACdefaultSortOrder Values:

- ascending
- descending
- from A to Z
- from Z to A

2.1.13.2.8 OPACItemsResultsDisplay Default: Don't show

Asks: ___ an item's branch, location and call number in OPAC search results.

Values:

- Don't show
- Show

Description:

- This setting selects the information about an item that will display in the search results page of the OPAC. The results can display the status of an item and/or full details including branch, location, and call number. While the 'Show' option allows for more information to be displayed on the search results page, the information can be overwhelming for large collections with multiple branches.

2.1.13.2.9 OPACnumSearchResults Default: 20

Asks: By default, show ___ results per page in the OPAC.

2.1.13.3 Search Form

2.1.13.3.1 AdvancedSearchTypes Default: itemtype

Asks: Show tabs in OPAC and staff-side advanced search for limiting searches on the ___ fields (separate values with |).

Description:

- On the advanced search page you can choose to allow filters on one or all of the following: Item types (itemtypes), Collection Codes (ccode) and Shelving Location (loc). If you would like to be able to limit searches on item type and shelving location for example you would enter itemtypes|loc in the preference input box. The order of these fields will determine the order of the tabs in the OPAC and staff client advanced search screens. Values within the search type are OR'ed together, while each different search type is AND'ed together in the query limits. The current stored values are supported without any required modification. Each set of advanced search fields are displayed in tabs in both the OPAC and staff client. The first value in the AdvancedSearchTypes syspref is the selected tab; if no values are present, "itemtypes" is used. For non-itemtype values, the value in AdvancedSearchTypes must match the Authorised Value name, and must be indexed with 'mc-' prefixing that name.

2.1.13.3.2 expandedSearchOption Default: don't show

Asks: By default, ___ "More options" on the OPAC and staff advanced search pages.

Values:

- don't show
- show

2.1.14 Serials

Get there: More > Administration > Global System Preferences > Serials

2.1.14.1 opacSerialDefaultTab

Default: Subscriptions tab

Asks: Show ___ as default tab for serials in OPAC.

Values:

- Holdings tab
- Serial Collection tab

IMPORTANT

Please note that the Serial Collection tab is currently available only for systems using the UNIMARC standard.

Library	Serial collection	Item callnumber
Bibliothèque Lettres et Sciences Humaines - Aix	vol. 43 no. 1 (1939) - vol. 43 no. 3 (1939) ; vol. 50 no. 1 (1946) - vol. 111 no. 4 (2007)	Wp 15269

- Subscriptions tab

Holdings (14)	Title notes	Subscriptions	Comments (0)
-----------------	-------------	---------------	----------------

This is a serial

There are 6 subscription(s) associated with this title.

At library: Fairfield

This subscription is closed.

Combined issues in Jan/Feb and Jul/Aug.

Subscription from: to: 01/01/2013

The 4 latest issues for this subscription:

Issue #	Date	Status	Note
V. 32, N. 3	02/23/2012	Arrived	
V. 32, N. 2	02/23/2012	Arrived	
V. 32, N. 1	02/23/2012	Arrived	
V. 31, N. 10	08/28/2012	Arrived	

2.1.14.2 OPACSerialIssueDisplayCount

Default: 3

Asks: Show the ___ previous issues of a serial on the OPAC.

Description:

- This preference allows the administrator to select the number of recent issues for each serial which appear in the OPAC when the serial is accessed. This is just the default value, patrons can always click to see a full list of serials.

2.1.14.3 RenewSerialAddsSuggestion

Default: Don't add

Asks: ___ a suggestion for a biblio when its attached serial is renewed.

Values:

- Add
- Don't add

Description:

- If set to "Add", this preference will automatically add a serial to the Acquisitions Purchase Suggestions menu when clicking the 'renew' option. If you don't use the Acquisitions module to manage serials purchases it's best to leave this set as 'Don't add.'

2.1.14.4 RoutingListAddReserves

Default: Place

Asks: ___ received serials on hold if they are on a routing list.

Values:

- Place
- Don't place

2.1.14.5 RoutingListNote

Asks: Include following note on all routing lists

Description:

- Text entered in this box will appear below the routing list information.

2.1.14.6 RoutingSerials

Default: Don't add

Asks: ___ received serials to the routing list.

Description:

- This preference determines if serials routing lists are enabled or disabled for the library. When set to "Add", serials routing is enabled and a serial can be directed through a list of people by identifying who should receive it next. The list of people can be established for each serial to be passed using the Serials module. This preference can be used to ensure each person who needs to see a serial when it arrives at the library will get it. Learn more in the [routing list](#) section of this manual.

Values:

- Add
- Don't add

2.1.14.7 StaffSerialIssueDisplayCount

Default: 3

Asks: Show the ___ previous issues of a serial on the staff client.

Description:

- This preference allows the administrator to select the number of recent issues for each serial which appear in the Staff Client when the serial is accessed. This is just the default value, staff members can always click to see a full list of serials.

2.1.14.8 SubscriptionDuplicateDroppedInput

Asks: List of fields which must not be rewritten when a subscription is duplicated (Separated by pipe |) ____

Description:

- When duplicating a subscription sometimes you don't want all of the fields duplicated, using this preference you can list the fields that you don't want to be duplicated. These field names come from the subscription table in the Koha database. Learn what fields are in that table on the [Koha DB Schema](#) site.

2.1.14.9 SubscriptionHistory

Default: full history

Asks: When showing the subscription information for a bibliographic record, preselect ____ view of serial issues.

Values:

- brief history

Issues for a subscription

Normal view Brief history Full history

Subscription information for Computers in libraries.

The current subscription began on 01/01/2012 and is issued every month for 12 months

The first subscription was started on

The subscription expired on 01/01/2013

Fairfield Combined issues in Jan/Feb and Jul/Aug.

Available issues

V. 31, N. 1; V. 31, N. 4; V. 31, N. 3; V. 31, N. 5; V. 31, N. 2; V. 31, N. 6; V. 31, N. 7; Testing; V. 31, N. 9; V. 32, N. 3; V. 32, N. 2; V. 32, N. 1

- full history

Subscription information for Computers in libraries.

Normal view Brief history Full history

Show year:

Date ▾	Library ⇅	Notes ⇅	Date received ⇅	Number ⇅	Status ⇅	Subscription ⇅
01/15/2012			02/23/2012	V. 32, N. 1	Arrived	1
01/15/2012			11/08/2011	Volume 36 / Number 1	Arrived	5
01/15/2012			11/27/2011	Volume 31, Number 1	Arrived	6
03/15/2012			02/23/2012	V. 32, N. 2	Arrived	1
03/15/2012				Volume 36 / Number 2	Waiting	5
03/15/2012				Volume 31, Number 2	Waiting	6
03/15/2012			03/13/2012	V 39, N 2	Arrived	8

Description:

- This preference determines what information appears in the OPAC when the user clicks the More Details option. The 'brief' option displays a one-line summary of the volume and issue numbers of all issues of that serial held by the library. The 'full' option displays a more detailed breakdown of issues per year, including information such as the issue date and the status of each issue.

2.1.15 Staff Client

Get there: More > Administration > Global System Preferences > Staff Client

2.1.15.1 Appearance

2.1.15.1.1 Display856uAsImage Default: Neither details or results page

Asks: Display the URI in the 856u field as an image on: ____

Values:

- Both results and details pages

-

IMPORTANT

Not implemented yet

- Detail page only

-

IMPORTANT

XSLTDetailsDisplay needs to be on for this preference to work.

IPod Touch

Type:  Visual Material

Description: 1 IPod .

Online Resources:

OPAC view: [Open in new window](#)

Holdings		Descriptions					
Item type	Current Location	Home Library	Call Number	Status	Last seen	Barcode	Spine Label
 KIT	Fairview	Fairview		Available	04/01/2011	316190004778978	Print Label

- Neither details or results page

- Results page only

-

IMPORTANT

Not yet implemented

Description:

- In addition to this option being set, the corresponding XSLT option must be turned on. Also, the corresponding 856q field must have a valid MIME image extension (e.g., "jpg") or MIME image type (i.e. starting with "image/"), or the generic indicator "img" entered in the field. When all of the requirements are met, an image file will be displayed instead of the standard link text. Clicking on the image will open it in the same way as clicking on the link text. When you click on the image

it should open to full size, in the current window or in a new window depending on the value in the system pref **OPACURLOpenInNewWindow**.

2.1.15.1.2 intranet_includes Default: includes

Asks: Use include files from the ___ directory in the template directory, instead of includes/. (Leave blank to disable)

2.1.15.1.3 intranetcolorstylesheet Asks: Include the stylesheet /intranet-tmpl/prog/en/css/ ___ on all pages in the staff interface.

Description:

- This preference is used to set the background color and style of the Staff Client. The value is a .css file. The system administrator should determine which file is appropriate.

IMPORTANT

Leave this field blank to disable.

2.1.15.1.4 IntranetFavicon Asks: Use the image at ___ for the Staff Client's favicon.

IMPORTANT

This should be a complete URL, starting with http://

TIP

Turn your logo into a favicon with the [Favicon Generator](#).

Description:

- The favicon is the little icon that appears next to the URL in the address bar in most browsers. The default value for this field (if left blank) is the small 'K' in the Koha logo.

2.1.15.1.5 IntranetmainUserblock Asks: Show the following HTML in its own column on the main page of the staff client

IntranetmainUserblock	<p>Show the following HTML in its own column on the main page of the staff client:</p> <pre><p style="color:red">Remember to remind patrons that the library will be closed this Friday when they come to check out.</p></pre>
-----------------------	--

<p><u>Circulation</u></p> <ul style="list-style-type: none"> • Check out to: <input type="text"/> <input type="button" value="OK"/> • Check in • Transfers <p><u>Patrons</u></p> <ul style="list-style-type: none"> • Search: <input type="text"/> <input type="button" value="OK"/> <p><u>Search</u></p> <ul style="list-style-type: none"> • Search catalog: <input type="text"/> <input type="button" value="OK"/> <p><u>Lists</u></p>	<p><u>Cataloging</u></p> <ul style="list-style-type: none"> • Add MARC Record • Authorities • Serials <p><u>Acquisitions</u></p> <p><u>Reports</u></p> <p><u>Koha administration</u></p> <ul style="list-style-type: none"> • System preferences <p><u>Tools</u></p> <p><u>About Koha</u></p>
--	---

Remember to remind patrons that the library will be closed this Friday when they come to check out.

2.1.15.1.6 IntranetNav Asks: Show the following HTML in the More menu at the top of each page on the staff client (should be a list of links or blank)

2.1.15.1.7 IntranetSlipPrinterJS Asks: Use the following JavaScript for printing slips.
Description:

- The most logical use of this preference is in conjunction with the [jsPrintSetup](#) Firefox add-on. Learn more about this preference and the add-on setup on the Koha wiki at http://wiki.koha-community.org/wiki/Setting_up_slip_printer_to_print_silently.

2.1.15.1.8 intranetstylesheet Asks: Include the stylesheet at ___ on all pages in the staff interface, instead of the default.

Description:

- The Intranetstylesheet preference is a layout and design feature for the intranet or staff client. To change the stylesheet from the original, place in this preference the file path to the style sheet - include the entire url starting with `http://`. This preference allows a library to customize the appearance of the Staff Client.

IMPORTANT

This should be a complete URL, starting with `http://`

2.1.15.1.9 IntranetUserCSS Asks: Include the following CSS on all pages in the staff client

2.1.15.1.10 intranetuserjs Asks: Include the following JavaScript on all pages in the staff interface

intranetuserjs	<p>Include the following JavaScript on all pages in the staff interface:</p> <pre>\$(document).ready(function(){ \$("#login #submit").parent().after("<p>Self-Checkout</p>"); });</pre>
----------------	--

Description:

- This preference allows the administrator to enter JavaScript or JQuery that will be embedded across all pages of the Staff Client. Administrators may use this preference to customize some of the interactive sections of Koha, customizing the text for the login prompts, for example. Sample JQuery scripts used by Koha libraries can be found on the wiki: http://wiki.koha-community.org/wiki/JQuery_Library.

2.1.15.1.11 SlipCSS Asks: Include the stylesheet at ___ on Issue and Reserve Slips.

IMPORTANT

This should be a complete URL, starting with http://

Description:

- If you would like to style your receipts or slips with a consistent set of fonts and colors you can use this preference to point Koha to a stylesheet specifically for your slips.

2.1.15.1.12 **StaffAuthorisedValueImages** Default: Show

Asks: ___ images for authorized values (such as lost statuses and locations) in search results.

Values:

- Don't show
- Show

2.1.15.1.13 **staffClientBaseURL** Asks: The staff client is located at http:// ___

2.1.15.1.14 **template** Default: prog

Asks: Use the ___ theme on the staff interface.

Values:

- prog

2.1.15.1.15 **XSLTDetailsDisplay** Default: default

Asks: Display details in the staff client using XSLT stylesheet at ___

Values:

- leave empty to not use the XSLT stylesheet

– In previous versions of Koha this was the setting that read 'normally'

Library mashups :

exploring new ways to deliver library data /

Library mashups : exploring new ways to deliver library data /

by [Engard, Nicole C.](#)

Type:  Book

Publisher: Information Today, Inc., c2009 .

Description: 334 p. cm .

ISBN: 9781573873727.

Related Subjects: [Mashups \(World Wide Web\) -- Library applications](#) | [Libraries and the Internet](#) | [Library Web sites -- Design](#) | [Web site development](#)

Online Resources: [Click here to access online](#)

Contents: What is a mashup? / Darlene Fichter -- Behind the scenes : some technical details on mashups / Bonaria Biancu -- Making your data available to be mashed up / Ross Singer -- Mashing up with librarian knowledge / Thomas Brevik -- Information in context / Brian Herzog -- Mashing up the library website / Lichen Rancourt -- Piping out library data / Nicole C. Engard -- Mashups @ Libraries interact / Corey Wallis -- Library catalog mashup : using Blacklight to expose collections / Bess Sadler, Joseph Gilbert, and Matt Mitchell -- Breaking into the OPAC / Tim Spalding -- Mashing up open data with biblios.net Web services / Joshua Ferraro -- SOPAC 2.0 : the thrashable, mashable catalog / John Blyberg -- Mashups with the WorldCat Affiliate Services / Karen A. Coombs -- Flickr and digital image collections / Mark Dahl and Jeremy McWilliams -- Blip.tv and digital video collections in the library / Jason A. Clark -- Where's the nearest computer lab? : mapping up campus / Derik A. Badman -- The repository mashup map / Stuart Lewis -- The LibraryThing API and libraries / Robin Hastings -- ZACK bookmaps / Wolfram Schneider -- Federated database search mashup / Stephen Hedges, Laura Solomon, and Karl Jendretzky -- Electronic dissertation mashups using SRU / Michael C. Witt.

- put a path to define a XSLT file
 - ex: /path/to/koha/and/your/stylesheet.xsl
 - If in a multi-language system you can enter {langcode} in the path to tell Koha to look in the right language folder
 - * ex: /home/koha/src/koha-tmpl/intranet-tmpl/prog/{langcode}/xslt/intranetDetail.xsl
 - * ex. http://mykoha.org/{langcode}/stylesheet.xsl
- put an URL for an external specific stylesheet
 - ex: http://mykoha.org/stylesheet.xsl

Description:

- XSLT stylesheets allow for the customization of the details shows on the screen when viewing a bib record. This preference will allow you either use the default look that comes with Koha or design your own stylesheet.

2.1.15.1.16 XSLTResultsDisplay Default: default

Asks: Display results in the staff client using XSLT stylesheet at ____

Values:

- leave empty to not use the XSLT stylesheet
 - In previous versions of Koha this was the setting that read 'normally'
- enter "default" for the default one
- put a path to define a XSLT file
 - ex: /path/to/koha/and/your/stylesheet.xml
 - If in a multi-language system you can enter {langcode} in the path to tell Koha to look in the right language folder
 - * ex: /home/koha/src/koha-tmpl/intranet-tmpl/prog/{langcode}/xslt/intranetDetail.xml
 - * ex. <http://mykoha.org/{langcode}/stylesheet.xml>
- put an URL for an external specific stylesheet
 - ex: <http://mykoha.org/stylesheet.xml>

Description:

- XSLT stylesheets allow for the customization of the details shows on the screen when viewing the search results. This preference will allow you either use the default look that comes with Koha or design your own stylesheet.

2.1.15.1.17 yuipath Default: included with Koha

Asks: Use the Yahoo UI libraries ____

Values:

- from Yahoo's servers
 - With this option there is less demand on your servers, but if the Internet goes down there will be issues
- included with Koha
 - With this option calls are made faster, and they will still work if the Internet goes down

Description:

- The yuipath preference allows for the user to define a local path or web URL to the Yahoo User Interface Library (<http://developer.yahoo.com/yui/2/>). This library is a resource of developer tools including JavaScript and style sheets.

2.1.15.2 Options**2.1.15.2.1 HidePatronName** Default: Show

Asks: ____ the names of patrons that have items checked out or on hold on detail pages or the "Place Hold" screen.

Values:

- Don't show
- Show

2.1.15.2.2 intranetbookbag Default: Show

Asks: ____ the cart option in the staff client.

Values:

- Don't show
- Show

2.1.15.2.3 viewISBD Default: Allow

Asks: ___ staff to view records in ISBD form on the staff client.

Values:

- Allow
- Don't allow

2.1.15.2.4 viewLabeledMARC Default: Allow

Asks: ___ staff to view records in labeled MARC form on the staff client.

Values:

- Allow
- Don't allow

2.1.15.2.5 viewMARC Default: Allow

Asks: ___ staff to view records in plain MARC form on the staff client.

Values:

- Allow
- Don't allow

2.1.16 Web Services

Get there: More > Administration > Global System Preferences > Web Services

2.1.16.1 ILS-DI**2.1.16.1.1 ILS-DI** Default: Disable

Asks: ___ ILS-DI services for OPAC users

Values:

- Disable
- Enable

2.1.16.1.2 ILS-DI:AuthorizedIPs Asks: ___ allowed IPs to use the ILS-DI services**2.1.16.2 OAI-PMH****2.1.16.2.1 OAI-PMH** Default: Disable

Asks: ___ Koha's OAI-PMH server.

Values:

- Disable
- Enable

Description:

- For the Open Archives Initiative-Protocol for Metadata Harvesting (OAI-PMH) there are two groups of 'participants': Data Providers and Service Providers. Data Providers (open archives, repositories) provide free access to metadata, and may, but do not necessarily, offer free access to full texts or other resources. OAI-PMH provides an easy to implement, low barrier solution for Data Providers. Service Providers use the OAI interfaces of the Data Providers to harvest and store metadata. Note that this means that there are no live search requests to the Data Providers; rather, services are based on the harvested data via OAI-PMH. Koha at present can only act as a Data Provider. It can not harvest from other repositories. The biggest stumbling block to having Koha harvest from other repositories is that MARC is the only metadata format that Koha indexes natively. Visit <http://www.oaforum.org/tutorial/english/page3.htm> for diagrams of how OAI-PMH works.

Learn more about OAI-PMH at: <http://www.openarchives.org/pmh/>

2.1.16.2.2 OAI-PMH:archiveID Default: KOHA-OAI-TEST

Asks: Identify records at this site with the prefix ___ :

2.1.16.2.3 OAI-PMH:AutoUpdateSets Default: Disable

Asks: ___ automatic update of OAI-PMH sets when a bibliographic record is created or updated.

Values:

- Disable
- Enable

2.1.16.2.4 OAI-PMH:ConfFile If this preference is left empty, Koha's OAI Server operates in normal mode, otherwise it operates in extended mode. In extended mode, it's possible to parameter other formats than marcxml or Dublin Core. OAI-PMH:ConfFile specify a YAML configuration file which list available metadata formats and XSL file used to create them from marcxml records.

For more information, see the [sample conf file](#) in the appendix.

2.1.16.2.5 OAI-PMH:MaxCount Default: 50

Asks: Only return ___ records at a time in response to a ListRecords or ListIdentifiers query.

Description:

- This is the maximum number of records that would be returned based on ListRecord or ListIdentifier queries from harvesters. ListRecords harvest the entire records while the ListIdentifier is an abbreviated form of ListRecords, retrieving only headers rather than records.

2.1.16.3 Reporting**2.1.16.3.1 SvcMaxReportRows** Default: 10

Asks: Only return ___ rows of a report requested via the reports web service.

Description:

- This value will be used to limit the number of results returned by [public reports](#).

2.2 Basic Parameters

Get there: More > Administration

IMPORTANT

Configure all 'parameters' in the order they appear.

2.2.1 Libraries & Groups

When setting up your Koha system you will want to add information for every library that will be sharing your system. This data is used in several areas of Koha.

- *Get there:* More > Administration > Basic Parameters > Libraries and Groups

When visiting this page you are presented with a list of the libraries and groups that have already been added to the system.

New Library
New Group

Libraries

Name	Code	Address	Properties	IP
Centerville	CPL	Jefferson Summit		Edit Delete

Group(s): Search Domain

Name	Code	Description		
Smith County Libraries	SMITH		Edit	Delete

Group(s): Properties

Name	Code	Description		
Academic Libraries	ACA		Edit	Delete
Public Libraries	PUB		Edit	Delete

2.2.1.1 Adding a Library

To add a new library:

- Click 'New Library'
- The top of the form asks for some basics about the library

New library

Library code

Name

Group(s):

Main Libraries

- The library code should not contain any spaces and be 10 or fewer characters. This code will be used as a unique identifier in the database.
- The name will be displayed on the OPAC wherever the library name displays to the public and should be a name that makes sense to your patrons.
- If you have **groups** set up you can choose what group this library belongs to after entering in the code and name

- Next you can enter basic contact info about the branch

Address line 1
 Address line 2
 Address line 3
 City
 State
 Zip/Postal code
 Country
 Phone
 Fax
 Email
 URL

OPAC info

B *I* | | | -- Format -- |

Path:

IP Can be entered as a single IP, or a subnet such as 192.168.1.*
 Notes

- The address and contact fields can be used to make notices custom for each library
- The email address field is not required, but it should be filled for every library in your system

*

IMPORTANT

Be sure to enter a library email address to make sure that notices are sent to and from the right address

- If the URL field is populated then the library name will be linked in the holdings table on the OPAC

 7-DAY BOOK Books	Fairfield	DVD
 7-DAY BOOK Books	Nicole's Library	Library & Information Science

- The OPAC Info box is for you to put information about the library that will appear in the OPAC when the branch name is moused over in the holdings table

 7-DAY BOOK Books	Nicole's Library	Library & Information Science	Z674 Shelf	
 7-DAY BOOK Books	Franklin	<div style="border: 1px solid black; padding: 5px;"> 123 Library Street Philadelphia, PA 19001 Ph: 215.555.1234 nengard@bywatersolutions.com http://web2learning.net </div>		
 7-DAY BOOK Books	Midway			
 7-DAY BOOK Books	Nicole's Library			Z674 Shelf
 7-DAY BOOK Books				

- IP Address does not have to be filled in unless you plan on limiting access to your staff client to a specific IP Address

*

IMPORTANT

 An IP address is required if you have enabled **AutoLocation**

- Finally, if you have any notes you can put them here. These will not show in the OPAC

TIP

 Of the fields listed, only 'Library code' and 'Name' are required

2.2.1.2 Editing/Deleting a Library

You will be unable to delete any library that has patrons or items attached to it.

Library cannot be deleted because there are patrons using that library

Each library will have an 'Edit' link to the right of it. Click this link to edit/alter details associated with the library in question.

IMPORTANT

 You will be unable to edit the 'Library code'

2.2.1.3 Adding a group

To add a Search Domain or Library Property Group click the 'New Group' button at the top of the screen

Add group

Of the fields on the group form, 'Category code' and 'Name' are the only required fields

2.2.1.3.1 Search Domain Groups Search Domain Groups allow you to search a group of libraries at the same time instead of searching just one library or all libraries.

Group(s): Search Domain

Name	Code	Description		
Smith County Libraries	SMITH		Edit	Delete

To see Search Domain Groups in action visit the staff client advanced search page in your Koha system:

Location and availability:

2.2.1.3.2 Library Property Groups You can assign specific categories to your libraries by adding groups for them

Group(s): Properties

Name	Code	Description		
Academic Libraries	ACA		Edit	Delete
Public Libraries	PUB		Edit	Delete

Properties are then applied to libraries via the add or edit library form

Modify library

Library code FFL

Name

Group(s):

Main Libraries

2.2.2 Item Types

Koha allows you to organize your collection by item types and collection codes.

- *Get there:* More > Administration > Basic Parameters > Item Types

Item types typically refer to the material type (book, cd, dvd, etc), but can be used in any way that works for your library.

New Item Type

Item Types Administration

Image	Code	Description	Not for loan	Renewable	Charge	Actions
	BK	Books		5 times	0.00	Edit Delete

2.2.2.1 Adding Item Types

To add a new item type, simply click the 'New Item Type' button at the top of the Item Types page.

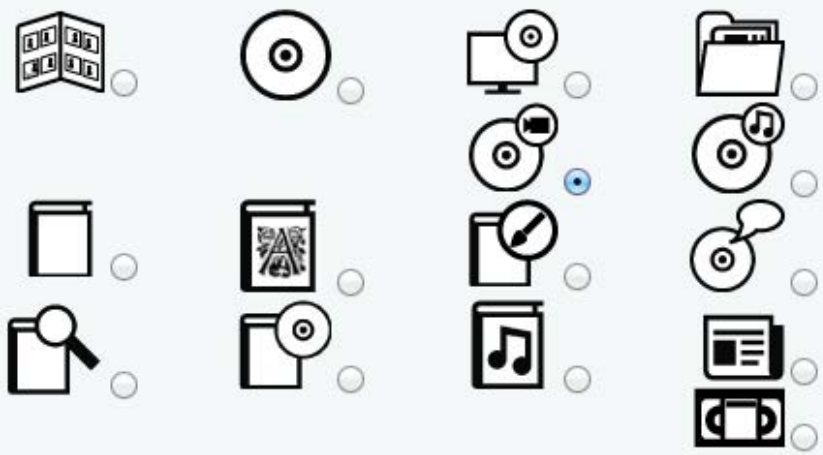

Add item type

Item type

Description

Choose an icon:

None libime-kids crystal-clear bridge Seshat npl **carredart** vokal Remote image

Not for loan (if checked, no item of this type can be issued. If not checked, every item of this type can be issued unless notforloan is set for a specific item)

Rental charge:

Summary:

Enter a summary that will overwrite the default one in search results lists. Example, for a website itemtype :
`open site` will show the link just below the title

- In the 'Item Type' field, enter a short code for your item type
- The description is the plain text definition of the item type
- You can choose to have an image associated with your item type
 - You can choose from a series of image collections
 - You can link to a remote image
 - Or you can just have no image associated with the item type
 -

IMPORTANT

To have your item type images appear in the OPAC you need to set nolitem-
Typelimages to 'Show'

* *Get there:* More > Administration > Global System Preferences > **Admin**

- For items that do not circulate, check the 'Not for loan' options
 - Items marked 'Not for loan' will appear in the catalog, but cannot be checked out to patrons
- For items that you charge a rental fee for, enter the total fee you charge in the 'Rental charge' field

–

IMPORTANT

Do not enter symbols in this field, only numbers and decimal points (ex. \$5.00 should be entered as 5 or 5.00)

- This will charge the patron on checkout
- When finished, click 'Save Changes'

–

TIP

All fields, with the exception of the 'Item Type' will be editable from the Item Types list

- Your new item type will now appear on the list

	DVD	DVD		No	1.00	Edit Delete
---	---------------------	-----	--	----	------	---

2.2.2.2 Editing Item Types

Each item type has an Edit button beside it. To edit an item simply click the 'Edit' link.

IMPORTANT

You will not be able to edit the code you assigned as the 'Item Type' but you will be able to edit the description for the item.

2.2.2.3 Deleting Item Types

Each item has a Delete button beside it. To delete an item, simply click the 'Delete' link.

IMPORTANT

You will not be able to delete item types that are being used by items within your system.

Cannot Delete Item Type

This record is used 4 times. Deletion is not possible.

Item type	BK
Description	Books
Loan length	
Renewals	Allowed
Rental charge	0.00

2.2.3 Authorized Values

Authorized values can be used in several areas of Koha. One reason you would add an authorized value category would be to control the values that can be entered into MARC fields by catalogers.

- *Get there:* More > Administration > Basic Parameters > Authorized Values

2.2.3.1 Existing Values

Koha installs with pre-defined values that your library is likely to use, for instance 'Lost'.

- Asort1
 - Used for acquisitions statistical purposes
- Asort2
 - Used for acquisitions statistical purposes
- BOR_NOTES
 - Values for custom patron messages that appear on the circulation screen and the OPAC. The value in the Description field should be the message text and is limited to 200 characters.

Authorized values for category BOR_NOTES:

Page(s): ⏪ ⏩ 1/1 ⏪ ⏩ Entries/page: 50					
Authorized value	Description	Description (OPAC)	Icon	Edit	Delete
UMB	An umbrella was left in the library			Edit	Delete
COAT	Your coat was found			Edit	Delete

- Bsort1
 - Values that can be entered to fill in the patron’s sort 1 field
- Bsort2
 - Values that can be entered to fill in the patron’s sort 2 field
- CART
 - Is the shelving cart location, used by [InProcessingToShelvingCart](#) and [ReturnToShelvingCart](#)
- CCODE
 - Collection codes (appears when cataloging and working with items)
- DAMAGED
 - Descriptions for items marked as damaged (appears when cataloging and working with items)

- HINGS_AS
 - General Holdings: Acquisition Status Designator :: This data element specifies acquisition status for the unit at the time of the holdings report.a
- HINGS_C
 - General Holdings: Completeness Designator
- HINGS_PF
 - Physical Form Designators
- HINGS_RD
 - General Holdings: Retention Designator :: This data element specifies the retention policy for the unit at the time of the holdings report.
- HINGS_UT
 - General Holdings: Type of Unit Designator
- LOC
 - Shelving location (usually appears when adding or editing an item)
- LOST
 - Descriptions for the items marked as lost (appears when adding or editing an item)
 -

IMPORTANT

Values given to lost statuses should be numeric and not alphabetical in order for statuses to appear properly

- MANUAL_INV
 - Values for manual invoicing types
 -

IMPORTANT

The value set as the Authorized Value for the MANUAL_INV authorized value category will appear as the Description and the Authorized Value Description will be used as the amount. Enter monetary amounts in the description without currency symbols.

- NOT_LOAN
 - Reasons why a title is not for loan
 -

IMPORTANT

Values given to lost statuses should be numeric and not alphabetical in order for statuses to appear properly

-

TIP

Negative number values will still allow holds (use for on order statuses for example) where as positive numbers will not allow holds or checkouts

- PROC
 - The location to be used for **NewItemsDefaultLocation** (change description as desired), also the location expected by **InProcessingToShelvingCart**.
- REPORT_GROUP
 - A way to sort and filter your reports, the default values in this category include the Koha modules (Accounts, Acquisitions, Catalog, Circulation, Patrons)

Authorized values for category REPORT_GROUP:

Page(s):  1/1  Entries/page: 50 

Authorized value	Description	Description (OPAC)	Icon	Edit	Delete
ACC	Accounts			Edit	Delete
ACQ	Acquisitions			Edit	Delete
CAT	Catalog			Edit	Delete
CIRC	Circulation			Edit	Delete
PAT	Patrons			Edit	Delete

- REPORT_SUBGROUP
 - Can be used to further sort and filter your reports. This category is empty by default. Values here need to include the authorized value code from REPORT_GROUP in the Description (OPAC) field to link the subgroup to the appropriate group.

Authorized values for category REPORT_SUBGROUP:

Page(s):  1/1  Entries/page: 50 

Authorized value	Description	Description (OPAC)	Icon	Edit	Delete
ADD	Added	CAT		Edit	Delete
PADD	Added	PAT		Edit	Delete
DEL	Deleted	CAT		Edit	Delete
HOLD	Holds	CIRC		Edit	Delete
TRANS	Transfers	CIRC		Edit	Delete

- RESTRICTED
 - Restricted status of an item
- SUGGEST
 - List of patron suggestion reject or accept reasons (appears when managing suggestions)
- WITHDRAWN
 - Description of a withdrawn item (appears when adding or editing an item)
- YES_NO
 - A generic authorized value field that can be used anywhere you need a simple yes/no pull down menu.

2.2.3.2 Add new Authorized Value Category

In addition to the existing categories that come by default with Koha, librarians can add their own authorized value categories to control data that is entered into the system. To add a new category:

- Click 'New Category'

New category

- Limit your Category to 10 characters (something short to make it clear what the category is for)

–

IMPORTANT

Category cannot have spaces or special characters other than underscores and hyphens in it.

- When adding a new category you're asked to create at least one authorized value

– Enter a code for your Authorized Value into the 'Authorized value' field

*

IMPORTANT

Authorized value is limited to 80 characters and cannot have spaces or special characters other than underscores and hyphens in it.

– Use the Description field for the actual value that will be displayed. If you want something different to show in the OPAC, enter a 'Description (OPAC)'

– If you have **StaffAuthorisedValueImages** and/or **AuthorisedValueImages** set to show images for authorized values you can choose the image under 'Choose an icon'

- Click 'Save'

- Your new category and value will appear on the list of Authorized Values

Show Category: MARC504

Category	Aut	Description	Icon	Edit	Delete
MARC504	IND	Asort1		Edit	Delete
MARC504	IND	Asort2		Edit	Delete
MARC504	IND	BOR_NOTES		Edit	Delete
		Bsort1		Edit	Delete
		Bsort2			
		CCODE			
		DAMAGED			
		HINGS_AS			
		HINGS_C			
		HINGS_PF			
		HINGS_RD			
		HINGS_UT			
		LOC			
		LOST			
		MANUAL_INV			
		MARC504			

2.2.3.3 Add new Authorized Value

New authorized values can be added to any existing or new category. To add a value:

- Click 'New authorized value for ...'

New authorized value

Category MARC504

Authorized value

Description

Description (OPAC)

Choose an icon:

None
liblime-kids
crystal-clear
bridge
Seshat
npl
carredart
vokal

No image:

Save
Cancel

- Enter a code for your Authorized Value into the 'Authorized value' field

–

IMPORTANT

Authorized value is limited to 80 characters and cannot have spaces or special characters other than underscores and hyphens in it.

- Use the Description field for the actual value that will be displayed. If you want something different to show in the OPAC, enter a 'Description (OPAC)'
- If you have StaffAuthorisedValueImages and/or AuthorisedValueImages set to show images for authorized values you can choose the image under 'Choose an icon'

- Click 'Save'
- The new value will appear in the list along with existing values

Show Category:

Category	Authorized value	Description	Icon	Edit	Delete
MARC504	INDBIB	Includes index and bibliographic references.		Edit	Delete
MARC504	INDX	Includes index.		Edit	Delete

2.3 Patrons & Circulation

Settings for controlling circulation and patron information.

2.3.1 Patron Categories

Patron categories allow you to organize your patrons into different roles, age groups, and patron types.

- *Get there:* More > Administration > Patrons & Circulation > Patron Categories

New Category

Patron Category Administration

Page(s): 1/1 Entries/page: 20

Code	Category name	Type	Enrollment period	Age required	Upper age limit	Enrollment fee	Overdue	Lost Items	Hold fee	Messaging	
B	Board	Prof.	99 months	5 years	17 years	0.00	Yes	Shown	0.00	Item Checkout : email Hold Filled : sms Item Due : email	Edit Delete
HB	Home Bound	Adult	99 months	18 years	999 years	0.00	Yes	Shown	0.00		Edit Delete
IL	Inter-Library Loan	Org.	99 months	18 years	999 years	0.00	Yes	Shown	0.00		Edit Delete
INH	In house	Statistical	999 months	0 years	0 years	0.00	No	Shown	0.00		Edit Delete
J	Juvenile	Child	99 months	5 years	17 years	0.00	Yes	Shown	10.00		Edit Delete
K	Kid	Child	99 months	5 years	17 years	0.00	Yes	Shown	0.00		Edit Delete

Patrons are assigned to one of six main categories:

- Adult
 - Most common patron type, usually used for a general 'Patron' category.
- Child
 - Children patrons can have a guardian to be attached to them.
- Staff
 - Librarians (and library workers) should be assigned the staff category so that you can **set their permissions** and give them access to the staff client.
- Organizational
 - Organizational patrons are organizations. Organizations can be used as guarantors for Professional patrons.
- Professional
 - Professional patrons can be linked to Organizational patrons
- Statistical
 - This patron type is used strictly for statistical purposes, such as in house use of items.

2.3.1.1 Adding a patron category

To add a new patron category click 'New Category' at the top of the page

New category

Category code:

Description:

Enrollment period: **Choose one**

In months: months

Until date: 

Age required: years

Upperage limit: years

Enrollment fee:

Overdue notice required:

Lost items in staff client:

Hold fee:

Category type:

Default messaging preferences for this patron category

	Days in advance	SMS	Email	Digests only?	Do not notify
Advance notice	<input type="text" value="0"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Item checkout	-	<input type="checkbox"/>	<input type="checkbox"/>	-	<input type="checkbox"/>
Hold filled	-	<input type="checkbox"/>	<input type="checkbox"/>	-	<input type="checkbox"/>
Item due	-	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Item check-in	-	<input type="checkbox"/>	<input type="checkbox"/>	-	<input type="checkbox"/>

- The 'Category Code' is an identifier for your new code.

-

IMPORTANT

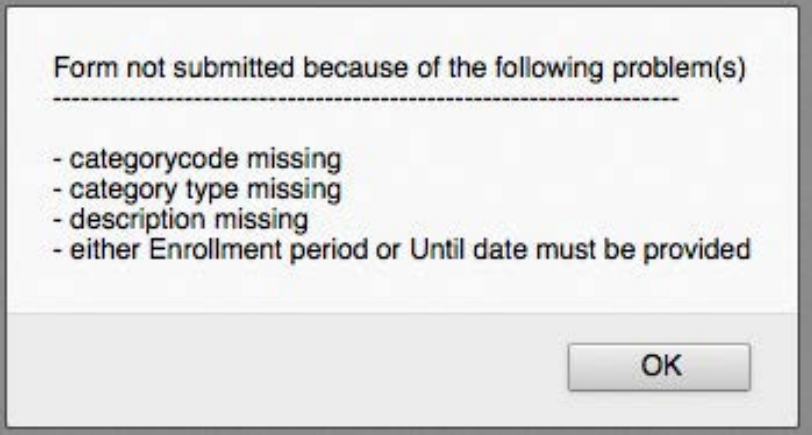

The category code is limited to 10 characters (numbers and letters)

-

IMPORTANT

This field is required in order to save your patron category. If left blank you will be presented with an error.

The error dialog box contains the following text:

Form not submitted because of the following problem(s)

- categorycode missing
- category type missing
- description missing
- either Enrollment period or Until date must be provided

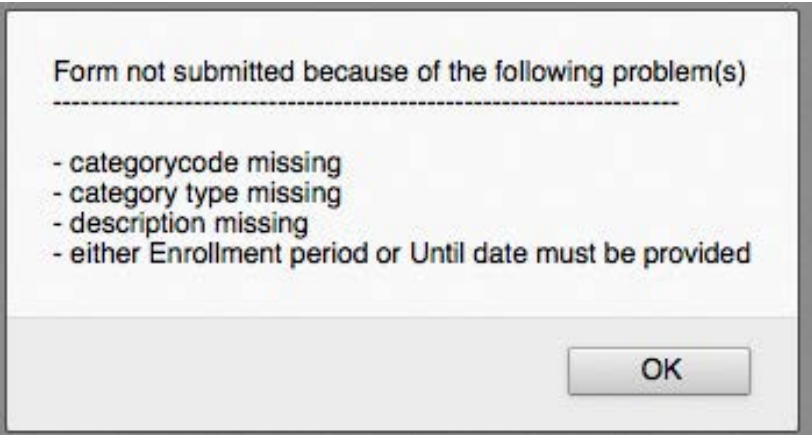

OK

- Enter a plain text version of the category in the 'Description' field.

-

IMPORTANT

This field is required in order to save your patron category. If left blank you will be presented with an error.

The error dialog box contains the following text:

Form not submitted because of the following problem(s)

- categorycode missing
- category type missing
- description missing
- either Enrollment period or Until date must be provided

OK

- Enrollment period (in months) should be filled in if you have a limited enrollment period for your patrons (eg. Student cards expire after 9 months or until a specific date)

-

IMPORTANT

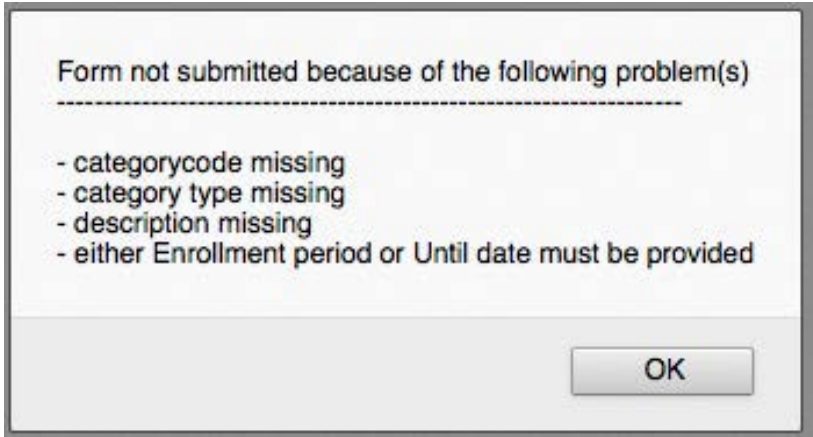

You cannot enter both a month limit and a date until. Choose to enter either one or the other.

-

IMPORTANT

This field is required in order to save your patron category. If left blank you will be presented with an error.

Form not submitted because of the following problem(s)

- categorycode missing
- category type missing
- description missing
- either Enrollment period or Until date must be provided

OK

- Some patron categories can have a minimum age (in years) requirement associated with them, enter this age in the 'Age required'

-

IMPORTANT

This value will only be checked if **BorrowerMandatoryField** defines the date-ofbirth as a required field on the patron record

- Patron categories can also have a maximum age (in years) associated with them (such as children), enter this age in the 'Upperage limit'

-

IMPORTANT

This value will only be checked if **BorrowerMandatoryField** defines the date-ofbirth as a required field on the patron record

- If you charge a membership fee for your patrons (such as those who live in another region) you can enter that in the 'Enrollment fee' field.

-

IMPORTANT

Only enter numbers and decimals in this field

- If you want your patron to receive overdue notices, set the 'Overdue notice required' to 'Yes'
- You can decide on a patron category basis if lost items are shown in the staff client by making a choice from the 'Lost items in staff client' pull down

**IMPORTANT**

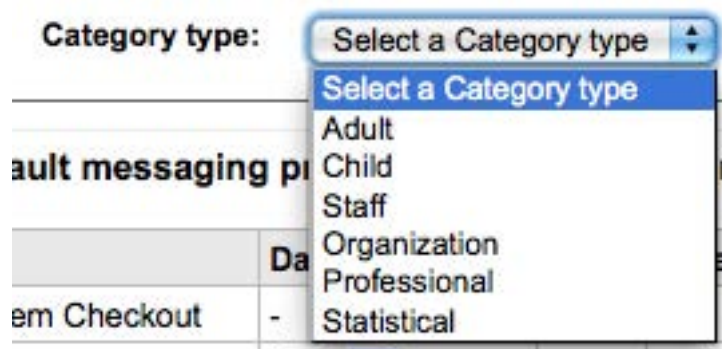

Note that this is only applicable in the staff client, so changing this value on patron categories who do not have access to the staff client won't make any difference

- If you charge patrons for placing holds on items, enter the fee amount in the 'Hold fee' field.

IMPORTANT

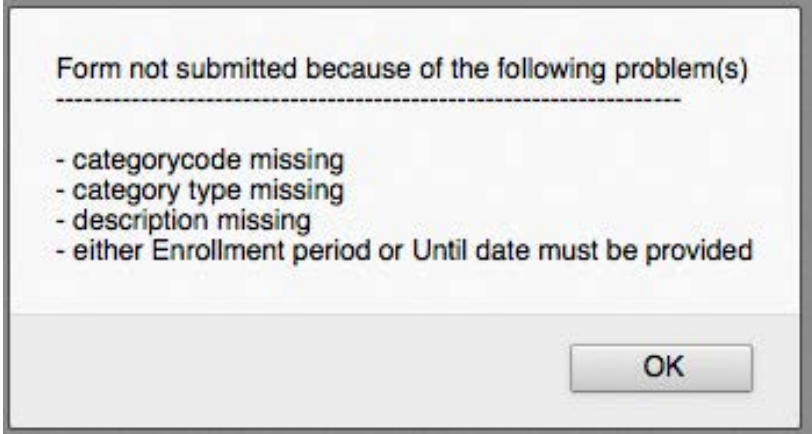

Only enter numbers and decimals in this field

- In the 'Category type' field choose one of the six main parent categories

IMPORTANT

This field is required in order to save your patron category. If left blank you will be presented with an error.

Form not submitted because of the following problem(s)

- categorycode missing
- category type missing
- description missing
- either Enrollment period or Until date must be provided

OK

- Finally you can assign advanced messaging preferences by default to a patron category

–

IMPORTANT

Requires that you have **EnhancedMessagingPreferences** enabled

- These defaults will be applied to new patrons that are added to the system. They will not edit the preferences of the existing patrons. Also, these can be changed for individual patrons, this setting is just a default to make it easier to set up messages for an entire category.

*

TIP

After setting the default for the patron category you can force those changes to all existing patrons by running the *borrowers-force-messaging-defaults* script found in the *misc/maintenance* folder. Ask your system administrator for assistance with this script.

2.3.2 Circulation and Fine Rules

These rules define how your items are circulated, how/when fines are calculated and how holds are handled.

- *Get there:* More > Administration > Patrons & Circulation > Circulation and fines rules

The rules are applied from most specific to less specific, using the first found in this order:

- same library, same patron type, same item type
- same library, same patron type, all item type
- same library, all patron types, same item type
- same library, all patron types, all item types

- all libraries, same patron type, same item type
- all libraries, same patron type, all item types
- all libraries, all patron types, same item type
- all libraries, all patron types, all item types

TIP

If you are a single library system choose your branch name before creating rules (sometimes having only rules for the 'all libraries' option can cause issues with holds)

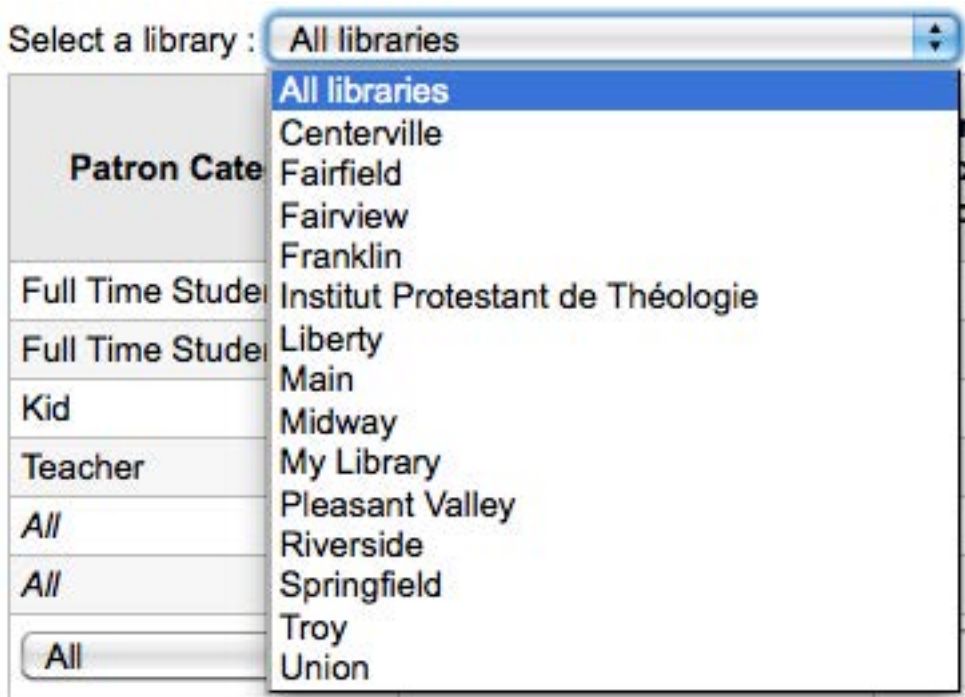

IMPORTANT

At the very least you will need to set a default circulation rule. This rule should be set for all item types, all libraries and all patron categories. That will catch all instances that do not match a specific rule. When checking out if you do not have a rule for all libraries, all item types and all patron types then you may see patrons getting blocked from placing holds. You will also want a rule for your specific library set for all item types and all patron types to avoid this holds issue. Koha needs to know what rule to fall back on.

2.3.2.1 Default Circulation Rules

Using the issuing rules matrix you can define rules that depend on patron/item type combos. To set your rules, choose a library from the pull down (or 'all libraries' if you want to apply these rules to all branches):

From the matrix you can choose any combination of patron categories and item types to apply the rules to

Select a library : Centerville Clone these rules to: Fairview Clone

Patron category	Item type	Current checkouts allowed	Loan period	Unit	Hard due date	Fine amount	Fine charging interval	Fine grace period (day)	Overdue Fines Cap (\$)	Suspension in days (day)	Renewals allowed (count)	Holds allowed (count)	Rental discount (%)	
All	All	11	14	days	None defined	0.10	1	0	5.00	0	3	50	0.000000	Delete
All	All	<input type="text"/>	<input type="text"/>	Days	Before <input type="text"/> (MM/DD/YYYY)	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	Add

- First choose which patron category you'd like the rule to be applied to. If you leave this to 'All' it will apply to all patron categories
- Choose the 'Item Type' you would like this rule to apply to. If you leave this to 'All' it will apply to all item types
- Limit the number of items a patron can have checked out at the same time by entering a number in the 'Current Checkouts Allowed' field
- Define the period of time an item can be checked out to a patron by entering the number of units (days or hours) in the 'Loan Period' box.
- Choose which unit of time, Days or Hours, that the loan period and fines will be calculate in
- You can also define a hard due date for a specific patron category and item type. A hard due date ignores your usual circulation rules and makes it so that all items of the type defined are due on, before or after the date you specify.
- 'Fine Amount' should have the amount you would like to charge for overdue items

-

IMPORTANT

Enter only numbers and decimal points (no currency symbols).

- Enter the 'Fine Charging Interval' in the unit you set (ex. charge fines every 1 day, or every 2 hours)
- The 'Fine Grace Period' is the period of time an item can be overdue before you start charging fines.

-

IMPORTANT

This can only be set for the Day unit, not in Hours

- The 'Overdue Fines Cap' is the maximum fine for this patron and item combination

-

IMPORTANT

If this field is left blank then Koha will not put a limit on the fines this item will accrue. A maximum fine amount can be set using the **MaxFine** system preference.

- If your library 'fines' patrons by suspending their account you can enter the number of days their fine should be suspended in the 'Suspension in Days' field

-

IMPORTANT

This can only be set for the Day unit, not in Hours

- Next decide if the patron can renew this item type and if so, enter how many times they can renew it in the 'Renewals Allowed' box
- If the patron can place holds on this item type, enter the total numbers of items (of this type) that can be put on hold in the 'Holds Allowed' field
- Finally, if you charge a **rental fee** for the item type and want to give a specific patron type a discount on that fee, enter the percentage discount (without the % symbol) in the 'Rental Discount' field

When finished, click 'Add' to save your changes. To modify a rule, create a new one with the same patron type and item type. If you would like to delete your rule, simply click the 'Delete' link to the right of the rule.

To save time you can clone rules from one library to another by choosing the clone option above the rules matrix.

Select a library : Clone these rules to:

After choosing to clone you will be presented with a confirmation message.

Cloning issuing rules to "Centerville"

The rules have been cloned.

[Return to Issuing rules](#)

2.3.2.2 Default Checkouts and Hold Policy

You can set a default maximum number of checkouts and hold policy that will be used if none is defined below for a particular item type or category.

	Total current checkouts allowed	Hold policy	Return policy		
Defaults (not set)	<input type="text" value="25"/>	<input type="text" value="From any library"/>	<input type="text" value="Item returns home"/>	<input type="button" value="Save"/>	<input type="button" value="Unset"/>

From this menu you can set a default to apply to all item types and patrons in the library.

- In 'Total Current Checkouts Allowed' enter the total number of items patrons can have checked out at one time
- Control where patrons can place holds from using the 'Hold Policy' menu
 - From Any Library: Patrons from any library may put this item on hold. (default if none is defined)
 - From Home Library: Only patrons from the item's home library may put this book on hold.
 - No Holds Allowed: No patron may put this book on hold.
- Control where the item returns to once it is checked in

- Item returns home
- Item returns to issuing branch
- Item floats
 - * When an item floats it stays where it was checked in and does not ever return 'home'
- Once your policy is set, you can unset it by clicking the 'Unset' link to the right of the rule

2.3.2.3 Checkouts Per Patron

For this library, you can specify the maximum number of loans that a patron of a given category can make, regardless of the item type.

Patron Category	Total Current Checkouts Allowed	
Board	<input type="text"/>	Add

TIP

If the total amount loanable for a given patron category is left blank, no limit applies, except possibly for a limit you define for a specific item type.

2.3.2.4 Item Hold Policies

For this library, you can edit rules for given itemtypes, regardless of the patron's category. Currently, this means hold policies.

Item type	Hold policy	Return policy	
Book	From any library	Item returns home	Add

The various Hold Policies have the following effects:

- From Any Library: Patrons from any library may put this item on hold. (default if none is defined)
- From Home Library: Only patrons from the item's home library may put this book on hold.
- No Holds Allowed: No patron may put this book on hold.

IMPORTANT

Note that if the system preference **AllowHoldPolicyOverride** set to 'allow', these policies can be overridden by your circulation staff.

IMPORTANT

These policies are based on the patron's home branch, not the branch that the reserving staff member is from.

The various Return Policies have the following effects:

- Item returns home: The item will prompt the librarian to transfer the item to its home library

-

IMPORTANT

If the **AutomaticItemReturn** preference is set to automatically transfer the items home, then a prompt will not appear

- Item returns to issuing branch: The item will prompt the librarian to transfer the item back to the library where it was checked out

-

IMPORTANT

If the **AutomaticItemReturn** preference is set to automatically transfer the items home, then a prompt will not appear

- Item floats: The item will not be transferred from the branch it was checked in at, instead it will remain there until transferred manually or checked in at another branch

2.3.3 Patron Attribute Types

Patron attributes can be used to define custom fields to associate with your patron records. In order to enable the use of custom fields you need to set the **ExtendedPatronAttributes** system preference.

- *Get there:* More > Administration > Patrons & Circulation > Patron attribute types

A common use for this field would be for a student ID number or a Driver's license number.

New Patron Attribute Type

Patron Attribute Types

Code	Description	Actions
STUID	Student ID	Edit Delete

2.3.3.1 Adding Patron Attributes

To add a new Patron Attribute Type, click the 'New Patron Attribute Type' button at the top of the page

Add patron attribute type

Patron attribute type code:

Description:

Repeatable: Check to let a patron record have multiple values of this attribute. This setting cannot be changed after an attribute is defined.

Unique identifier: If checked, attribute will be a unique identifier — if a value is given to a patron record, the same value cannot be given to a different record. This setting cannot be changed after an attribute is defined.

Allow password: Check to make it possible to associate a password with this attribute.

Display in OPAC: Check to display this attribute on a patron's details page in the OPAC.

Searchable: Check to make this attribute staff_searchable in the staff patron search.

Display in check-out: Check to show this attribute in patron check-out.

Authorized value category: Authorized value category; if one is selected, the patron record input page will only allow values to be chosen from the authorized value list. However, an authorized value list is not enforced during batch patron import.

Category: Choose one to limit this attribute to one patron type. Please leave blank if you want these attributes to be available for all types of patrons.

Class: Group attributes types with a block title (based on Authorised values category 'PA_CLASS')

- In the 'Patron attribute type code', enter a short code to identify this field

-

IMPORTANT

 This field is limited to 10 characters (numbers and letters only)

-

IMPORTANT

 This setting cannot be changed after an attribute is defined

- In the 'Description' field, enter a longer (plain text) explanation of what this field will contain
- Check the box next to 'Repeatable' to let a patron record have multiple values of this attribute.

-

IMPORTANT

This setting cannot be changed after an attribute is defined

- If 'Unique identifier' is checked, the attribute will be a unique identifier which means, if a value is given to a patron record, the same value cannot be given to a different record.

–

IMPORTANT

This setting cannot be changed after an attribute is defined

- Check 'Allow password' to make it possible to associate a password with this attribute.
- Check 'Display in OPAC' to display this attribute on a patron's details page in the OPAC.
- Check 'Searchable' to make this attribute searchable in the staff patron search.
- Check 'Display in check-out' to make this attribute visible in the patron's short detail display on the left of the checkout screen and other patron pages

Nicole Engard (9876543457)

123 My Street
 Philadelphia, PA 19101
 555.111.2345
nengard@gmail.com ...
 Student ID : 12345675432
 Category: Staff (S)
 Home Library: Nicole's Library

- Authorized value category; if one is selected, the patron record input page will only allow values to be chosen from the authorized value list.

– You will first need to add an authorized value list for it to appear in this menu

* *Get there:* More > Administration > Basic Parameters > **Authorized Values**

-

IMPORTANT

an authorized value list is not enforced during batch patron import.

- If you'd like to only show this attribute on patrons of one type choose that patron type from the 'Category' pull down
- If you have a lot of attributes it might be handy to group them so that you can easily find them for editing. If you create an **Authorized Value** for PA_CLASS it will show in the 'Class' pull down and you can then change your attributes page to have sections of attributes

Patron Attribute Types

Code	Description	Actions
DL	Driver's License	Edit Delete
HBR	Home Branch	Edit Delete
RES	Resident	Edit Delete
SHOW_BCODE	Show Barcode in OPAC	Edit Delete

Students

Code	Description	Actions
STUID	Student ID	Edit Delete

- Click Save to save your new attribute

Once added your attribute will appear on the list of attributes and also on the patron record add/edit form

Additional attributes and identifiers

Type	Value	
DL (Driver's License)	<input type="text"/>	Clear
HBR (Home Branch)	<input type="text"/>	Clear
RES (Resident)	<input type="text" value="↓"/>	Clear
SHOW_BCODE (Show Barcode in OPAC)	<input type="text" value="↓"/>	Clear

If you have set up classes for organizing attributes they will appear that way on the add/edit patron form

Additional attributes and identifiers

Type	Value	
HBR (Home Branch)	<input type="text"/>	Clear
RES (Resident)	<input type="text" value=""/>	Clear
SHOW_BCODE (Show Barcode in OPAC)	<input type="text" value=""/>	Clear

Students

Type	Value	
STUID (Student ID)	<input type="text"/>	Clear

2.3.3.2 Editing/Deleting Patron Attributes

Each patron attribute has an edit and a delete link beside it on the list of attributes.

Some fields in the attribute will not be editable once created:

- Patron attribute type code
- Repeatable
- Unique identifier

You will be unable to delete an attribute if it's in use.

Could not delete patron attribute type "STUID" — it is in use by 3 patron records

2.3.4 Library Transfer Limits

Limit the ability to transfer items between libraries based on the library sending, the library receiving, and the collection code involved.

- *Get there:* More > Administration > Patrons & Circulation > Library Transfer Limits

These rules only go into effect if the preference [UseBranchTransferLimits](#) is set to 'enforce'. Before you begin you will want to choose which library you are setting these limits for.

Select a library : [Choose](#)

Check the boxes for the libraries you accept to checkin items from.

Transfer limits are set based on the collections codes you have applied via the [Authorized Value](#) administration area.

Show Category:

Category	Authorized value	Description	Icon	Edit	Delete
CCODE	FIC	Fiction		Edit	Delete
CCODE	NFIC	Non Fiction		Edit	Delete
CCODE	REF	Reference		Edit	Delete

Collection codes will appear as tabs above the checkboxes:

FIC
REF
NFIC
REF-BK
YMAR

Policy for Collection Code: FIC

Check the boxes for the libraries that you accept checkins from for the item type you have selected at the top (in the example below - FIC)

Select a library :

Check the boxes for the libraries you accept to checkin items from.

For all Collection Codes: [Check All](#) | [Uncheck All](#)

FIC | REF | NFIC | REF-BK | YMAR

Policy for Collection Code: FIC

[Check All](#) | [Uncheck All](#)

Library	Allow transfer?
CPL - Centerville	<input checked="" type="checkbox"/>
FFL - Fairfield	<input checked="" type="checkbox"/>
FPL - Fairview	<input checked="" type="checkbox"/>
FRL - Franklin	<input type="checkbox"/>
IPT - Institut Protestant de Théologie	<input checked="" type="checkbox"/>
LPL - Liberty	<input type="checkbox"/>
MMM - Main	<input checked="" type="checkbox"/>
MPL - Midway	<input checked="" type="checkbox"/>
PVL - Pleasant Valley	<input checked="" type="checkbox"/>
RPL - Riverside	<input checked="" type="checkbox"/>
SPL - Springfield	<input checked="" type="checkbox"/>
TPL - Troy	<input checked="" type="checkbox"/>
UPL - Union	<input checked="" type="checkbox"/>

[Cancel](#)

In the above example, Centerville library will allow patrons to return items from all libraries except Liberty and Franklin to their branch.

2.3.5 Transport cost matrix

The Transport cost matrix lets a library system define relative costs to transport books to one another. In order for the system to use this matrix you must first set the **UseTransportCostMatrix** preference to 'Use'.

IMPORTANT

The Transport cost matrix takes precedence in controlling where holds are filled from, if the matrix is not used then Koha checks the **StaticHoldsQueueWeight**.

Costs are decimal values between some arbitrary maximum value (e.g. 1 or 100) and 0 which is the minimum (no) cost. For example, you could just use the distance between each library in miles as your 'cost', if that would accurately reflect the cost of transferring them. Perhaps post offices would be a better measure. Libraries sharing a post office would have a cost of 1, adjacent post offices would have a cost of 2, etc.

To enter transport costs simply click in the cell you would like to alter, uncheck the 'Disable' box and

enter your 'cost'

From \ To	Centerville	Fairfield	Fairview	Franklin	Goleta Public Library	Liberty	Midway	Nicole's Library	Pleasant Valley	Riverside	Springfield	Troy	Union
Centerville													
Fairfield					5								
Fairview													
Franklin			10.00										
Goleta Public Library													
Liberty													
Midway													
Nicole's Library													
Pleasant Valley													
Riverside													
Springfield	4.00		5.00										
Troy													
Union													

After entering in your cost, hit 'Enter' on your keyboard or click the 'Save' button at the bottom of the matrix to save your changes.

2.3.6 Item Circulation Alerts

Libraries can decide if they want to have patrons automatically notified of circulation events (check ins and check outs).

- *Get there:* More > Administration > Patrons & Circulation > Item Circulation Alerts

These preferences are set based on patron types and item types.

IMPORTANT

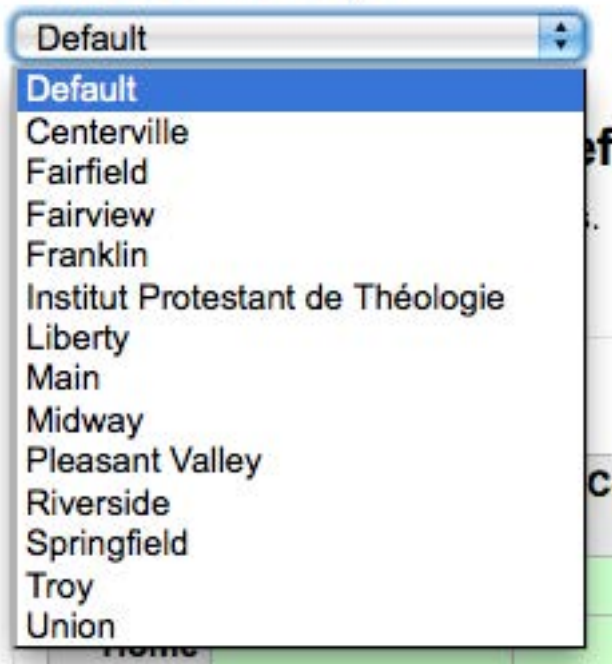

These preference can be overridden by changes in the individual patron's messaging preferences.

To set up circulation alerts:

- Choose your library from the pull down at the top of the screen

Item Circulation Alerts

Select a library:

- To set preferences for all libraries, keep the menu set to 'Default'
- By default all item types and all patrons are notified of check ins and check outs. To change this, click on the item/patron type combo that you would like to stop notices for.

Circulation Alerts for Default

Click on the grid to toggle the settings.

Checkout Check-in

Checkout

	Books	Computer Files	Continuing Resources	DVD	Maps	Mixed Materials	Music	Reference	Visual Materials	Young Adult
Board										
Home Bound										
Inter-Library Loan										
Juvenile	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all
Kid	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all	Disabled for all
Library										
Patron

- In the above example, Juveniles and Kids will not receive check out notices.

2.3.7 Cities and Towns

To standardize patron input you can define cities or towns within your region so that when new patrons are added librarians simply have to select the town from a list instead of having to type the town and zip (or postal) code information.

- *Get there:* More > Administration > Patrons & Circulation > Cities and Towns

2.3.7.1 Adding a City

To add a new city, click the 'New City' button at the top of the page and enter the city name, state, zip/postal code and country.

New city

City:
State:
Zip/Postal code:
Country:

One you click Submit, your city will be saved and will be listed on the Cities and Towns page

Cities

Page(s): 1/1 Entries/page:

City ID	City	State	Zip/Postal code	Country		
2	Atantic City	NJ	08401		Edit	Delete
1	Philadelphia	PA	19030	USA	Edit	Delete

Cities can be edited or deleted at any time.

2.3.7.2 Viewing Cities on Patron Add Form

If you have defined local cities using the New city form, then when adding or editing a patron record you will see those cities in a pull down menu to make city selection easy.

Main address

Street number:
Address:
Address 2:
City: or choose
State:
Zip/Postal code:
Country:

Atantic City NJ 08401
 Philadelphia PA 19030

This will allow for easy entry of local cities into the patron record without risking the potential for typos or mistaken zip/postal codes.

2.3.8 Road Types

To standardize patron input you can define road types within your region so that when new patrons are added librarians simply have to select the road from a list instead of having to type it in.

TIP

If you want your patrons to have their road types abbreviated all of the time then you can enter the appropriate abbreviations here, if you'd like the road types to always be spelled out you can do that here as well.

2.3.8.1 Adding Road Types

To add a road type, click 'New Road Type' and then enter the road type the way you'd like it displayed.

New road type

Road type:

Once you submit the form, your new road type will be listed on the Road Types page

Road type

Road type		
Avenue	Edit	Delete
Boulevard	Edit	Delete
Street	Edit	Delete

2.3.8.2 Viewing Road Types on Patron Add form

When adding or editing a patron, if you have road types defined, there will be a pull down to choose the road type from.

Main address

Street number:

Street type:

Address:

Address 2:

City: or choose

State:

Zip/Postal code:

Country:

2.4 Catalog Administration

Set these controls before you start cataloging on your Koha system.

- *Get there:* More > Administration > Catalog

2.4.1 MARC Bibliographic Frameworks

Think of Frameworks as templates for creating new bibliographic records. Koha comes with some pre-defined frameworks that can be edited or deleted, and librarians can create their own frameworks for content specific to their libraries.

- *Get there:* More > Administration > Catalog > MARC Bibliographic Frameworks

New framework

MARC frameworks

Framework name, then go to MARC biblio to set MARC editor parameters

Code	Description		Edit	Delete	Export	Import
	Default framework	MARC structure			Export	Import
ACQ	Acquisitions	MARC structure	Edit	Delete	Export	Import
SR	Audio Cassettes, CDs	MARC structure	Edit	Delete	Export	Import
IR	Binders	MARC structure	Edit	Delete	Export	Import
BKS	Books, Booklets, Workbooks	MARC structure	Edit	Delete	Export	Import
CF	CD-ROMs, DVD-ROMs, General Online Resources	MARC structure	Edit	Delete	Export	Import
VR	DVDs, VHS	MARC structure	Edit	Delete	Export	Import
FA	Fast Cataloging	MARC structure	Edit	Delete	Export	Import
FA2	Fast Cataloging2	MARC structure	Edit	Delete	Export	Import
KT	Kits	MARC structure	Edit	Delete	Export	Import
AR	Models	MARC structure	Edit	Delete	Export	Import
SER	Serials	MARC structure	Edit	Delete	Export	Import
TST	test	MARC structure	Edit	Delete	Export	Import

IMPORTANT

Do not delete or edit the Default Framework since this will cause problems with your cataloging records - always create a new template based on the Default Framework, or alter the other Frameworks.

After clicking the 'MARC structure' link to the right of each framework you can decide how many fields you want to see on one screen by using the pagination options at the top of the table.

page(s) : 1/16 , entries/page : 20

Tag		Lib
000	LEADER	
001	CONTROL NUMBER	
003	CONTROL NUMBER IDENTIFIER	
005	DATE AND TIME OF LATEST TRANSACTION	
006	FIXED-LENGTH DATA ELEMENTS--ADDITIONAL MATERIAL CHARACTERISTICS--GENERAL INFORMATION	

2.4.1.1 Add New Framework

To add a new framework

- Click 'New Framework'

Add framework

Framework code

Description

- Enter a code of 4 or fewer characters
- Use the Description field to enter a more detailed definition of your framework

- Click 'Submit'
- Once your Framework is added click 'MARC structure' to the right of it on the list of Frameworks

Create framework for MIN (Short Record) using

- You will be asked to choose a Framework to base your new Framework off of, this will make it easier than starting from scratch

- Once your Framework appears on the screen you can edit or delete each field by following the instructions for [editing subfields](#)

2.4.1.2 Edit Existing Frameworks

Clicking 'Edit' to the right of a Framework will only allow you to edit the Description for the Framework:

Modify framework text

Framework code BKS

Description

To make edits to the fields associated with the Framework you must first click 'MARC Structure' and then follow the instructions for [editing subfields](#)

2.4.1.3 Add subfields to Frameworks

To add a field to a Framework click the 'New Tag' button at the top of the Framework definition

MARC Framework for Books, Booklets, Workbooks (BKS)

Search for tag: In framework:

Display only used tags/subfields

Page(s): 1/16 Entries/page:

Tag	Lib	Repeatable	Mandatory	Auth value	Subfields	Edit	Delete
000	LEADER	No	Yes		Subfields	Edit	Delete
001	CONTROL NUMBER	No	No		Subfields	Edit	Delete
003	CONTROL NUMBER IDENTIFIER	No	No		Subfields	Edit	Delete
005	DATE AND TIME OF LATEST TRANSACTION	No	No		Subfields	Edit	Delete

This will open up a blank form for entering MARC field data

MARC Framework for Books, Booklets, Workbooks (BKS)

Tag:

Label for lib:

Label for opac:

Repeatable:

Mandatory:

Authorized value: (if you select a value here, the indicators will be limited to the authorized value list)

Enter the information about your new tag:

- The 'Tag' is the MARC field number
- The 'Label for lib' is the text that will appear in the staff client when in the cataloging module
- The 'Label for OPAC' is the text that will appear in the OPAC when viewing the MARC version of the record
- If this field can be repeated, check the 'Repeatable' box
- If this field is mandatory, check the 'Mandatory' box
- If you want this field to be a pull down with limited possible answers, choose which 'Authorized value' list you want to use

When you're finished, click 'Save Changes' and you will be presented with your new field

520	SUMMARY, ETC.	Yes	No	Subfields	Edit	Delete
-----	---------------	-----	----	---------------------------	----------------------	------------------------

To the right of the new field is a link to 'Subfields,' you will need to add subfields before this tag will appear in your MARC editor. The process of entering the settings for the new subfield is the same as those found in the [editing subfields in frameworks](#) section of this manual.

2.4.1.4 Edit Framework Subfields

Frameworks are made up of MARC fields and subfields. To make edits to most Frameworks you must edit the fields and subfields. Clicking 'Edit' to the right of each subfield will allow you to make changes to the text associated with the field

MARC Framework for Books, Booklets, Workbooks (BKS)

Modify tag 022

Tag:

Label for lib:

Label for opac:

Repeatable:

Mandatory:

Authorized value: (if you select a value here, the indicators will be limited to the authorized value list)

- Each field has a tag (which is the MARC tag)
 - The 'Label for lib' is what will show in the staff client if you have [advancedMARCeditor](#) set to display labels
 - The 'Label for OPAC' is what will show on the MARC view in the OPAC
 - If you check 'Repeatable' then the field will have a plus sign next to it allowing you to add multiples of that tag
 - If you check 'Mandatory' the record will not be allowed to save unless you have a value assigned to this tag
 - 'Authorized value' is where you define an [authorized value](#) that your catalogers can choose from a pull down to fill this field in

To edit the subfields associated with the tag, click 'Subfields' to the right of the tag on the 'MARC Structure' listing

- From the list of subfields you can click 'Delete' to the right of each to delete the subfields
- To edit the subfields click 'Edit Subfields'

Tag 504 Subfield constraints

Save changes

6 8 a b New

Basic constraints

Subfield code:

Text for librarian:

Text for OPAC:

Repeatable:

Mandatory:

Managed in tab: (ignore means that the subfield does not display in the record editor)

[Hide constraints](#)

Advanced constraints:

Default value:

Max length: (see online help)

hidden: (see online help)

Is a URL: (if checked, it means that the subfield is a URL and can be clicked)

Link: (e.g., Title or Local-Number) *NOTE: If you change this value you must ask your administrator to run [misc/batchRebuildBiblioTables.pl](#).*

Koha link:

Other Options: (choose one)

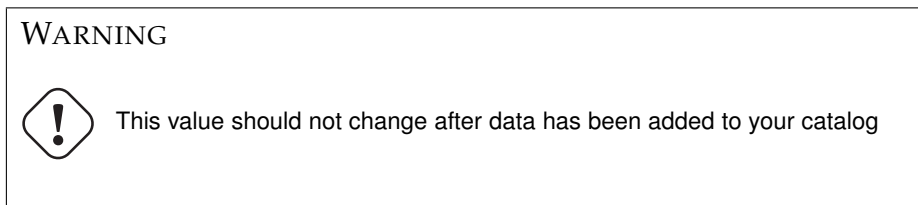

Authorized value:

Thesaurus:

Plugin:

- For each subfield you can set the following values
 - Text for librarian
 - * what appears before the subfield in the librarian interface
 - Text for OPAC
 - * what appears before the field in the OPAC.
 - If left empty, the text for librarian is used instead
 - Repeatable
 - * the field will have a plus sign next to it allowing you to add multiples of that tag
 - Mandatory
 - * the record will not be allowed to save unless you have a value assigned to this tag
 - Managed in tab
 - * defines the tab where the subfield is shown. All subfields of a given field must be in the same tab or ignored. Ignore means that the subfield is not managed.
 - Default value
 - * defines what you want to appear in the field by default, this will be editable, but it saves time if you use the same note over and over or the same value in a field often.

- hidden
 - * allows you to select from 19 possible visibility conditions, 17 of which are implemented. They are the following:
 - -9 => Future use
 - -8 => Flag
 - -7 => OPAC !Intranet !Editor Collapsed
 - -6 => OPAC Intranet !Editor !Collapsed
 - -5 => OPAC Intranet !Editor Collapsed
 - -4 => OPAC !Intranet !Editor !Collapsed
 - -3 => OPAC !Intranet Editor Collapsed
 - -2 => OPAC !Intranet Editor !Collapsed
 - -1 => OPAC Intranet Editor Collapsed
 - 0 => OPAC Intranet Editor !Collapsed
 - 1 => !OPAC Intranet Editor Collapsed
 - 2 => !OPAC !Intranet Editor !Collapsed
 - 3 => !OPAC !Intranet Editor Collapsed
 - 4 => !OPAC Intranet Editor !Collapsed
 - 5 => !OPAC !Intranet !Editor Collapsed
 - 6 => !OPAC Intranet !Editor !Collapsed
 - 7 => !OPAC Intranet !Editor Collapsed
 - 8 => !OPAC !Intranet !Editor !Collapsed
 - 9 => Future use
 - * (! means 'not visible' or in the case of Collapsed 'not Collapsed')
- Is a URL
 - * if checked, it means that the subfield is a URL and can be clicked
- Link
 - * If you enter a field/subfield here (200b), a link appears after the subfield in the MARC Detail view. This view is present only in the staff client, not the OPAC. If the librarian clicks on the link, a search is done on the database for the field/subfield with the same value. This can be used for 2 main topics :
 - on a field like author (200f in UNIMARC), put 200f here, you will be able to see all bib records with the same author.
 - on a field that is a link (4xx) to reach another bib record. For example, put 011a in 464\$x, will find the serials that are with this ISSN.
 - *

- Koha link
 - * Koha is multi-MARC compliant. So, it does not know what the 245\$a means, neither what 200\$f (those 2 fields being both the title in MARC21 and UNIMARC). So, in this list you can "map" a MARC subfield to its meaning. Koha constantly maintains consistency between a subfield and its meaning. When the user want to search on "title", this link is used to find what is searched (245 if you're MARC21, 200 if you're UNIMARC).
- Authorized value
 - * means the value cannot be typed by the librarian, but must be chosen from a pull down generated by the **authorized value** list

* In the example above, the 504a field will show the MARC504 Authorized Values when cataloging

- Thesaurus

* means that the value is not free text, but must be searched in the authority/thesaurus of the selected category

- Plugin

* means the value is calculated or managed by a plugin. Plugins can do almost anything.
 * For example, in UNIMARC there are plugins for every 1xx fields that are coded fields. The plugin is a huge help for cataloger ! There are also two plugins (unimarc_plugin_210c and unimarc_plugin_225a that can "magically" find the editor from an ISBN, and the collection list for the editor)

- To save your changes simply click the 'Save Changes' button at the top of the screen

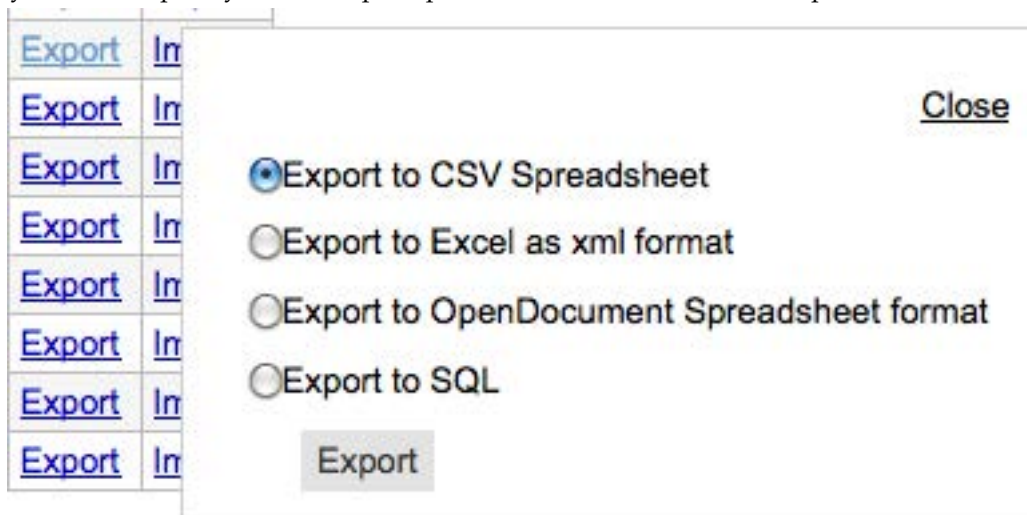

2.4.1.5 Import/Export Frameworks

Next to each framework is a link to either import or export the framework.

2.4.1.5.1 Export Framework To export a framework simply click the 'Export' link to the right of framework title.

BKS	Books, Booklets, Workbooks	MARC structure	Edit	Delete	Export	Import
-----	----------------------------	--------------------------------	----------------------	------------------------	------------------------	------------------------

When you click 'Export' you will be prompted to choose what format to export the file in.

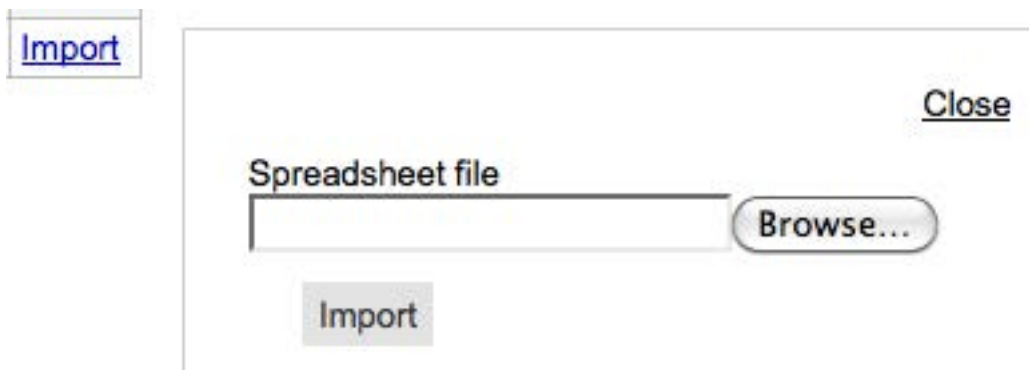

A framework exported this way can be imported into any other Koha installation using the import framework option.

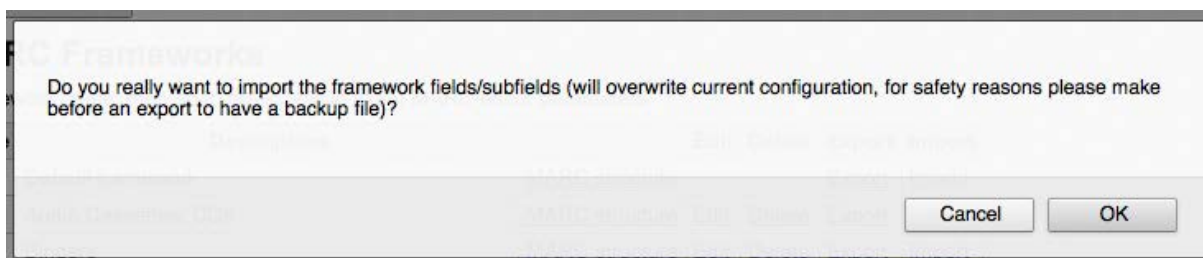

2.4.1.5.2 Import Framework An easy way to create a new framework is to import it from another Koha database. To import a framework you first need to create a new framework. Once you have that framework, click 'Import' to the right of the new framework.

BKS	Books, Booklets, Workbooks	MARC structure	Edit	Delete	Export	Import
-----	----------------------------	--------------------------------	----------------------	------------------------	------------------------	------------------------

You will be prompted to find a file on your computer to import into the framework.

You will be asked to confirm your actions before the file is imported.

As your file is uploaded you will see an image that will confirm that the system is working.

Once your import is complete you will be brought to the framework edit tool where you can make any changes you need to the framework you imported.

2.4.2 Koha to MARC Mapping

While Koha stores the entire MARC record, it also stores common fields for easy access in various tables in the database. Koha to MARC Mapping is used to tell Koha where to find these values in the MARC record. In many cases you will not have to change the default values set by in this tool on installation, but it is important to know that the tool is here and can be used at any time.

- *Get there:* More > Administration > Catalog > Koha to MARC Mapping

The Koha to MARC Mapping page offers you the option of choosing from one of three tables in the database to assign values to.

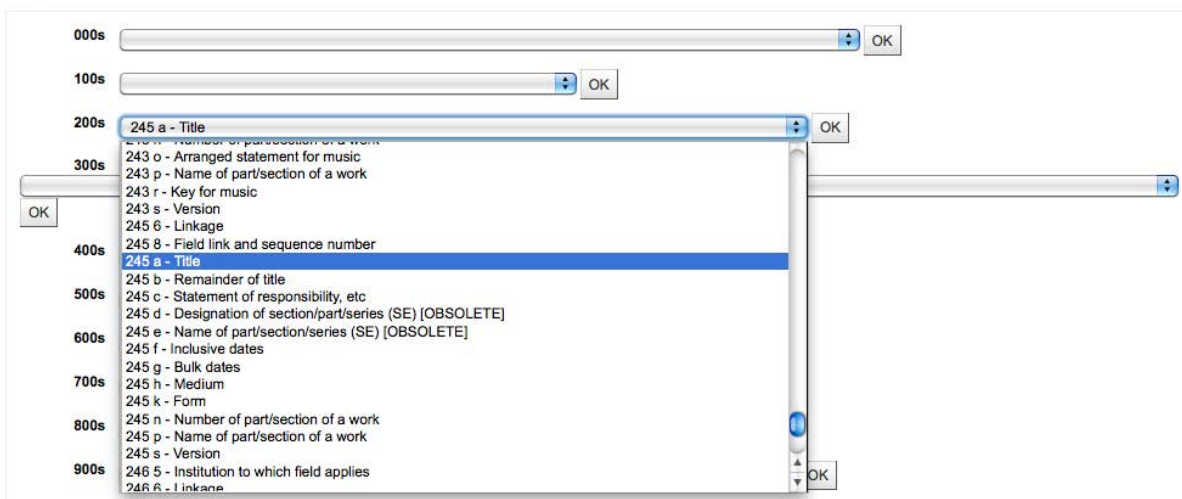

Koha to MARC Mapping

biblio	OK	Tag	Subfield	Lib	
biblio					
biblioitems		999	c	Koha biblionumber	Edit
items					
frameworkcode					Edit
author		100	a	Personal name	Edit
title		245	a	Title	Edit
untitile		240	a	Uniform title	Edit
notes		500	a	General note	Edit
serial		942	s	Serial record flag	Edit
seriestitle		440	a	Title	Edit
copyrightdate		260	c	Date of copyright, publication, distribution, release, etc	Edit
timestamp					Edit
datecreated					Edit
abstract		520	a	Summary, etc	Edit

After choosing the table you would like to view, click 'OK.' To edit any mapping click on the 'Koha Filed' or the 'Edit' link.

Connect biblio.title to a MARC subfield

Choose and validate 1 MARC subfield for **biblio.title**. That will modify **all frameworks** which is usually what you need, but you have been warned.

Click to "Unmap" [Cancel](#)

Choose which MARC field you would like to map to this Koha Field and click the 'OK' button. If you would like to clear all mappings, click the 'Click to "Unmap"' button.

IMPORTANT

At this time you can map only 1 MARC field to 1 Koha field. This means that you won't be able to map both the 100a and the 700a to the author field, you need to choose one or the other.

2.4.3 Keywords to MARC Mapping

This tool will allow you to map MARC fields to a set of predefined keywords.

- *Get there:* More > Administration > Catalog > Keywords to MARC Mapping

IMPORTANT

This tool only effects sites that are not using the XSLT Stylesheets.

At this time the only keyword in use is 'subtitle.'

Using this tool you can define what MARC field prints to the detail screen of the bibliographic record using keywords. The following example will use the subtitle field.

Using the Framework pull down menu, choose the **Framework** you would like to apply this rule to. For example, the subtitle for books can be found in the 245\$b field.

Framework:

Add a mapping

Field name:

MARC field:

MARC subfield:

However the subtitle for DVDs appears in 245\$p

Framework:

Add a mapping

Field name:

MARC field:

MARC subfield:

Using this tool you can tell Koha to print the right field as the subtitle when viewing the bibliographic record in the OPAC.

No cover
image
available

Library mashups :, exploring new ways to deliver library data /

Normal View

MARC View

ISBD View

Authors: [Engard, Nicole C.--1979-](#)

Published by : [Information Today, Inc.](#) (Medford, N.J. :)

Physical details: 334 p. cm.

ISBN: 9781573873727

This tool can be used to chain together pieces of the record as well. If you want the series number to show in the title on your search results you simply have to map 490 \$v to 'subtitle' along with the 245 \$b.

TIP

Chain together the fields you want to show after the item title in the order in which you want them to appear.

Future developments will include additional keyword assigned fields.

2.4.4 MARC Bibliographic Framework Test

Checks the MARC structure.

- *Get there:* More > Administration > Catalog > MARC Bibliographic Framework Test

If you change your MARC Bibliographic framework it's recommended that you run this tool to test for errors in your definition.

MARC Bibliographic Framework Test

Test	Result
OK	itemnum : the field itemnumber is mapped to a field in tab -1
OK	All item fields are in the same tag and in item tab
OK	Only 1 MARC tag mapped to items
OK	biblioitems.itemtype defined
OK	homebranch defined
OK	holdingbranch defined
OK	at least 1 item type defined
OK	at least 1 branch defined
OK	biblionumber and biblioitemnumber mapped correctly
OK	no NULL value in frameworkcode
OK	all subfields for each tag are in the same tab (or ignored)
OK	all authority types used in the frameworks are defined

Configuration OK, you don't have errors in your MARC parameters table

2.4.5 Authority Types

Authority Types are basically MARC Frameworks for Authority records and because of that they follow the same editing rules found in the [MARC Bibliographic Frameworks](#) section of this manual. Koha comes with many of the necessary Authority frameworks already installed. To learn how to add and edit Authority Types, simply review the [MARC Bibliographic Frameworks](#) section of this manual.

- *Get there:* More > Administration > Catalog > Authority Types

2.4.6 Classification Sources

Source of classification or shelving scheme is an [Authorized Values](#) category that is mapped to field 942\$2 in Koha's MARC Bibliographic frameworks.

- *Get there:* More > Administration > Catalog > Classification sources

[New Classification Source](#)

[New Filing Rules](#)

Classification Sources

Code	Description	In Use	Filing Rule	Actions
anscr	ANSCR (Sound Recordings)	No	generic	Edit Delete
ddc	Dewey Decimal Classification	Yes	dewey	Edit Delete
lcc	Library of Congress Classification	Yes	lcc	Edit Delete
sudocs	SuDoc Classification (U.S. GPO)	No	generic	Edit Delete
udc	Universal Decimal Classification	No	generic	Edit Delete
z	Other/Generic Classification Scheme	No	generic	Edit Delete

Classification Filing Rules

Code	Description	Sorting Routine	Actions
dewey	Default filing rules for DDC	Dewey	Edit Delete
generic	Generic call number filing rules	Generic	Edit Delete
lcc	Default filing rules for LCC	LCC	Edit Delete

Commonly used values of this field are:

- ddc - Dewey Decimal Classification
- lcc - Library of Congress Classification

If you chose to install classification sources during Koha's installation, you would see other values too:

- ANSCR (sound recordings)
- SuDOC classification
- Universal Decimal Classification
- Other/Generic Classification

2.4.6.1 Adding/Editing Classification Sources

You can add your own source of classification by using the New Classification Source button. To edit use the Edit link.

Add classification source

The screenshot shows a web form titled "Add classification source". It contains the following fields and controls:

- Classification source code:** A text input field containing "NLM".
- Description:** A text input field containing "National Library of Medicine".
- Source in use?:** A checkbox that is checked.
- Filing Rule:** A dropdown menu with a blue border. The selected option is "Default filing rules for LCC (lcc)". The dropdown list is open, showing four options: "Default filing rules for LCC (lcc)", "Default filing rules for DDC (dewey)", "Generic call number filing rules (generic)", and "Default filing rules for LCC (lcc)".
- Buttons:** "Save" and "Cancel" buttons are located at the bottom left of the form.

When creating or editing:

- You will need to enter a code and a description.
- Check the 'Source in use?' checkbox if you want the value to appear in the drop down list for this category.
- Select the appropriate **filing rule** from the drop down list.

2.4.6.2 Classification Filing Rules

Filing rules determine the order in which items are placed on shelves.

Values that are pre-configured in Koha are:

- Dewey
- LCC
- Generic

Filing rules are mapped to **Classification sources**. You can setup new filing rules by using the New Filing Rule button. To edit use the Edit link.

When creating or editing:

- Enter a code and a description
- Choose an appropriate filing routine - dewey, generic or lcc

2.4.7 Record Matching Rules

Record matching rules are used when importing MARC records into Koha.

- *Get there:* More > Administration > Catalog > Record Matching Rules

The rules that you set up here will be referenced with you **Stage MARC Records for Import**. To create a new matching rule :

- Click 'New Record Matching Rule'

Add record matching rule

Matching rule code: *Required*

Description: *Required*

Match threshold: *Required*

Match points

Match point 1 | [Add match point](#) | [Remove this match point](#)

Search index:

Score:

Matchpoint components

Subfields:

Offset:

Length:

Normalization rule:

Target (database) record check field

Tag:

Subfields:

Offset:

Length:

Normalization rule:

- Choose a unique name and enter it in the 'Matching rule code' field

- 'Description' can be anything you want to make it clear to you what rule you're picking

- 'Match threshold' - The total number of 'points' a biblio must earn to be considered a 'match'

- Match points are set up to determine what fields to match on

- 'Search index' can be found by looking at the ccl.properties file on your system which tells the zebra indexing what data to search for in the MARC data".

- 'Score' - The number of 'points' a match on this field is worth. If the sum of each score is greater than the match threshold, the incoming record is a match to the existing record

- Enter the MARC tag you want to match on in the 'Tag' field

- Enter the MARC tag subfield you want to match on in the 'Subfields' field

- 'Offset' - For use with control fields, 001-009

- 'Length' - For use with control fields, 001-009

- Koha only has one 'Normalization rule' that removes extra characters such as commas and semicolons. The value you enter in this field is irrelevant to the normalization process.

- 'Required match checks' - ??

2.4.7.1 Sample Record Matching Rule: Control Number

Add record matching rule

Matching rule code:	<input type="text" value="LOC"/>	<i>Required</i>

2.4.8 OAI Sets Configuration

On this page you can create, modify and delete OAI-PMH sets

2.4.8.1 Create a set

To create a set:

- Click on the link 'Add a new set'
- Fill the mandatory fields 'setSpec' and 'setName'
- Then you can add descriptions for this set. To do this click on 'Add description' and fill the newly created text box. You can add as many descriptions as you want.
- Click on 'Save' button'

2.4.8.2 Modify/Delete a set

To modify a set, just click on the link 'Modify' on the same line of the set you want to modify. A form similar to set creation form will appear and allow you to modify the setSpec, setName and descriptions.

To delete a set, just click on the link 'Delete' on the same line of the set you want to delete.

2.4.8.3 Define mappings

Here you can define how a set will be build (what records will belong to this set) by defining mappings. Mappings are a list of conditions on record content. A record only need to match one condition to belong to the set.

- Fill the fields 'Field', 'Subfield' and 'Value'. For example if you want to include in this set all records that have a 999\$9 equal to 'XXX'. Fill 'Field' with 999, 'Subfield' with 9 and 'Value' with XXX.
- If you want to add another condition, click on 'OR' button and repeat step 1.
- Click on 'Save'

To delete a condition, just leave at least one of 'Field', 'Subfield' or 'Value' empty and click on 'Save'.

NOTE

Actually, a condition is true if value in the corresponding subfield is strictly equal to what is defined if 'Value'. A record having 999\$9 = 'XXX YYY' will not belong to a set where condition is 999\$9 = 'XXX'.

And it is case sensitive : a record having 999\$9 = 'xxx' will not belong to a set where condition is 999\$9 = 'XXX'.

2.4.8.4 Build sets

Once you have configured all your sets, you have to build the sets. This is done by calling the script misc/migration_tools/build_oai_sets.pl.

2.5 Acquisitions

The Koha Acquisitions module provides a way for the library to record orders placed with vendors and manage purchase budgets.

Before using the **Acquisitions Module**, you will want to make sure that you have completed all of the set up.

- *Get there:* More > Administration > Acquisitions

2.5.1 Currencies and Exchange Rates

If you place orders from more than one country you will want to input currency exchange rates so that your acquisitions module will properly calculate totals.

- *Get there:* More > Administration > Acquisitions > Currencies and Exchange Rates

Currencies and Exchange Rates

Currency	Rate	Symbol	Last Updated	Active	Actions
CAD	1.02207	\$	02/02/2010		Edit Delete
EUR	0.87400	€	02/02/2010		Edit Delete
GBP	1.99290	£	02/02/2010		Edit Delete
USD	1.00000	\$	02/02/2010	✓	Edit Delete

TIP

This data is not automatically updated, so be sure to keep it up to date so that your accounting is kept correct.

The active currency is the main currency you use in your library. Your active currency will have a check mark in the 'Active' column. If you don't have an active currency you will see an error message telling you to choose an active currency.

No active currency is defined
Please edit one currency and mark it as active.

2.5.2 Budgets

Budgets are used for tracking accounting values related to acquisitions. For example you could create a Budget for the current year (ex. 2012) and then break that into **Funds** for different areas of the library (ex. Books, Audio, etc).

- *Get there:* More > Administration > Acquisitions > Budgets

When visiting the main budget administration you will see two tabs, one for active and one for inactive budgets.

[+ New budget](#)

Budgets administration

Currency = USD

Active Budgets [Inactive Budgets](#)

Budget name	Start date	End date	Locked	Total	Actions
2012	01/01/2012	12/31/2012		10,000.00	Edit Delete Add Fund

2.5.2.1 Add a budget

Budgets can either be created from scratch or by duplicating the previous year’s budget.

To duplicate a budget from a previous year, click on the link for the budget name from the list of budgets

[+ New budget](#)

Budgets administration

Currency = USD

Active Budgets [Inactive Budgets](#)

Budget name	Start date	End date	Locked	Total	Actions
2012	01/01/2012	12/31/2012		10,000.00	Edit Delete Add Fund

On the screen listing the budget breakdown click the Edit button at the top and choose to Duplicate budget

[+ New](#) [Edit](#) [Planning](#)

Funds for

Currency = USD

Edit budget '2012'
[Duplicate budget '2012'](#)

Fund code	Fund name	Total allocated	Base-level allocated	Base-level spent
Books	Books	1,000.00	1,000.00	0.00

You will be presented with a form where you simply need to enter the new start and end date and save the budget.

Start date 
 (MM/DD/YYYY)

End date 
 (MM/DD/YYYY)

This will not only duplicate your budget, but all of the funds associated with that budget so that you can reuse budgets and funds from year to year.

If you haven't used Koha before for acquisitions then you'll need to start fresh with a new budget. To add a new budget click the 'New Budget' button.

Add budget

Start date 
 (MM/DD/YYYY)

End date 
 (MM/DD/YYYY)

Description

Total amount

Make budget active

Lock budget

- Choose the time period this budget is for, whether it's an academic year, a fiscal year, a quarter, etc.
- The Description should be something that will help you identify the budget when ordering
- In the amount box do not use any symbols, simply enter the amount of the budget with numbers and decimals.
- Marking a budget active makes it usable when placing orders in the acquisitions module, even if the order is placed after the budget end date. This will allow you to record orders that were placed in a previous budget period.
- Locking a budget means that Funds will not be able to be modified by librarians

Once you have made your edits, click the 'Save Changes' button. You will be brought to a list of your existing budgets.

Budgets administration

Currency = \$

Budget Name ▾	Start Date ◆	End Date ◆	Active ◆	Locked ◆	Total ◆	Actions
Fiscal Year 2010	01/01/2010	12/31/2010	Active		60,000.00	Edit Delete Add Fund

2.5.3 Funds

- *Get there:* More > Administration > Acquisitions > Funds

2.5.3.1 Add a Fund

A fund is added to a budget.

IMPORTANT

A **budget** must be defined before a fund can be created.

To add a new fund click the New button and then choose which Budget you would like to add the fund to.

In the form that appears you want to enter the basics about your fund.

Add Fund for Budget '2010'

Fund code:

Fund name:

Amount:

Encumbrance:

Expenditure:

Owner:

Library:

Restrict access to:

Notes:

Statistic 1 done on:

Statistic 2 done on:

The three first fields are required, the rest are optional

- Fund Code is a unique identifier for your fund
- The Fund Name should be something that librarians will understand
- Amount should be entered with only numbers and decimals, no other characters
- *Encumbrance ??*
- *Expenditure ??*
- You can choose to assign this fund to a librarian. Doing so will make it so that only that librarian can make changes to the Fund
- Choose which library will be using this fund
- You can restrict who can order from this fund by choosing either the owner or the library from the 'Restrict access to' menu

Restrict access to:

Notes:

None

Owner

Library

- Notes are simply for any descriptive notes you might want to add so that librarians know when to use this fund
- Planning categories are used for statistical purposes. To learn more about planning categories, check out the [Planning Category FAQ](#).

When complete, click 'Submit' and you will be brought to a list of all of the funds for the budget.

Funds for '2012'

Currency = USD

Fund code	Fund name	Total allocated	Base-level allocated	Base-level spent	Total sublevels spent	Base-level remaining	Actions
Books	Books	1,000.00	1,000.00	0.00		1,000.00	Edit Delete Add child fund
FIC	Fiction	5,000.00	5,000.00	0.00		5,000.00	Edit Delete Add child fund
HB	Hardback	400.00	400.00	0.00		400.00	Edit Delete Add child fund
NFIC	Non Fiction	2,500.00	2,500.00	0.00		2,500.00	Edit Delete Add child fund
STAFF	Staff Collection	500.00	500.00	0.00		500.00	Edit Delete Add child fund
TST	Test	500.00	500.00	0.00		500.00	Edit Delete Add child fund
Period allocated	10,000.00	9,900.00		0	0		

To the right of each fund you will find the 'Edit,' 'Delete,' and 'Add Child Fund' options.

A child fund simply a sub-fund of the fund listed. An example would be to have a fund for 'Fiction' and under that have a fund for 'New Releases' and a fund for 'Science Fiction.' It is an optional way to further organize your finances.

Funds with children will show with a small arrow to the left. Clicking that will show you the children

Funds for '2012 Annual Budget'

Once your changes are made, click the 'Save' button. If you would like to export your data as a CSV file you can do so by entering a file name in the 'Output to a file named' field and clicking the 'Output' button.

Output to a file named: Into an application:

2.6 Additional Parameters

- *Get there:* More > Administration > Additional Parameters

2.6.1 Z39.50 Servers

Koha has a powerful copy cataloging tool. Using Koha you can connect to any Z39.50 target that is publicly available or that you have the log in information to.

- *Get there:* More > Administration > Additional Parameters > Z39.50 Servers

Koha comes with a default list of Z39.50 targets set up that you can add to, edit or delete

New z39.50 Server

Z39.50 Servers Administration

Target	Hostname/Port	Database	Userid	Password	Checked	Rank	Syntax	Encoding		
COLUMBIA UNIVERSITY	clio-db.cc.columbia.edu:7090	voyager			0	0	USMARC	MARC-8	Edit	Delete
LIBRARY OF CONGRESS	z3950.loc.gov:7090	Voyager			1	1	USMARC	MARC-8	Edit	Delete
NEW YORK PUBLIC LIBRARY	catnyp.nypl.org:210	innopac			0	0	USMARC	MARC-8	Edit	Delete
NEW YORK UNIVERSITY LIBRARIES	bobcat.nyu.edu:210	advance			0	0	USMARC	MARC-8	Edit	Delete
SMITHSONIAN INSTITUTION LIBRARIES	siris-libraries.si.edu:210	Default			0	0	USMARC	MARC-8	Edit	Delete

To find additional targets you use IndexData's IRSpy: <http://irspy.indexdata.com>

2.6.1.1 Add a Z39.50 Target

- From the main Z39.50 page, click 'New Z39.50 Server'

– Userid and Password are only required for servers that are password protected

New Z39.50 server

Z39.50 server:

Hostname:

Port:

Database:

Userid:

Password:

Checked (searched by default):

Rank (display order):

Syntax (z3950 can send records in various format. Choose one):

Encoding (z3950 can send records in various encodings. Choose one):

Timeout (0 its like not set): seconds

2.6.1.2 Suggested Z39.50 Targets

The following targets have been used successfully by other Koha libraries (in the Americas):

- CUYAHOGA COUNTY PUBLIC weecat.cuyahoga.lib.oh.us:210 INNOPAC
- GREATER SUDBURY PUBLIC 216.223.90.51:210 INNOPAC
- HALIFAX PUBLIC catalogue.halifaxpubliclibraries.ca:210 horizon
- HALTON HILLS PUBLIC cat.hhpl.on.ca:210 halton_hills

- VANCOUVER PUBLIC LIBRARY z3950.vpl.ca:210 Horizon

2.6.2 Did you mean?

Get there: More > Administration > Additional Parameters > Did you mean?

Koha can offer 'Did you mean?' options on searches based on values in your **authorities**.

IMPORTANT

Did you mean? only works in the OPAC at this time. The Intranet options are here for future development.

Using this page you can control which options Koha gives patrons on their search results.

Did you mean?

Please put the *Did you mean?* box to enable those plugins (for the staff client)

OPAC

ExplodedTerms

Suggest that patrons explore searches to include broader/related terms.

AuthorityFile

Suggest authorities which are related to the term the user searched for.

Save configuration

Cancel

To turn on the 'Did you mean?' bar on your search results you need to check the box next to each plugin you would like to use. The two plugins you have to choose from are:

- The ExplodedTerms plugin suggests that the user try searching for broader/narrower/related terms for a given search (e.g. a user searching for "New York (State)" would click the link for narrower terms if they're also interested in "New York (City)"). This is only relevant for libraries with highly hierarchical authority data.
- The AuthorityFile plugin searches the authority file and suggests the user might be interested in bibs linked to the top 5 authorities

If you want one plugin to take priority over another you simply drag it above the other.

If you choose both plugins you will see several options at the top of your search results

If you choose just the AuthorityFile you'll see just authorities.

Chapter 3

Tools

Tools in Koha all perform some sort of action. Often many of the items listed under Tools in Koha are referred to as 'Reports' in other library management systems.

- *Get there:* More > Tools

3.1 Patrons and Circulation

3.1.1 Comments

- *Get there:* More > Tools > Patrons and Circulation > Comments

All comments added by patrons via the OPAC to bibliographic records require moderation by the librarians. If there are comments awaiting moderation they will be listed on the main staff dashboard under the Tools label:

Tools

- [Comments pending approval:](#) **1**

To moderate comments click on the notification on the main dashboard or go directly to the Comments Tool and click 'Approve' or 'Delete' to the right of the comments awaiting moderation.

Comments

Approved comments		Comments awaiting moderation	
Commenter	On Title	Comment	
Engard, Nicole	Death Masks: A Novel of the Dresden Files (The Dresden Files, Book 5).	These books just get better and better!	Approve Delete

If there are no comments to moderate you will see a message saying just that

Comments

Approved comments		Comments awaiting moderation	
No comments to moderate.			

You can also review and unapprove comments you have approved in the past by choosing the 'Approved comments' tab

Comments

Approved comments		Comments awaiting moderation	
Commenter	On Title	Comment	
Engard, Nicole	Blood Rites (The Dresden Files, Book 6)	This is an awesome book series.	Unapprove Delete
Engard, Nicole	Fool Moon (The Dresden Files, Book 2)	This was a great title, I highly recommend it.	Unapprove Delete
Engard, Nicole	Learning Perl /	A very handy guide for getting started with the language Koha is written in ... Perl.	Unapprove Delete
Engard, Nicole	Harry Potter and the goblet of fire	I love listening to the narrator reading me Harry Potter.	Unapprove Delete

3.1.2 Patron Import

- *Get there:* More > Tools > Patrons and Circulation > Import Patrons

The patron import tool can be used at any time to add patrons in bulk. It is commonly used in universities and schools when a new batch of students registers.

3.1.2.1 Creating Patron File

Your Koha installation comes with a blank CSV file that you can use as a template for your patron records. If you would like to create the file yourself, make sure that your file has the following fields in this order as the header row:

borrowernumber, cardnumber, surname, firstname, title, othernames, initials, streetnumber, street-type, address, address2, city, zipcode, country, email, phone, mobile, fax, emailpro, phonepro, B_streetnumber, B_streettype, B_address, B_address2, B_city, B_zipcode, B_country, B_email, B_phone, dateofbirth, branch-code, categorycode, dateenrolled, dateexpiry, gonenoaddress, lost, debarred, contactname, contactfirst-name, contacttitle, guarantorid, borrowernotes, relationship, ethnicity, ethnotes, sex, password, flags, userid, opacnote, contactnote, sort1, sort2, altcontactfirstname, altcontactsurname, altcontactaddress1, altcontactaddress2, altcontactaddress3, altcontactzipcode, altcontactcountry, altcontactphone, smsalernumber, patron_attributes

IMPORTANT

The 'password' value should be stored in plain text, and will be converted to a md5 hash (which is an encrypted version of the password).

- If your passwords are already encrypted, talk to your systems administrator about options

IMPORTANT

Date formats should match your **system preference**, and must be zero-padded, e.g. '01/02/2008'.

IMPORTANT

The fields 'branchcode' and 'categorycode' are required and must match valid entries in your database.

TIP

If loading **patron attributes**, the 'patron_attributes' field should contain a comma-separated list of attribute types and values.

- The attribute type code and a colon should precede each value.

- For example: **INSTID:12345,LANG:fr** or **STARTDATE:January 1 2010,TRACK:Day**
- If an input record has more than one attribute, the fields should either be entered as an unquoted string (previous examples), or with each field wrapped in separate double quotes and delimited by a comma:
 - * **"STARTDATE:January 1, 2010","TRACK:Day"**
 - * This syntax would be required if the data might have a comma in it, like a date string.

3.1.2.2 Importing Patrons

Once you have created your file, you can use the Patron Import Tool to bring the data into Koha.

Import into the borrowers table

Select the file to import:

Field to use for record matching

- Choose your CSV file and choose to match on 'Cardnumber' to prevent adding of duplicate card numbers to the system
- Next you can choose default values to apply to all patrons you are importing
 - ex. If you're importing patrons specific to one branch you can use the field on the Import form to apply the branch code to all those you are importing.
- Finally you need to decide on what data you want to replace if there are duplicates.

If matching record is already in the borrowers table:

Ignore this one, keep the existing one

Overwrite the existing one with this

Extended Attributes

Replace all Extended Attributes

Replace only included Extended Attributes

- A matching record is found using the field you chose for matching criteria to prevent duplication
- If you included patron attributes in your file you can decide whether to add your values to existing values or erase existing values and enter only your new values.

3.1.3 Notices & Slips

- *Get there:* More > Tools > Patrons and Circulation > Notices & Slips

All notices and circulation receipts (or slips) generated by Koha can be customized using the Notices & Slips Tool. The system comes with several predefined templates that will appear when you first visit this tool.

Select a library :

Library	Module	Code	Name			
(All libraries)	circulation	CHECKIN	Item Check-in (Digest)	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	CHECKOUT	Item Check-out (Digest)	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	DUE	Item Due Reminder	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	DUEDGST	Item Due Reminder (Digest)	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	ISSUEQSLIP	Issue Quick Slip	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	circulation	ISSUESLIP	Issue Slip	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	circulation	ODUE	Overdue Notice	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	circulation	PREDUE	Advance Notice of Item Due	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	PREDUEDGST	Advance Notice of Item Due (Digest)	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	circulation	RESERVESLIP	Reserve Slip	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	circulation	TRANSFERSLIP	Transfer Slip	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	claimacquisition	ACQCLAIM	Acquisition Claim	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	claimissues	SERCL	Serial Claim	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	members	ACCTDETAILS	Account Details Template - DEFAULT	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	reserves	HOLD	Hold Available for Pickup	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/>
(All libraries)	reserves	HOLDPLACED	Hold Placed on Item	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	reserves	HOLD_PRINT	Hold Available for Pickup (print notice)	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	serial	RLIST	Routing List	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	suggestions	ACCEPTED	Suggestion accepted	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	suggestions	AVAILABLE	Suggestion available	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	suggestions	ORDERED	Suggestion ordered	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
(All libraries)	suggestions	REJECTED	Suggestion rejected	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete
Centerville	circulation	ODUE	Overdue Notice	Edit	<input type="text" value="Centerville"/>	<input type="button" value="Copy"/> Delete

Each notice can be edited, but only a few can be deleted, this is to prevent system errors should a message try to send without a template. Each notice and slip can be edited on a per library basis, by default you will see the notices for all libraries.

If you have a style you'd like applied to all slips you can point the **SlipCSS** preference to a stylesheet. The same is true for notices, using the **NoticeCSS** preference to define a stylesheet.

3.1.3.1 Adding Notices & Slips

To add a new notice or slip

- Click 'New Notice'

Add notice

Library:

Koha module:

Code:

Name:

HTML Message:

Message Subject:

Message Body:

--BRANCHES--

- branches.branchcode
- branches.branchname
- branches.branchaddress1
- branches.branchaddress2
- branches.branchaddress3
- branches.branchzip
- branches.branchcity
- branches.branchstate

>>

[Cancel](#)

- Choose which library this notice or slip is for
- Choose the module this notice is related to
- The Code is limited to 20 characters

-

IMPORTANT

 When working with the overdue notices you want each notice at each branch to have a unique code. Think about using the branch code in front of the notice code for each branch.

- Use the name field to expand on your Code

-

TIP

 With overdue notices, be sure to put your branch name in the description as well so that it will be visible when setting up your **triggers**.

- If you plan on writing the notice or slip in HTML check the 'HTML Message' box, otherwise the content will be generated as plain text
- Message Subject is what will appear in the subject line of the email
- In the message body feel free to type whatever message you feel is best, use the fields on the left hand side to enter individualized data from the from database.

IMPORTANT

Overdue notices can use `<<items.content>>` tags by themselves, or use `<item></item>` to span all of the tags. Learn more about the [Overdue Notice Markup](#)

* On overdue notices make sure to use `<<items.content>>` tags to print out the data related to all items that are overdue.

* The other option, only for overdue notices, is to use the `<item></item>` tags to span the line so that it will print out multiple lines One example for the `<item></item>` tag option is:

```
<item>"<<biblio.title>>"          by          <<biblio.author>>,
<<items.itemcallnumber>>, Barcode: <<items.barcode>> , Checkout
date: <<issues.issuedate>>, Due date: <<issues.date_due>> Fine:
<<items.fine>> Due date: <<issues.date_due>> </item>
```

IMPORTANT

Only the overdue notices take advantage of the `<item></item>` tags, all other notices referencing items need to use `<<items.content>>`

TIP

To add today's date you can use the `<<today>>` syntax

3.1.3.1.1 Overdue Notice Markup When creating your overdue notices there are two tags in addition to the various database fields that you can use in your notices.

IMPORTANT

These new tags only work on the overdue notices, not other circulation related notices at this time.

- `<item></item>` which should enclose all fields from the `biblio`, `biblioitems`, and `items` tables.
- `<fine></fine>` which should be enclosed by the `item` tag and should enclose a currency identifier per ISO 4217. If this tag is present with a proper identifier, the fine for that item will be displayed in the proper currency format.
 - Note: ISO 4217 changes from time to time therefore all currencies may not be supported. If you find one that is not supported, please file a bug with the `Locale::Currency::Format` author Tan D Nguyen tnguyen@cpan.doe.org.

An example of using these two tags in a notice template might be like:

The following item(s) is/are currently overdue:

```
<item>"<<biblio.title>>" by <<biblio.author>>, <<items.itemcallnumber>>, ↔  
Barcode: <<items.barcode>> Fine: <fine>GBP</fine></item>
```

Which, assuming two items were overdue, would result in a notice like:

The following item(s) is/are currently overdue:

```
"A Short History of Western Civilization" by Harrison, John B, 909.09821 H2451 ↔  
, Barcode: 08030003 Fine: £3.50  
"History of Western Civilization" by Hayes, Carlton Joseph Huntley, 909.09821 ↔  
H3261 v.1, Barcode: 08030004 Fine: £3.50
```

3.1.3.2 Existing Notices & Slips

Among the default notices are notices for several common actions within Koha. All of these notices can be customized by altering their text via the Notices & Slips tool and their style using the [NoticeCSS](#) preference to define a stylesheet. Here are some of what those notices do

- ACCTDETAILS
 - Sent to patrons when their account is set up if the [AutoEmailOPACUser](#) preference is set to 'Send'
- ACQCLAIM (Acquisition Claim)
 - Used in the claim acquisition module
 - *Get there:* More > Acquisitions > Late issues
- HOLD (Hold Available for Pickup)
 - This notice is used if two criteria are met:
 1. The [EnhancedMessagingPreferences](#) is set to 'Allow'
 2. The patron has requested to receive this notice
 - * *Get there:* OPAC > Login > my messaging
 - * *Get there:* Staff Client > Patron Record > [Notices](#)
 - When this notice references the branches table it is referring to the pickup branch information.
- HOLDPLACED (a notice to the library staff that a hold has been placed)
 - This notice requires the [emailLibrarianWhenHoldIsPlaced](#) system preference to be set to 'Enable'
 - When this notice references the branches table it is referring to the pickup branch information.
- HOLD_PRINT (Printed notice when hold available for pickup)
 - This notice is used for hold confirmation notices that are sent out in print format. This will not effect what the email notice looks like.
 - When this notice references the branches table it is referring to the pickup branch information.
- ODUK (Overdue Notice)
 - This notice is used to send Overdue Notices to Patrons
 - See a [Sample Overdue Notice](#)
 - Requires that you set [Overdue Notice/Status Triggers](#)
- RLIST (Routing List)
 - Used in the serials module to notify patrons/staff of new issues of a serial

* *Get there:* More > Serials > **New Subscription**

- You have the option to select the 'Routing List' notice when creating a new subscription (Choose from the 'Patron notification' drop down).

-

TIP

Notice also that if you'd like to notify patrons of new serial issues, you can click on 'define a notice' which will take you to the 'Notices' tool

There are also a set of predefined slips (or receipts) listed on this page. All of these slips can be customized by altering their text via the Notices & Slips tool and their style using the **SlipCSS** preference to define a stylesheet. Here is what those slips are used for:

- ISSUEQSLIP
 - Used to print the quick slip in circulation
 - The quick slip only includes items that were checked out today
- ISSUESLIP
 - Used to print a full slip in circulation
 - The slip or receipt will show items checked out today as well as items that are still checked out
- RESERVESLIP
 - Used to print a holds slip
 - The holds slip is generated when a hold is confirmed
- TRANSFERSLIP
 - Used to print a transfer slip
 - The transfer slip is printed when you confirm a transfer from one branch to another in your system

3.1.4 Overdue Notice/Status Triggers

- *Get there:* More > Tools > Patrons and Circulation > Overdue Notice/Status Triggers

In order to send the overdue notices that you defined using the **Notices** tool, you need to first set the triggers to have these messages.

IMPORTANT

In order to have overdue notices sent to your patrons, you need to **set that patron category** to require overdue notices.

The Overdue Notice/Status Triggers tool gives the librarian the power to send up to three notices to each patron type notifying them of overdue items

Select a library:

Rules for overdue actions: default library

	Delay	First Letter	Restrict
Board	<input type="text" value="4"/>	<input type="text" value="Overdue Notice"/>	<input type="checkbox"/>
Home Bound	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
Inter-Library Loan	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
Juvenile	<input type="text" value="1"/>	<input type="text" value="Overdue Notice"/>	<input type="checkbox"/>
Kid	<input type="text" value="1"/>	<input type="text" value="Overdue Notice"/>	<input type="checkbox"/>
Library	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
Patron	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
School	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
Student	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>
Young Adult	<input type="text"/>	<input type="text" value="No notice"/>	<input type="checkbox"/>

- Delay is the number of days after an issue is due before an action is triggered.

-

IMPORTANT

If you want Koha to trigger an action (send a letter or restrict member), a delay value is required.

- To send additional notices, click on the tabs for 'Second' and 'Third' notice
- If you would like to prevent a patron from checking items out because of their overdue items, check the 'Restrict' box, this will put a notice on the patron's record at checkout informing the librarian that the patron cannot check out due to overdue items.
- See a [Sample Overdue Notice](#)

3.1.5 Patron Card Creator

- *Get there:* More > Tools > Patrons and Circulation > Patron Card Creator

The Patron Card Creator allow you to use layouts and templates which you design to print a nearly unlimited variety of patron cards including barcodes. Here are some of the features of the Patron Card Creator module:

- Customize patron card layouts
- Design custom card templates for printed patron cards
- Build and manage batches of patron cards
- Export single or multiple batches
- Export single or multiple patron cards from within a batch
- Export card data as a PDF readable by any standard PDF reader, making patron cards printable directly on a printer

At the top of each screen within the Patron Card Creator, you will see a toolbar allowing quick access to relevant functions. The menu to the left of each screen also allows easy access to the different sections of the Patron Card Creator. The bread crumb trail near the top of each screen will give specific indication as to where you are within the Patron Card Creator module and allow quick navigation to previously traversed sections. And finally, you can find more detailed information on each section of the Patron Card Creator by clicking the online help link at the upper left-hand corner of every page.

3.1.5.1 Templates

- *Get there:* More > Tools > Patron Card Creator > Templates

A template is the label/card stock you are using. This might be Avery 5160 for address labels, Gaylord 47-284 for spine labels or Avery 28371 for your patron cards, just to give a couple of examples. These labels will include all of the information you will need for setting up a Koha, this information may be on the packaging, and if not it can usually be found on the vendor's website.

3.1.5.1.1 Add a Template To add a new template, you want to click on the 'Templates' button at the top of your page and choose 'New Template'

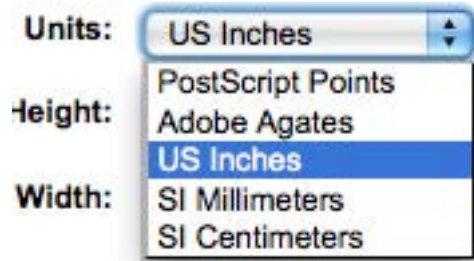

Using the form that appears you can define the template for your sheet of labels or cards.

Edit patron card template

<p>Template ID: 23</p> <p>Template code: <input type="text" value="HB-PC0001"/></p> <p>Template description: <input type="text" value="A template for home brewed patron card forms"/></p> <p>Units: <input type="text" value="US Inches"/></p> <p>Page height: <input type="text" value="11"/> in</p> <p>Page width: <input type="text" value="8.5"/> in</p> <p>Card width: <input type="text" value="3.1875"/> in</p> <p>Card height: <input type="text" value="1.9375"/> in</p>	<p>Top page margin: <input type="text" value="0.6875"/> in</p> <p>Left page margin: <input type="text" value="0.875"/> in</p> <p>Number of columns: <input type="text" value="2"/></p> <p>Number of rows: <input type="text" value="4"/></p> <p>Gap between columns: <input type="text" value="0.4375"/> in</p> <p>Gap between rows: <input type="text" value="0.1875"/> in</p> <p>Profile: <input type="text" value="Test Printer 01/Test Bin"/></p>
<p><input type="button" value="Save"/> <input type="button" value="Cancel"/></p>	

- Template ID will be automatically generated after saving your template, this is simply a system generated unique id

- Template Code should be something you can use to identify your template on a list of templates
- You can use the Template Description to add additional information about the template
- The Units pull down is used to define what measurement scale you're going to be using for the template. This should probably match the unit of measurement used on the template description provided by the product vendor.

- The measurements can be found on the vendor product packaging or website.
- A profile is a set of "adjustments" applied to a given template just prior to printing which compensates for anomalies unique and peculiar to a given printer (to which the profile is assigned).
 - Before picking a profile try printing some sample cards so that you can easily define a profile that is right for your printer/template combination.
 - After finding any anomalies in the printed document, **create a profile** and assign it to the template.

After saving, your templates will appear on the 'Manage Templates' page.

Current Branch: Fairview

Currently Available Templates

Template ID	Template Name	Description	Select
23	HB-PC0001	A template for home brewed patron card forms	<input type="checkbox"/>

3.1.5.2 Profiles

- *Get there:* More > Tools > Patron Card Creator > Profiles

A profile is a set of "adjustments" applied to a given **template** just prior to printing which compensates for anomalies unique and peculiar to a given printer (to which the profile is assigned). This means if you set a template up and then print a sample set of data and find that the items are not all aligned the same on each card, you need to set up a profile for each printer to make up for the differences in printing styles, such as the shifting of text to the left, right, top or bottom.

If your cards are printing just the way you want, you will not need a profile.

3.1.5.2.1 Add a Profile To add a new profile, you want to click on the 'Profiles' button at the top of your page and choose 'New Profile'

Using the form that appears you can create a profile to fix any problems with your template.

Edit printer profile

Profile settings

Printer name:

Paper bin:

Template name: Profile unassigned

Units: PostScript Points ▾

Offset:

Horizontal: pt

Vertical: pt

Creep:

Horizontal: pt

Vertical: pt

Save
Cancel

- The Printer Name and Paper Bin do not have to match your printer exactly, they are for your reference so you can remember what printer you have set the profile for. So if you want to use the Printer model number in printer name or you can call it 'the printer on my desk'
- Template will be filled in once you have chosen which template to apply the profile to on the [template edit form](#)
- The Units pull down is used to define what measurement scale you're going to be using for your profile.

- Offset describes what happens when the entire image is off center either vertically or horizontally

and creep describes a condition where the distance between the labels changes across the page or up and down the page

- For these values, negative numbers move the error up and to the left and positive numbers move the error down and to the right
- Example: the text is .25" from the left edge of the first label, .28" from the left edge of the second label and .31" from the left edge of the third label. This means the horizontal creep should be set to .03" to make up for this difference.

After saving, your profiles will appear on the 'Manage Profiles' page.

Current Branch: Fairview

Currently Available Profiles

Profile ID	Printer Name	Paper Bin	Template Name	Select
16	Test Printer 01	Test Bin	HB-PC0001	<input type="checkbox"/>

Once you have saved your new profile, you can return to the list of templates and choose to edit the template that this profile is for.

3.1.5.3 Layouts

- *Get there:* More > Tools > Patron Card Creator > Layouts

A layout defines the text and images that will be printed on to the card and where it will appear.

3.1.5.3.1 Add a Layout To add a new layout, you want to click on the 'Layouts' button at the top of your page and choose 'New Layout'

Using the form that appears you can create a profile to fix any problems with your template.

Image source:

- The name you assign to the layout is for your benefit, name it something that will be easy to identify at a later date
- The Units pull down is used to define what measurement scale you're going to be using for your layout.

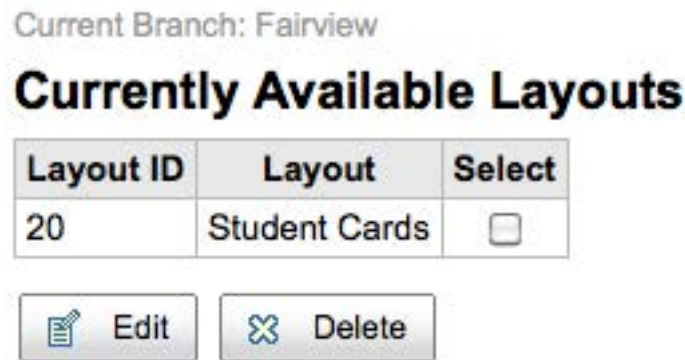

- Next note if this layout is for the front or the back of the patron card
 - You will need a layout for both the front and back of your card if you have 2-sided library cards
- You have the option of adding up to 3 lines of text to your card. Your text can be static text of your choosing and/or fields from the patron record. If you want to print fields from the patron record you want to put the field names in brackets like so - <firstname>
- For each line of text, you can choose your font, font size and the location of the text on the card using the lower X and Y coordinates
- In order to show the barcode and the patron card number you will need to check the 'Print Card Number as Barcode' option. This will turn the patron card number into a barcode. If you want the

number to print in human readable format you will need to check the 'Print Card Number as Text Under Barcode' option.

- Finally you can choose up to two images to print on the card.
 - One can be the **patron image** which you can resize to meet your needs.
 - The other image can be something like a library logo or symbol that you uploaded using the '**Manage Images**' module of the Patron Card Creator Tool.

After saving, your layouts will appear on the 'Manage Layouts' page.

3.1.5.4 Batches

- *Get there:* More > Tools > Patron Card Creator > Batches

A batch is a collection of patrons for whom you want to generate cards.

3.1.5.4.1 Add a Batch To add a new batch, you want to click on the 'Batches' button at the top of your page and choose 'New Batch'

3.1.5.5 Manage Images

- *Get there:* More > Tools > Patron Card Creator > Manage Images

Images uploaded using this tool will appear on the menu when creating **patron card layouts**. You are limited in how many images you can upload (not counting patron images) by the **ImageLimit** system preference.

IMPORTANT

Images must be under 500k in size.

TIP

Pictures uploaded with this tool should be at least 300dpi which is the minimum quality for a printable image.

In the center of the screen is a simple upload form, simply browse for the file on your computer and give it a name you'll recognize later.

Upload Images

NOTE: Only PNG, GIF, JPEG, XPM formats are supported. Images must be less than 500KB.

Select the file to upload:

Image name:
This will be the name by which you will refer to this image in the patron card layout editor.

Delete Images

No images are currently available.

Once the file is uploaded you will be presented with a confirmation message.

And the image will be listed with all of your others on the right hand side of the page.

Delete Images

Select one or more images to delete.

ID	Name	Select
3	Koha Logo	<input type="checkbox"/>
1	nicole	<input type="checkbox"/>

To delete one or multiple of these images, click the checkbox to the right of each image you want to delete and click the 'Delete' button.

3.1.6 Patrons (anonymize, bulk-delete)

- *Get there:* More > Tools > Patrons and Circulation > Patrons (anonymize, bulk-delete)

This tool allows you to bulk anonymize circulation histories (this means that you keep records of how many times items were checked out - but not the patrons who checked the items out) or bulk delete patrons (remove them from the system completely).

IMPORTANT

Patrons with outstanding fines or items checked out are not saved. They are not completely removed from the system (they are only moved to the delete_borrowers table), but this tool does not provide as many checks as one may desire.

IMPORTANT

The anonymization will fail quietly if **AnonymousPatron** preference does not contain a valid value.

Delete some old patrons/Anonymize some check-out history

What do you want to do ?

- Delete borrower who has not borrowed since:
- Anonymize check-out history older than

Next >>

To either delete or anonymize patrons

- Check the task you would like to perform (Delete or Anonymize)
- Enter a date before which you want to alter the data
- Click 'Next'
- A confirmation will appear asking if you're sure this is what you want to happen

Warnings

- 0 patrons will be deleted
- 1 check-out history will be anonymized

Check-out history for 1 patrons will be anonymized

Finish

[Cancel](#)

- Clicking 'Finish' will delete or anonymize your data

No patron records have been removed

All patrons with checkouts older than 2009-10-01 have been anonymized

3.1.7 Batch patron modification

- *Get there:* More > Tools > Patrons and Circulation > Batch patron modification

With this tool you can make edits to a batch of patron records. Simply load in a file of cardnumbers (one per line) or scan patron card numbers in to the box provided.

Batch patrons modification

The screenshot shows a web-based interface for batch patron modification. It is divided into two main sections. The first section, titled 'Use a file', contains a 'File:' label, an empty text input field, and a 'Browse...' button. The second section, titled 'Or list cardnumbers one by one', contains a label 'Cardnumber list (one cardnumber per line):' and a large text area with a green border. This text area contains two lines of card numbers: '23529001000463' and '23529000035676'. At the bottom of the interface are two buttons: 'Continue' and 'Cancel'.

Once you have the file loaded or the barcodes scanned click 'Continue.' You will be presented with a list of the patrons and the changes you can make.

Once you have made the changes you want, you can click 'Save' and Koha will present you with the changed patron records.

3.1.8 Tag Moderation

- *Get there:* More > Tools > Patrons and Circulation > Tags

Depending on your **tagging system preferences**, librarians may need to approve tags before they are published on the OPAC. This is done via the Tag Moderation Tool. If there are tags awaiting moderation they will be listed on the main staff dashboard under the module labels:

Authorities

About Koha

Suggestions pending approval: **1**

Comments pending approval: **1**

Tags pending approval: **3**

To moderate the tags visit the Tags tool. When first visiting the tool, you will be presented with a list of tags that are pending approval or rejection by a librarian

Tags

Displaying Pending Terms

Select: [All](#) [Pending](#) [None](#)

Test Blacklist

Enter a word or phrase here to test against your whitelist/blacklist:

crap is neither permitted nor prohibited!

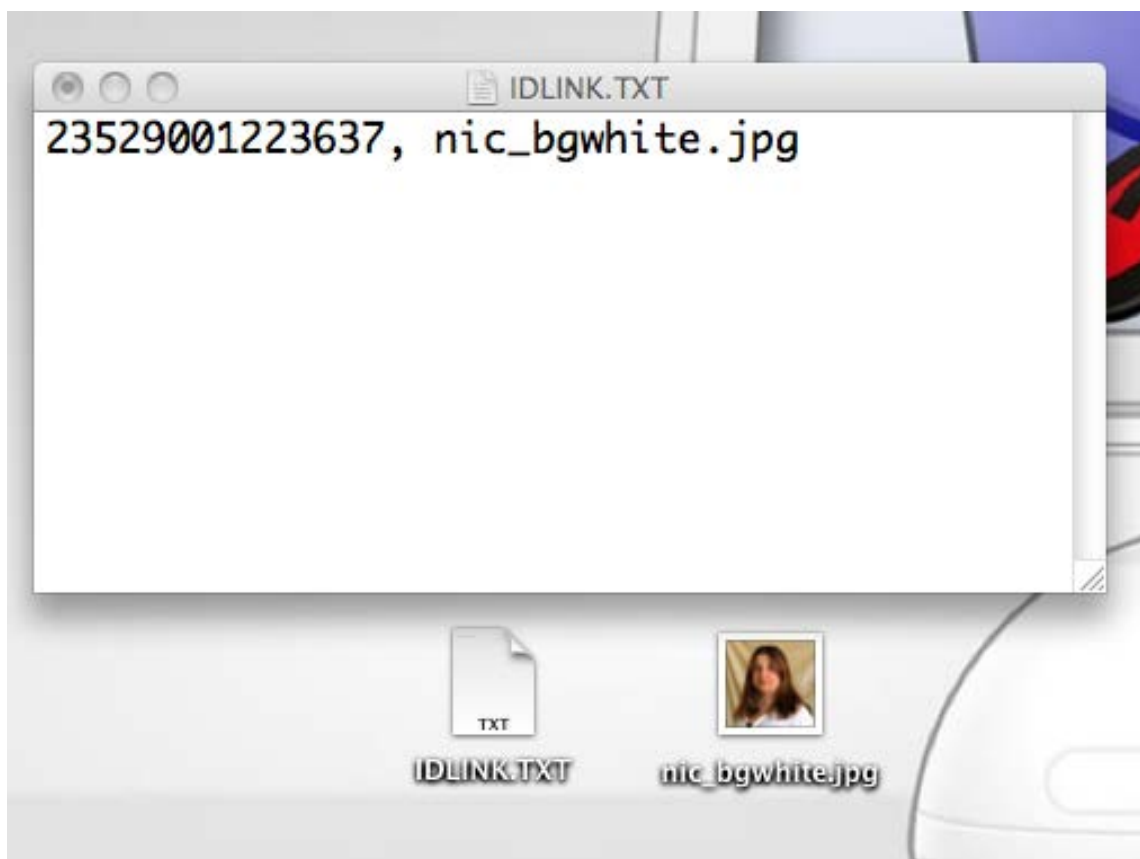

3.1.9 Upload Patron Images

- *Get there:* More > Tools > Patrons and Circulation > Upload Patron Images

Patron images can be uploaded in bulk if you are [allowing patron images](#) to be attached to patron records. These images can also be used when creating [patron cards](#).

- Create a txt file and title it "DATALINK.TXT" or "IDLINK.TXT"

- On each line in the text file enter the patron's card number followed by comma (or tab) and then the image file name

- Make sure that your TXT file is a plain text document, not RTF.
- Zip up the text file and the image files
- Go to the Upload Patron Images Tool

Upload Patron Images

NOTE: Only PNG, GIF, JPEG, XPM formats are supported.

zip file

image file

Select the file to upload:

Enter patron cardnumber:

[Cancel](#)

- For a single image, simply point to the image file and enter the patron card number
- For multiple images, choose to upload a zip file

- After uploading you will be presented with a confirmation

Patron Image(s) Successfully Uploaded

- Unpacking completed
- 1 directorie(s) scanned.
- 1 directorie(s) processed.
- 1 image(s) moved into the database:
- nic_bgwhite.jpg - Cardnumber:
23529001223637 imported successfully.

IMPORTANT

There is a limit of 520K on the size of the picture uploaded and it is recommended that the image be 200x300 pixels, but smaller images will work as well.

3.2 Catalog

3.2.1 Batch item modification

- *Get there:* More > Tools > Catalog > Batch item modification

This tool will allow you to modify a batch of item records in Koha.

3.2.3 Export Data (MARC & Authorities)

- *Get there:* More > Tools > Catalog > Export Data

Koha comes with a tool that will allow you to export your bibliographic, holdings and/or authority data in bulk. This can be used to send your records to fellow libraries, organizations or services; or simply for backup purposes.

3.2.3.1 Export Bibliographic Records

At the top of the screen you need to pick what data you're exporting. If you're exporting bibliographic records with or without the holdings information you want to click the 'Export bibliographic records' tab.

- Fill in the form in order to limit your export to a specific range (all fields are optional)

Export bibliographic records
Export authority records

Note : The items are exported by this tool unless specified.

Select records to export

From biblio number:

To biblio number:

Item type:

Library:

From item call number:

To item call number:

Accession date (inclusive):

Start date: 

End date: 

- Choose to limit your export by any one or more of the following options
 - * Limit to a bib number range
 - * Limit to a specific item type
 - * Limit to a specific library
 - * Limit to a call number range
 - * Limit to an acquisition date range
- Next choose what to skip when exporting

Options

Don't export items

Remove non-local items

Don't export fields separate by a blank. (e.g., 100a 200 606)

- * By default items will be exported, if you would like to only export bibliographic data, check the 'Don't export items' box
 - * To limit your export only to items from the library you're logged in as (if you leave the 'Library' field set to 'All') or to the library you selected above check the 'Remove non-local items' box
 - * You can also choose what fields you don't want to export. This can be handy if you're sharing your data, you can remove all local fields before sending your data to another library
- Finally choose the file type and file name

- * Choose to export your data in marc or marcxml format
 - * Choose the name you want your file to save as
- Click 'Export bibliographic records'

3.2.3.2 Export Authority Records

At the top of the screen you need to pick what data you're exporting. If you're exporting authority records you want to click the 'Export authority records' tab.

- Fill in the form in order to limit your export to a specific range or type of authority record (all fields are optional)

- Next choose fields that you would like to exclude from the export separated by a space (no commas)

- If you'd like to exclude all subfields of the 200 for example just enter 200
- If you'd like to exclude a specific subfield enter it beside the field value 100a will exclude just the subfield 'a' of the 100

- Finally choose the file type and file name

<input type="checkbox"/>	10101000000056	591A - Amazing animals /	08/18/2009	None

Alternatively you can export the list to a CSV file for altering in an application on your desktop. Simply check the box next to 'Export to csv file' to generate this file.

Once you have found the items on your shelves you can return to this list and check off the items you found to have the system update the last seen date to today.

If you have a portable scanner (or a laptop and USB scanner) you can walk through the library with the scanner in hand and scan barcodes as you come across them. Once finished you can then upload the text file generated by the scanner to Koha

Use a barcode file

Barcode file:

Set inventory date to: 
(MM/DD/YYYY)

Choose the text file and the date you want to mark all items as seen and click 'Submit.'

3.2.5 Label Creator

- *Get there:* More > Tools > Catalog > Label Creator

The Label Creator allow you to use layouts and templates which you design to print a nearly unlimited variety of labels including barcodes. Here are some of the features of the Label Creator module:

- Customize label layouts
- Design custom label templates for printed labels
- Build and manage batches of labels
- Export single or multiple batches
- Export single or multiple labels from within a batch
- Export label data in one of three formats:

- PDF - Readable by any standard PDF reader, making labels printable directly on a printer
- CSV - Export label data after your chosen layout is applied allowing labels to be imported in a variety of applications
- XML - Included as an alternate export format

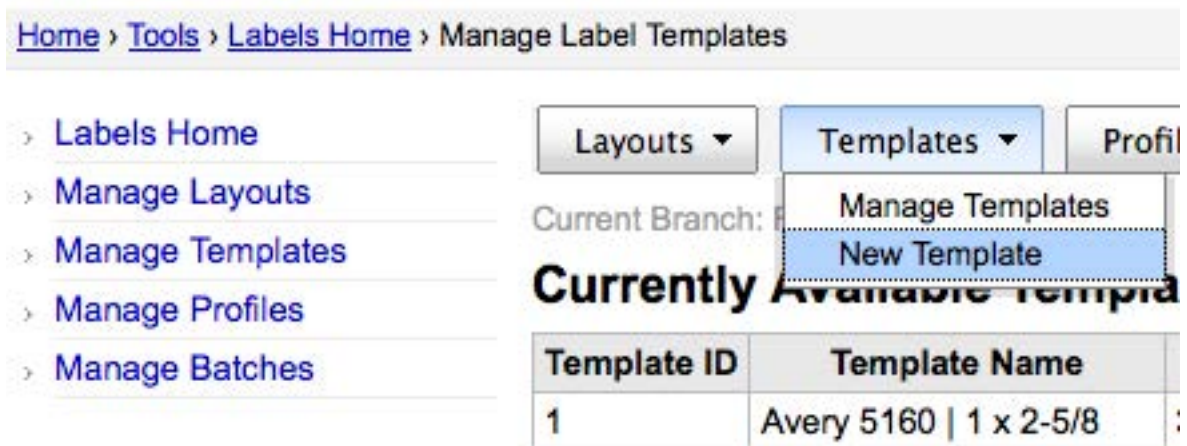

At the top of each screen within the Label Creator, you will see a toolbar allowing quick access to relevant functions. The menu to the left of each screen also allows easy access to the different sections of the Label Creator. The bread crumb trail near the top of each screen will give specific indication as to where you are within the Label Creator module and allow quick navigation to previously traversed sections. And finally, you can find more detailed information on each section of the Label Creator by clicking the online help link at the upper left-hand corner of every page.

3.2.5.1 Templates

- *Get there:* More > Tools > Label Creator > Templates

A template is based on the label/card stock you are using. This might be Avery 5160 for address labels, Gaylord 47-284 for spine labels or Avery 28371 for your patron cards, just to give a couple of examples. These labels will include all of the information you will need for setting up a Koha, this information may be on the packaging, and if not it can usually be found on the vendor’s website.

3.2.5.1.1 Add a Template To add a new template, you want to click on the ‘Templates’ button at the top of your page and choose ‘New Template’

Using the form that appears you can define the template for your sheet of labels or cards.

Edit label template

Template ID: 7

Template code:

Template description:

Units:

Page height: in

Page width: in

Label width: in

Label height: in

Top page margin: in

Top text margin: in

Left text margin: in

Number of columns:

Number of rows:

Gap between columns: in

Gap between rows: in

Profile:

- Template ID will be automatically generated after saving your template, this is simply a system generated unique id
- Template Code should be something you can use to identify your template on a list of templates
- You can use the Template Description to add additional information about the template
- The Units pull down is used to define what measurement scale you're going to be using for the template. This should probably match the unit of measurement used on the template description provided by the product vendor.

- The measurements, number of columns and number of rows can be found on the vendor product packaging or website.

-

IMPORTANT

If you do not supply a left text margin in the template, a 3/16" (13.5 point) left text margin will apply by default.

- A profile is a set of "adjustments" applied to a given template just prior to printing which compensates for anomalies unique and peculiar to a given printer (to which the profile is assigned).
 - Before picking a profile try printing some sample labels so that you can easily define a profile that is right for your printer/template combination.
 - After finding any anomalies in the printed document, **create a profile** and assign it to the template.

After saving, your templates will appear on the 'Manage Templates' page.

Currently Available Templates

Template ID	Template Name	Description	Select
1	Avery 5160 1 x 2-5/8	3 columns, 10 rows of labels	<input type="checkbox"/>
7	Demco WS14942260	1" X 1.5" Spine Label Setup for up to four lines of text	<input type="checkbox"/>
12	Demco WS14942260	1" X 1.5" Spine Label Setup for five lines of text	<input type="checkbox"/>
22	DEFAULT TEMPLATE 01	Default description	<input type="checkbox"/>

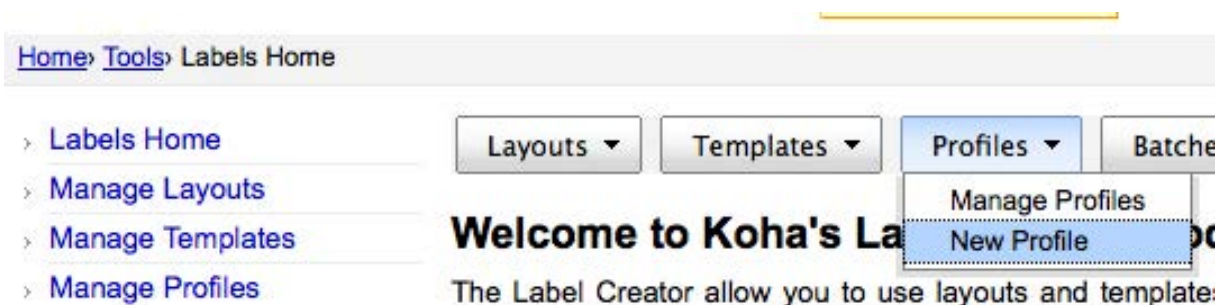

3.2.5.2 Profiles

- *Get there:* More > Tools > Label Creator > Profiles

A profile is a set of "adjustments" applied to a given **template** just prior to printing which compensates for anomalies unique and peculiar to a given printer (to which the profile is assigned). This means if you set a template up and then print a sample set of data and find that the items are not all aligned the same on each label, you need to set up a profile for each printer to make up for the differences in printing styles, such as the shifting of text to the left, right, top or bottom.

If your labels are printing just the way you want, you will not need a profile.

3.2.5.2.1 Add a Profile To add a new profile, you want to click on the 'Profiles' button at the top of your page and choose 'New Profile'

Using the form that appears you can create a profile to fix any problems with your template.

Edit printer profile

Profile settings

Printer name:

Paper bin:

Template name: Profile unassigned

Units:

Offset:

Horizontal: pt

Vertical: pt

Creep:

Horizontal: pt

Vertical: pt

- The Printer Name and Paper Bin do not have to match your printer exactly, they are for your reference so you can remember what printer you have set the profile for. So if you want to use the Printer model number in printer name or you can call it 'the printer on my desk'
- Template will be filled in once you have chosen which template to apply the profile to on the [template edit form](#)
- The Units pull down is used to define what measurement scale you're going to be using for your profile.

- Offset describes what happens when the entire image is off center either vertically or horizontally

and creep describes a condition where the distance between the labels changes across the page or up and down the page

- For these values, negative numbers move the error up and to the left and positive numbers move the error down and to the right
- Example: the text is .25" from the left edge of the first label, .28" from the left edge of the second label and .31" from the left edge of the third label. This means the horizontal creep should be set to .03" to make up for this difference.

After saving, your profiles will appear on the 'Manage Profiles' page.

Currently Available Profiles

Profile ID	Printer Name	Paper Bin	Template Name	Select
1	Library Laser	Bypass	Avery 5160 1 x 2-5/8	<input type="checkbox"/>
11	Library Laser	Tray 1	Avery 5160 1 x 2-5/8	<input type="checkbox"/>
17	HP 450	1		<input type="checkbox"/>

Once you have saved your new profile, you can return to the list of templates and choose to edit the template that this profile is for.

3.2.5.3 Layouts

- *Get there:* More > Tools > Label Creator > Layouts

A layout is used to define the fields you want to appear on your labels.

3.2.5.3.1 Add a Layout To add a new layout, you want to click on the 'Layouts' button at the top of your page and choose 'New Layout'

Using the form that appears you can create a profile to fix any problems with your template.

- The name of your layout can be anything you'd like to help you identify it later.
 - If this is a barcode label you'll want to choose the encoding (Code 39 is the most common)
 - The layout type can be any combination of bibliographic information and/or barcode. For example a spine label would just be Biblio whereas a label for your circulation staff to use to checkout the book would probably be Biblio/Barcode.
 - The Bibliographic Data to Print includes any of the data fields that may be mapped to your MARC frameworks. You can choose from the preset list of fields or you can click on 'List Fields' and enter your own data. In 'List Fields', you can specify MARC subfields as a 4-character tag-subfield string: (ie. 254a for the title field), You can also enclose a whitespace-separated list of fields to concatenate on one line in double quotes. (ie. "099a 099b" or "itemcallnumber barcode"). The fields available are from the database tables list below. Finally you could add in static text strings in single-quote (ie. 'Some static text here.')
- You can use the schema viewer (<http://schema.koha-community.org>) with the following tables to find field names to use:
- * Currently all fields in the following tables are used: items, biblioitems, biblio, branches

- Choose if the label maker should print out the guidelines around each label

- Choose if you'd like Koha to try to split your call numbers (usually used on Spine Labels)
- Finally choose your text settings such as alignment, font type and size.

After saving, your layouts will appear on the 'Manage Layouts' page.

3.2.5.4 Batches

- *Get there:* More > Tools > Label Creator > Batches

Batches are made up of the barcodes you would like to print. Once in this tool you can search for the item records you would like to print out labels for.

3.2.5.4.1 Add a Batch Batches can be created in one of two ways. The first is to click the 'Create Label Batch' link on the '[Staged MARC Management](#)' page:

Manage Staged MARC Records

#	File name	Comments	Status	Staged	# Bibs	# Items	Action
16	bib-1181.utf8		staged	2010-02-24 07:33:34	1	1 (Create Label Batch)	Clean
15	bib-1181.utf8		imported	2010-02-24 06:39:05	1	0	Clean
14	bib-16001.utf8		imported	2010-02-11 23:26:51	1	1 (Create Label Batch)	Clean
13	koha.mrc		cleaned	2010-02-05 03:55:12	198	394 (Create Label Batch)	
12	bib-1.mrc		imported	2009-12-15 14:30:53	1	8 (Create Label Batch)	Clean
11	bib-1.mrc		imported	2009-12-15 01:11:20	1	8 (Create Label Batch)	Clean

The other is to choose to create a new batch from the label creator tool

[Home](#) > [Tools](#) > [Labels Home](#) > Manage Label Batches

Manage Batches
New Batch

There Are No Batches Currently Available.

You will be brought to an empty batch with an 'Add item(s)' button at the top of the page and a box to scan barcodes in to.

Add item(s)

Current library: Nicole's Library

Add by barcode(s):
 One barcode per line.
 Leave empty to add
 via item search.

**There are no items in
Batch 11 yet**

Add items by barcode using the
text area above or leave empty to
add via item search.

You can either scan barcodes in to the box provided and click the 'Add item(s)' button or you can click the 'Add item(s)' button with the barcodes box empty. Clicking 'Add item(s)' with nothing in the barcodes box will open a search window for you to find the items you want to add to the batch.

Search for items to add to Batch 11

The slow learner.

by Abraham, Willard. [], Center for Applied Research in Education, New York : 1964, x, 113 p.

The Grolier library of women's biographies.

[], Grolier Educational, Danbury, Conn. : 1998, 10 v. :, ISBN: 0717291243, Includes index.

Add Item	Call Number	Accession Date	Barcode	Select
Add	NA	2009-12-27	2566543245678	<input type="checkbox"/>
Add	NA	2009-12-27	2566543245679	<input type="checkbox"/>
Add	NA	2009-12-27	2566543245680	<input type="checkbox"/>

Once you have added all of the items click the 'Done' button. The resulting page will list the items you have selected.

Current Branch: Fairview

Items in batch number 2

Label Number	Summary	Item Type	Barcode	Select
1	Cotton Mather Wendell, Barrett			<input type="checkbox"/>
2	The years Woolf, Virginia			<input type="checkbox"/>
3	The years Woolf, Virginia		33203000669201	<input type="checkbox"/>
4	The Grolier library of women's biographies N/A		2566543245678	<input type="checkbox"/>
5	The Grolier library of women's biographies N/A		2566543245679	<input type="checkbox"/>

To print your labels, click the 'Export Batch' button. To print only some of the labels, click the 'Export Item(s)' button. Either way you will be presented with a confirmation screen where you can choose your template and layout.

1 batch(es) to export.

Select a template to be applied: Avery 5160 | 1 x 2-5/8

Select a layout to be applied: Label Test

Enter starting label number: 1

Export
Cancel

You will then be presented with three download options: PDF, Excel, and CSV.

After saving your file, simply print to the blank labels you have in your library.

3.2.6 Quick Spine Label Creator

- *Get there:* More > Tools > Catalog > Quick Spine Label Creator

TIP

This tool does not use the label layouts or templates, it simply prints a spine label in the first spot on the label sheet.

- Define the fields you want to print on the spine label in the [SpineLabelFormat](#) system preference
- Format your label printing by editing `spinelabel.css` found in `koha-tmpl/intranet-tmpl/prog/en/css/`

To use this tool you simply need the barcode for the book you'd like to print the spine label for.

Quick spine label creator

Barcode:

View spine label

3.2.7 Stage MARC Records for Import

- *Get there:* More > Tools > Catalog > Stage MARC records for import

This tool can be used to import both bibliographic and authority records that are saved in MARC format. Importing records into Koha includes two steps. The first is to stage records for import.

- First find the MARC file on your computer

Stage records into the reservoir

Select the file to stage:

- Next you will be presented with options for record matching and item imports

Stage records into the reservoir

Select the file to stage:

Upload progress:

100%

Comments about this file:

Record type:

Character encoding:

Look for existing records in catalog?

Record matching rule:

Action if matching record found:

Action if no match is found:

Check for embedded item record data?

Yes

No

How to process items:

- Enter 'Comments about this file' to identify your upload when going to the ['Manage Staged MARC Records'](#) tool

- Tell Koha which type of file this is, bibliographic or authority

- Choose the character encoding

- Choose whether or not you want to look for matching records

- * You can set up **record matching rules** through the administration area

- Next choose what to do with matching records if they are found
- Finally choose what to do with records that are unique
- Next you can choose whether or not to import the item data found in the MARC records (if the file you're loading is a bibliographic file)

- Click 'Stage for import'
- You will be presented with a confirmation of your MARC import

Stage MARC Records For Import

MARC Staging results :

- 200 records in file
- 0 records not staged because of MARC error
- 200 records staged
- 116 records with at least one match in catalog per matching rule "ISBN"
- 263 item records found and staged
- [Manage staged records](#)
- [Back](#)

- To complete the process continue to the [Managed Staged MARC Records Tool](#)

3.2.8 Staged MARC Record Management

- *Get there:* More > Tools > Catalog > Staged MARC Record Management

Once you have **staged** your records for import you can complete the import using this tool.

Manage Staged MARC Records

#	File name	Comments	Status	Staged	# Bibs	# Items	Action
9	koha.mrc		staged	2009-11-24 08:40:48	200	263 (Create Label Batch)	Clean
8	bib-684.marc8		imported	2009-10-20 13:16:17	1	1 (Create Label Batch)	Clean
7	koha(3).mrc		cleaned	2009-08-18 16:18:26	94	125 (Create Label Batch)	
6	koha(2).mrc		cleaned	2009-08-18 16:15:57	43	43 (Create Label Batch)	
5	koha.mrc		cleaned	2009-08-18 16:14:33	1000	1113 (Create Label Batch)	

- From the list of staged records, click on the file name that you want to finish importing
 - You will note that records that have already been imported will say so under 'Status'
- A summary of your import will appear along with the option to change your matching rules

File name: bib-3.utf8

Comments:

Staged: 2011-03-17 21:21:55

Status: staged

Matching rule applied:

Action if matching record found:

Action if no match found:

Item processing:

- Below the summary is the option to import the batch of bib records using a specific framework

Add new bibliographic records into this framework:

#	Citation	Status	Match?
1	Korean-English Dictionary	staged	no_match

Default

Books, Booklets, Workbooks

Audio Cassettes, CDs

Kits

Fast Add Framework

Binders

Models

CD-ROMs, DVD-ROMs, General Online Resources

DVDs, VHS

Serials

- Choosing a framework other than 'Default' isn't necessary, but it's helpful for running reports and having the right bib level item type selected on import.

- Below the framework selection there will be a list of the records that will be imported

Page 1 2 3 4 5 6 7 8

#	Citation	Status	Match?	Bib
1	Library mashups : (9781573873727)	staged	auto_match	
	Matches biblio 2 (score = 1000): Library mashups :			
2	Library mashups : (9781573873727)	staged	auto_match	
	Matches biblio 2 (score = 1000): Library mashups :			
3	Winslow Homer watercolors, Hoopes, Donelson F.	staged	no_match	
4	The encyclopedia of the biological sciences, Gray, Peter,	staged	no_match	
5	Year of fear; Mechanicus, Philip.	staged	no_match	
6	A history of medical psychology Zilboorg, Gregory,	staged	no_match	
7	Understanding the Old Testament Anderson, Bernhard W.	staged	no_match	
8	Philo of Alexandria : Sandmel, Samuel. (0195025148)	staged	auto_match	
	Matches biblio 8 (score = 1000): Philo of Alexandria : Sandmel, Samuel.			
9	The changing metropolis, McKeown, James E. (0395112311)	staged	auto_match	
	Matches biblio 9 (score = 1000): The changing metropolis, McKeown, James E.			
10	Becoming partners; marriage and its alternatives, Rogers, Carl R.	staged	no_match	

- Review your summary before completing your import to make sure that your matching rule worked and that the records appear as you expect them to

- Click 'Import into catalog' to complete the import

Completed import of records

Number of records added	84
Number of records updated	0
Number of records ignored	116
Number of items added	260
Number of items ignored because of duplicate barcode	3

To clean items out of the 'reservoir':

- Visit the main screen of the Manage Staged MARC Records tool

Manage Staged MARC Records

#	File name	Comments	Status	Staged	# Bibs	# Items	Action
9	koha.mrc		staged	2009-11-24 08:40:48	200	263 (Create Label Batch)	<input type="button" value="Clean"/>
8	bib-684.marc8		imported	2009-10-20 13:16:17	1	1 (Create Label Batch)	<input type="button" value="Clean"/>
7	koha(3).mrc		cleaned	2009-08-18 16:18:26	94	125 (Create Label Batch)	
6	koha(2).mrc		cleaned	2009-08-18 16:15:57	43	43 (Create Label Batch)	
5	koha.mrc		cleaned	2009-08-18 16:14:33	1000	1113 (Create Label Batch)	

- To clean a batch, click the 'Clean' button to the right
- You will be presented with a confirmation message

- Accept the deletion and the records will be removed from the reservoir and the status will be changed to 'cleaned'

3.2.9 Upload Local Cover Image

- *Get there:* More > Tools > Catalog > Upload Local Cover Image

This tool will allow you to upload cover images for the materials in your catalog. To access this tool, staff will need the [upload_local_cover_images permission](#). In order for images to show in the staff client and/or OPAC you will need to set your [LocalCoverImages](#) and/or [OPACLocalCoverImages](#) preferences to 'Display.' Images can be uploaded in batches or one by one.

TIP

Koha does not have a maximum file size limit for this tool, but Apache may limit the maximum size of uploads (talk to your sys admin).

If uploading a single image:

- Visit the tool and click the 'Browse' button to browse to the image on your local machine.

Upload Local Cover Image

- Select an image file or ZIP file to upload. The tool will accept images in GIF, JPEG, PNG, and XPM formats.

Upload images

Select the file to upload:

Upload progress: 
100%

File type

ZIP file

Image file

Enter cover biblionumber:

Options

Replace existing covers

- Click 'Upload file'
- Choose 'Image file' under the 'File type' section
- Enter the biblionumber for the record you're attaching this image to. This is not the same as the barcode, this is the system generated number assigned by Koha.
 - Find the biblionumber by looking at the end of the URL in the address bar when on the detail page

- or by clicking on the MARC tab on the detail page in the staff client

MARC biblio : 4091 (Library mashups :)

With Framework :

- If you would like to replace any other cover images you may have uploaded in the past, check the 'Replace existing covers' box under the 'Options' section
- Click 'Process images'
- You will be presented with a summary of the upload and a link to the record you have just added the image to

If uploading a batch of images at once you will need to prepare a ZIP file first.

- Enter in to the ZIP file all the images you are uploading
- Also include a text file (*.TXT) named either datalink.txt or idlink.txt listing the biblionumber followed by the image name for each image one per line

– ex. 4091,image4091.jpg

- Browse your local computer to the ZIP file
- Click 'Upload file'
- Choose 'Zip file' under the 'File type' section
- If you would like to replace any other cover images you may have uploaded in the past, check the 'Replace existing covers' box under the 'Options' section
- Click 'Process images'
- You will be presented with a summary of the upload

Upload Local Cover Image

Image upload results :

- 2 images found
- [View final record](#)
- [Back](#)

IMPORTANT

The source image is used to generate a 140 x 200 px thumbnail image and a 600 x 800 px full-size image. The original sized image uploaded will not be stored by Koha

You will be able to see your cover images in the staff client on the detail page under the 'Image' tab in the holdings table at the bottom

In the OPAC the cover images will also appear in the images tab, as well as next to the title and on the search results.

3.3 Additional Tools

3.3.1 Calendar

- *Get there:* More > Tools > Additional Tools > Calendar

Libraries can define library closings and holidays to be used when calculating due dates. You can make use of the Calendar by turning on the proper system preferences:

- *Get there:* More > Administration > Global System Preferences > Circulation > **useDaysMode**
 - Choose the method for calculating due date - either include days the library is closed in the calculation or don't include them.
- *Get there:* More > Administration > Global System Preferences > Circulation > **finescalendar**
 - This will check the holiday calendar before charging fines

Nicole's Library Calendar

Define the holidays for:

Calendar information

⌚⌚

Su	Mo	Tu	We	Th	Fr	Sa
28	29	30	31	1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	1

Today

Copy holidays to:

3.3.1.1 Adding Events

Before adding events, choose the library you would like to apply the closings to. When adding events you will be asked if you would like to apply the event to one branch or all branches. To add events, simply

- Click on the date on the calendar that you would like to apply the closing to

Add new holiday

Library: Nicole's Library

From date: Thursdays, 11/8/2012

To date : 

Title:

Description:

Holiday only on this day. [\[?\]](#)

Holiday repeated every same day of the week. [\[?\]](#)

Holiday repeated yearly on the same date. [\[?\]](#)

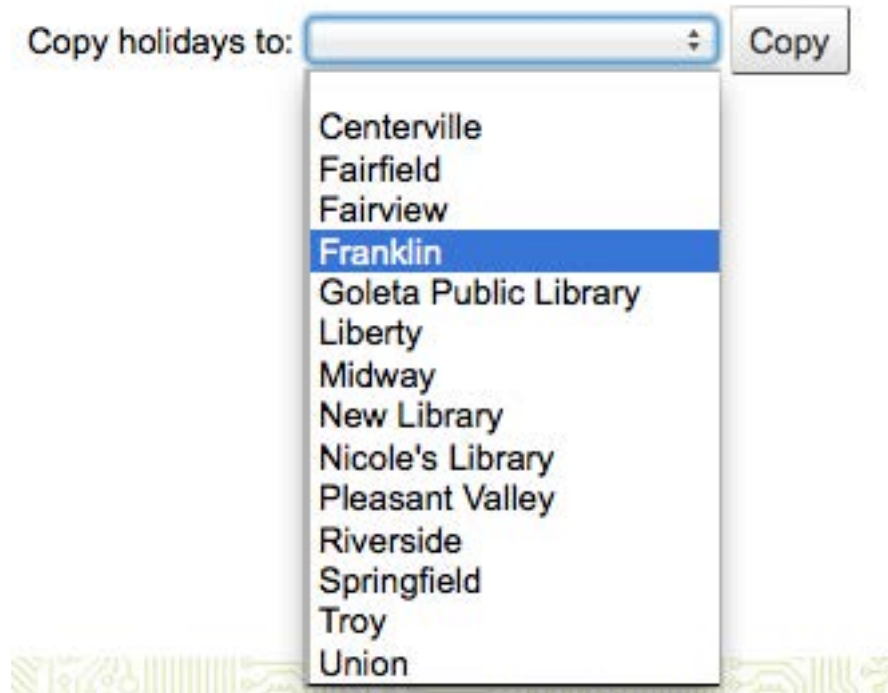

Holidays on a range. [\[?\]](#)

Holidays repeated yearly on a range. [\[?\]](#)

Copy to all libraries. [\[?\]](#)

- In the form that appears above the calendar, enter the closing information (for more info on each option click the question mark [?] to the right of the option)
 - Library will be filled in automatically based on the library you chose from the pull down at the top of the page
 - The day information will also be filled in automatically based on the date you clicked on the calendar
 - In the description enter the reason the library is closed
 - Next you can choose if this event is a one time event or if it is repeatable.
 - * If this is a one day holiday choose 'Holiday only on this day'
 - * If this is a weekly closing (like a weekend day) then you can choose 'Holiday repeated every same day of the week'
 - * If this is an annual holiday closing choose 'Holiday repeated yearly on the same date'
 - * If the library is going to be closed for the week or a range of time choose 'Holiday on a range' and enter a 'To Date' at the top
 - * If the library is going to be closed for a range of time each year (such as summer holidays for schools) choose 'Holiday repeated yearly on a range' and enter a 'To Date' at the top
 - Finally decide if this event should be applied to all libraries or just the one you have originally selected

- * If you'd rather enter all the holidays and then copy them all to another branch all at once you can use the copy menu below the calendar

- After saving you will see the event listed in the summary to the right the calendar

Nicole's Library Calendar

Define the holidays for:

Calendar information

Copy holidays to:

Hints

- Search in the calendar the day you want to set as holiday.
- Click the date to add or edit a holiday.
- Enter a title and description for the holiday.
- Specify how the holiday should repeat.
- Click Save to finish.

Key

Weekly - Repeatable Holidays

Day of week	Title	Description
Sundays	Sunday Closed	

Yearly - Repeatable Holidays

Month/Day	Title	Description
10/31	Halloween	

Unique Holidays

Date	Title	Description
12/31/2011		
01/01/2012		
01/02/2012		
11/22/2012	Thanksgiving	

3.3.1.2 Editing Events

To edit events

- Click on the event on the calendar that you want to change (do this by clicking on the date on the calendar, not the event listed in the summary)

Edit this holiday

Unique holiday

Library: Nicole's Library

From Date: Thursdays, 11/22/2012

To Date : 

Title:

Description:

Generate exceptions on a range of dates. [?]

Delete this holiday. [?]

Delete the single holidays on a range. [?]

Delete the repeated holidays on a range. [?]

Delete the exceptions on a range. [?]

Edit this holiday [?]

- From this form you can make edits to the holiday or delete the holiday completely.

– All actions require that you click 'Save' before the change will be made.

- Clicking on repeatable events will offer slightly different options

Edit this holiday

Holiday repeating weekly

Library: Nicole's Library

From Date: Sundays, 11/4/2012

To Date : 

Title:

Description:

Generate an exception for this repeated holiday. [?]
 Generate exceptions on a range of dates. [?]
 Delete this holiday. [?]
 Delete the single holidays on a range. [?]
 Delete the repeated holidays on a range. [?]
 Delete the exceptions on a range. [?]
 Edit this holiday [?]

- In the form above you will note that there is now an option to 'Generate an exception for this repeated holiday,' choosing this option will allow you to make it so that this date is not closed even though the library is usually closed on this date.

* All actions require that you click 'Save' before the change will be made.

3.3.1.3 Additional Help

When adding or editing events you can get additional help by clicking on the question mark next to various different options on the form

Delete this holiday. [?]
 This will delete this holiday rule. If it is a repeatable holiday, this option checks for possible exceptions. If an exception exists, this option will remove the exception and set the date to a regular holiday.

3.3.2 CSV Profiles

- *Get there:* More > Tools > Additional Tools > CSV Profiles

CSV Profiles are created to define how you would like your cart or list to export.

3.3.2.1 Add CSV Profiles

To add a CSV Profile

- Click 'CSV Profiles' from the Tools menu

New profile

New CSV export profile

Profile name:

Profile description:

CSV separator:

Field separator:

Subfield separator:

Encoding:

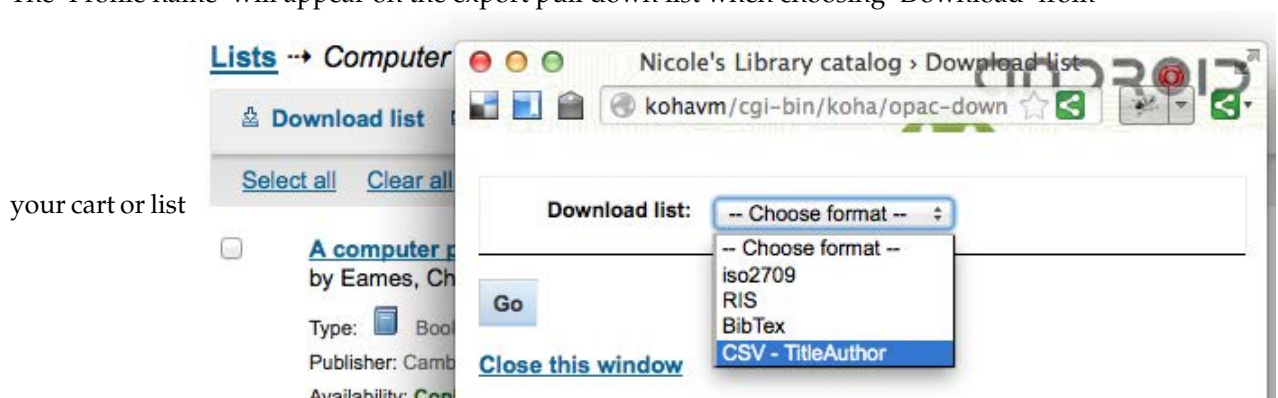

Profile MARC fields:

You have to define which fields or subfields you want to export, separated by pipes.

You can also use your own headers (instead of the ones from Koha) by prefixing the field number with an header, followed by the equal sign.

Example: Personal name=200|Entry element=210\$a|300|009

- The 'Profile name' will appear on the export pull down list when choosing 'Download' from

your cart or list

- The 'Profile description' is for your own benefit, but will also appear in the OPAC when patrons download content, so make sure it's clear to your patrons as well
- The 'CSV separator' is the character used to separate values and value groups

TIP

The most common option here is comma because most spreadsheet applications know how to open files split by commas.

- The 'Field separator' is the character used to separate duplicate fields
 - * Example: You may have multiple 650 fields and this is the character that will appear in

between each one in the column

A	B
Title	Subject
A computer perspective,	Computers Exhibitions.
Application of computer technology to library processes:	Libraries Automation Outlines, syllabi, etc.
Computer systems in the library;	Libraries Automation.
Computer use;	Electronic data processing Business.#Electronic data processing depart
Digital magnetic tape recording for computer applications	Computer storage devices.#Magnetic recorders and recording.
Introduction to computers and computer science	Electronic data processing.#Electronic digital computers.
Man and the computer	Computers and civilization.#Electronic digital computers.
The computer from Pascal to von Neumann	Computers History.

- The 'Subfield separator' is the character used to separate duplicate subfields
 - * Example: You may have multiple \$a subfields in a field
- The 'Encoding' field lets you define the encoding used when saving the file
- Finally format your CSV file using the 'Profile MARC fields' fields
 - * Define which fields or subfields you want to export, separated by pipes. Example :
200|210\$a|301

*

TIP

You can also use your own headers (instead of the ones from Koha) by prefixing the field number with an header, followed by the equal sign. Example : Personal name=100|title=245\$a|300

When you have entered in all of the information for you profile, simply click 'Submit' and you will be presented with a confirmation that your profile has been saved.

3.3.2.2 Modify CSV Profiles

Once you have created at least one CSV Profile an 'Edit profile' tab will appear next to the 'New profile' button.

New profile
Edit existing profile

Modify or delete a CSV export profile

Profile name: -- Choose One --

Profile description: -- Choose One --
TitleAuthor

CSV separator: Colon (:)

Field separator: Colon (:)

Subfield separator: Colon (:)

Encoding: ascii

Profile MARC fields:

Delete selected profile ?

Submit
Cancel

- Choose the profile you would like to edit and alter the necessary fields.
- After submitting your changes you will be presented with a confirmation message at the top of the screen

The CSV profile has been successfully modified.

- To delete a profile, check the 'Delete selected profile' option before clicking 'Submit Query'

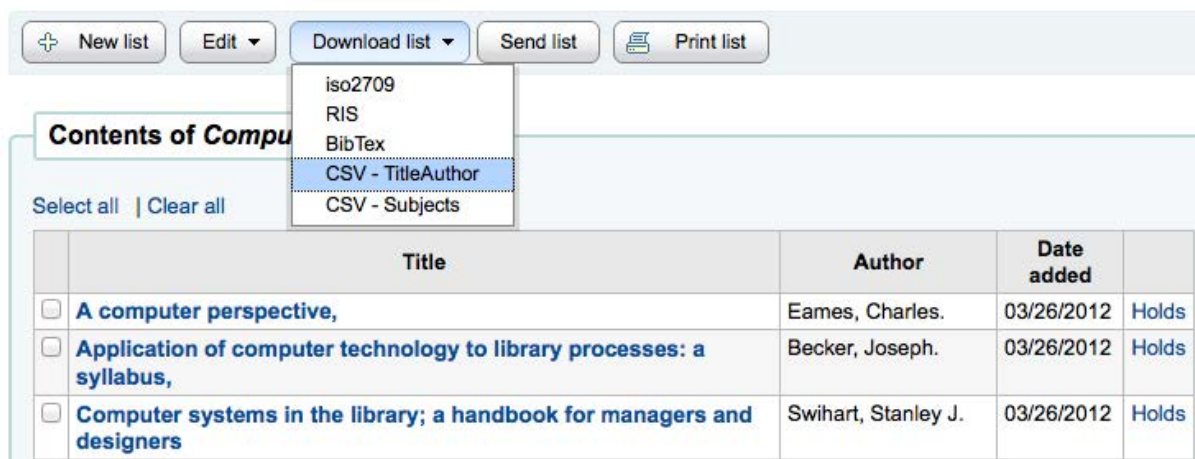

Profile MARC fields: Personal name=100|title=245\$a|300

Delete selected profile ?

Submit
Cancel

3.3.2.3 Using CSV Profiles

Your CSV Profiles will appear on the export list or cart menu under the 'Download' button in both the staff client and the OPAC

Contents of Compu

Select all | Clear all

	Title	Author	Date added	
<input type="checkbox"/>	A computer perspective,	Eames, Charles.	03/26/2012	Holds

3.3.5 Task Scheduler

- *Get there:* More > Tools > Additional Tools > Task Scheduler

The task scheduler is a way to schedule reports to run whenever you want.

To schedule a task, visit the Task Scheduler and fill in the form

- Current Server Time shows the time on your server (schedule all of your reports to run based on that time - not on your local time)
- Time should be entered as hh:mm (2 digit hour, 2 digit minute)
- Date should be entered using the calendar pop up
- From Report choose the report you want to schedule
- Choose whether to receive the text of or a link to the results
- In the Email filed enter the email of the person you want to receive your report

Below the task scheduler form, there is a list of scheduled reports

Jobs already entered

Date/Time	Action	
Mon Dec 14 10:00	EXPORT KOHA_CONF="/home/nengard/koha-dev/etc/koha-conf.xml"; /home/nengard/kohaclone/tools/runreport.pl 5 text nengard@gmail.com	Delete

You can also schedule reports directly from the list of saved reports by clicking the 'Schedule' link

Saved Reports

Choose the report to run from the list

3.3.5.1 Troubleshooting

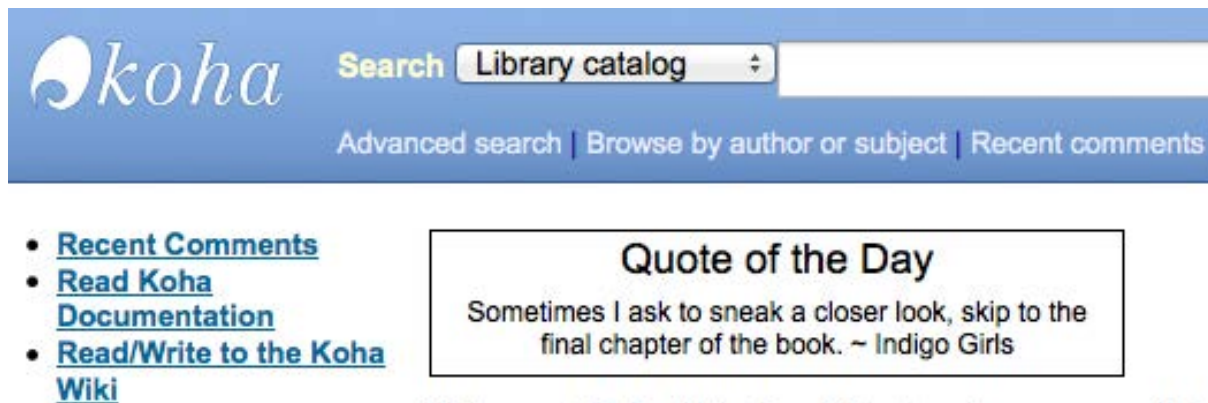

Task scheduler will not work if the user the web server runs as doesn't have the permission to use it. To find out if the right user has the permissions necessary, check /etc/at.allow to see what users are in it. If you don't have that file, check etc/at.deny. If at.deny exists but is blank, then every user can use it. Talk to your system admin about adding the user to the right place to make the task scheduler work.

3.3.6 Quote of the Day (QOTD) Editor

- *Get there:* More > Tools > Additional Tools > Edit quotes for QOTD feature

This tool will allow you to add and edit quotes to show on the OPAC if you're using the Quote of the Day (QOTD) feature.

To turn this feature on set the [QuoteOfTheDay](#) preference to 'Enable' and add at least one quote via the Quote of the Day Editor. Once these steps are complete you will see your quotes above the [OpacMainUserBlock](#) in the OPAC:

3.3.6.1 Add a Quote

To add a quote:

- Click the 'Add quote' button in the toolbar and an empty quote entry will be added to the end of the current quote list.

Quote editor

-

IMPORTANT

Both the 'Source' and the 'Text' fields must be filled in in order to save the new quote.

Show entries Search:

ID	Source	Text	Last displayed
1	Indigo Girls	Sometimes I ask to sneak a closer look, skip to the final chapter of the book.	2012-09-20 13:13:50
NA	<input type="text"/>	<input type="text"/>	0000-00-00 00:00:00

Showing 1 to 2 of 2 entries

- When finished filling in both fields, press the <Enter> key on your keyboard to save the new quote.
- The list will update and the new quote should now be visible in the list.

TIP

You may cancel the addition of a new quote any time prior to saving it simply by pressing the <Esc> key on your keyboard.

3.3.6.2 Edit/Delete a Quote

Once the current quote pool has been loaded into the editing table, you may edit the quote source and text.

- Edit either the 'Source' or 'Text' fields by clicking on the desired field.

Show entries Search:

ID	Source	Text	Last displayed
1	<input type="text" value="Indigo Girls"/>	Sometimes I ask to sneak a closer look, skip to the final chapter of the book.	2012-09-20 13:13:50

Showing 1 to 1 of 1 entries

- When you are finished editing a field, press the <Enter> key on your keyboard to save the changes.

The list will be updated, the edits saved, and visible.

If you'd like you can also delete quote(s).

- Select the quote(s) you desire to delete by clicking on the corresponding quote id.
- Once quote selection is finished, simply click the 'Delete quote(s)' button.
- You will be prompted to confirm the deletion.
- After confirming the deletion, the list will update and the quote(s) will no longer appear.

3.3.6.3 Import Quotes

If you'd like you can import a batch of quotes as a CSV file. Your file must contain two columns in the form: "source","text" with no header row.

NOTE

You will be prompted to confirm upload of files larger than 512KB.

- To start the import process click the 'Import quotes' button at the top of the screen

Quote editor

- Once on the import quotes screen you can browse your computer for the file you would like to import

- After selecting the CSV file, click the 'Open' button and the file will be uploaded into a temporary editing table.

Show entries Search:

Number	Source	Quote
1	George Washington	As Mankind becomes more liberal, they will be more apt to allow that all those who conduct themselves as worthy members of the community are equally entitled to the protections of civil government. I hope ever to see America among the foremost nations of justice and liberality.
2	George Washington	The time is now and near at hand which must probably determine whether Americans are to be freemen or slaves; whether they are to have property they can call their own; whether their houses and farms are to be pillaged and destroyed, and themselves consigned to a state of wretchedness from which no human efforts will deliver them. The fate of unborn millions will now depend, under God, on the courage and conduct of this army. Our cruel and unrelenting enemy leaves us no choice but a brave resistance, or the most abject submission. . . . We have, therefore, to resolve to conquer or to die.

- From the listing you can edit either the 'Source' or 'Text' fields by clicking on the desired field. When you are finished editing a field, press the <Enter> key on your keyboard to save the changes.

Show entries Search:

Number	Source	Quote
1	<input type="text" value="George Washingtd"/>	As Mankind becomes more liberal, they will be more apt to allow that all those who conduct themselves as worthy members of the community are equally entitled to the protections of civil government. I hope ever to see America among the foremost nations of justice and liberality.

- You can also delete quotes from this listing before completing the import.
 - Select the quote(s) you desire to delete by clicking on the corresponding quote id.

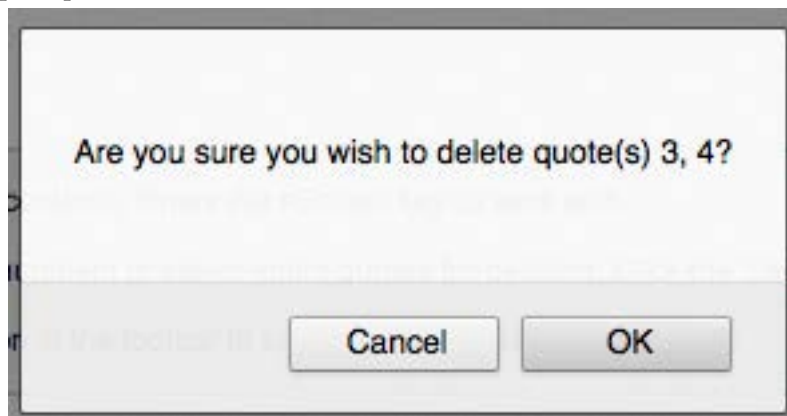

Show 10 entries Search:

Number	Source	Quote
1	George Washington	As Mankind becomes more liberal, they will be more apt to allow that all those who conduct themselves as worthy members of the community are equally entitled to the protections of civil government. I hope ever to see America among the foremost nations of justice and liberality.
2	George Washington	The time is now and near at hand which must probably determine whether Americans are to be freemen or slaves; whether they are to have property they can call their own; whether their houses and farms are to be pillaged and destroyed, and themselves consigned to a state of wretchedness from which no human efforts will deliver them. The fate of unborn millions will now depend, under God, on the courage and conduct of this army. Our cruel and unrelenting enemy leaves us no choice but a brave resistance, or the most abject submission. . . . We have, therefore, to resolve to conquer or to die.
3	George Washington	I conceive that a knowledge of books is the basis on which all other knowledge rests.
4	George Washington	Precedents are dangerous things; let the reins of government then be braced and held with a steady hand, and every violation of the Constitution be reprehended: If defective let it be amended, but not suffered to be trampled upon whilst it has an existence.

– Once quote selection is finished, simply click the 'Delete quote(s)' key.

– You will be prompted to confirm the deletion.

– After confirming the deletion, the list will update and the quote(s) will no longer appear.

- Once you are satisfied with the quotes, click the 'Save quotes' button in the toolbar at the top and the quotes will be saved.

Chapter 4

Patrons

Before importing and/or adding patrons be sure to set up your **patron categories**.

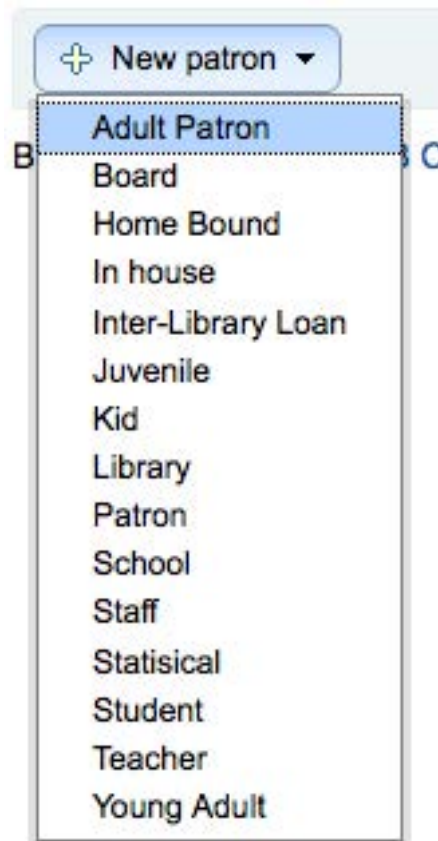

4.1 Add a new patron

Patrons are added by going to the 'Patrons' module.

- *Get there:* Patrons

Once there you can add a new patron.

- Click 'New patron'

- The fields that appear on the patron add form can be controlled by editing the **BorrowerUnwantedField** system preference.
- First enter the identifying information regarding your patron

Add Patron patron

Patron identity

Salutation:

Surname: *Required*

First name: *Required*

Date of birth: 
(MM/DD/YYYY)

Initials:

Other name:

Female Male N/A

- Required fields are defined in the **BorrowerMandatoryField** system preference
- Salutation is populated by the **BorrowersTitles** system preference

- Next enter the contact information

Main address

Address:

Address 2:

City: or choose

State:

Zip/Postal code:

Contact

Primary phone:
Shows on transit slips

Secondary phone:

Other phone:

Primary email:
Shows on transit slips

Secondary email:

Fax:

- For contact information, note that the primary phone and email addresses are the ones that appear on notices and slips printed during circulation (receipts, transfer slips and hold slips). The primary email is also the one that overdue notices and other messages go to.

- If this patron is a child, you will be asked to attach the child patron to an adult patron

Guarantor information

Surname:

First name:

Relationship:

Search for guarantor

Ordered by

- Click 'Set to Patron' to search your system for an existing patron

- If the Guarantor is not in the system, you can enter the first and last name in the fields available
- The relationships are set using the **borrowerRelationship** system preference
- If this patron is a professional, you will be asked to attach the patron to an organizational patron

Guarantor information

Organization name:

- Click 'Set to Patron to search your system for an existing patron
- Each patron can have an alternate contact

Alternate address

Address:

Address 2:

City:

State:

Zip/Postal code:

Country:

Phone:

Email:

Contact note:

Alternate contact

Surname:

First name:

Address:

Address 2:

City:

State:

Zip/Postal code:

Country:

Phone:

- An alternate contact could be a parent or guardian. It can also be used in academic settings to store the patron's home address.
- The library management section includes values that are used within the library

Library management

Card number: *Required*

Library:

Category:

Sort 1:

Sort 2:

- The card number field is automatically calculated if you have the **autoMemberNum** system preference set that way

*

NOTE

For a newly installed system this preference will start at 1 and increment by 1 each time after. To have it start with the starting number of your barcodes, enter the first barcode by hand in the patron record and save the patron. After that the field will increment that number by 1.

- If you accidentally chose the wrong patron category at the beginning you can fix that here
- Sort 1 and 2 are used for statistical purposes within your library
- Next, the Library Setup section includes additional library settings

Library set-up

Registration date: (MM/DD/YYYY)

Expiry date (leave blank for auto calc): (MM/DD/YYYY)

OPAC note:
This message appears on this patron's user page in the OPAC

Circulation note:
This message displays when checking out to this patron

OPAC/Staff login

Username:

Password:
Minimum password length: 4

Confirm password:

- The registration date will automatically be filled in with today's date
- If your patron cards expire (based on your **patron category settings**) the Expiry date will automatically be calculated

- The OPAC Note is a note for the patron - it will appear in the OPAC on the patron’s record
- The Circulation Note is meant solely for your library staff and will appear when the circulation staff goes to check an item out to the patron

Checking out to Ronnie Ballard (23529000139858)
 Enter item barcode:

 Specify due date (MM/DD/YYYY):

Attention:
Notes:
 Has permission to check out books for students.
Messages:
 Add a new message

- The Staff/OPAC asks for the username and password to be used by the patron (and/or staff member) to log into their account in the OPAC and for staff to log in to the staff client.
 - * Staff will only be able to use this log in info to log in to the staff client if they have the **necessary permissions**.

- If you have set **additional patron attributes** up, these will appear next

Additional attributes and identifiers

Type	Value	
DL (Drivers License)	<input type="text"/>	<input type="button" value="Clear"/>
FAVCOLOR (Favourite Colour)	<input type="text"/>	<input type="button" value="Clear New"/>
PREVID (Previous system ID)	<input type="text"/>	<input type="button" value="Clear New"/>

- Finally, if you have **EnhancedMessagingPreferences** set to 'allow,' you can choose the messaging preferences for this patron.

Patron messaging preferences

	Days in advance	Email	Digests only?	Do not notify
Advance notice	0	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Item checkout	-	<input type="checkbox"/>	-	<input type="checkbox"/>
Hold filled	-	<input type="checkbox"/>	-	<input type="checkbox"/>
Item due	-	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Item check-in	-	<input type="checkbox"/>	-	<input type="checkbox"/>

- These notices are:
 - * **Advanced Notice** : A notice in advance of the patron’s items being due (The patron can choose the number of days in advance)
 - * **Item Checkout** : A notice that lists all the of the items the patron has just checked out and/or renewed, this is an electronic form of the checkout receipt
 - * **Hold Filled** : A notice when you have confirmed the hold is waiting for the patron
 - * **Item Due** : A notice on the day and item is due back at the library
 - * **Item Checkin** : A notice that lists all the of the items the patron has just checked in

IMPORTANT

These preferences will override any you set via the **patron categories**

-

IMPORTANT

These preference can be altered by the patron via the OPAC

- Once finished, click 'Save'

If the system suspects this patron is a duplicate of another it will warn you.

Duplicate suspected

[Detail](#) Duplicate ? [Yes](#) No, it is not

If you have set a minimum or upper age limit on the patron category and are requiring that the birth date be filled in, Koha will warn you if the patron you're adding is too old or young for the patron category you have selected:

The following fields are wrong. Please fix them.

- Patron's age is incorrect for their category. Ages allowed are 5-17.

4.2 Add a Staff Patron

All staff members must be entered into Koha as patrons of the 'Staff' type. Follow the steps in [Add a Patron](#) to add a staff member. To give the staff member permissions to access the staff client, follow the steps in [Patron Permissions](#)

IMPORTANT

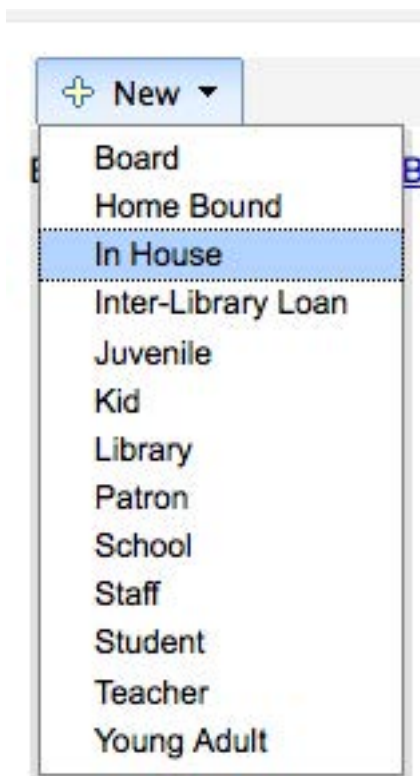

Remember to assign your staff secure usernames and passwords since these will be used to log into the staff client.

4.3 Add a Statistical Patron

One way to track use of in house items is to "check out" the materials to a statistical patron. The "check out" process doesn't check the book out, but instead tracks an in house use of the item. To use this method for tracking in house use you first will need a [patron category](#) set up for your Statistical patron.

INHS	In House	Statistical	999 months	0 years	0 years	0.00	No	0.00	none	Edit	Delete
------	--------------------------	-------------	------------	---------	---------	------	----	------	------	----------------------	------------------------

Next, you will need to create a new patron of the statistical type

Next, follow the steps put forth in the ['Add a new Patron'](#) section of this manual. Since this patron is not a real person, simply fill in the required fields, the correct library and nothing else.

To learn about other methods of tracking in house use visit the [Tracking inhouse use](#) section of this manual.

4.4 Duplicate a Patron

Sometimes when you're adding a new family to your system you don't want to type the contact information over and over. Koha allows for you to duplicate a patron and change only the parts you want to (or need to) change.

- Open the patron you want to use as your base (the patron you want to duplicate information from)
- Click the 'Duplicate' button at the top of their record

Nicole Engard (23529001223637)

- All of the fields with the exception of first name, card number, username and password have been duplicated. Fill in the missing pieces and click 'Save'

Duplicate Staff patron Nicole Engard

Patron identity

Salutation:

Surname: *Required*

First name: *Required*

Date of birth: 
(MM/DD/YYYY)

TIP

Clicking in a field that is already populated with data will clear that field of all information (making it easier for you to type in something different)

- You will be brought to your new patron

Brian Engard (12345678675432)

123 My Street
Philadelphia, PA 19101

4.5 Editing Patrons

Patrons in Koha can be edited using one of many edit buttons.

- To edit the entire patron record simply click the 'Edit' button at the top of the patron record.

Nicole Engard (23529001223637)

- Patron passwords are not recoverable. The stars show on the patron detail next to the Password label are always there even if a password isn't set. If a patron forgets their password the only option is to reset their password. To change the patron's password, click the 'Change Password' button

Change username and/or password for Ronnie Ballard

New username:

New password:
 Koha cannot display existing passwords. Leave the field blank to leave password unchanged.
[Click to fill with a randomly generated suggestion. Passwords will be displayed as text.](#)
 Minimum password length: 3

Confirm new password:

- Koha cannot display existing passwords. Leave the field blank to leave password unchanged.
 - This form can automatically generate a random password if you click the link labeled "Click to fill with a randomly generated suggestion. Passwords will be displayed as text."
- To edit a specific section of the patron record (for example the Library Use section) click the 'Edit' link below the section

Library use

Card number:	9876543456
Borrowernumber:	53
Category:	Juvenile (J)
Registration date:	02/18/2011
Expiration date:	05/18/2019
Library:	Fairfield
Privacy Pref:	Never
Username:	beau
Password:	*****

[Edit](#)

- A patron image can be added by browsing for the image on your machine from the 'Manage Patron Image' section

Upload Patron Image

Ronnie Ballard does not currently have an image available. To import an image for Ballard, enter the name of an image file to upload.
Only PNG, GIF, JPEG, XPM formats are supported.

Select the file to upload:

- This form will not appear if you have the **patronimages** system preference to not allow patron images
- To add patron images in bulk, use the **Upload Patron Images Tool**
- Patrons can also be blocked from checking items out by setting Patron Flags

Patron account flags

Today
Done

- If you would like your circulation staff to confirm a patron's address before checking items out to the patron, you can see the 'Gone no Address' flag

Cannot Check Out!

› **Address: Patron's address in doubt**

- If you would like to bar a patron from the library you can set the 'Restricted' flag
 - * This flag can automatically be set with the **Overdue/Notice Status Triggers**

Cannot Check Out!

› **Restricted: Patron's account is restricted** [Lift restriction](#)

- If you enter in a date and/or note related to the restriction you will see that in the restricted message as well

Cannot check out!

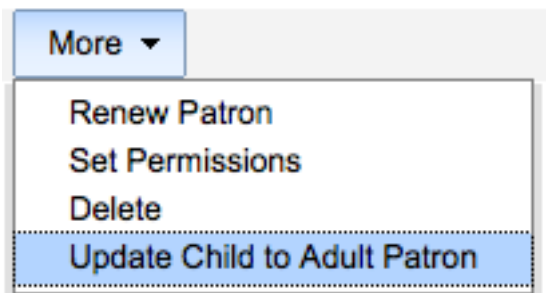

› **Restricted: Patron's account is restricted until 02/29/2012 with the comment "blocked due to trouble in the library"**

- If the patron reports that they have lost their card you can set the 'Lost Card' flag to prevent someone else from using that card to check items out

Cannot Check Out!

> **Lost: Patron's card is lost**

- Children patrons do not become adults automatically in Koha. To upgrade a child patron to and adult patron category click on the 'More' menu and choose 'Update Child to Adult Patron'

- You will then be presented with a pop up window asking which one of your adult patron categories this Child should be updated to

Choose Adult category

	Code	Description
<input type="radio"/>	ADPT	Adult Patron
<input type="radio"/>	HB	Home Bound
<input type="radio"/>	PT	Patron
<input type="radio"/>	ST	Student

4.6 Patron Permissions

Patron Permissions are used to allow staff members access to the staff client.

IMPORTANT

In order for a staff member to log into the staff interface they must have (at the very least) 'catalogue' permissions which allow them to view the staff interface.

4.6.1 Setting Patron Permissions

To set patron permissions, you must first **have a patron of the 'Staff' type** open

- On the patron record click More and choose Set Permissions to alter patron permissions

- You will be presented with a list of preferences, some of which can be expanded by clicking the plus sign to the left of the section title.

Set permissions for Engard, Nicole

- (*superlibrarian*) Access to all librarian functions
- (*circulate*) Check out and check in items
- (*catalogue*) **Required for staff login.** Staff access, allows viewing of catalogue in staff client.
- (*parameters*) Manage Koha system settings (Administration panel)
- (*borrowers*) Add or modify patrons
- (*permissions*) Set user permissions
- (*reserveforothers*) Place and modify holds for patrons
- (*borrow*) Borrow books
- (*editcatalogue*) Edit Catalog (Modify bibliographic/holdings data)
 - (*edit_catalogue*) Edit catalog (Modify bibliographic/holdings data)
 - (*edit_items*) Edit Items
 - (*fast_cataloging*) Fast cataloging
- (*updatecharges*) Manage patrons fines and fees
- (*acquisition*) Acquisition and/or suggestion management
- (*management*) Set library management parameters (deprecated)
- (*tools*) Use all tools (expand for granular tools permissions)
- (*editauthorities*) Edit Authorities
- (*serials*) Manage serial subscriptions
- (*reports*) Allow access to the reports module
- (*staffaccess*) Allow staff members to modify permissions for other staff members

Save Cancel

4.6.2 Patron Permissions Defined

- superlibrarian
 - Access to all librarian functions

*

TIP

With this selected there is no need to choose any other permissions

- circulate
 - Check out and check in items
 - This section can be expanded ([Learn more](#))
- catalogue
 - **Required for staff login.** Staff access, allows viewing the catalogue in staff client

*

IMPORTANT

Must be given to all staff members to allow them to login to the staff client

- parameters
 - Manage Koha system systems (Administration panel)
 - This section can be expanded ([Learn more](#))
- borrowers
 - Add or modify patrons
- permissions
 - Set user permissions
- reserveforothers
 - Place and modify holds for patrons
 - This section can be expanded ([Learn more](#))
- borrow
 - Borrow books
- editcatalogue
 - Edit Catalog (Modify bibliographic/holdings data)
 - This section can be expanded ([Learn more](#))
- updatecharges
 - Manage patrons fines and fees
- acquisition
 - Acquisition and/or suggestion management
 - This section can be expanded ([Learn more](#))
- management
 - Set library management parameters (deprecated)

*

IMPORTANT

This permission level no longer controls anything.

- tools
 - Use all tools
 - This section can be expanded ([Learn more](#))
- editauthorities
 - Edit Authorities
- serials
 - Manage serial subscriptions
 - This section can be expanded ([Learn more](#))
- reports
 - Allow access to the reports module
 - Reports found on the Circulation page are not controlled by this permission
 - This section can be expanded ([Learn more](#))
- staffaccess
 - Allow staff members to modify permissions for other staff members
 -

IMPORTANT

Requires the borrowers permission above

4.6.2.1 Granular Circulate Permissions

If the staff member has 'circulate' permissions they have the ability to perform all of these actions. If you would like to control circulation permissions on a more granular level choose from these options:

- circulate_remaining_permissions
 - Remaining circulation permissions
 - All circulation rights except the ability to override renewals
- override_renewals
 - Override blocked renewals
 - Requires that the staff member also has circulate_remaining_permissions

4.6.2.2 Granular Parameters Permissions

If the staff member has 'parameters' permissions they have the ability to perform all of these actions. If you would like to control parameter permissions on a more granular level choose from these options:

- manage_circ_rules
 - Manage circulation rules
 - The ability to access the **Circulation and fines rules** in the administration area
- parameters_remaining_permissions
 - Remaining system parameters permissions
 - The ability to access all areas in Administration (other than the Circulation and fine rules)

4.6.2.3 Granular Holds Permissions

If the staff member has 'reserveforothers' permissions they have the ability to perform all of these actions. If you would like to control holds permissions on a more granular level choose from these options:

- modify_holds_priority
 - Modify holds priority
 - Allow staff members to alter the holds priority (moving patrons up and down the queue)
- place_holds
 - Place holds for patrons

4.6.2.4 Granular Cataloging Permissions

If the staff member has 'editcatalogue' permissions they have the ability to perform all of these actions. If you would like to control cataloging permissions on a more granular level choose from these options:

- edit_catalogue
 - Edit catalog (Modify bibliographic/holdings data)
 - Ability to access all cataloging functions via the **Cataloging** page
- edit_items
 - Edit items
 - Ability to make **edits to item/holdings records**, but not bibliographic records
- fast_cataloging
 - Fast cataloging
 - The ability to catalog using only the **Fast Add Framework** found on the **Circulation** page

4.6.2.5 Granular Acquisitions Permissions

If the staff member has 'acquisition' permissions they have the ability to perform all of these actions. If you would like to control acquisitions permissions on a more granular level choose from these options:

- budget_add_del
 - Add and delete budgets (but can't modify them)
- budget_manage
 - Manage budgets
- budget_manage_all
 - Manage all budgets

- budget_modify
 - Modify budget (can't create lines, but can modify existing ones)
- contracts_manage
 - Manage contracts
- group_manage
 - Manage orders and basket groups
- order_manage
 - Manage orders and baskets
- order_receive
 - Manage orders and baskets
- period_manage
 - Manage periods
- planning_manage
 - Manage budget planning
- vendors_manage
 - Manage vendors

4.6.2.6 Granular Serials Permissions

If the staff member has 'serials' permissions they have the ability to perform all of these actions. If you would like to control serials permissions on a more granular level choose from these options:

- check_expiration
 - Check the **expiration of a serial**
- claim_serials
 - Claim missing serials via the **Claims section**
- create_subscription
 - Create **a new subscription**
- delete_subscription
 - Delete an existing subscription
- edit_subscription
 - Edit an existing subscription
 - This permission does not include the ability to delete or create a subscription
- receive_serials
 - Serials receiving
 - Receive serials on existing subscriptions
- renew_subscription
 - Renew a subscription
- routing
 - Routing
 - Manage **routing lists**

4.6.2.7 Granular Tools Permissions

If the staff member has 'tools' permissions they have the ability to access and use all items under the Tools menu. If you would like to control which tools staff members have access to on a more granular level choose from these options:

- batch_upload_patron_images
 - Upload patron images in batch or one at a time
 - Access to the **Image Upload Tool**
- delete_anonymize_patrons
 - Delete old borrowers and anonymize circulation/reading history (deletes borrower reading history)
 - Access to the **Anonymize Patron Tool**
- edit_calendar
 - Define days when the library is closed
 - Access to the **Calendar/Holidays Tool**
- edit_news
 - Write news for the OPAC and staff interfaces
 - Access to the **News Tool**
- edit_notice_status_triggers
 - Set notice/status triggers for overdue items
 - Access to the **Overdue Notice Status/Triggers Tool**
- edit_notices
 - Define notices
 - Access to the **Notices Tool**
- export_catalog
 - Export bibliographic, authorities and holdings data
 - Access to the **Export Data Tool**
- import_patrons
 - Import patron data
 - Access to the **Import Patrons Tool**
- inventory
 - Perform inventory (stocktaking) of your catalog
 - Access to the **Inventory Tool**
- items_batchdel
 - Perform batch deletion of items
 - Access to the **Batch Item Deletion Tool**
- items_batchmod
 - Perform batch modification of items
 - Access to the **Batch Item Modification Tool**
- label_creator

- Create printable labels and barcodes from catalog and patron data
- Access to the [Label Creator](#) and [Quick Label Creator](#) Tools
- manage_csv_profiles
 - Manage CSV export profiles
 - Access to the [CSV Profiles Tool](#)
- manage_staged_marc
 - Managed staged MARC records, including completing and reversing imports
 - Access to the [Manage Staged MARC Records Tool](#)
- moderate_comments
 - Moderate patron comments
 - Access to the [Comments Tool](#)
- moderate_tags
 - Moderate patron tags
 - Access to the [Tags Tool](#)
- schedule_tasks
 - Schedule tasks to run
 - Access to the [Task Scheduler Tool](#)
- stage_marc_import
 - Stage MARC records into the reservoir
 - Access to the [Stage MARC Records Tool](#)
- upload_local_cover_images
 - Upload local cover images
 - Access to the [Upload Local Cover Image Tool](#)
- view_system_logs
 - Browse the system logs
 - Access to the [Log Viewer Tool](#)

4.6.2.8 Granular Reports Permissions

If the staff member has 'reports' permissions they have the ability to perform all of these actions. If you would like to control reports permissions on a more granular level choose from these options:

- create_reports
 - Create SQL Reports
 - The ability to create and edit but not run SQL reports
- execute_reports
 - Execute SQL Reports
 - The ability to run but not create or edit SQL reports

*

TIP

This include Circulation reports such as Overdues

4.7 Patron Information

When viewing a patron record you have the option to view information from one of many tabs found on the left hand side of the record.

- *Get there:* Patrons > Browse or search for patron > Click patron name

4.7.1 Check Out

For instruction on checking items out, view the [Checking Out](#) section of this manual.

4.7.2 Details

All patron information will appear on the Details tab. This includes all the contact information, notes, custom patron attributes, messaging preferences, etc entered when adding the patron.

In the case of patrons who are marked as 'Child' or 'Professional' and their Guarantors additional information will appear on their record.

- A child patron will list their Guarantor

Beau Engard (123454)

4.7.3 Fines

The patron’s complete accounting history will appear on the Fines tab. Contrary to its name, the Fines tab does not just show fine data, it also shows membership fees, rental fees, reserve fees and any other charge you may have for patrons.

Account **Pay fines** Create manual invoice Create manual credit

Date	Description of charges	Note	Amount	Outstanding		Print
09/11/2012	Payment,thanks View item The academic library and the net gen student :		-5.40	0.00	Reverse	Print
09/10/2012	The academic library and the net gen student : 07/18/2012 23:59 View item The academic library and the net gen student :		5.40	0.00		Print
09/10/2012	100 questions every home seller should ask : 07/16/2012 23:59 View item 100 questions every home seller should ask :		5.60	5.60		Print
09/10/2012	UContent : 04/18/2012 23:59 View item UContent :		12.40	12.40		Print
09/10/2012	Harry Potter and the sorcerer's stone / 06/14/2012 23:59 View item Harry Potter and the sorcerer's stone /		8.80	8.80		Print

The table will show you the following columns:

- Date: the date the charge/payment was posted
 - In the case of fines this will be the last day that the fine was accrued
- Description: a description of the charges including the due date for overdue items and a link to the item record where one is available
- Note: any notes about this charge/payment
- Amount: the total amount of the payment or charge
- Outstanding: the amount still due on charge

4.7.3.1 Charging Fines/Fees

Most fees and fines will be charged automatically if the **fines cron job** is running:

- Fines will be charged based on your **Circulation & Fines Rules**
- Hold fees will be charged based on the rules you set in the **Patron Types & Categories** administration area
- Rental fees will be charged based on the settings in your **Item Types** administration area
- Marking an item 'Lost' via the cataloging module will automatically charge the patron the replacement cost for that item

4.7.3.2 Pay/Reverse Fines

Each line item can be paid in full (or written off) using the 'Pay Fines' tab.

Account Pay fines Create manual invoice Create manual credit

Fines & Charges	Sel	Description	Account Type	Notify id	Level	Amount	Amount Outstanding
Pay Write off	<input checked="" type="checkbox"/>	Non resident Account Management fee	A	1	0	120.00	120.00
Pay Write off	<input checked="" type="checkbox"/>	Fine	F	1	0	1.15	1.15
Pay Write off	<input checked="" type="checkbox"/>	Fine 9	F	1	0	2.35	2.35
						Sub Total:	123.50
Pay Write off	<input checked="" type="checkbox"/>	Copier Fees	Copie	0	0	0.25	0.25
						Sub Total:	0.25
						Total Due:	123.75

Pay amount Write off all Pay selected Cancel

- Each line item can be paid in full, partially paid, or written off.
- Pay a fine in full
 - Click "Pay" next to the fine you want to pay in full
 - The full amount of the fine will be populated for you in the "Collect From Patron" box

Account Pay fines Create manual invoice Create manual credit

Pay an individual fine

Description	Account Type	Notify id	Level	Amount	Amount Outstanding
Non resident Account Management fee	A	1	0	120.00	120.00
Total amount payable:					120.00

Collect from patron:

Confirm Cancel

- Click "Confirm"
- The fine will be removed from outstanding fines, and displayed as fully paid.
- Pay a partial fine
 - Click "Pay" next to the fine you want to partially pay
 - Enter the amount you are collecting from the patron in the "Collect From Patron" box

– Enter an amount to pay towards the fines.

Account	Pay fines	Create manual invoice	Create manual credit
-------------------------	---------------------------	---------------------------------------	--------------------------------------

Pay an amount toward selected fines

Total amount outstanding: 1.40

Collect from patron:

[Confirm](#) [Cancel](#)

- Click "Confirm"
- The fine totals will be updated with the payment applied to the oldest selected fines first.

- Writeoff a single fine

- Click "Writeoff" next to the fine you wish to writeoff.
- The fine will be removed from outstanding fines, and displayed as written off.

- Writeoff All fines

- Click the "Writeoff All" button
- All fines will be removed from outstanding fines, and displayed as written off.

- If you accidentally mark and item as paid, you can reverse that line item by clicking 'Reverse' to the right of the line

02/26/2012	Payment, thanks - View item	Change of heart :	1.00	0.00	Reverse	Print
------------	---	-------------------	------	------	-------------------------	-----------------------

– Once clicked a new line item will be added to the account, showing the payment as reversed

02/26/2012	Payment, thanks - Reversed - View item	Change of heart :	1.00	-1.00	Reverse	Print
------------	--	-------------------	------	-------	-------------------------	-----------------------

4.7.3.3 Creating Manual Invoices

For fees that are not automatically charged, librarians can create a manual invoice

Account Pay fines **Create Manual Invoice** Create Manual Credit

Manual Invoice

Type:

- Lost Item
- Fine
- Account Management Fee
- New Card
- Sundry

Barcode:

Description:

Amount: Example: 5.00

[Cancel](#)

- First choose the type of invoice you would like to create
 - To add additional values to the manual invoice type pull down menu, add them to the **MANUAL_INV** Authorized Value
 -

IMPORTANT

The value set as the Authorized Value for the MANUAL_INV authorized value category will appear as the Description and the Authorized Value Description will be used as the amount.

- If the fee is associated with an item you can enter its barcode so that the line item shows a link to that item
- The description field is where you will enter the description of the charge
- In the amount field, do not enter currency symbols, only numbers and decimals

4.7.3.4 Creating Manual Credits

Manual credits can be used to pay off parts of fines, or to forgive a fine amount.

- First choose the type of credit you'd like to apply
- If this credit is associated with an item you can enter that item's barcode so that the line item links to the right item
- The description field is where you will enter the description of the credit
- In the amount field, do not enter currency symbols, only numbers and decimals

4.7.3.5 Printing Invoices

To the right of each account line there is a print link. Clicking that link will print an invoice for the line item that includes the date and description of the line item along with the total outstanding on the account.

<u>INVOICE</u>		
Fairview		
Bill To: Nicole Engard		
Card Number: 23529001223637		
Date	Description of charges	Amount
09/27/2010	Lost Item Voyages of discovery : 33203000745779	15.00
Total outstanding dues as on date:		2.65

4.7.4 Routing Lists

A list of all of the serial routing lists the patron belongs to will be accessible via the 'Routing Lists' tab on the patron record.

On this tab you will be able to see and edit all of the routing lists that this patron is on.

Search subscriptions:

ISSN: Title:

3 Subscription routing list(s)

Subscription title	Routing list
Computers in libraries.	Edit routing list
Computers in libraries.	Edit routing list
Library journal	Edit routing list

4.7.5 Circulation History

The circulation history tab will appear if you have set the [intranetreadinghistory](#) preference to allow it to appear. If you have the [OPACPrivacy](#) system preference set to 'Allow' and the patron has decided that the library cannot keep this information this tab will only show currently checked out items.

Circulation History

4.8 Patron Search

Clicking on the link to the Patron module will bring you to a search/browse screen for patrons. From here you can search for a patron by any part of their name or their card number.

Enter patron card number or partial name:

Search patrons [Check out](#) [Check in](#) [Search the catalog](#)

If you want to filter your results to a specific branch or category, you can click the plus sign [+] to the right of the search box.

Enter patron card number or partial name:

Search fields:

Search type:

Category: Any

Search patrons Check out Check in Search the catalog

- Standard:
 - Enter any part of their name, username, email address or barcode
- Email:
 - Enter any part of their email address using % as a wildcard
- Borrower number:
 - Enter the Koha borrower number
- Phone number:
 - Enter the phone number exactly as it is in the system or by using spaces between each batch of numbers.
 - Example: To find (212) 555-1212 you can search for it exactly as it was entered or by searching for 212 555 1212
- Street address:
 - Enter any part of the patron's address (includes all address fields) using % as a wildcard
 - Example: To find Portland, ME you can search for %Port% and it will find the string "Port" anywhere in the address fields

You can also choose how your results will be sorted by using the 'Order by' pull down menu at the end of the form.

Enter patron card number or partial name:

Chapter 5

Circulation

Circulation functions can be accessed in several different ways. On the main page of the staff client there are some quick links in the center of the page to check items out, in or transfer them. For a complete listing of Circulation functions you can visit the Circulation page which is linked from the top left of every page or from the center of the main page.

Before circulating your collection you will want to set your [Global System Preferences](#), [Basic Parameters](#) and [Patrons & Circulation Rules](#).

While in Circulation you can jump between the tabs on the quick search box at the top of the screen by using the following hot keys:

- jump to the catalog search with Alt+Q
- jump to the checkout with Alt+U
 - this will not work for Mac users
- jump to the checkin with Alt+R

TIP

Mac users use the OPTION button in place of ALT

5.1 Check Out (Issuing)

To begin the checkout process you must enter the patron barcode or part of their name. The checkout option appears in three main places:

- Check out option on the top of the main staff client

The screenshot shows the Koha staff client interface. On the left is the Koha logo. To the right is a search bar with the placeholder text "Enter patron card number or partial name:". Below the search bar are four tabs: "Check out" (highlighted with a green border), "Check in", "Search patrons", and "Search the catalog". A "Submit" button is located to the right of the search bar.

- Check out option on the patron record

03/31/2012 15:40	Social media marketing :, by Evans, Liana. 72385889	Books	03/31/2012 14:40	Nicole's Library	HF5415.1265 .E93 2010	0.00		0 <input type="checkbox"/>	<input type="checkbox"/>
04/13/2012 00:00	My sister's keeper :, by Picoult, Jodi, 100002	Books	03/16/2012 00:00	Nicole's Library	PS3566.I372 M9 2005	0.00	14.00	1 <input type="checkbox"/>	<input type="checkbox"/>
Totals:						0.10	108.95	Renewal due date: <input style="width: 100%;" type="text"/> <input type="button" value="Calendar"/> Forgive fines on return: <input type="checkbox"/>	

Override Renewal Limit:

At the top of the Check Out screen is a box for you to type or scan the item's barcode into.

-

IMPORTANT

Many modern barcode scanners will send a 'return' to the browser, making it so that the 'Check Out' button is automatically clicked

- If the barcode is not found you will be prompted to use fast cataloging to add the item. Learn more about [fast cataloging](#) later in this manual.

Below the box for the barcode there may be options for you to override the default due date for the item.

- This option will only appear if you have set the [SpecifyDueDate](#) system preference to allow staff to override the due date

At the bottom of the page there is a summary of the patron's current checked out items along with the due date (and time if the item is an hourly loan), items checked out today will appear at the top.

TIP

If the checked out time is listed as 00:00 then the item is a daily loan item. The due time for daily checkouts will show 23:59 which is the last minute of the day.

3 Checkout(s) 5 Hold(s)

5.1.1.1 Printing Receipts

Once you have checked out all of the items for the patron you can print them a receipt by choosing one of two methods.

If you have the **CircAutoPrintQuickSlip** preference set to 'open a print quick slip window' you can simply hit enter on your keyboard or scan a blank piece of paper with your barcode scanner. The idea being that you're "checking out" a blank barcode which triggers Koha to print the 'Quick slip.'

You can also click the Print button at the top of the screen and choose 'Print slip' or 'Print quick slip'.

If you choose 'Print slip' it will print all of the items the patron has checked out, including those they checked out at an earlier date. Choosing 'Print quick slip' will print only the items that were checked out today.

What prints on the slips can be customized by altering the slip templates under the **Notices & Slips** tool.

5.1.1.2 Clear Patron Information

When you're done checking an item out if you have the **DisplayClearScreenButton** preference set to 'Show' you can clear the current patron by clicking the X in the top right of the patron's info to remove the current patron from the screen and start over.

If you have the **CircAutoPrintQuickSlip** preference set to 'clear the screen' then you simply need to hit enter or scan a blank barcode and the screen will be cleared of the current patron.

5.1.2 Check Out Messages

If you check out an item that has multiple pieces and you have cataloged that information in subfield 3 of the item record (in MARC21) a message will pop up when you check out that item telling you how many pieces should be there.

**Note about the accompanying materials:
17 Disks**

There are times when Koha will prevent the librarian from being able to check out items to a patron. When this happens a warning will appear notifying the librarian of why the patron cannot check items out.

- Patron owes too much in fines

Checking out to Beau ENGARD (23529001223644)

Cannot check out!

- > **Overdues:** Patron has **ITEMS OVERDUE**. See highlighted items [below](#)
- > **Fines:** Patron has [Outstanding fines of 22.50](#). Checkouts are **BLOCKED** because fine balance is **OVER THE LIMIT**. Make [Payment](#)

Messages:

✓ Yes, Check Out (Y)

✗ No, Don't Check Out (N)

5.2 Renewing

Checked out items can be renewed (checked out for another period of time) based on your [circulation rules](#) and [renewal preferences](#). If you allow it, patrons can renew their own items via the OPAC, but sometimes you'll need to help them by renewing their items via the staff client. To renew items checked

out to a patron, visit their details page or checkout page and review their checkout summary at the bottom.

3 Checkout(s) Relatives' Checkouts 7 Hold(s)

Due date	Title	Item Type	Checked out on	Checked out from	Call no	Charge	Price	Renew <small>select all none</small>	Check in <small>select all none</small>	
Previous checkouts										
09/22/2011	Handle with care :, by Picout, Jodi, 100004	Books	07/14/2011	Nicole's Library	PS3566.I372 H36 2009	0.00	27.95	1 <input checked="" type="checkbox"/>	<input type="checkbox"/>	
09/22/2011	Harry Potter and the sorcerer's stone , by Rowling, J. K. - 7 disks 100020	Book on CD	07/22/2011		PZ7.R79835 Har 1999ab	0.00	49.95	2 Not Renewable	<input type="checkbox"/>	
09/22/2011	Fool Moon , by Butcher, Jim 2345678765343234		09/08/2011	Nicole's Library		0.00		0 <input checked="" type="checkbox"/>	<input type="checkbox"/>	
Totals:							0.00	220.84	Renewal due date: <input type="text"/>	
									Forgive fines on return: <input type="checkbox"/>	

Override Renewal Limit:

In the Renew column you will see how many times each item has been renewed and a checkbox to renew the item for the patron. Check the boxed of the items you would like to renew and click the 'Renew or Return checked items' button, or to renew all items checked out to the patron simply click the 'Renew all' button.

Sometimes renewals will be blocked based on your circulation rules, to override this block you must have your **AllowRenewalLimitOverride** preference set to 'Allow'. If you allow renewal limit overrides, you will see a checkbox at the bottom left of the circulation summary. Check that box and then choose the items you would like to renew.

Checking that box will add checkboxes in the renew column above where before the item was not renewable.

5.3 Check In (Returning)

Checking in items can be performed from various different locations

- The check in box on the top of the main staff client

- The check in option on the quick search bar on the Circulation page

- The check in link on the patron's checkout summary (and on the checkout summary page)

Due date	Title	Item Type	Call no	Barcode	Renewals	Renew?	Check In?
12/25/2009	The Baltimore book , by	BK	975.26B	10101000000414		On Hold	Check In

- The Check in page under the Circulation menu

Circulation

- [Check Out](#)
- [Check In](#)

5.3.1 Checking Items In

To check an item in scan the barcode for the item into the box provided. A summary of all items checked in will appear below the checkin box

Check In	Options
Enter item barcode: <input type="text"/> <input type="submit" value="Submit"/>	<ul style="list-style-type: none"> <input type="checkbox"/> Forgive overdue charges <input type="checkbox"/> Dropbox mode

Checked-In items

Due Date	Title	Author	Barcode	Shelving Location	Call Number	Type	Patron	Note
06/19/2011	My sister's keeper :	Picoult, Jodi,	100002		PS3566.I372 M9 2005	BK	Engard, Beau (J)	
05/19/2011 (overdue)	Harry Potter and the sorcerer's stone	Rowling, J. K.	100020		PZ7.R79835 Har 1999ab	CDBK	Engard, Nicole (S)	7 disks

If you are checking items in that were put in the dropbox while the library was closed you can check the 'Dropbox mode' box before scanning items. This will effectively roll back the returned date to the last date the library was open.

- This requires that you have your closings added to the [Holidays & Calendar Tool](#)

You can also choose to forgive all overdue charges for items you are checking in by checking the 'Forgive overdue charges' box before scanning items.

5.3.2 Check In Messages

There are several messages that can appear when checking items in:

- If you are checking an item in at a library other than the home branch, a message will appear asking you to transfer the book to the home library

This item needs to be transferred to Union
Transfer now?

Check In

Enter item barcode:

Options

- Forgive overdue charges

- (212) 555-1212

Transfer to: Fairview

– Clicking the Confirm hold and Transfer button will mark the item as in transit to the library where the hold was placed

Item type	Location	Call Number	Status	Last seen	Barcode
	Fairview General Stacks	975.26B	In transit from Midway, to Fairview, since 12/01/2009 On hold for Edna Acosta expected at Fairview since 10/31/2009	12/01/2009	10101000000414

- Clicking the Print Slip, Transfer and Confirm button will mark the item as in transit to the library where the hold was placed and present the library with a receipt to print and place on the book with the patron’s information
- Ignoring the hold will leave the item on hold, but leave its status as Available (it will not cancel the hold)
- If you have the system showing you fines at the time of checkin (**FineNotifyAtCheckin**) you will see a message telling you about the fine and providing you a link to the payment page for that patron

5.4 Circulation Messages

Circulation messages are short messages that librarians can leave for their patrons or their colleagues that will appear at the time of circulation.

5.4.1 Setting up Messages

Circulation messages are set up as **Authorized Values**. To add or edit Circulation Messages you want to work with the **BOR_NOTES** value.

Authorized values

This table is used in MARC definition. You can define as many categories as you want, and as many authorized values as you want in each category.

When you define the MARC subfield structure, you can link a subfield to a authorized-value category. When the user ask for adding of modifying a biblio, the subfield is not entered through a free field, but through a list of authorized values

Show Category:

Authorised values for category BOR_NOTES :

Authorized value	Description	Description (OPAC)	Icon	Edit	Delete
UMBOPAC	Your umbrella was found in the library. Please pick it up next time you visit.			Edit	Delete
UMBR	Patron left umbrella in library last time			Edit	Delete
VERID	Patron needs to bring in driver's license to verify ID			Edit	Delete

The 'Description' field can hold a canned message that you would like to appear on the patron’s record.

IMPORTANT

The 'Description' field is limited to 80 characters, but the patron message field can hold more than that. Enter 80 characters in the 'Description' field and then type the rest on the patron record.

5.4.2 Adding a Message

When on the patron's check out tab you will see a link to 'Add a new message' to the right of the check out box.

Attention:

> **Fines:** Patron has [Outstanding fines of 2.00](#). Make [Payment](#)

Messages:

> 09/22/2009 FPL "Patron left umbrella in library last time" [\[Delete\]](#)

[Add a new message](#)

When you click 'Add a new message' you will be asked to choose if the message is for the librarians or the patron and the message you would like to leave.

Leave a message

Add a message for:

Edna

Predefined notes:

UMBOPAC

Your umbrella was found in the library. Please pick it up next time you visit.

Save

[Cancel](#)

NOTE

A message for the patron will also show to the library staff.

5.4.3 Viewing Messages

Circulation messages meant for the staff and/or the patron will appear on the patron's checkout screen to the right of the checkout box. Messages in bold and red are meant for the library staff only, whereas messages in regular italics font are meant for the patron and the librarian.

Attention:

> **Fines:** Patron has [Outstanding fines of 2.00](#). Make [Payment](#)

Messages:

> 09/22/2009 FPL "Patron left umbrella in library last time" [\[Delete\]](#)
[Add a new message](#)

Circulation messages meant for the patron will also appear when they log into the OPAC.

Messages For You

- **Your umbrella was found in the library. Please pick it up next time you visit.**
Written on 12/07/2009 by Fairview

Hello, Edna Acosta ([Click here](#) if you're not Edna Acosta)

5.5 Holds

Koha allows patrons to put things on hold. A 'Hold' is a way to reserve an item. Depending on your [circulation and fine rules](#) and [hold preference](#) settings patrons will be able to place items on hold for pickup at the library at a later date/time.

5.5.1 Placing Holds in Staff Client

There are several ways to place holds from the staff client. The most obvious is using the 'Place Hold' button at the top of any bibliographic record.

<input type="radio"/>	BOOK Books	50671988	Nicole's Library	Pleasant Valley			In transit from Nicole's Library, to Pleasant Valley, since 06/02/2011 Can't be cancelled when item is in transit

- Enter any notes that might apply to this hold
- Choose the library where the patron will pick up the item
- If the patron wants the hold to start on a date other than today, enter that in the 'Hold starts on date' field
 - This option will only appear if the **AllowHoldDateInFuture** system preference is set to 'Allow'
- If the patron has specified that they don't want the item after a certain date, or if you have limits on hold lengths, you can enter an expiration date for the hold in the 'Hold expires on date'
 - To have expired holds canceled automatically you will need to have the **Expired Holds** cron job set to run on a regular basis.
- Next choose if you want to place a hold on the next available item or a specific item by clicking the radio button next to an individual item.

If you're placing a hold on multiple items you will be presented with the next available option for all titles. If no items are available for hold it will say so on the confirmation screen.

Confirm Holds

- Pickup library is different than [Coda Engard's](#) home library (Franklin / FRL)

Hold details

Patron: [Coda Engard \(23529001223638\)](#)

Notes:

Pickup at:

Hold starts on date:

Hold expires on date:

Title	Priority	Information
Introduction to cataloging	1	No copies are available to be placed on hold
The Changing environment of libraries;	1	
The school teacher in England and the United States;	1	

Once your hold is placed, if you'd like to have Koha forget that you used the 'Search to Hold' function, you can choose to have Koha 'forget' the patron's name by clicking the arrow to the right of the 'Place Hold' button on the search results and choosing the 'Forget' option.

5.5.2 Managing Holds

Holds can be altered and canceled from the Holds tab found on the left of the bibliographic record.

[Home](#) › [Catalog](#) › [Library mashups](#) :

- Normal
- MARC
- ISBD
- Items
- Holds**
- Checkout history
- Modification log

From the list of holds you can change the order of the holds, the pickup location, suspend and/or cancel the hold.

Existing holds									
Priority		Patron	Notes	Date	Expiration	Pick up library	Details		
Waiting	↑ ↓	Henry Acevedo		03/02/2012		Item waiting at Nicole's Library	100034	↓	×
1	↑ ↓	Jordan Alford		03/02/2012		Nicole's Library	Next available	↓	×
2	↑ ↓	Brian Engard		03/02/2012		Nicole's Library	Next available	↓	×
3	↑ ↓	Nicole Schneider		11/28/2012		Franklin	Only item 100034	↓	×
4	↑ ↓	Beau Engard		03/02/2012		Fairview	Next available	↓	×
5	↑ ↓	Nicole Engard		11/28/2012		Centerville	Only item 100034	↓	×

Suspend until Clear Date
 Unsuspend on 07/20/2012 Clear Date
 Suspend until Clear Date
 Suspend until Clear Date
 Suspend until Clear Date

Update hold(s)

NOTE

 If you have your **AutoResumeSuspendedHolds** preference set to "Don't allow" then you will not have the option to put an end date on the hold suspension

NOTE

 Depending on how you have your **HidePatronName** system preference set the list may show card numbers instead of names in the Patron column like in the image above.

To rearrange or delete holds, simply make a selection from the 'Priority' pull down or click the arrows to the right of the priority pull down.

Existing holds

Priority		Patron
1	↑ ↑ ↓ ↓	23529001000463
1	↑ ↑ ↓ ↓	23529000033739
2	↑ ↑ ↓ ↓	23529000429697
3	↑ ↑ ↓ ↓	23529000662701
4	↑ ↑ ↓ ↓	

If you use the priority pull down to rearrange or delete holds you will need to click the 'Update hold(s)' button to save your changes.

Clicking the down arrow to the right of the hold will stick the hold at the bottom of the list even if more requests are made.

For example, your library has home-bound patrons that are allowed to keep books out for months at a time. It would not be fair to other patrons if a home-bound patron were able to check out a brand new book and keep it for months. For this reason, the home-bound patron's hold request would stay at the bottom of the queue until everyone else who wanted to read that book has already done so.

Details	↓

8		Sal Acosta	10/19/2011	Nicole's Library	Next available		

Update hold(s)

5.5.3 Receiving Holds

When items that are on hold are **checked in** or **out** the system will remind the circulation librarian that the item is on hold and offer them options for managing the hold.

When you check in an item that has a hold on it the system will ask you to either confirm and transfer the item

Hold Found: The Baltimore book:

- 7896 Library Rd.
Portland, OR 44240
- (212) 555-1212

Hold at Centerville

 Confirm hold  Print Slip and Confirm  Ignore

Clicking the Confirm button will mark the item as on hold for the patron. If the item needs to be transferred the item will also be marked as in transit to the proper branch. Clicking 'Ignore' will retain the hold, but allow you to check the item out to another patron. Choosing to confirm and print will present you with a printable page that you can slip inside the book with the necessary hold and/or transfer information.

Once confirmed the hold will show on the patron record and on the checkout screen under the 'Hold' tab.

1 Checkout(s) 1 Hold(s)

Hold date	Title	Call Number	Barcode	Priority	Delete?
12/28/2009	Library mashups :	020.285/4678	Item 898739894 waiting at Centerville		No

Cancel Marked Requests

The item record will also show that the item is on hold.

Item type	Location	Collection	Call Number	Status	Last seen	Barcode	Publication Details
Books	Centerville General Stacks	Non Fiction	020.285/4678	Waiting for 23529001000463 at Centerville since 12/28/2009	12/28/2009	898739894	

In some cases a patron may come in to pick up a hold for their partner (or someone else in their household). In this case you want to make sure that the hold is cancelled when you check the item out to someone else. When trying to check out an item that is already waiting for someone else you will be

presented with a warning message.

Please confirm checkout

- The patron has a debt of 34.95
- Item *About a boy* / (100034) has been waiting for [Henry Acevedo](#) (23529000035676) at Nicole's Library since 08/23/2012

Cancel hold

✓ Yes, Check Out (Y) ✗ No, Don't Check Out (N)

From here you can check the item out to the patron at the desk and cancel the hold for the patron.

5.6 Transfers

If you work in a multi-branch system you can transfer items from one library to another by using the Transfer tool.

- *Get there:* Circulation > Transfer

To transfer an item

- Click 'Transfer' on the Circulation page

Transfer

Destination library:

Centerville

Enter barcode:

887369820192012

Submit

- Enter the library you would like to transfer the item to
- Scan or type the barcode on the item you would like to transfer

- Click 'Submit'

Transfer

Destination library:

Enter barcode:

Transferred Items

Bar Code	Title	To
887369820192012	Library mashups : ()	Centerville

- The item will now say that it is in transit

	Centerville	020.285/4678	In transit from Midway, to Centerville, since 12/07/2009	12/07/2009	887369820192012
---	-------------	--------------	--	------------	---------------------------------

- When the item arrives at the other branch the librarian must check the item in to acknowledge that it is no longer in transit
- The item will not be permanently moved to the new library

Barcode 887369820192012

Item Information [\[Edit Items\]](#)

Damaged Status:	<input type="text"/> <input type="button" value="Set Status"/>
Withdrawn?:	No <input type="button" value="Withdraw"/>

- The item shows the same 'Home Library' but has updated the 'Current Location' to note where it resides at this time

5.7 Set Library

By default you will enter the staff client as if you are at your home library. This library will appear in the top right of the Staff Client.

Fairview ([Set](#)) | nce ([Log Out](#)) | [\[?\]](#)

This is the library that all circulation transactions will take place at. If you are at another library (or on a bookmobile) you will want to set your library before you start circulating items. To do this you can click 'Set' at the top right or on the Circulation page.

Once you have saved your changes your new library will appear in the top right.

5.8 Fast Add Cataloging

Sometimes circulation librarians need to quickly add a record to the system for an item they are about to check out. This is called 'Fast Add.' To allow circulation librarians access to the Fast Add Cataloging tool, simply make sure they have the [fast_cataloging](#) permissions. There are two ways to add titles via fast add. If you know that you're about to check out an item that isn't in your catalog you can go to the Circulation module and click 'Fast cataloging.'

To generate this report, you must have the [Build Holds Queue cron job](#) running. This cron job is a script that should be run periodically if your library system allows borrowers to place on-shelf holds. This script decides which library should be responsible for fulfilling a given hold request.

It's behavior is controlled by the system preferences [StaticHoldsQueueWeight](#) and [RandomizeHoldsQueueWeight](#).

If you do not want all of your libraries to participate in the on-shelf holds fulfillment process, you should list the the libraries that *do* participate in the process here by inputting all the participating library's branchcodes, separated by commas (e.g. "MPL,CPL,SPL,BML" etc.).

By default, the holds queue will be generated such that the system will first attempt to hold fulfillment using items already at the pickup library if possible. If there are no items available at the pickup library to fill a hold, `build_holds_queue.pl` will then use the list of libraries defined in `StaticHoldsQueueWeight`. If `RandomizeHoldsQueueWeight` is disabled (which it is by default), the script will assign fulfillment requests in the order the branches are placed in the `StaticHoldsQueueWeight` system preference.

For example, if your system has three libraries, of varying sizes (small, medium and large) and you want the burden of holds fulfillment to be on larger libraries before smaller libraries, you would want `StaticHoldsQueueWeight` to look something like "LRG,MED,SML".

If you want the burden of holds fulfillment to be spread out equally throughout your library system, simply enable `RandomizeHoldsQueueWeight`. When this system preference is enabled, the order in which libraries will be requested to fulfill an on-shelf hold will be randomized each time the list is regenerated.

Leaving `StaticHoldsQueueWeight` empty is contraindicated at this time. Doing so will cause the `build_holds_queue` script to ignore `RandomizeHoldsQueueWeight`, causing the script to request hold fulfillment not randomly, but by alphabetical order.

5.9.2 Holds to pull

This report will show you all of the items that have holds on them that are available at the library for pulling. If the items are available at multiple branches then all branches with that item available will see the hold to pull until one library triggers the hold.

Pending holds placed between 12/01/2008 and 12/16/2009**Reported on 12/16/2009**

The following holds have not been filled. Please retrieve them and check them in.

Pull This Many Items	Items Available	Patrons with Holds	Title	Libraries	Available Call Numbers	Available Itypes	Available Locations	Earliest Hold Date

5.9.4 Hold ratios

Hold ratios help with collection development. Using this report you will be able to see how many of your patrons have holds on items and whether you should buy more. By default it will be set to the library needing 3 items per hold that has been placed. The report will tell you how many additional items need to be purchased to meet this quota.

Hold Ratios to Calculate Items Needed

Calculated on 12/16/2009. From 12/16/2008 to 12/16/2009

These items have a hold ratio ≥ 3 .

Reserves	Items	Hold Ratio	Title	Holding Libraries	Location	Itype	Call Numbers	Items Needed
3	1	3.00	A gate at the stairs :	SFL	FIC	BOOK	FIC MOORE	1 to order
4	1	4.00	Alex Cross's trial /	SFL	FIC	BOOK	FIC PATTERSON	1 to order
4	1	4.00	The defector /	SFL	FIC	BOOK	FIC SILVA	1 to order
5	1	5.00	The elegance of the hedgehog / "French Voices"--P. 4 of cover.	SFL	FIC	BOOK	FIC BARBERY	1 to order
6	2	3.00	Catching fire /	SFL	TEEN	BOOK	TEE COL	1 to order
6	1	6.00	True compass :	SFL		BOOK	B KENNEDY B KENNEDY	2 to order

5.9.5 Transfers to receive

This report will list all of the items that Koha thinks are in transit to your library.

Transfers made to your library on : 12/15/2009

Your library is the destination for the following transfer(s)

Coming from Centerville

Date of transfer	Title	Reserved by	Location
12/15/2009	Library mashups : (Books) Barcode: 898739895	None	CPL 020.285/4678

If your transfers are late in arriving at your library you will see a message stating how late your items are.

Transfers made to your library as of 02/01/2010

Your library is the destination for the following transfer(s)

Transfers are **considered late** after 3 days.

Coming from Centerville

Date of transfer	Title	Reserved by	Location
12/19/2009 Transfer is 41 days late	The world rubber economy : (Books) Barcode: 33203000400797	None	MMM HD9161.A2 G73

IMPORTANT

An item is considered late based on the number of days you have entered in the **TransfersMaxDaysWarning** system preference.

5.9.6 Overdues

IMPORTANT

For libraries with a large patron base, this report may take a significant amount of time to run.

TIP

Large libraries can choose to filter the report before it runs by setting the **FilterBeforeOverdueReport** system preference to 'Require'.

This report will list all items that are overdue at your library.

Filter on:

Date due:

From:

To:

Name or cardnumber:

Patron category:

Patron flags:

Driver's License:

Home Branch:

Item type:

Library of the patron:

The report can be filtered using the menu options found on the left of the report.

TIP

The 'Show any items currently checked out' checkbox basically switches this from a report of overdue to a report of checkouts. It will show all titles checked out regardless of due date.

5.9.7 Overdues with fines

This report will show you any overdue at your library that have accrued fines on them.

Circulation: Overdues at Nicole's Library

Shelving location selected:

Date due	Title	Patron	Location	Overdue status	Notified by
10/18/2011 00:00	Library mashups : exploring new ways to deliver library data / Barcode : 316190004778987	Acosta, Edna (212) 555-1212 test@gmail.com	Nicole's Library Z674.75.W67 L52 2009		
05/25/2012 23:59	Harry Potter and the deathly hallows 7. by Rowling, J. K. Barcode : 100021	Alford, Jordan (212) 555-1212	Nicole's Library PZ7.R79835 Hajd 2007b		
05/25/2012 23:59	Harry Potter and the prisoner of Azkaban / by Rowling, J. K. Barcode : 100027	Alford, Jordan (212) 555-1212	Nicole's Library PZ7.R79835 Ham 1999		
09/28/2011 00:00	Fool Moon (The Dresden Files, Book 2). by Butcher, Jim. Barcode : 60479690	Charles, Lisa (212) 555-1212	Nicole's Library		
07/02/2012 23:59	Harry Potter and the deathly hallows / by Rowling, J. K. Barcode : 100024	Edwards, Casey (212) 555-1818	Nicole's Library PZ7.R79835 Hak 2007		
06/05/2012 23:59	Harry Potter and the prisoner of Azkaban by Rowling, J. K. Barcode : 100019	Engard, Beau 555.111.2345 beau@gmail.com	Nicole's Library PZ7.R79835 Ham 2000		

If you would like to limit the report you can use the pull down menu at the top to limit to a specific shelving location at your branch. To see overdues with fines at other branches you will have to **change your branch** or log in at that branch.

IMPORTANT

If you do not charge fines and/or don't have the **fines cron job** running you will see no data on this report.

5.10 Tracking In house Use

Many libraries track the use of items within the library. This can be done in Koha one of two ways. The first is to create one or more **Statistical Patrons**. When collecting items that have been used within the library, you will want to check them out to your statistical patron:

Checking out to In House (23529001223640)

Enter item barcode:

Check Out

Specify due date (MM/DD/YYYY):

 Remember for session:

Clear

Instead of marking the item as 'checked out' the system will record that the item was used in house:

• Local Use Recorded

Repeat these steps for all items that have been used within the library to keep accurate statistics for item use.

The other way to record local use of items is to set your **RecordLocalUseOnReturn** preference to 'Record.' Then whenever you check an item in that is not checked out and not on hold a local use will be recorded.

TIP

If you have **RecordLocalUseOnReturn** set to 'Record' you can still use your statistical patrons to record local use as well.

5.11 In Processing / Book Cart Locations

Koha allows for handling temporary locations like the processing center and/or book carts throughout the library. For this feature to work you must first make sure you have **authorized values** set in the **LOC** category for PROC (Processing Center) and CART (Book Cart).

Show Category:

Authorised values for category LOC :

Authorized value	Description	Description (OPAC)	Icon	Edit	Delete
AV	Audio Visual			Edit	Delete
CART	Circ Cart			Edit	Delete
CHILD	Children's Area			Edit	Delete
DISPLAY	On Display			Edit	Delete
FIC	Fiction			Edit	Delete
GEN	General Stacks			Edit	Delete
NEW	New Materials Shelf			Edit	Delete
PROC	Processing Dept			Edit	Delete
REF	Reference			Edit	Delete
STAFF	Staff Office			Edit	Delete

Next you need to set the **NewItemsDefaultLocation** system preference to PROC. This will set the new items to the Processing Center as their default location.

Create items with their desired final shelving location.

- These newly cataloged items will be temporarily set to the PROC location and will display with whatever description PROC has. The original location code entered at item creation is stored in the new items column 'permanent_location', for future use. Items will stay in the PROC location until they are checked in. To have those items then move to the shelving cart:
 1. Turn on the **InProcessingToShelvingCart** system preference
 2. Check in those newly-created items and they will be moved to the location code of CART and display with whatever description CART has.

3. A **cron job** runs at specified intervals to age items from CART to the permanent shelving location. (For example, an hourly cron entry of `cart_to_shelf.pl --hours 3` where `--hours` is the amount of time an item should spend on the cart before aging to its permanent location.)

TIP

If the **ReturnToShelvingCart** system preference is turned on, any newly checked-in item is also automatically put into the shelving cart, to be covered by the same script run.

IMPORTANT

Checkins with confirmed holds will not go into the shelving cart. If items on the shelving cart are checked out, the cart location will be cleared.

5.12 Self Checkout

Koha comes with a very basic self checkout module. To enable this module you need to set the **Web-BasedSelfCheck** preference to 'Enable.' To use this module you have to log in as a **staff member** with **circulation permissions**.

TIP

Create a **staff patron** specifically for this action so that you don't leave a real staff client logged into a computer all day

There is no link to the Self Checkout module, but a simple addition to the **intranetuserjs** system preference can add one.

```
$(document).ready(function(){ $("#login
  #submit").parent().after("<p><a
  href=\"http://YOUR_KOHA_OPAC_URL/cgi-bin/koha/sco/sco-main.pl\"
  target=\"_blank\">Self-Checkout</a></p>"); });
```

IMPORTANT

The code above has line breaks added to make it more readable, please be sure to enter the above as one line in when putting it in the system preference.

The link will then appear at the bottom of the log in page:

Username:

Password:

Library:

Login »

[Self-Checkout](#)

You can also access this module by going to : http://YOUR_KOHA_OPAC_URL/cgi-bin/koha/sco/sco-main.pl

When on the self checkout page depending on your value in the [SelfCheckoutByLogin](#) preference you will be asked to enter you cardnumber

Nicole's Library Self Checkout System

or your username and password:

Nicole's Library Self Checkout System

Self Checkout

Please login with your username and password

Username: Password: **Submit**

Once you're logged in to the self check module you will be asked to scan the items you are checking out

Nicole's Library Self Checkout System

You are logged in as Nicole Engard.

Check out or return an item:

Scan a new item or enter its barcode: **Submit**

Scan next item, or **Click here if done.**

You currently have nothing checked out.

© Nicole C. Engard
[Home](#) | [Contact](#) | [Privacy](#)

As you scan items they will appear below the barcode box

Issues for Nicole Engard (1 total)

Title ▼	Call No. ◆	Due ▲	Renew
Blue book, dolls & values. (10101000000409)	688.722B	01/01/2010	Return Item

When you are finished scanning items it is important to click the 'Click here if done' button to log the patron out and prepare for the next patron.

When attempting to check items out there are some instances where error messages will appear and the patron will be directed to the librarian. This will happen even if you are allowing overrides on circulation functions. Only a librarian can override a circulation block and so patrons must go to the librarian for help in these situations.

Item cannot be checked out.

Sorry, This item cannot be checked out at this station.

MESSAGE 6: You owe the library and cannot borrow. Please see a member of the library staff.

[← Return to Account Summary](#)

5.13 Offline Circulation Utility

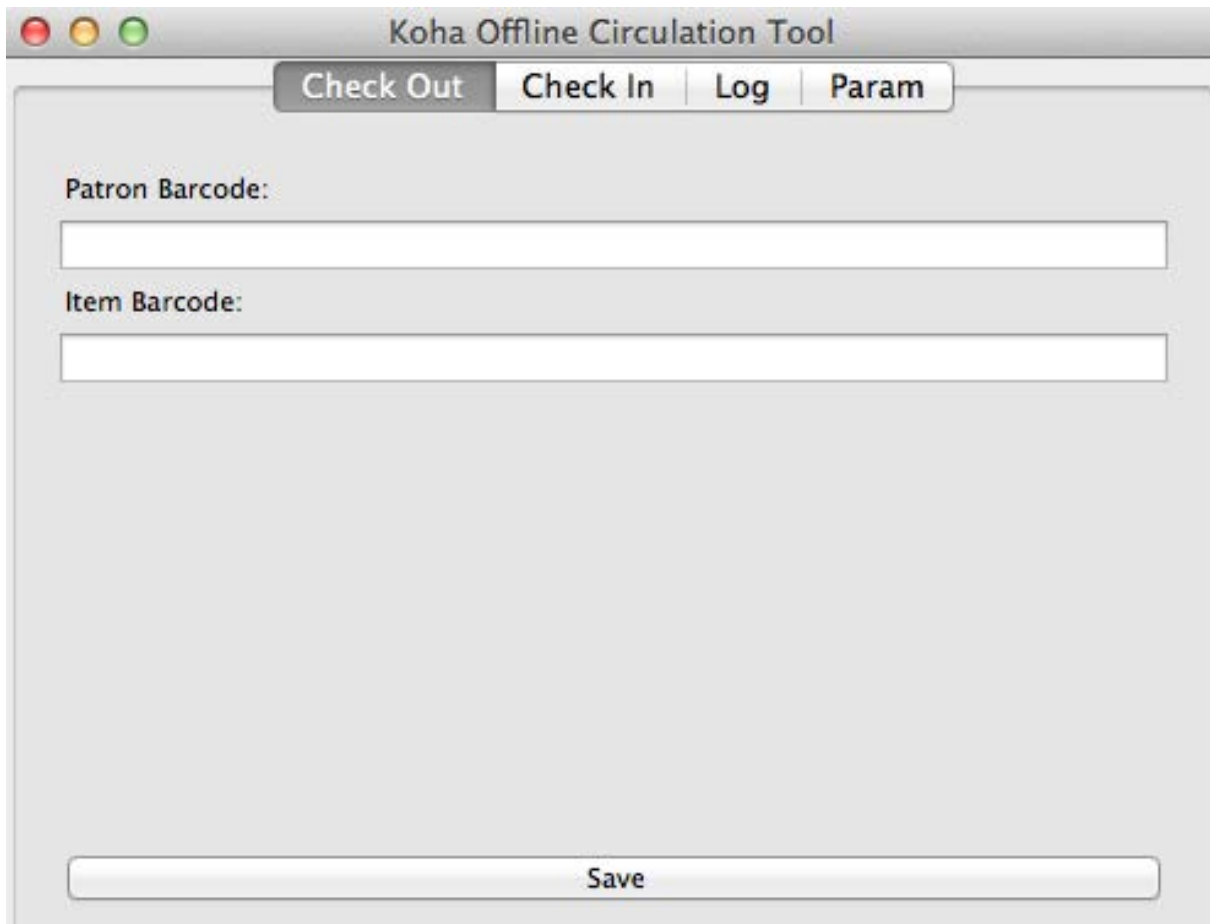

5.13.1 Firefox Plugin

There is an offline circulation tool that you can add to your Firefox browser as a plugin/addon. To do so, just go to <https://addons.mozilla.org/en/firefox/addon/koct/> page and click on the "install now" button. You may have to confirm the installation, just click on "install now" and then restart Firefox to complete the installation.

Once you have installed the plugin and restarted Firefox, you will see the Koha logo in the add-on bar at the bottom right of Firefox.

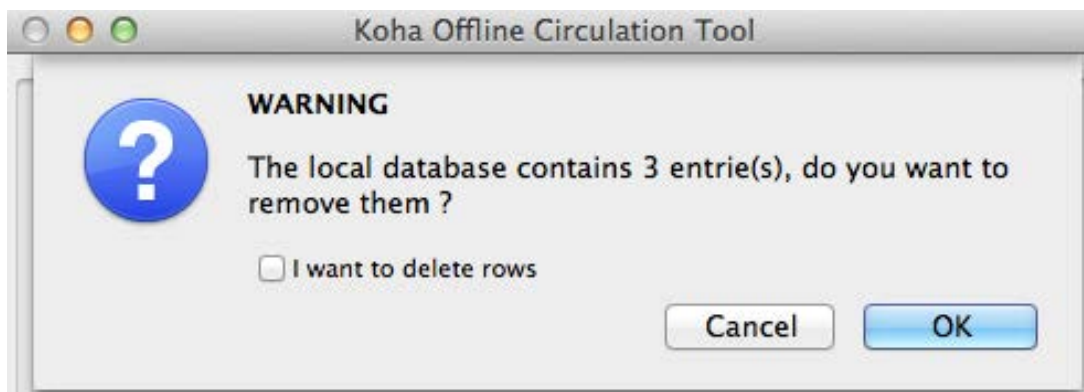

A click on the logo will open the tool in its own window.

The plugin consists of four tabs:

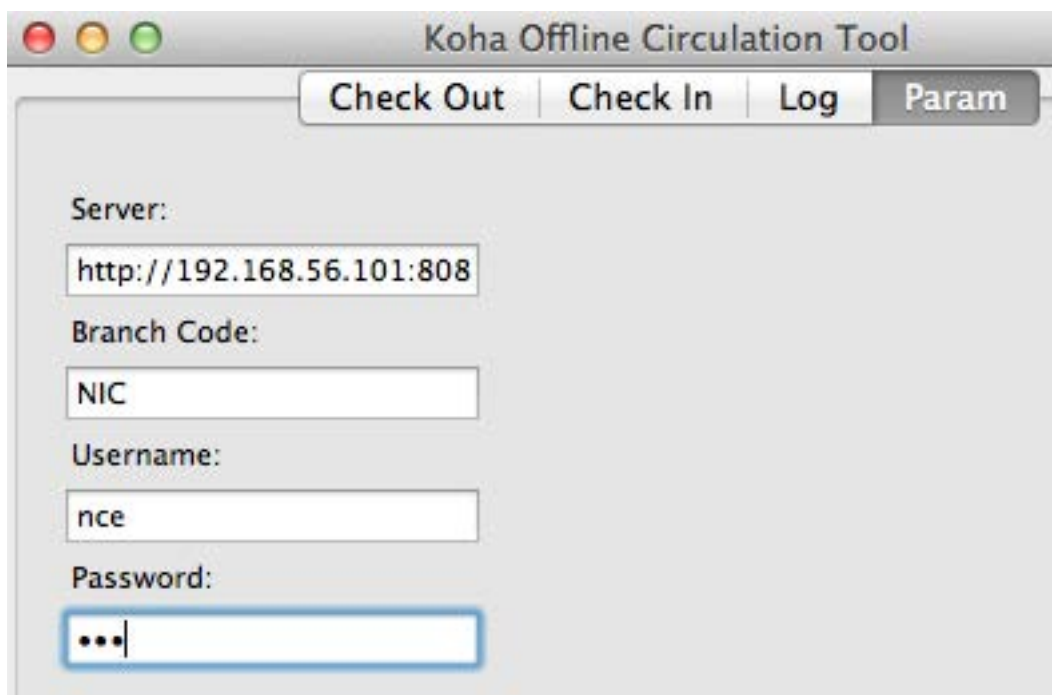

- The Check Out tab is where you check out items
- The Check In tab is where you check in items
- The Log tab keeps track of every transaction done while in offline mode
 - The log will keep information until you empty it. Each time you open the plugin and it contains data in the log it will warn you

If you'd like to clear the log, check the 'I want to delete rows' box before hitting the 'OK' button. Otherwise clicking 'OK' will keep the items in the log and let you continue working with the tool.

- The Param tab is to set up the plugin

The first thing you want to do then is to set up the plugin. Go to the Param tab to set up the plugin

Answer the 4 questions presented:

- Server = the URL of the librarian interface
- Branch Code = the code for the branch where you are located
- Username = your staff account login
- Password = your staff account password

IMPORTANT

To save the settings, you will have to close the plugin window and re-open it by clicking again on the Koha logo in the add-on bar.

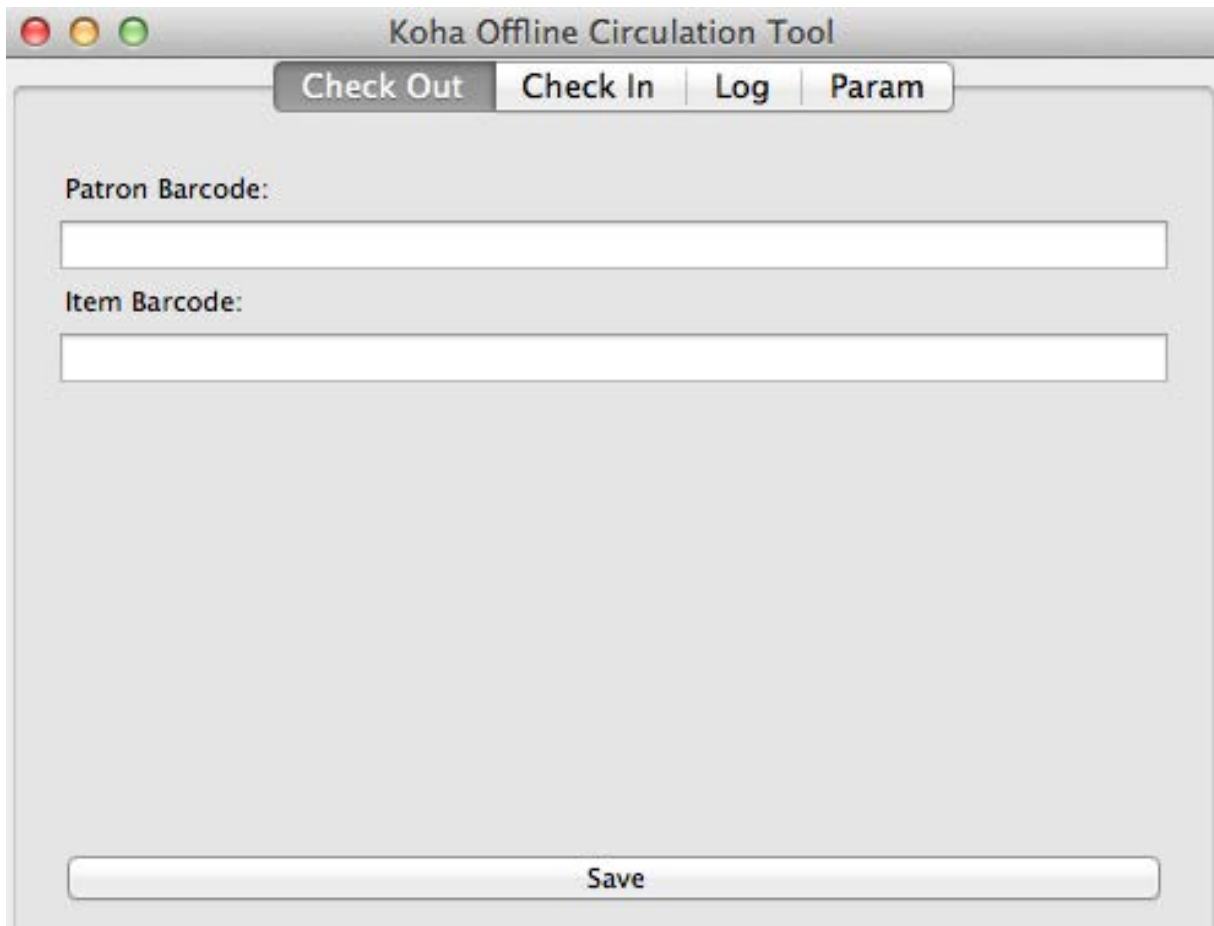

TIP

You can create a staff account dedicated to the offline circulation. So that, no matter who is at the circulation desk, they can all use the same login. Along those lines, you can use a group login that you already have in place for circulation as well.

Once you have everything set up you can start checking items in and out.

Checking out:

Koha Offline Circulation Tool

Check Out | Check In | Log | Param

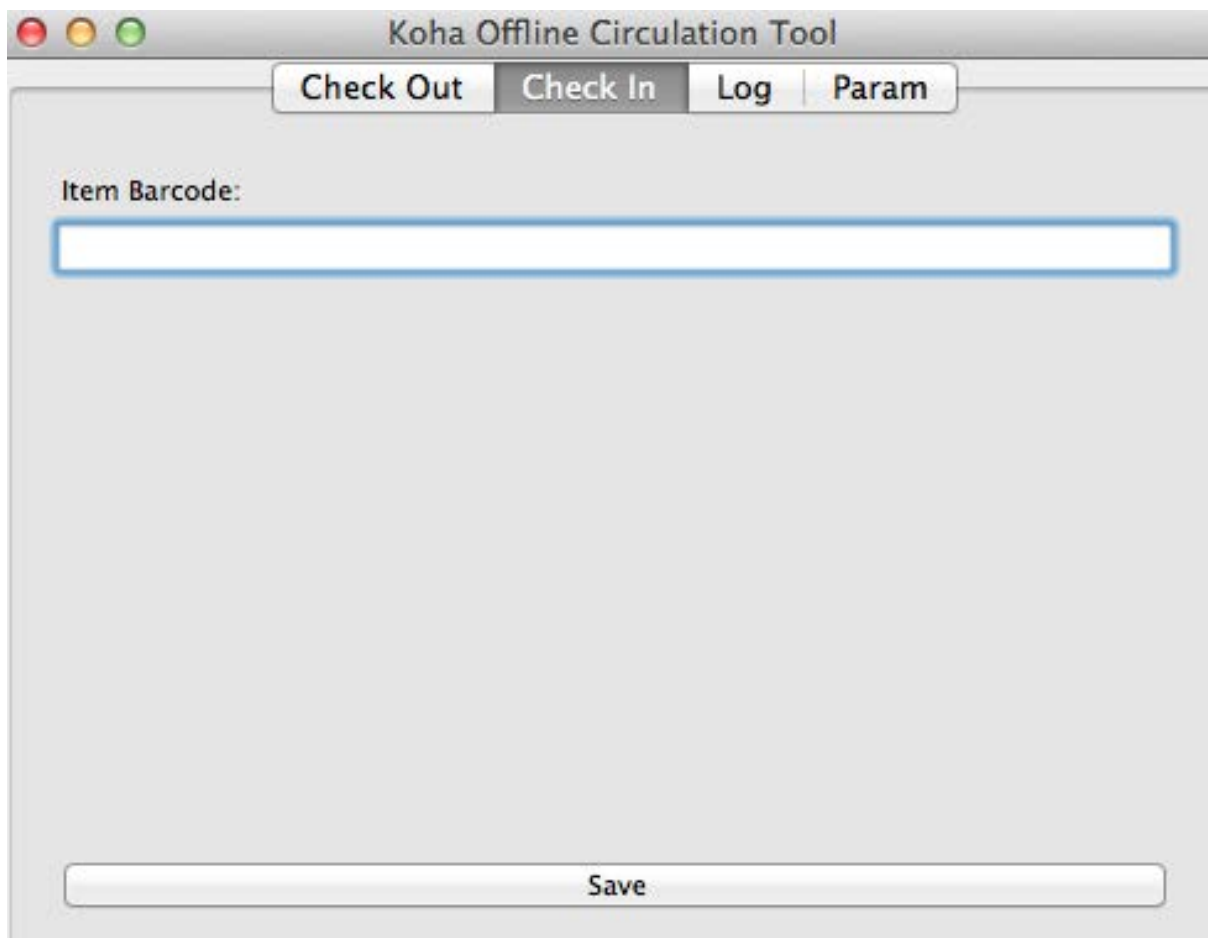

Patron Barcode:

Item Barcode:

Save

- Go to the Check Out tab
- Scan the patron barcode
- Scan the item barcode
- Click 'Save'

Checking in:

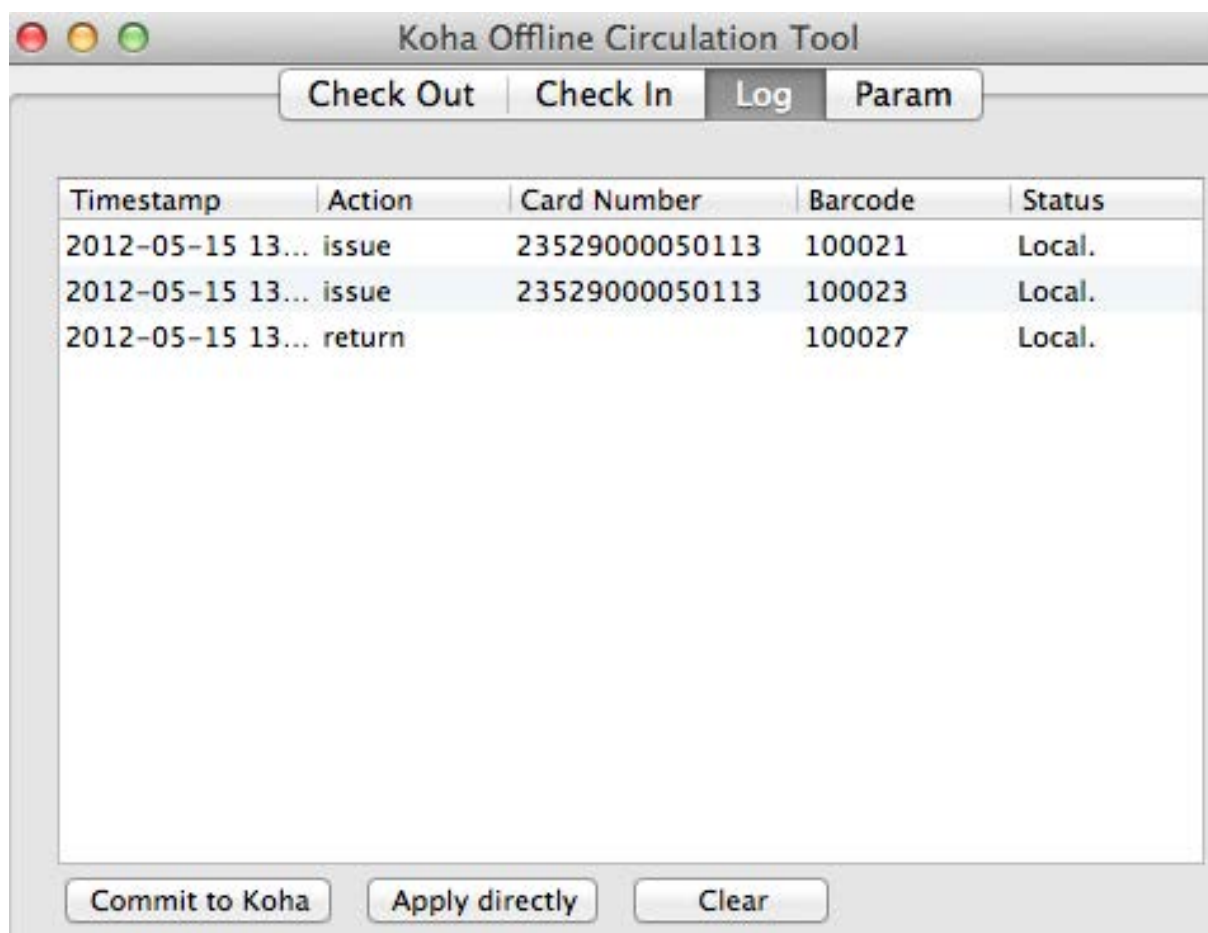

- Go to the Check In tab
- Scan the item barcode
- Click Save

Each time, you check out or check in an item, a new transaction is recorded in the local plugin database and you will see, at the bottom of the plugin how many transactions has been made during the offline circulation. For example, "10 Row(s) Added" means you did 10 transactions.

3 Row(s) Added

Then, if you want an overview of every transaction, go to the Log tab. This tab will show you the transactions in the plugin database

**TIP**

The status will be "Local." as long as you are offline and don't process the transactions into Koha.

When your Internet connection comes back up you will want to get these transactions in to Koha. Before processing these transactions you should be aware of a few issues.

Because you are not connected to your Koha database when using this plugin holds will need additional processing. If an item you check in while offline has a hold, the hold is kept on the item. Since, you can't confirm holds found during the processing of every check in, the holds stay on the item and will need to be managed later. If you only checked in a few items you can just keep a record of them all. If you checked in a lot of items you can use the Holds Queue once it rebuilds to see what holds made it to the shelf erroneously.

Similarly, if a patron card was expired, the offline circulation tool won't know about it, so the checkout will be recorded regardless of the patron's account being blocked normally.

You have two options for adding this data to Koha

- Commit to Koha
 - If you checked in/out on more than one computer at the same time, what you want is to process every transaction consistently. Let's say for instance that one patron checked a book out on one computer and then checked the same book in on another computer. To be consistent, you need to record the check out first and then the check in. Not the opposite! To do so, you need to group every transaction in one place, sort them all and then, process everything. So, you need to use the "Commit to Koha" option from every plugin/computer you worked with. This way, the log will go to Koha and be accessible from the Offline Circulation page.

Circulation

- Check out
- Check in
- Transfer
- Set library
- Fast cataloging

Offline circulation

- Offline circulation file (.koc) uploader
- Offline circulation (Firefox add-on)

– *Get there:* Circulation > Offline Circulation (Firefox add-on)

Offline circulation

Check all | Uncheck all

	Date	Action	Barcode	Card number
<input type="checkbox"/>	2012-05-15 13:13:26	issue	100021	23529000050113
<input type="checkbox"/>	2012-05-15 13:13:34	issue	100023	23529000050113
<input type="checkbox"/>	2012-05-15 13:13:38	return	100027	

For the selected operations:

- Once all of the logs from all of the circulation computers are loaded you will be able to check them all or select just those you want to process into Koha.
- Click on the Process button and Koha will record every stored transaction one by one. For each transaction, the status will change to:
 - * "Success." if the transaction was processed correctly
 - * "Borrower not found." if the borrower card number is incorrect
 - * "Item not found." if the item barcode is wrong
 - * "Item not issued." if you checked in an available item
- Once finished you will have a summary of all of your transactions

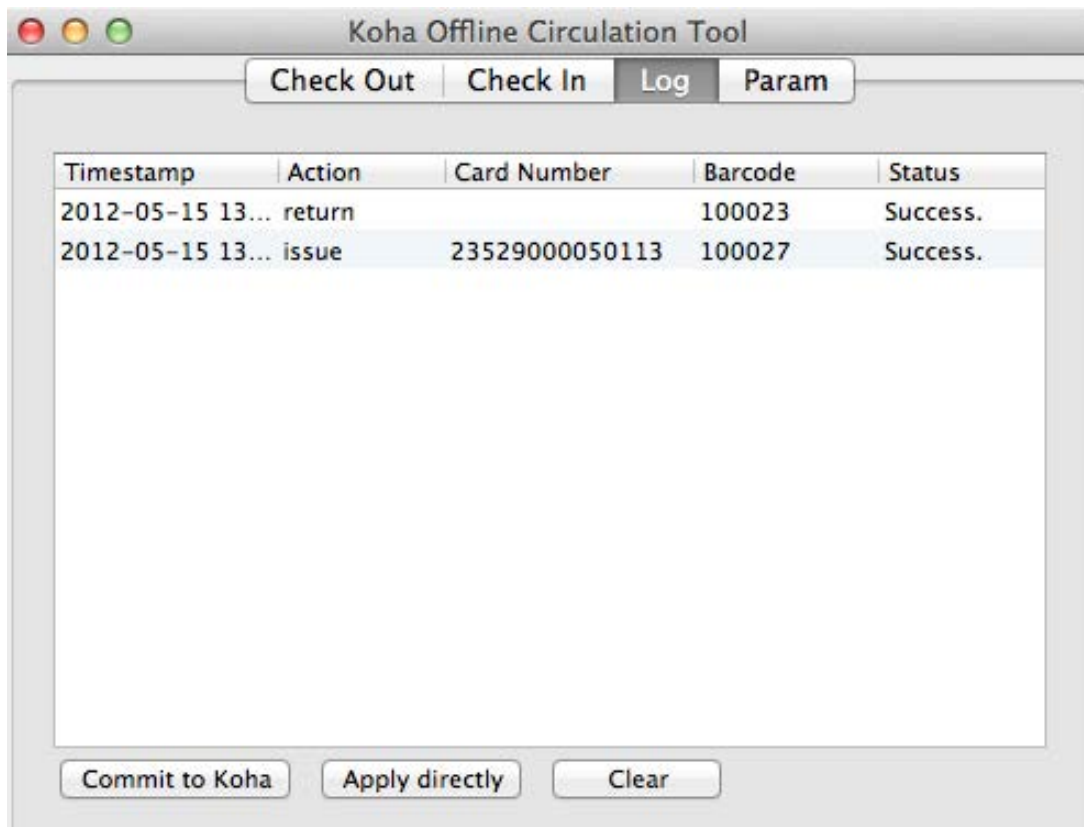

Offline circulation

Check all | Uncheck all

	Date	Action	Barcode	Card number
Success.	2012-05-15 13:13:26	issue	100021	23529000050113
Success.	2012-05-15 13:13:34	issue	100023	23529000050113
Success.	2012-05-15 13:13:38	return	100027	

- Apply directly
 - If you performed all of the circulation actions on one computer then everything is sorted already so you can choose to "Apply directly"

- The status column will be updated to let you know if the transactions were applied
 - * "Success." if the transaction was processed correctly
 - * "Borrower not found." if the borrower card number is incorrect
 - * "Item not found." if the item barcode is wrong
 - * "Item not issued." if you checked in an available item
- Once you're finished you can review all of the items right in the Log tab

Once you are done you can clear the log by clicking Clear. If you don't you will be warned the next time you open the Offline Circulation tool.

5.13.2 Offline Circ Tool for Windows

The Offline Circulation Utility can be downloaded at: <http://kylehall.info/index.php/projects/koha/-koha-offline-circulation/>

To generate a borrowers.db file for loading in to the Windows tool you will need to run the [file generator via a cron job](#).

5.13.3 Upload Offline Circ File

The [offline circulation tool for Windows](#) will generate a KOC file that you can upload into Koha once your system comes back up.

On the Circulation menu click 'Offline Circulation File (.koc) Uploader'

Circulation

- [Check out](#)
- [Check in](#)
- [Transfer](#)
- [Set library](#)
- [Fast cataloging](#)
- **Offline circulation**
 - [Offline circulation file \(.koc\) uploader](#)
 - [Offline circulation \(Firefox add-on\)](#)

Browse your computer for the *.koc file

Upload Offline Circulation Data

Choose .koc File:

Once the file is uploaded, click the process the file

Upload progress:

100%

When this is complete you'll see the summary of actions from when you were offline (including any errors).

Koha Offline Circulation

Your data was processed. Here are the results:

Checked out [I did it for myself](#) (100113350) to ():

Checked out [The Web library](#) (100104291) to ():

Warning: Unable to determine patron from item barcode (100104291). Cannot check in.

Chapter 6

Cataloging

Before you start cataloging in Koha you're going to want to do some basic setup. Refer to the [Implementation Checklist](#) for a full list of these things. Most importantly you're going to want to make sure that your [Frameworks](#) are all defined the way you want. Once in the cataloging module you will not be able to add or remove fields and subfields so your frameworks must be ready before you start cataloging.

You can also use OCLC Connexion to send records directly in to Koha. For more information on that please review the [OCLC Connexion Setup appendix](#).

- *Get there:* More > Cataloging

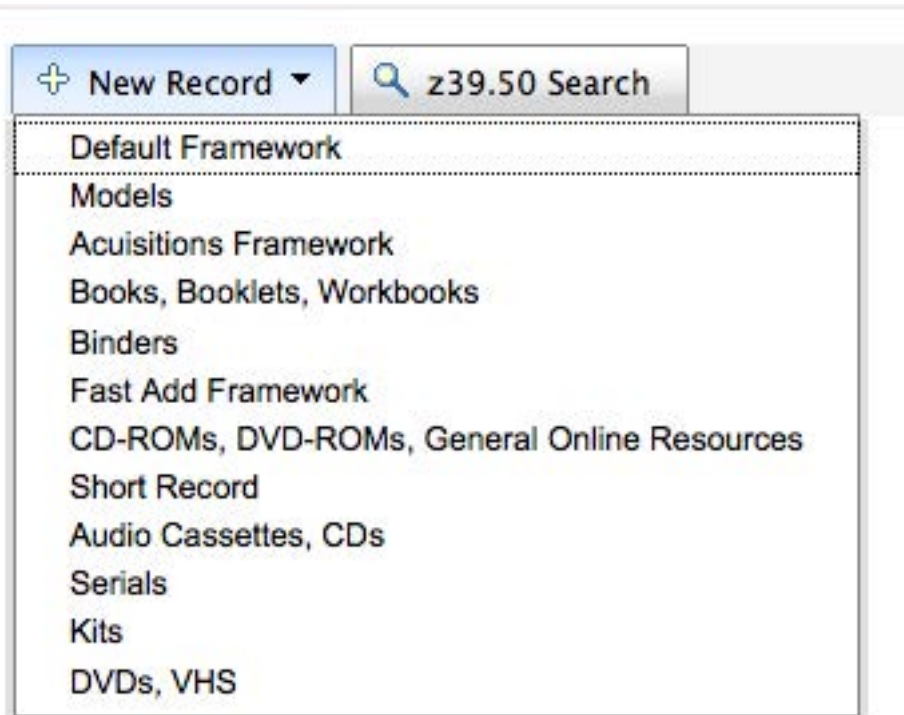

6.1 Bibliographic Records

In Koha the bibliographic record contains the main information related to the material. This includes things like the title, author, ISBN, etc. This information is stored in Koha in Marc (different flavors of Marc are supported in Koha). Once this information is saved, [items or holdings](#) can be attached.

6.1.1 Adding Records

Records can be added to Koha via original or copy cataloging. If you would like to catalog a record using a blank template

- Click 'New Record'

- Choose the framework you would like to base your record off of

If you want to catalog a record based on an existing record at another library

- Click 'Z39.50 Search'

Z39.50 search points

Add MARC record

- If you are about to add a duplicate record to the system you will be warned before saving

6.1.2 Adding Analytic Records

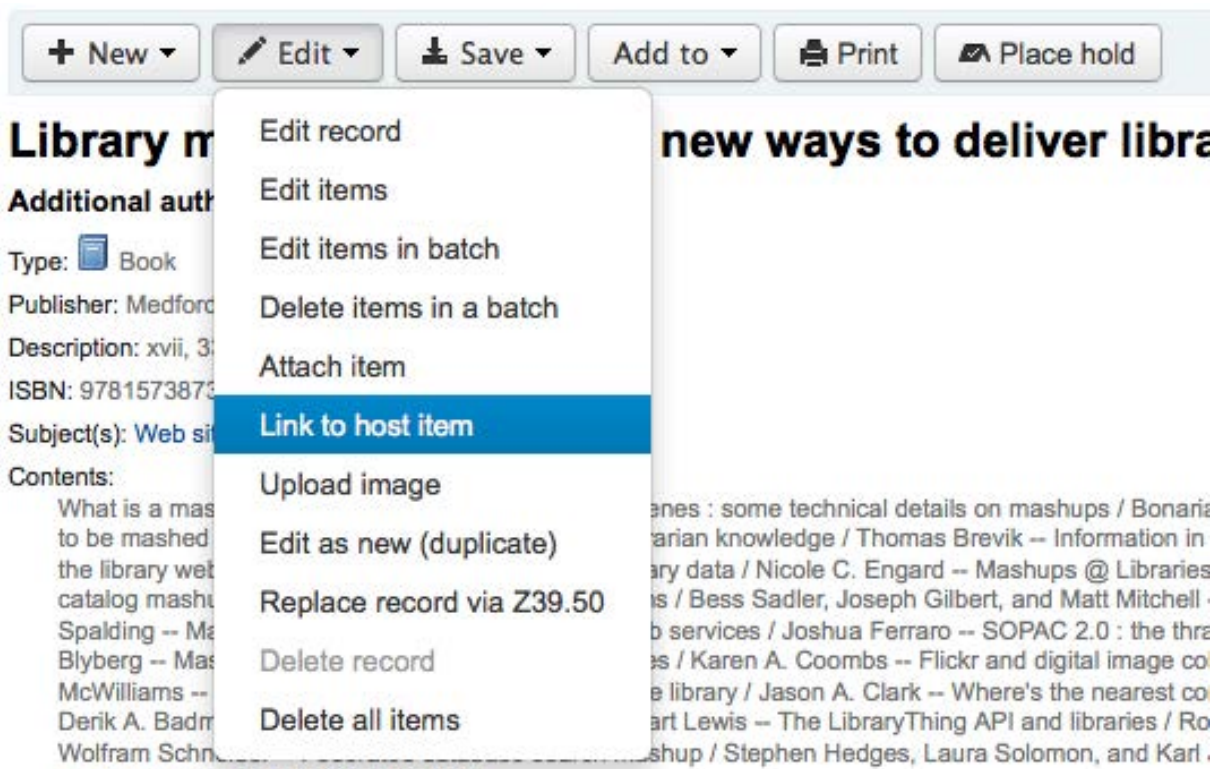

Libraries sometimes make journal articles and articles within monographs and serials accessible to library patrons through analytics cataloging. Analytics cataloging creates separate bibliographic records for these articles, chapters, sections, etc. found within a larger resource such as a book, an article within a journal, newspaper or serial. In analytics cataloging, although a separate bib record is created for the title, it is not physically separated from the host item. Learn more about Analytics in Chapter 13 of AACR2.

If you would like to catalog analytic records there are two options. One is to use the [Easy Analytics](#) function; the other is the [Analytics Enhanced Workflow](#).

6.1.2.1 Easy Analytics

The Easy Analytics feature makes linking analytic records together easier. The first thing you need to do is set the [EasyAnalyticalRecords](#) preference to 'Display' and the [UseControlNumber](#) preference to 'Don't use.'

After cataloging your analytic record (see [Adding Records](#) for more on creating records) click 'Edit' from the normal view and choose to 'Link to Host Item'

This will prompt you to enter the barcode for the item this record should be linked to.

Select the host item to link to *Following the Yellow Brick Road to Simplified Link Management*
 Enter item barcode:

Select

After entering the item’s barcode and clicking ‘Select’ you will receive a confirmation message.

The item has successfully been linked to *Following the Yellow Brick Road to Simplified Link Management*.

The record will now have the 773 field filled in properly to complete the link.

773 ? 0 - HOST ITEM ENTRY

0	Host Biblionumber	4038
g	Host Itemnumber	5471
d	Place, publisher, and date of publication	Westport, CT : Meckler, c1988-

6.1.2.2 Analytics Enhanced Workflow

To use the Enhanced Workflow method of adding analytics the first thing you need to do is set the **EasyAnalyticalRecords** preference to 'Don't display' and the **UseControlNumber** preference to 'Use.'

After cataloging your original record (see **Adding Records** for more on creating records) click 'New'

from the normal view and choose to 'New child record.'

- Clicking 'Edit in Host' will allow you to edit the item on the host record.
- Clicking 'Delink' will remove the 773 field and the link between the analytic and the host.

6.1.3 Editing Records

To edit a record you can click 'Edit Biblio' from the search results on the cataloging page

Library mashups : exploring new ways to deliver library data / - 1573873721 9781573873727 - Information Today, Inc., - 2009 ; Medford, N.J. : - 334 p. cm.	Checked out (3), On order (3)	MARC Card	Edit biblio	Add/Edit Items
--	----------------------------------	---------------------------	-----------------------------	--------------------------------

or by clicking the Edit button on the Bibliographic Record and choosing 'Edit Record'

The record will open in the MARC editor

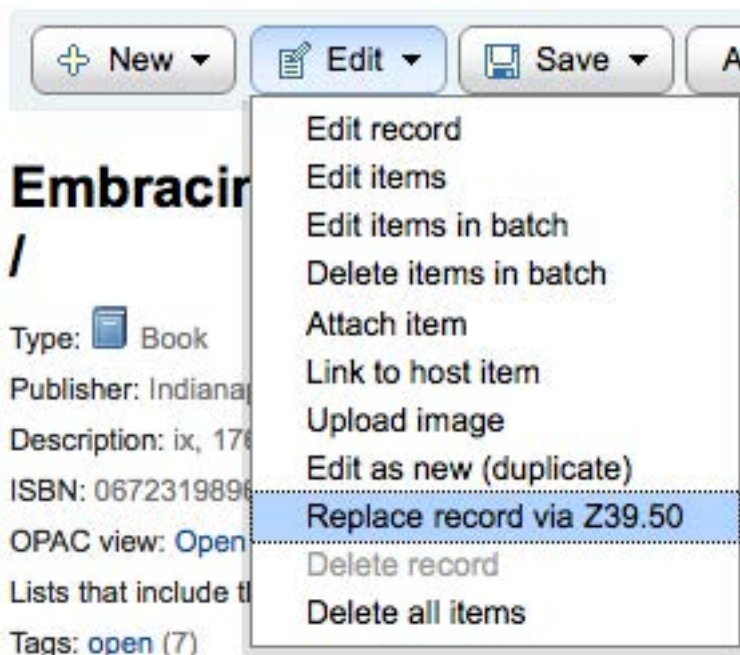

Editing *Embracing insanity : open source software development* / Russell C. Pavlicek. (Record number 538)

Show MARC tag documentation links

Change framework:

0	1	2	3	4	5	6	7	8	9
<p>000 ? - LEADER <input type="button" value="✖"/></p> <p>▲ 00 fixed length control field * <input type="text" value="00752cam a22002294a 4500"/> <input type="button" value="✎"/></p> <p>001 ? - CONTROL NUMBER <input type="button" value="✖"/></p> <p>▲ 00 control field <input type="text" value="11979316"/> <input type="button" value="✎"/></p> <p>003 ? - CONTROL NUMBER IDENTIFIER <input type="button" value="✖"/></p> <p>▲ 00 control field * <input type="text" value="NCE"/> <input type="button" value="✎"/></p> <p>005 ? - DATE AND TIME OF LATEST TRANSACTION <input type="button" value="✖"/></p> <p>▲ 00 control field * <input type="text" value="20120802164618.0"/> <input type="button" value="✎"/></p> <p>006 ? - FIXED-LENGTH DATA ELEMENTS--ADDITIONAL MATERIAL CHARACTERISTICS--GENERAL INFORMATION <input type="button" value="☒"/> <input type="button" value="✖"/></p> <p>007 ? - PHYSICAL DESCRIPTION FIXED FIELD--GENERAL INFORMATION <input type="button" value="☒"/> <input type="button" value="✖"/></p> <p>▲ 00 fixed length control field <input type="text" value=""/> <input type="button" value="✎"/></p> <p>008 ? - FIXED-LENGTH DATA ELEMENTS--GENERAL INFORMATION <input type="button" value="✖"/></p> <p>▲ 00 fixed length control field * <input type="text" value="000419s2000 inu 001 0 eng"/> <input type="button" value="✎"/></p>									

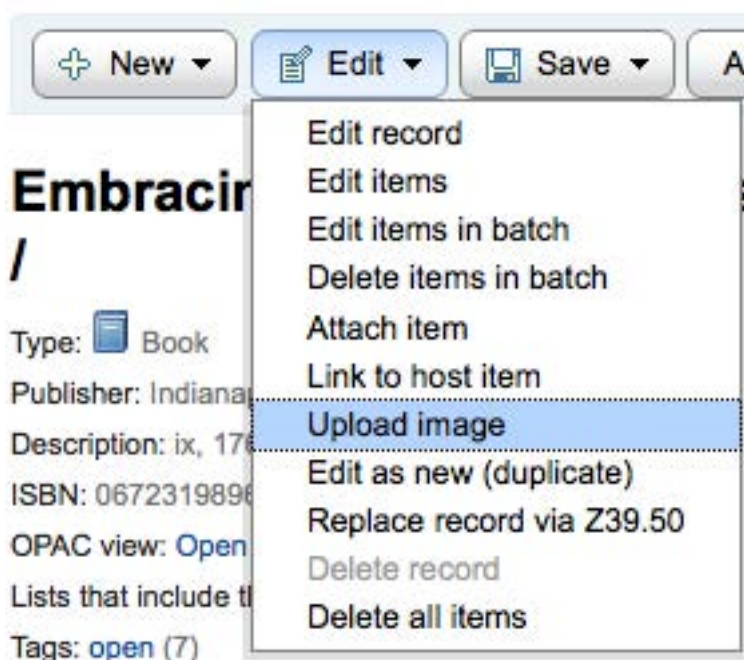

The alternative is to search via Z39.50 to overlay your record with a fuller record found at another library. You can do this by choosing 'Replace Record via Z39.50' from the Edit menu.

Once you choose that you will be brought to a Z39.50 search window to search other libraries for the record in question.

Once you have made your edits (via either method) you can click 'Save' at the top left of the editor.

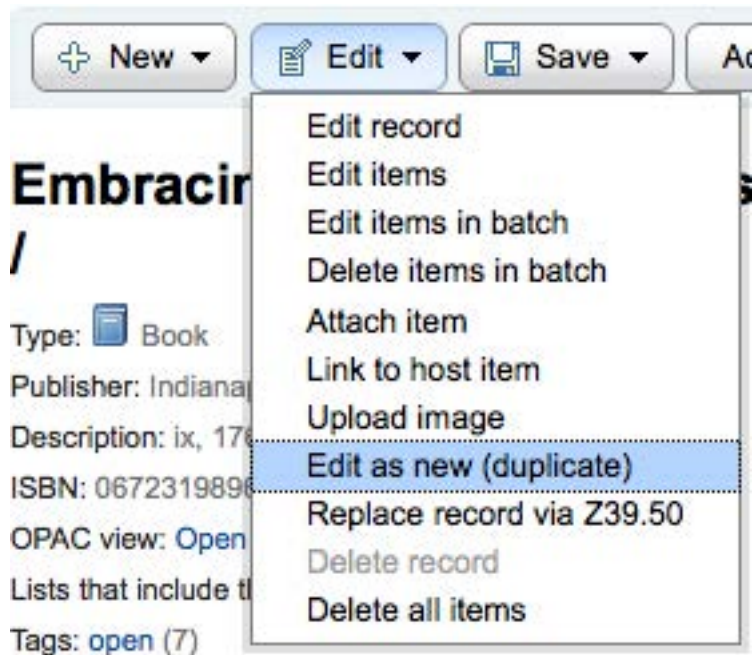

You can also use the edit menu to add your own custom cover image if you have either **OPACLocalCoverImages** and/or **LocalCoverImages** set to 'Display' by choosing 'Upload Image' from the menu.

Choosing to 'Upload Image' will take you to the **Upload Local Cover Image Tool**.

6.1.4 Duplicating Records

Sometimes a copy of the record you need to catalog can't be found via Z39.50. In these cases you can create a duplicate of similar record and edit the necessary pieces to create a new record. To duplicate an existing record click 'Edit as New (Duplicate)' from the Edit menu on the Bibliographic Record

This will open a new MARC record with the fields filled in with the values from the original Bibliographic Record.

Add MARC record

Show MARC tag documentation links

Change framework:

0	1	2	3	4	5	6	7	8	9

▲	c	Statement of responsibility, etc		<input type="text" value="Russell C. Pavlicek."/>							
▲	h	Medium		<input type="text"/>							

6.1.5 Merging Records

If you would like to merge together multiple records you can do that via the [Lists](#) tool. [Learn more here.](#)

6.1.6 Deleting Records

To delete a bibliographic record simply choose the 'Edit' button and select 'Delete record'

Bibliographic records can only be deleted once all items have been deleted. If you try to delete a biblio-

graphic record with items still attached you will see that the delete option is grayed out.

6.2 Item Records

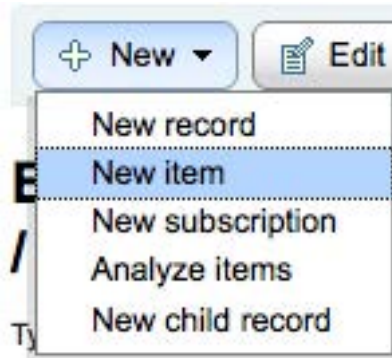

In Koha each bibliographic record can have one or more items attached. These items are sometimes referred to as holdings. Each item includes information to the physical copy the library has.

6.2.1 Adding Items

After saving a new bibliographic record, you will be redirected to a blank item record so that you can attach an item to the bibliographic record. You can also click 'Add/Edit Items' from the cataloging search results

Library mashups : exploring new ways to deliver library data / - 1573873721 9781573873727 - Information Today, Inc., - 2009 ; Medford, N.J. : - 334 p. cm.	Checked out (3), On order (3)	MARC Card	Edit biblio	Add/Edit Items
--	--	--	--	---

or you can add new item at any time by clicking 'New' on the bibliographic record and choosing 'New Item'

The item edit form will appear:

Items for Embracing insanity : by Pavlicek, Russell C. (Record #1357)

Add Item

0 - Withdrawn status	<input type="text"/>
1 - Lost status	<input type="text"/>
2 - Source of classification or shelving scheme	Dewey Decimal Classification
3 - Materials specified (bound volume or other part)	<input type="text"/>
4 - Damaged status	<input type="text"/>
5 - Use restrictions	<input type="text"/>
7 - Not for loan	<input type="text"/>
8 - Collection code	<input type="text"/>
a - Permanent location	Centerville
b - Current location	Centerville
c - Shelving location	<input type="text"/>
d - Date acquired	<input type="text"/>
e - Source of acquisition	<input type="text"/>
f - Coded location qualifier	<input type="text"/>
g - Cost, normal purchase price	<input type="text"/>
h - Serial Enumeration / chronology	<input type="text"/>

At the very least, if you plan on circulating the item, the following fields should be entered for new items:

- 2 - Source of classification
- a - Permanent location
- b - Current location
- o - Full call number
- p - Barcode
- v - Cost, replacement price
 - This value will be charged to patrons when you mark an item they have checked out as 'Lost'
- y - Koha item type

To make sure that these values are filled in you can mark them as mandatory in the **framework** you're using and then they will appear in red with a 'required' label. The item will not save until the required fields are filled in.

x - Non-public note	<input type="text"/>
y - Koha item type	Books Required
z - Public note	<input type="text"/>

•

TIP

To make item subfields required in a framework you'll want to edit the 952 field in the **framework editor**.

Below the add form there are 3 buttons for adding the item

- Add Item will add just the one item
- Add & Duplicate will add the item and fill in a new form with the same values for your to alter
- Add Multiple Copies will ask how many copies and will then add that number of copies adding +1 to the barcode so each barcode is unique

Your added items will appear above the add form once submitted

Items for Embracing insanity : by Pavlicek, Russell C. (Record #1270)

6.2.4 Moving Items

Items can be moved from one bibliographic record to another using the Attach Item option

Visit the bibliographic record you want to attach the item to and choose 'Attach Item' from the 'Edit' menu.

Attach an item to *Library mashups* :

Enter the barcode of the item to attach:

The item you select will be moved to the target record.

Simply enter the barcode for the item you want to move and click 'Select'

If you want to move all items to a new record creating only one bibliographic record you can use the [Merge Records tool](#) instead.

6.2.5 Deleting Items

There are many ways to delete item records. If you only need to delete one item you can do this by opening up the detail page for the bib record and clicking the 'Edit' button at the top. From there you can choose to 'Edit items'.

The screenshot shows a library cataloging interface. On the left is a sidebar with navigation buttons: Normal, MARC, Labeled MARC, ISBD, Items, Holds, Analytics, Checkout history, and Modification log. The main area displays a record for a 'Book' by Medford. The 'Edit' button is open, showing a dropdown menu with options: Edit record, Edit items (highlighted), Edit items in batch, Attach item, Link to host item, Edit as new (duplicate), Replace record via Z39.50, Delete record, and Delete all items. Below the record details, there are 'Holdings' and 'Descriptions' tabs. The 'Holdings' tab is active, showing a table with columns for Item type, Current location, and Home Library. Two rows are visible, both for '7-DAY BOOK' items located at 'Centerville'.

Item type	Current location	Home Library
7-DAY BOOK Books		
7-DAY BOOK	Centerville	Centerville

You will be presented with a list of items and next to each one will be a link labeled 'Delete'. Click that link and if the item is not checked out it will delete that item.

Items for Library mashups : (Record #4091)

		Withdrawn status	Source of classification or shelving scheme	Damaged status	Not for loan	Collection code	Permanent location	Current location	Shelving location	Date acquired
Edit	Delete				Ordered	Library & Information Science	Centerville	Centerville		2011-11-19

If you know that all of the items attached to your record are not currently checked out you can use the 'Delete all items' option under the 'Edit menu' and it will remove all items from the record.

Finally you can use the [batch delete tool](#) to delete a batch of items.

6.2.6 Item Specific Circulation History

Each bibliographic record keeps a circulation history (with or without the patron information depending on your settings), but each item also has its own circulation history page. To see this, click on the 'Items' tab to the left of the record you are viewing.

6.3 Authorities

Authority records are a way of controlling fields in your MARC records. Using authority records will provide you with control over subject headings, personal names and places.

6.3.1 Adding Authorities

To add a new authority record, choose the authority type from the 'New Authority' button.

The form that appears will allow you to enter all of the necessary details regarding your authority record.

Adding authority Personal Name

Save

Authority search

Search options

Authority type: GEOGR_NAME

Main entry (\$a only): contains

Main entry: contains

Anywhere: contains

Heading match: contains

Sort by: Heading ascendant

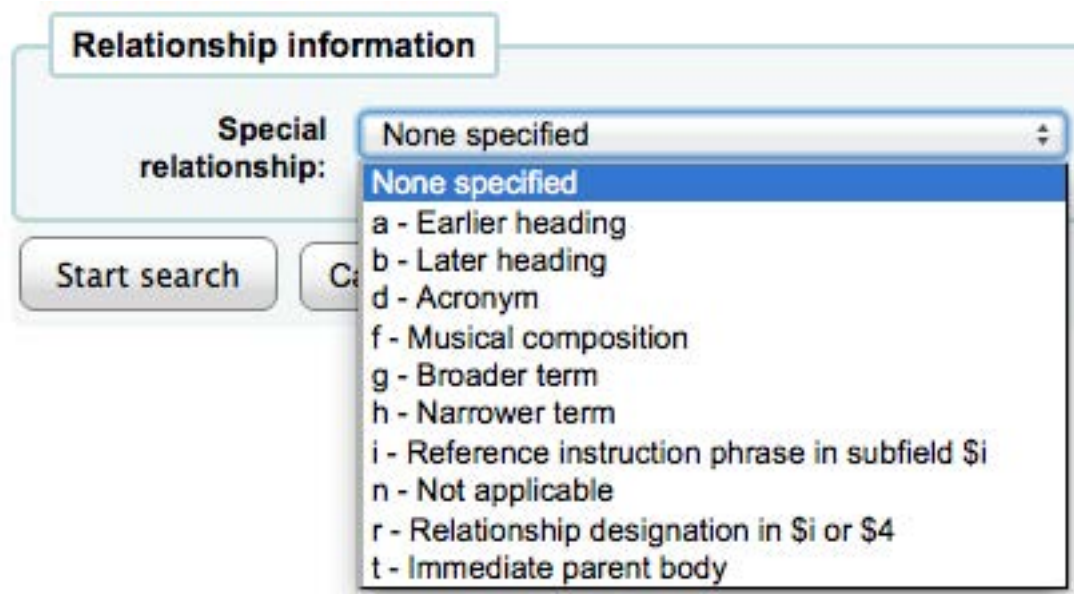

Relationship information

Special relationship: None specified

Start search Cancel Clear field Create new

From there you can search your authority file for the authority to link. If you can't find the authority

to link, you can click the 'Create new' button and add the necessary authority for the link. This plugin also allows for you to choose the link relationship between the authorities.

6.3.2 Searching Authorities

From the authorities page you can search for existing terms and the bibliographic records they are attached to.

Enter authority heading (\$a):

[Search Authorities](#)
[Search Main Heading](#)
[Search All Headings](#)

From the results you will see the authority record, how many bibliographic records it is attached to, and a delete link (if there are no bibliographic records attached).

100 - HEADING--PERSONAL NAME -

▲ a	Personal name	Engard, Nicole C.,	
▲ d	Dates associated with	1979-	

Once you've made the necessary edits, simply click 'Save' and if you have the `dontmerge` system preference set to 'Do' the next time the `merge_authorities.pl cronjob` runs it will update all of the bib records that use that authority.

To delete an authority record you first must make sure it's not linked to any bibliographic records. If it is not used by any bibliographic records a 'Delete' link will appear to the right of the record on the search results and as a button that appears after clicking on the summary of the authority record.

6.4 Cataloging Guides

6.4.1 Bibliographic Record Cataloging Cheat Sheet

6.4.2 Item/Holdings Record Cataloging Guide

This table represents the default embedded holdings data in Koha. This information can be used for migration or importing data purposes

* - required for circulation

** - required by Koha

6.4.3 Handling On Order Items and Holds

If you tend to import your MARC records when you have ordered the book (as opposed to when you receive the books), and allow patrons to place holds on those books, you may need to add item records to the *.mrc file before importing.

The easiest way to import your latest order is to first run your records through `MARCEdit`. Download your MARC records, saving them to your desktop or some other location you use/will remember. If you have `MARCEdit` already installed you should simply have to double click on your MARC records, and they will automatically open in `MARCEdit`.

IMPORTANT

This tutorial was written with `MARCEdit` version 5.2.3769.41641 on Windows XP, instructions may be different if your version or operating system is different.

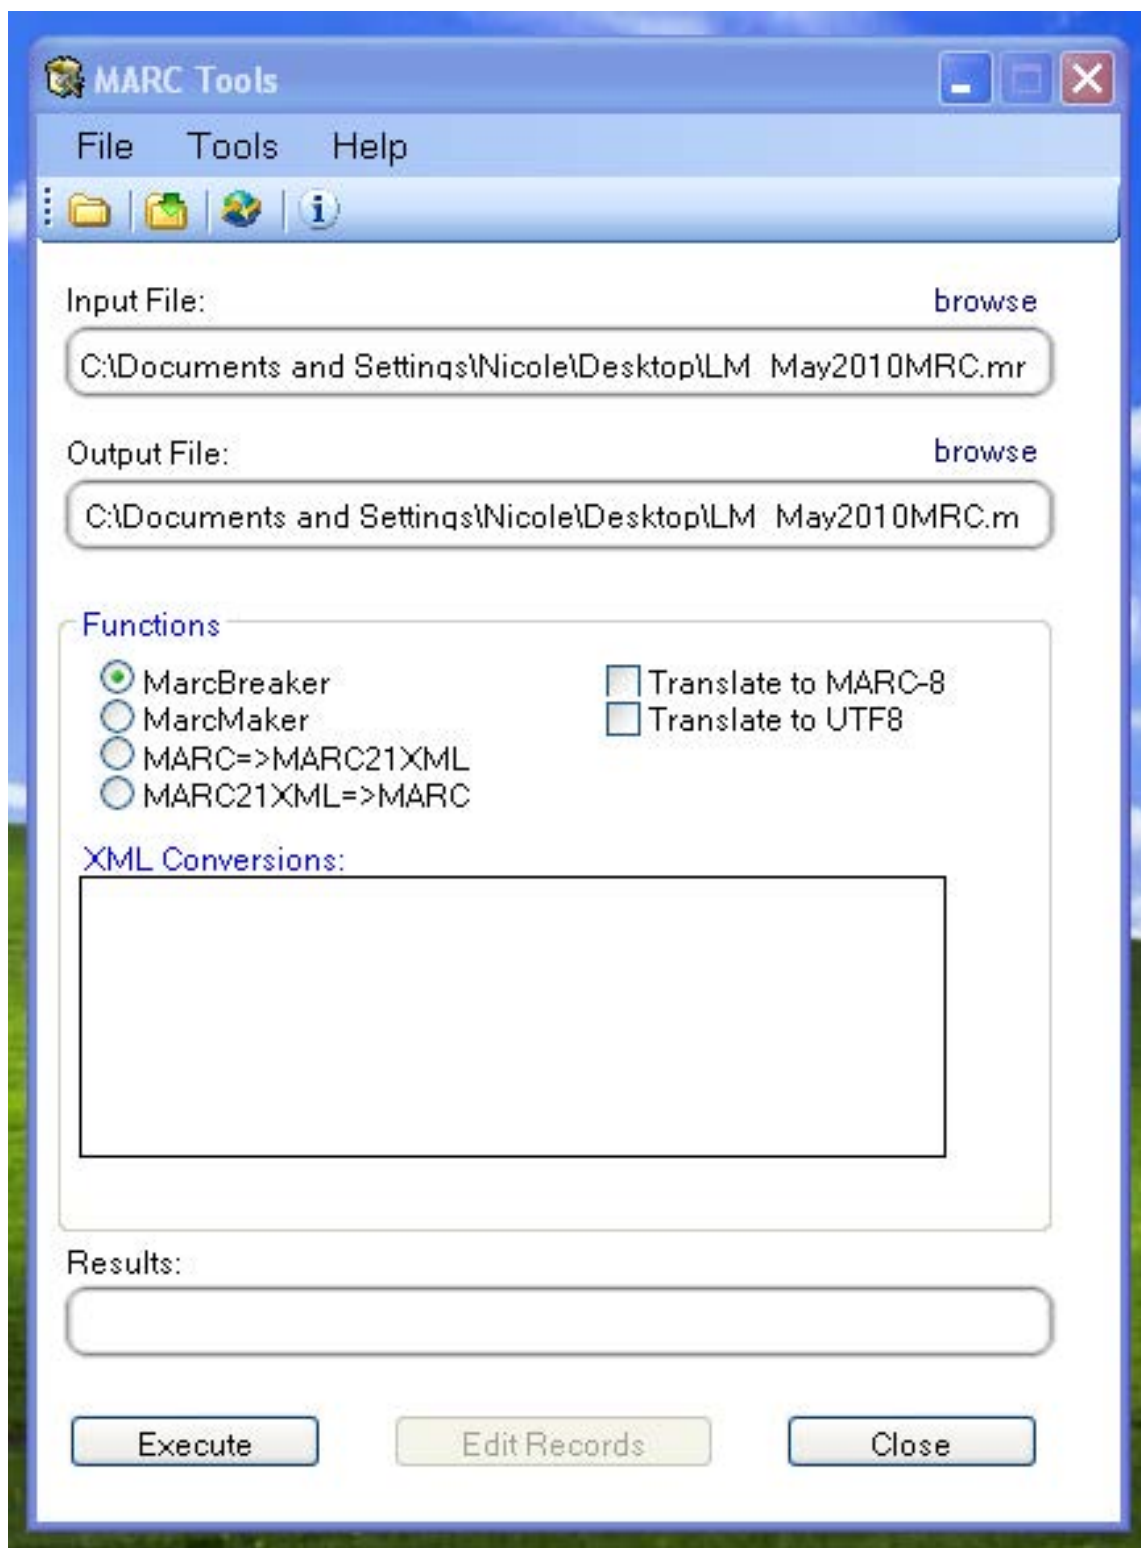

- Your original file will automatically be in the input; ensure `MarcBreaker` is chosen, and then click "Execute"

Table 6.1 Cataloging Guide

Tag	Label	Description	Instructions
000	LEADER	Describes the record(i.e. surrogate) -- is it a record for a monograph? A serial?	Click in this field to fill it in. Then set "Bibliographic level" to 'a' for articles or 's' for serials. Otherwise, leave everything as is.
001	CONTROL NUMBER	Accession number.	Enter the accession number written inside the item here. For articles and items which do not have accession numbers, leave blank.
003	CONTROL NUMBER IDENTIFIER	Your MARC Organizational Code	Click in this field to fill it in (will auto fill if you have your MARCOrgCode preference set).
005	D & T LATEST TRANSACTION	Current date and time.	Click in this field to fill it in.
008	FIXED-LENGTH DATA ELEMENTS	Field containing computer-readable representations of a number of things.	Generally you will only use 's' (single) or 'm' (multiple) options for position 06- use the former when the item was published in a single year, the latter when it was published over the course of several. If there is a single date, only enter a date in the first date field (positions 07-10). Enter the three-digit country code in positions 15-17, being sure to add spaces if the country code is fewer than three characters long. If there is an index, note that fact in position 31. Enter the three-letter language code in positions 35-37.
010	LCCN	A number assigned by the Library of Congress to uniquely identify the work.	Check on the copyright page of the book (if it was published in the US) or the LC catalog for this number. If you can't find it, don't worry about it.
020	ISBN	Unique number used by publishers to identify books.	If this number isn't listed on the book, there probably isn't one.
022	ISSN	Unique number used by publishers to identify serials.	If this number isn't listed on the book, there probably isn't one.
			For auctions that took place on only one day,

Table 6.2 Koha Embedded Holdings Data

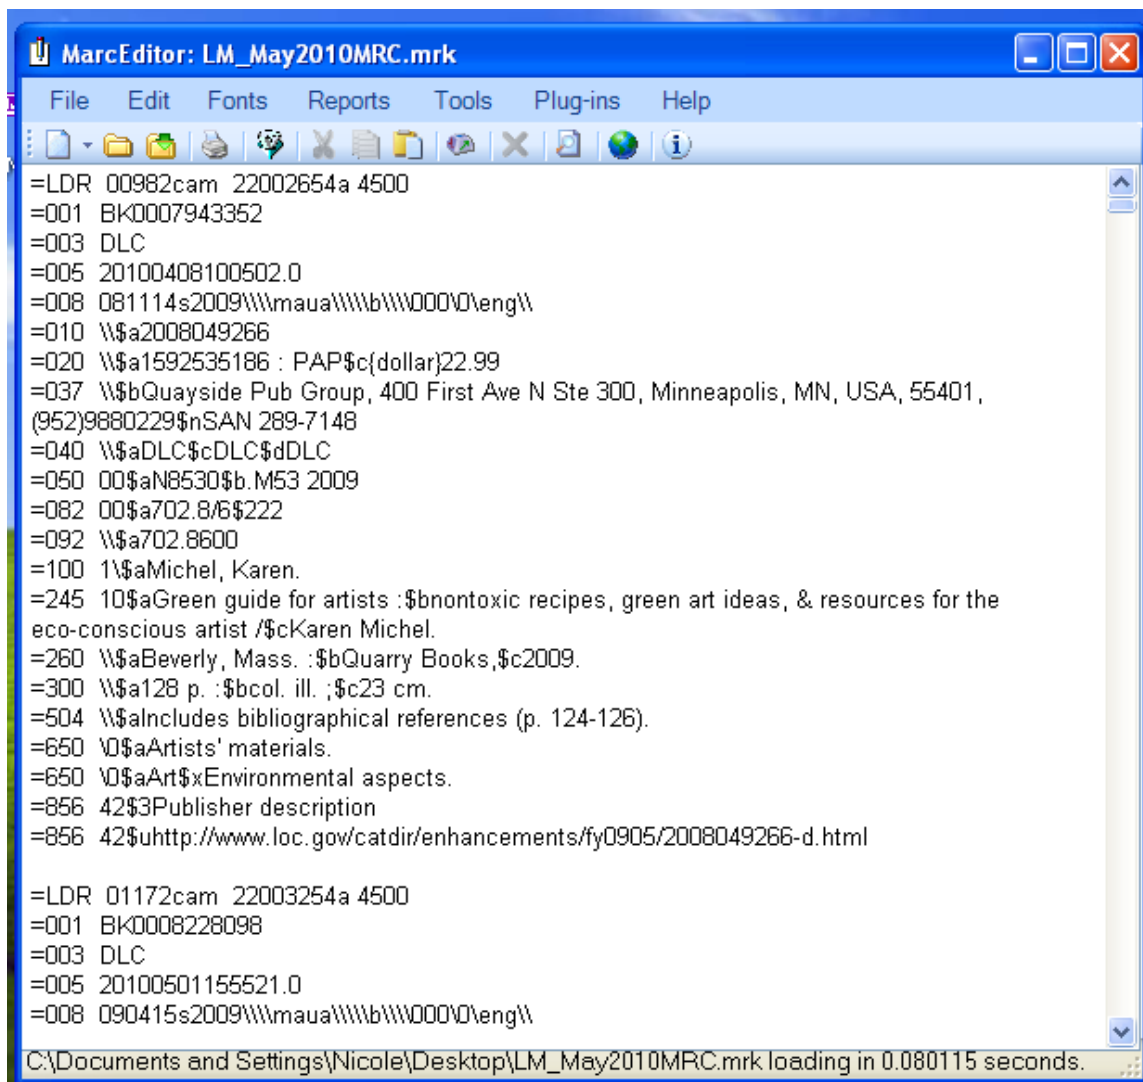

MARC21 Tag/subfield	Data Element	Description	Notes
952\$0	Withdrawn status	Default values: <ul style="list-style-type: none"> • 0 = Not withdrawn • 1 = Withdrawn 	Coded value, matching Authorized Value category ('WITHDRAWN' in default installation)
952\$1	Lost status	Default values: <ul style="list-style-type: none"> • 0 = Available • 1 = Lost • 2 = Long Overdue (Lost) • 3 = Lost and Paid For • 4 = Missing in Inventory • 5 = Missing in Hold Queue 	It's possible to configure OPAC so that lost items don't display with the hidelostitems system preference. Coded value, matching Authorized Value category ('LOST' in default installation)
952\$2	Classification	Classification scheme that defines filing rules used for sorting call numbers.	A choice of classification sources as they are defined in administration. If no classification scheme is entered, the system will use the value entered in the Default-ClassificationSource preference.
952\$3	Materials specified	Specific issues of serials or multi-part items.	Displayed when items are checked out and in to tell the staff how many pieces the item has. Copy/volume data is stored in 952\$h and \$t for display in Normal views.
952\$4	Damaged status	Default values: <ul style="list-style-type: none"> • 0 = Not damaged • 1 = Damaged 	Coded value, matching Authorized Value category ('DAMAGE' in default installation)
952\$5	Use restrictions	Default values: <ul style="list-style-type: none"> • 0 = No use restrictions • 1 = Restricted Access 	Coded value, matching Authorized Value category ('RESTRICT' in default installation). This value has no effect on circulation.
952\$7	Not for loan	Default values: <ul style="list-style-type: none"> • -1 = Ordered • 0 = Available for loans • 1 = Not for Loan • 2 = Staff 	Coded value, matching Authorized Value category ('NOT_LOAN' in default installation). Negative number values can still be placed on hold

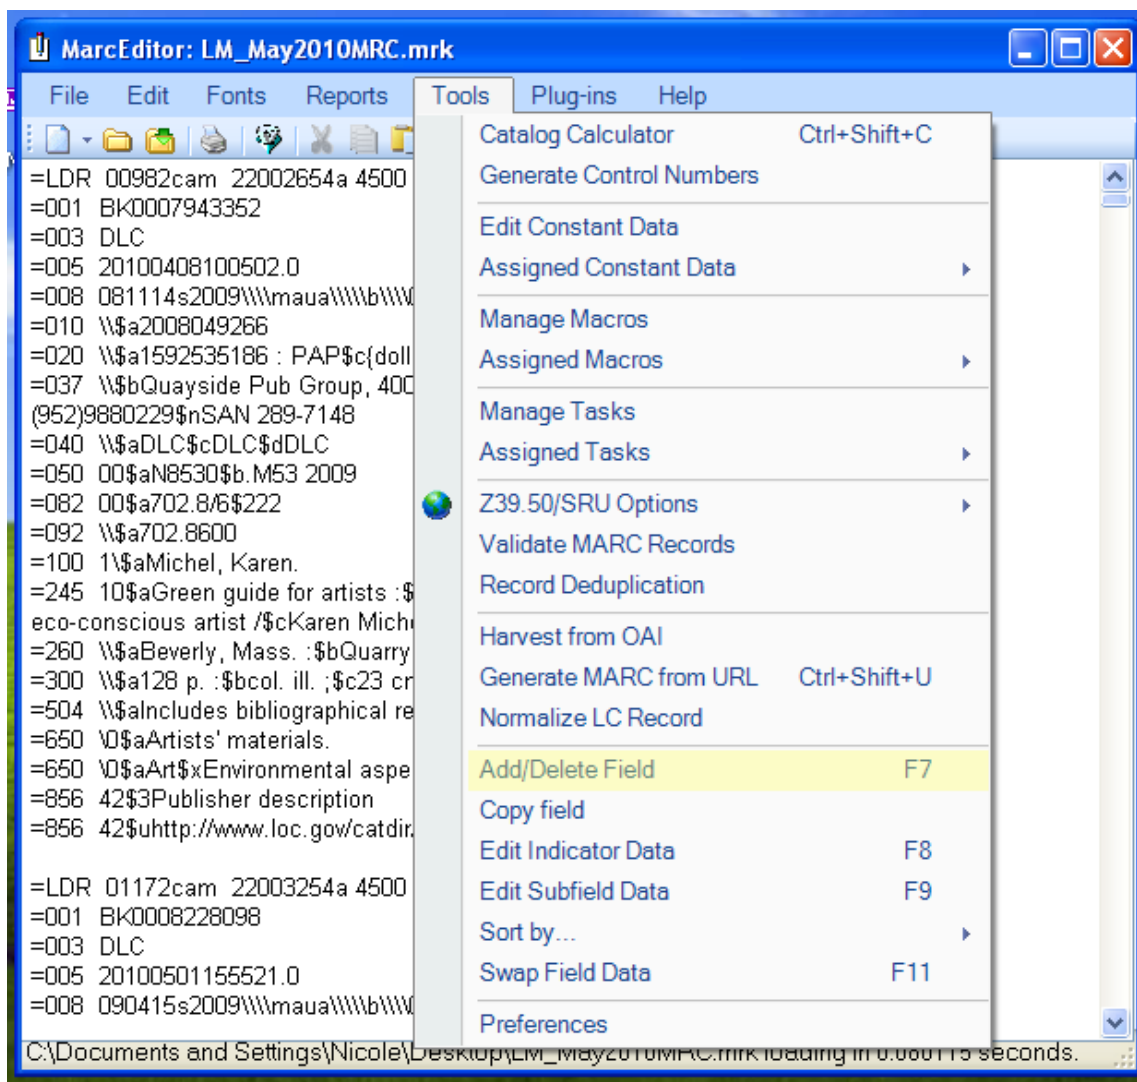

- You will be presented with a summary of the records processed at the bottom of the screen

- Click 'Edit Records' to continue on to adding item records
- Your screen will be replaced with a larger screen containing the MARC records

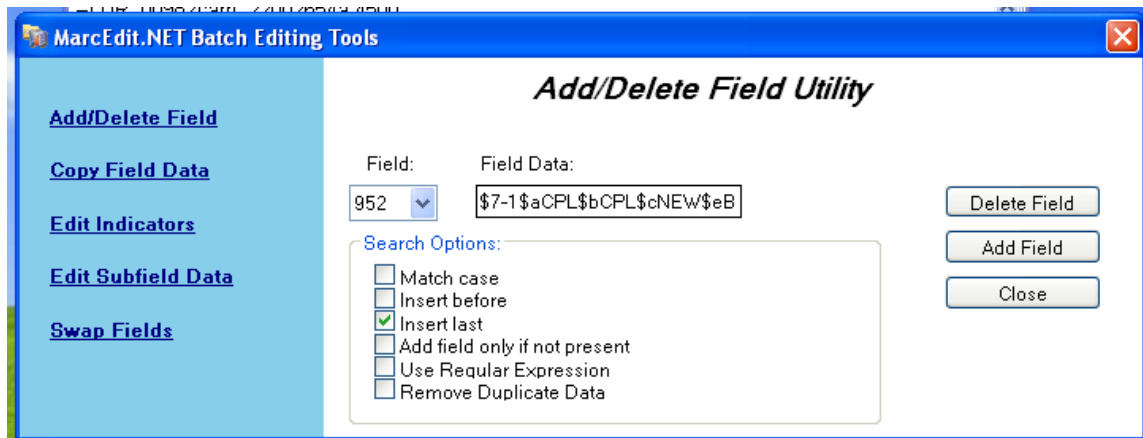

- Click on Tools > Add/Edit Field

- Enter in the Koha specific item info

- In the Field box, type 942
 - In the Field Data box, type \\\$c and the item type code (\\\$cBOOK in this example)
 - Check the 'Insert last' option
 - Click 'Add Field'
- Enter in the item record data

– In the Field box, type 952

– In the Field Data box, type \$7ORDERED_STATUS\$aPERM_LOC\$bCURR_LOC\$cSHELVING_LOCATION\$eSO

* ex. \$7-1\$aCPL\$bCPL\$cNEW\$eBrodart\$yBOOK

· In a default install of Koha -1 is the value for the Ordered status

* You may want to look at other subfields you would like data in -- for example, changing the collection code to put all the items in the same collection (8), automatically fill in the acquisition date (d), or put in a public note (z).

* Be sure you use the \$ to separate subfields; adding each subfield on a separate line will cause that many items to be imported with your MARC record (in the example above, four items, each with one of those subfields corrected)

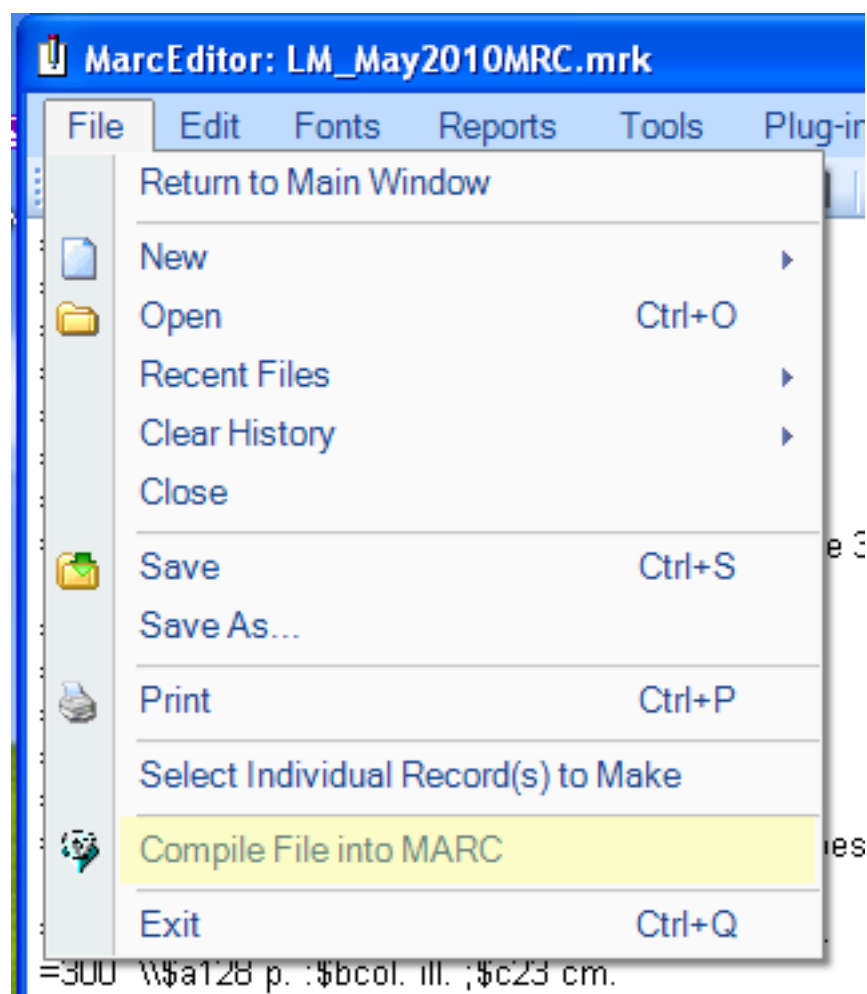

* Make sure you look at the Administration > Authorized Values in Koha to put the correct code into the field

– Check the 'Insert last' option

– Click 'Add Field'

• Close the field editor window

• Click on File > Compile into MARC

- Choose where to save your file

Now you want to go into your Koha system and follow the instructions for **importing MARC records**.

Once the item has come in, you will need to go to the item record and individually change the item to have the correct barcode, and manually change the status from Ordered to the blank line in the Not for Loan field.

TIP

If you purchase your cataloged item records, you may want to request your vendor put in the information you need into the MARC records for you; that way, you could import the edited-by-the-vendor file, overwriting the current record, automatically replacing the data with what you need.

Chapter 7

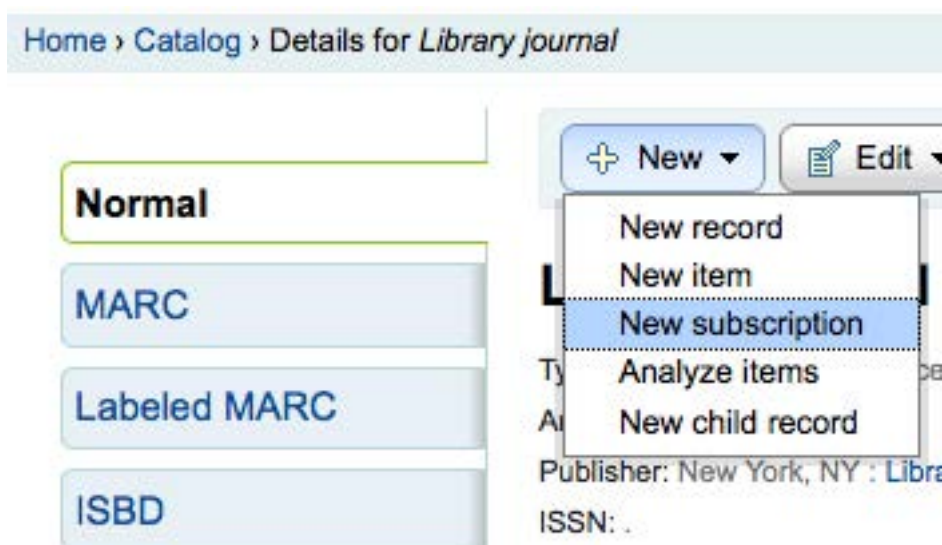

Serials

Serials actions can be accessed by going to the More menu at the top of your screen and choosing Serials or by clicking Serials on the main Koha staff client page. The Serials module in Koha is used for keeping track of journals, newspapers and other items that come on a regular schedule. As with all modules, make sure you go through the related [Implementation Checklist](#) before using the Serials module.

- *Get there:* More > Serials

7.1 Add a subscription

Subscriptions can be added by clicking the 'New' button on any bibliographic record

Or by visiting the Serials module and clicking 'New Subscription'

If you are entering a new subscription from the Serials module you will be presented with a blank form (if creating new from a bibliographic record the form will include the bib info).

Add a new subscription

Subscription details

Vendor: () [Search for a vendor](#)

Biblio: 6158 (Library journal) *Required*

do not create an item record when receiving this serial

Library: None (select a library)

Location: None

Call number:

Grace period: day(s)

OPAC note:

Nonpublic note:

Patron notification: None

Select a notice and subscribers will be notified when new issues are received.

Number of issues to display to staff:

Number of issues to display in OPAC:

Serials planning

First issue publication date:

Frequency: -- please choose -- *Required*

Manual history:

Numbering pattern: -- please choose --

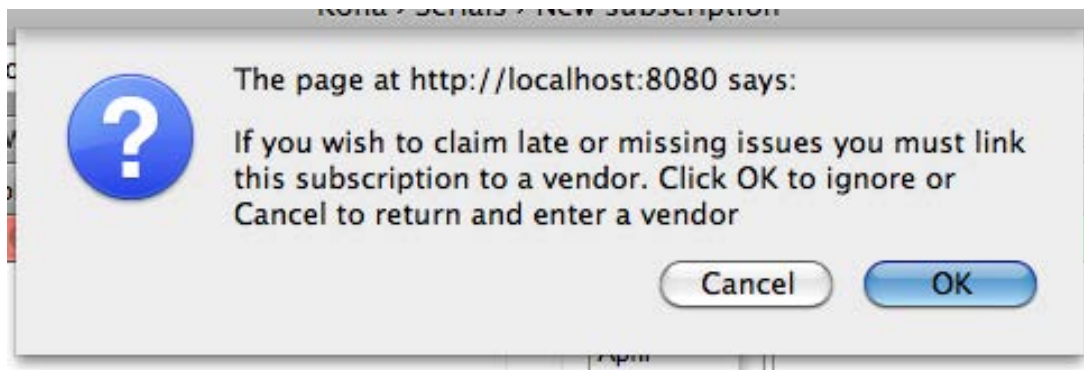

Subscription start date: *Required*

Subscription length: Number of months (enter amount in numerals) *Required*

Subscription end date:

Numbering formula:

- 'Librarian' field will show the logged in librarian's username
- 'Vendor' can be found by either searching vendors entered via the **Acquisitions module** or entering the vendor ID number
 - Vendor information is not required
 - In order to claim missing and late issues you need to enter vendor information

- 'Biblio' is the MARC record you'd like to link this subscription to
 - This can be done by searching for an existing record by clicking on the 'Search for Biblio' link below the boxes or by entering the bib number for a record in the first box. Only if you search with the field between the parenthesis.
- Next you can choose whether a new item is created when receiving an issue
- 'Location' is for the shelving location
- 'Call Number' is for your item's call number prefix
- 'Library' is the branch that owns this subscription.
 - If more than one library subscribes to this serial you will need to create a subscription for each library

- This can be done easily by using the 'Edit as New (Duplicate)' option found on the subscription information page and changing only the 'Library' field

- The 'Grace Period' is the number of days before an issue is automatically moved from 'expected' status to 'waiting' and how many days before an issue is automatically moved from 'waiting' status to 'late'
- Use the 'Public Note' for any notes you would like to appear in the OPAC for the patrons
- 'Nonpublic Note' should be used for notes that are only visible to the librarians via the staff client
- To set up a routing list for serials, choose 'Routing List' from the 'Patron notification' field.
 - For this option to appear you need to make sure that you have a Routing List notice set up in the [Notices Tool](#)
 - Learn more about [Routing Lists](#) later in this manual
- The Staff and OPAC Display options allow you to control how many issues appear by default on bibliographic records in the Staff Client and the OPAC
 - If no values are entered in these fields, they will use the [OPACSerialIssueDisplayCount](#) and [StaffSerialIssueDisplayCount](#) system preference values
- In 'First issue publication date' you want to enter the date of the issue you have in your hand, the date from which the prediction pattern will start
- There are several pre-defined options for the 'Frequency' of publication
 - Without periodicity: some very specific (usually high level science journals) don't have a true periodicity. When you subscribe to the title, you subscribe for 6 issues, which can arrive in 1 year... or 2... There is no regularity or known schedule.
 - Unknown select this if none of the other choices are relevant
 - Irregular: The journal is not "regular" but has a periodicity. You know that it comes out on January, then in October and December, it is irregular, but you know when it's going to arrive.
 - 2/day: Twice daily
 - 1/day: Daily
 - 3/week: Three times a week
 - 1/week: Weekly
 - 1/ 2 weeks: Twice monthly (fortnightly)
 - 1/ 3 weeks: Tri-weekly
 - 1/month: Monthly
 - 1/ 2 months (6/year): Bi-monthly
 - 1/ 3 months (1/quarter): Quarterly
 - 1/quarter (seasonal) : Quarterly related to seasons (ie. Summer, Autumn, Winter, Spring)
 - 2/year: Half yearly
 - 1/year: Annual
 - 1/ 2 years: Bi-annual

- Checking the 'Manual history' box will allow you to enter serials outside the prediction pattern.
- 'Numbering pattern' will help you determine how the numbers are printed for each issue
 - Start with the numbering on the issue you have in hand, the numbering that matches the date you entered in the 'First issue publication' field
 - If you have chosen any 'Numbering Format' other than 'Number' in the 'Rollover at' field, enter the last issue number before the volume number changes
 - * If you chose the 'Number' Numbering Format you will see 'issues expected' in which you will enter the total number of issues you expect to receive.

The screenshot shows a form with the following elements:

- Frequency:** A dropdown menu set to "1/month" with a red "Required" label to its right.
- Manual history:** A checkbox that is currently unchecked.
- Numbering pattern:** A dropdown menu set to "Year/Number".
- Table:** A table with three rows and three columns. The first row has headers "Year" and "Number". The second row is labeled "Starting with:" and has "2012" in the Year column and "6" in the Number column. The third row is labeled "Rollover at:" and has an empty Year column and "12" in the Number column.

	Year	Number
Starting with:	2012	6
Rollover at:		12

- You can choose to create your own numbering pattern by choosing 'None of the above' and clicking the 'Show/Hide Advanced Pattern' button at the bottom of the form
- 'Subscription start date' is the date at which the subscription begins. This is used for setting up renewal alerts
- 'Subscription length' is the number of issues or months in the subscription. This is also used for setting up renewal alerts
- 'Subscription end date' should only be entered for subscriptions that have ended (if you're entering in a backlog of serials)
- The 'Numbering formula' is editable to match the way you'd like your numbering to print on the item record and subscription information pages

Click 'Save Subscription' to save the information you have entered. [Find sample serial examples in the appendix.](#)

7.2 Receive Issues

Issues can be marked as received from several locations. To find a subscription, use the search box at the top of the Serials page to search for the serial you'd like to receive issues for:

Search Subscriptions:
 ISSN: Title:
[Search Subscriptions](#) [Check Out](#) [Search the Catalog](#)

[+ New Subscription](#)

Serials subscriptions

Supplemental issue				
--------------------	--	--	--	--

Click to add item

choosing 'Arrived'

- If your issue has a supplemental issue with it, fill in the Supplemental Issue information.
- If you have decided to have an item record created for each issue an **item add form** will appear for your supplement and for the issue itself
- Once you have entered your info you can click 'Save'

If you are receiving multiple issues at once, or have marked an issue as 'Late' or 'Missing' there you can click the 'Generate Next' button below the list of issues.

2012

Date published	Date received	Number	Status	Notes	Library	Routing	Edit
06/15/2012	06/15/2012	Issue 6 : 2012	Expected		CPL	Print list	<input checked="" type="checkbox"/>

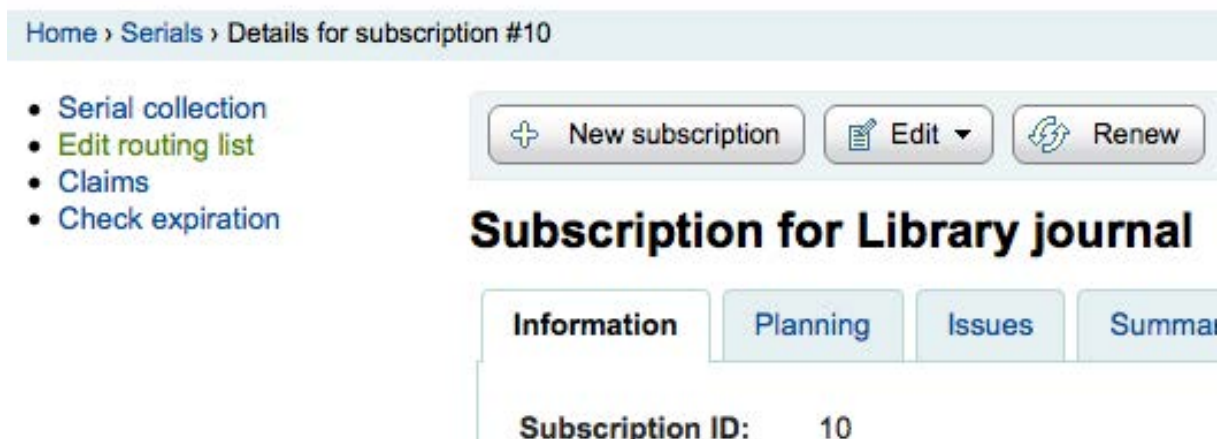

Clicking this button will generate the next issue for you and mark the previously expected issue as 'Late' automatically. You can then check the 'Edit' box to the right of each issue and edit the status on multiple issues at once.

7.3 Create a Routing List

A routing list is a list of people who receive the serial before it goes to the shelf. When setting up your serial subscription you want to be sure to pick 'Routing List' from the 'Patron Notification' pull down.

When on the subscription page you will see a link to the left that reads 'Create Routing List' or 'Edit Routing List'

Clicking that link will bring you to the menu to add a new routing list.

Edit routing list for *Library journal*

From here you want to click 'Add recipients' in order to add people to the routing list. In the menu that appears you can filter patrons by part of their name, their library and/or patron category.

Filter :

Name:

Library:

Category:

Results 1 to 5 of 5 found for 'engard'

Card	Name	Library	Add
9876543456	Engard, Beau	FFL	Add
9876543453	Engard, Brian	NIC	Add
9876543452	Engard, Coda	FFL	Add
9876543457	Engard, Nicole	NIC	Add
23529001223643	Engard, Unnamed Puppy	NIC	Add

[Close](#)

Clicking 'Add' to the right of each name will add them to the routing list. When you have chosen all of the people for the list, click the 'Close' link to be redirected to the routing list.

Edit routing list for *Library journal*

Issue: Issue 6 : 2012 (06/14/2012) ▾

Recipients:

Name	Rank	Delete
Brian Engard	1 ▾	Delete
Coda Engard	2 ▾	Delete
Nicole Engard	3 ▾	Delete

[Add recipients](#) [Delete all](#)

Notes:

If the list looks the way you expect it to, then click 'Save'. Next you will be brought to a preview of the routing list. To print the list click 'Save and preview routing slip.' This will open a printable version of the list.

Preview routing list for *Library journal*

Issue: Issue 6 : 2012 (06/14/2012)

List member:

Name
Engard, Brian
Engard, Coda
Engard, Nicole

Notes:

If `RoutingListAddReserves` is set to on then patrons listed in the routing list will automatically be added to the holds list for the issue.

To see a list of all of the routing lists a specific patron is on visit the [Routing Lists tab](#) on their patron record.

7.4 Subscriptions in Staff Client

Subscription information will appear on bibliographic records under the 'Subscriptions' tab

7.6 Claim Late Serials

Koha can send email messages to your serial vendors if you have late issues. To the left of the main serials page there is a link to 'Claims'

[Home](#) > [Serials](#)

- [Claims](#)
- [Check Expiration](#)

The links to claims also appears to the left of the subscription detail page

[Home](#) › [Serials](#) › [Details for Subscript](#)

- [Serial Collection](#)
- [Edit Routing List](#)
- [Claims](#)
- [Check Expiration](#)

If you don't have a claim notice defined yet you will see a warning message that you need to first define a notice.

No claims notice defined. [Please define one.](#)

Clicking 'Claims' will open a report that will ask you to choose from your various serial vendors to generate claims for late issues.

Select notice: Serial Claim ▾ Send notification

From the list of late issues you can choose which ones you want to send a claim email to by clicking the checkbox to the left of late issue, choosing the notice template to use and clicking the 'Send notification' button.

7.7 Check Serial Expiration

When adding serials you enter a subscription length, using the check expiration tool you can see when your subscriptions are about to expire. To use the tool click the link to 'Check expiration' on the serials menu.

Check expiration

Filter results :

Title:

ISSN:

Expiring before:  *Required*
(MM/DD/YYYY)

In the form that appears you need to enter at least a date to search by.

In your results you will see all subscriptions that will expire before the date you entered. From there you can choose to view the subscription further or renew it in one click.

1 subscription(s) will expire before **01/01/2014**

ISSN	Title	Note	Expiration date	
1041-7915	Computers in libraries.	Combined issues in Jan/Feb and Jul/Aug.	01/01/2012	Edit Renew

7.8 Renewing Serials

If your serial subscription has expired you won't be able to receive issues. To renew your subscription you can click the 'Renew' button at the top of your subscription detail page.

Subscription for Computers in libraries 2010.

Another option is to click the 'Renew' link to the right of the subscription on the Serial Collection page.

Serial Collection information for *Computers in libraries.* callnumber: MAG

Subscription Summary

Subscription Num.	Frequency	Numbering pattern	Library	Call number	Notes	Routing	Renew
# 1	1/Month	Volume, Number	FFL	MAG	Combined issues in Jan/Feb and Jul/Aug.	Edit Routing List	Renew

Once you click the 'Renew' link or button you will be presenting with renewal options.

Subscription renewal for Computers in libraries 2010.

Start date:

Subscription length:

Number of num:

Number of weeks:

Number of months:

Note for the librarian that will manage your renewal request:

- The start date should be the date your subscription period starts.
- For the subscription length you'll want to fill in one of the three fields presented: Number of num (issues), Number of months or Number of weeks.
- Finally enter any notes you might have about this renewal.

7.9 Searching Serials

Once in the Serials module there is basic search box at the top that you can use to find subscriptions using any part of the ISSN and/or title.

Search subscriptions:

ISSN: Title: [Advanced search](#)

[Search subscriptions](#) [Check out](#) [Search the catalog](#)

You can also click the 'Advanced Search' link to the right of the 'Submit' button to do a more thorough search of your serials.

Chapter 8

Acquisitions

The Koha Acquisitions module provides a way for the library to record orders placed with vendors and manage purchase budgets.

- *Get there:* More > Acquisitions

8.1 Setup

Before using the Acquisitions Module you will want to make sure that you have completed all of the set up.

First, set your [Acquisitions System Preferences](#) and [Acquisitions Administration](#) to match your library's workflow.

On the main acquisitions page you will see your library's funds listed.

All available funds for Nicole's Library branch

Fund	Owner	Branch	Amount	Ordered	Spent	Avail
FIC	Nicole Engard	Nicole's Library	5,000.00	1,317.81	394.43	3,287.76
NFIC		Nicole's Library	2,500.00	26.00	187.95	2,286.05
Total			7,500.00	1,343.81	582.38	5,573.81

Show all :

TIP

If the total line is confusing for the funds you have set up you can hide it by adding

```
#funds_total {display:none;}
```

to the [IntranetUserCSS](#) preference.

To see all active funds you can click the checkbox next to 'Show all' below the funds table.

To see a history of all orders in a fund you can click on the linked amount and it will run a search for you.

Fund: FIC

Ordered

Title	Order	Vendor	Itemtype	Left on Order	Estimated cost per unit	Date Ordered	Subtotal
Korean-English Dictionary	6	1	CDBK	1	10.00	04/28/2011	10.00
The lost gate :	18	3	BK	1	24.99	11/09/2011	24.99
To have and to kill /	19	3	BK	1	24.99	11/09/2011	24.99
Love letters :	21	3	BK	1	25.99	11/09/2011	25.99
Mr. Monk on the road :	22	3	BK	1	22.95	11/09/2011	22.95

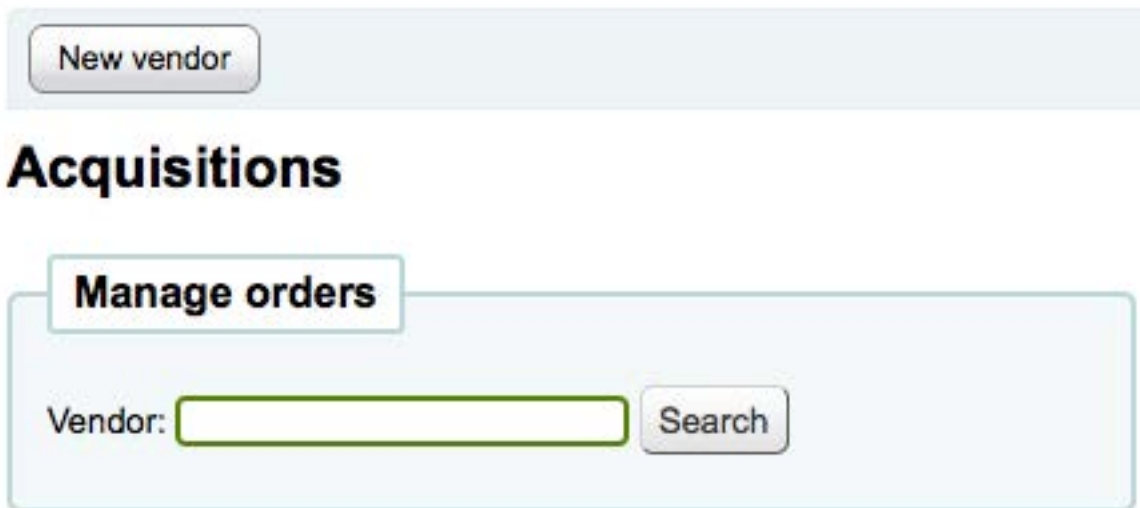

Learn more in the [Budget/Fund Tracking](#) section of this manual.

8.2 Vendors

Before any orders can be places you must first enter at least one vendor.

8.2.1 Add a Vendor

To add a vendor click the 'New Vendor' button on the Acquisitions page

The vendor add form is broken into three pieces

- The first section is for basic information about the Vendor

The image shows a screenshot of a form titled 'Company details'. The form contains several input fields: 'Name *' (with a red asterisk), 'Postal address', 'Physical address', 'Phone', 'Fax', 'Website', and 'Account number'. Each field is represented by a rectangular text box.

- Of these fields, only the Vendor name is required, the rest of the information should be added to help with generating claim letters and invoices

- The second section is for information regarding your contact at the Vendor's office

Contact details

Contact name
Position
Phone
Alternative phone
Fax
Email
Notes

- None of these fields are required, they should only be entered if you want to keep track of your contact's information within Koha

- The final section is for billing information

Ordering information

Vendor is: Active Inactive
List prices are
Invoice prices are
Tax Number Registered: Yes No
List prices: Include tax Don't include tax
Invoice prices: Include tax Don't include tax
Discount %
Tax rate % (leave blank for default tax of 0.0%)
Delivery time days
Notes

- To be able to order from a vendor you must make them 'Active'
- For List Prices and Invoice Prices choose the currency
 - * Currencies are assigned in the **Currencies & Exchange Rates** admin area
- If your library is charged tax mark your Tax Number as registered
- Note if you list prices and/or invoice prices include tax
- If the vendor offers a consistent blank discount, enter that in the 'Discount' field
 - * You can enter item specific discounts when placing an order
- Enter your tax rate if your library is charged taxes on orders
- If you know about how long it usually takes orders to arrive from this vendor you can enter a delivery time. This will allow Koha to estimate when orders will arrive at your library on the late orders report.
- Notes are for internal use

8.2.2 View/Edit a Vendor

To view a vendor’s information page you must search for the vendor from the Acquisitions home page. Your search can be for any part of the Vendor’s name:

You searched on vendor b, 2 results found

Choose a vendor in the list to jump directly to the right place.

If the vendor has no baskets attached to it then a 'Delete' button will also be visible and the vendor can be deleted.

Amazon2

8.2.3 Vendor Contracts

You can define contracts (with a start and end date) and attach them to a vendor. This is used so that at the end of the year you can see how much you spent on a specific contract with a vendor. In some places, contracts are set up with a minimum and maximum yearly amount.

8.2.3.1 Add a Contract

At the top of a Vendor Information Page, you will see a 'New Contract' button.

Baker & Taylor

Order	Order receive	Vendor
Add basket	Receive shipment	Baker & Taylor

The contract form will ask for some very basic information about the contract

New contract for Amazon

Name *

Description

Start date * 
(MM/DD/YYYY)

End date * 
(MM/DD/YYYY)

IMPORTANT

You cannot enter a contract retrospectively. The end date must not be before today's date.

Once the contract is saved it will appear below the vendor information.

8.3 Managing Suggestions

Depending on your settings in the **suggestion** system preference, patrons may be able to make purchase suggestions via the OPAC. When a suggestion is waiting for library review, it will appear on the Acquisitions home page under the vendor search.

Pending suggestions

6 suggestions waiting. [Manage suggestions.](#)

It will also appear on the main staff dashboard under the module labels:

Suggestions pending approval: **6**
Comments pending approval: **1**
Tags pending approval: **3**

Clicking 'Manage suggestions' will take you to the suggestion management tool. If there are no pending suggestions you can access the suggestion management tool by clicking the 'Manage suggestions' link on the menu on the left of the Acquisitions page.

Suggestions management

Mark selected as: -- Choose a status -- with this reason: -- Choose a reason -- OR: Delete selected

Submit

Your suggestions will be sorted into several tabs: Accepted, Pending, Checked, Ordered and/or Rejected. Each accepted or rejected suggestion will show the name of the librarian who managed the suggestion and the reason they gave for accepting or rejecting it (found under 'Status').

An 'Accepted' suggestion is one that you have marked as 'Accepted' using the form below the suggestions. A 'Pending' suggestion is one that is awaiting action from the library. A 'Checked' suggestion is one that has been marked as 'Checked' using the form before the suggestions. An 'Ordered' suggestion is one that has been ordered using the '**From a purchase suggestion**' link in your basket. A 'Rejected' suggestion is one that you have marked at 'Rejected' using the form below the list of suggestions.

For libraries with lots of suggestions, there are filters on the left hand side of the Manage Suggestions page to assist in limiting the number of titles displayed on the screen.

8.4 Placing Orders

To place an order you must first search for the vendor or bookseller you want to send the order to.

8.4.1 Create a basket

To create a basket you must first search for the vendor you're ordering from:

[Baker & Taylor](#)

Basket (#) ▲	Item count ◆	Biblio count ◆	Items expected ◆	Created by ◆	Date ◆	
PO12342212 (#14)	0	0	0	Nicole Engard	11/09/2011	View
PO123423 (#24)	27	26	27	Nicole Engard	03/11/2012	closed on 03/11/2012 View
PO39092190 (#15)	25	24	21	Nicole Engard	11/09/2011	View
PO647938224 (#18)	25	25	25	Nicole Engard	11/19/2011	View

Next to the vendor name you will see a 'New Basket' button

Add a basket to Amazon

The screenshot shows a form titled "Add a basket to Amazon". The form contains the following fields and controls:

- Basket name:** A text input field.
- Billing Place:** A dropdown menu with "Nicole's Library" selected.
- Delivery Place:** A dropdown menu with "Nicole's Library" selected.
- Vendor:** A dropdown menu with "Amazon" selected.
- Internal note:** A large text area for notes.
- Vendor note:** A large text area for notes.
- Save:** A button at the bottom left of the form.

- When adding a basket you want to give it a name that will help you identify it later
- Enter in the Billing Place and Delivery Place (this will default the library you're logged in at)
- If you would like to change the vendor you're ordering from you can use the Vendor pull down menu
- The notes fields are optional and can contain any type of information

If you have **added contracts** to the vendor you're ordering from, you will also have an option to choose which contract you're ordering these items under.

Title King Lear

Author:

Publisher: Project Gutenberg Literary Archive Foundation,

Edition:

Publication year: 1997

ISBN:

Series:

Item

2 - Source of classification or shelving scheme

3 - Materials specified (bound volume or other)

- From the order form, you will not be able to edit the catalog details.

- * The other option is to import all records from the staged file by scrolling below the list of records in the staged file and filling in the item information.

King Solomon's Mines	no_match	Add order
The Kingdom of God Is Within You	no_match	Add order
Knots, Splices and Rope Work	no_match	Add order

Import All

Import all the lines in the basket with the following parameters:

Item

2 - Source of classification or shelving scheme

3 - Materials specified (bound volume or other)

- If you choose this option the Koha will look in the 020\$c and grab the pricing information from that field and put that on each order line.

After bringing in the bib information, if your **AcqCreateItem** system preference is set to add an item when ordering you will enter the item info next. You need to fill out at least one item record and then click the 'Add' button at the bottom left of the item form.

Item

2 - Source of classification or shelving scheme

3 - Materials specified (bound volume or other part)

7 - Not for loan

8 - Koha collection

a - Location (home branch)

b - Sublocation or collection (holding branch)

c - Shelving location

d - Date acquired ...

e - Source of acquisition

g - Cost, normal purchase price

h - Serial Enumeration / chronology

o - Koha full call number

p - Piece designation (barcode) ...

t - Copy number

u - Uniform Resource Identifier

v - Cost, replacement price

w - Price effective from

x - Nonpublic note

y - Koha item type

z - Public note

[Clear](#)

After clicking the 'Add item' button below the item record the item will appear above the form and then you can enter your next item the same way (if ordering more than one item).

Once you have entered the info about the item, you need to enter the Accounting information.

Accounting Details

Quantity:

Fund: **Show all:**

Currency:

Vendor price:

Uncertain price:

gstrate:

Discount: %

Replacement cost: (adjusted for USD)

Budgeted cost:

Total: (budgeted cost * quantity)

Actual cost:

Notes:

The 2 following fields are available for your own usage. They can be useful for statistical purposes

Statistic 1:

Statistic 2:

- Quantity is populated by the number of items you've added to the order above.

IMPORTANT

You cannot edit the quantity manually, you must click 'Add' below the item form to add as many items as you're ordering.

- The list of funds is populated by the **funds** you have assigned in the Acquisitions Administration area.
- The currency pull down will have the **currencies** you set up in the **Acquisitions Administration** area.
- The vendor price is the price before any taxes or discounts are applied.
- If the price is uncertain, check the uncertain price box.
 - A basket with at least one uncertain price can't be closed.
- If you are charged sales tax, choose that from the gstrate field
- Enter the percentage discount you're receiving on this order, once you enter this, hit tab and Koha will populate the rest of the cost fields below.
- If you added Planning Values when **creating the Fund**, those values will appear in the two Planning Value fields.

Once an item is added to the basket you will be presented with a basket summary.

Orders with uncertain prices

Orders from:

basket	order	by	uncertain	price	quantity
today's order	The Software challenge // Time-Life Books,, 0809460580 0809460599 (lib. edit)	Nicole Engard	<input checked="" type="checkbox"/>	<input type="text" value="5.000000"/>	<input type="text" value="1"/>

IMPORTANT

The Uncertain Prices page is independent of the basket. It is linked to the vendor so you will see all items on order with uncertain prices for that vendor.

8.4.2 Create a basket group

A basket group is simply a group of baskets. In some libraries, you have several staff members that create baskets, and, at the end of a period of time, someone then groups them together to send to the vendor in bulk. That said, it is possible to have one basket in a basket group if that's the workflow used in your library.

8.4.3 Printing baskets

When you are finished adding items to your basket, click 'Close this Basket.'

Basket Fiction Order (17) for [Borders](#)

Total Tax Inc. (USD)			11.00		1	11.00	
Total + Shipment cost (USD)					1	16.00	

8.7 Claims & Late Orders

If you have entered in an email address for the vendors in your system you can send them claim emails when an order is late. Before you can send claims you will need to set up an **acquisitions claim notice**.

Upon clicking on the link to 'Late Orders' from the Acquisitions page you will be presented with a series of filter options on the left hand side. These filters will be applied only closed baskets.

Filter Results:

Order date:
 days ago

Estimated Delivery date from:
 
 (MM/DD/YYYY)

To:
 
 (MM/DD/YYYY)

Vendor:

NOTE

 The vendor pull down only shows vendors with closed baskets that are late.

Once you filter your orders to show you the things you consider to be late you will be presented with a list of these items.

Late orders

Claim using notice:

Order date	Estimated delivery date	Vendor	Information	Total cost	Basket	Claims count	Claimed date	
(3) 03/11/2012 (29 days)	03/14/2012	Baker & Taylor	The lost gate : Author: Card, Orson Scott. Published by: Tor,	5.99x2 = 11.98 Fiction	24 NIC	0		<input type="checkbox"/>
(3) 03/11/2012 (29 days)	03/14/2012	Baker & Taylor	The lost gate : Author: Card, Orson Scott. Published by: Tor,	24.99x1 = 24.99 Fiction	24 NIC	0		<input type="checkbox"/>
(3) 03/11/2012 (29 days)	03/14/2012	Baker & Taylor	To have and to kill / Author: Clark, Mary Jane Behrends. Published by: William Morrow,	24.99x1 = 24.99 Fiction	24 NIC	0		<input type="checkbox"/>
(3) 03/11/2012 (29 days)	03/14/2012	Baker & Taylor	The Waxman murders / Author: Doherty, P. C. Published by: Minotaur Books,	25.99x1 = 25.99 Fiction	24 NIC	0		<input type="checkbox"/>

To the right of each late title you will be see a checkbox. Check off the ones you want a claim letter sent to and click 'Claim Order' at the bottom right of the list. This will automatically send an email to the vendor at the email address you have on file.

NOTE

The Estimated Delivery Date is based on the Delivery time value entered on the vendor record.

If you would rather use a different acquisition claim letter (other than the default) you can **create that in the notices module** and choose it from the menu above the list of late items.

8.8 Acquisition Searches

At the top of the various Acquisition pages there is a quick search box where you can perform either a Vendor Search or an Order Search.

In the Vendor Search you can enter any part of the vendor name to get results.

Search vendors:

Vendor search [Orders search](#)

Vendor b

You searched on vendor b, 2 results found

Choose a vendor in the list to jump directly to the right place.

Baker & Taylor

Basket (#)	Item count	Biblio count	Items expected	Created by	Date	
PO12342212 (#14)	0	0	0	Nicole Engard	11/09/2011	View
PO123423 (#24)	27	26	27	Nicole Engard	03/11/2012	closed on 03/11/2012 View
PO39092190 (#15)	25	24	21	Nicole Engard	11/09/2011	View
PO647938224 (#18)	25	25	25	Nicole Engard	11/19/2011	View

Using the Orders Search you can search for items that have been ordered with or without the vendor.

You can enter info in one or both fields and you can enter any part of the title and/or vendor name.

Search orders:

8.9 Budget/Fund Tracking

On the main acquisitions page there will be a table on the right showing you all of your active funds and a breakdown of what has been ordered or spent against them.

All available funds for Nicole's Library branch

Fund	Owner	Branch	Amount	Ordered	Spent	Avail
FIC	Nicole Engard	Nicole's Library	5,000.00	1,317.81	394.43	3,287.76
NFIC		Nicole's Library	2,500.00	26.00	187.95	2,286.05

Clicking on the linked amounts under spent or ordered will show you a summary of the titles ordered on that budget.

Chapter 9

Lists & Cart

Lists are a way to save a collection of content on a specific topic or for a specific purpose. The Cart is a session specific storage space.

- *Get there:* More > Lists

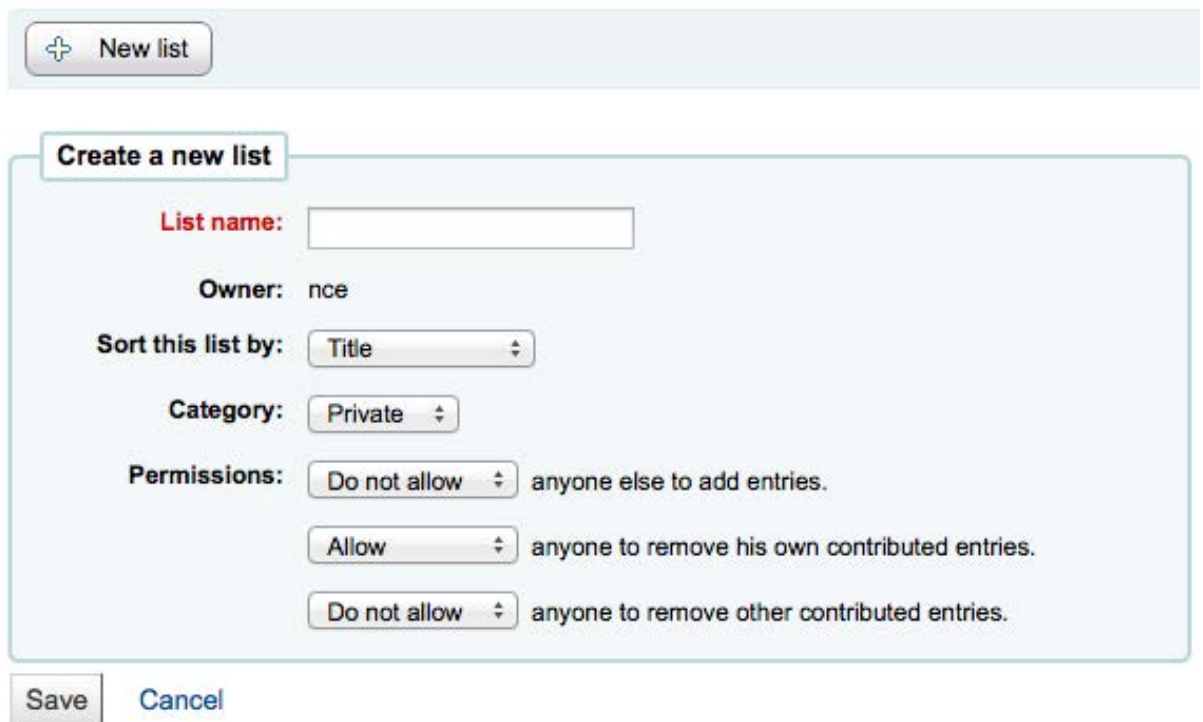

9.1 Lists

9.1.1 Create a List

A list can be created by visiting the Lists page and clicking 'New List'

The new list form offers several options for creating your list:

A screenshot of a web form for creating a new list. At the top left of the form area is a button with a plus icon and the text "New list". Below this is a section titled "Create a new list" in a rounded box. The form contains several fields: "List name:" followed by a text input field; "Owner:" followed by the text "nce"; "Sort this list by:" followed by a dropdown menu showing "Title"; "Category:" followed by a dropdown menu showing "Private"; and "Permissions:" followed by three stacked dropdown menus. The first dropdown is set to "Do not allow" and has the text "anyone else to add entries." to its right. The second dropdown is set to "Allow" and has the text "anyone to remove his own contributed entries." to its right. The third dropdown is set to "Do not allow" and has the text "anyone to remove other contributed entries." to its right. At the bottom left of the form are two buttons: "Save" and "Cancel".

- The name is what will appear on the list of Lists
- You can also choose how to sort the list
- Next decide if your list is going to be private or public

- A Private List is managed by you and can be seen only by you (depending on your permissions settings below)
 - A Public List can be seen by everybody, but managed only by you (depending on your permissions settings below)
- Finally decide what your permissions will be on the list. You can all or disallow:
 - anyone else to add entries
 - anyone to remove his own contributed entries

*

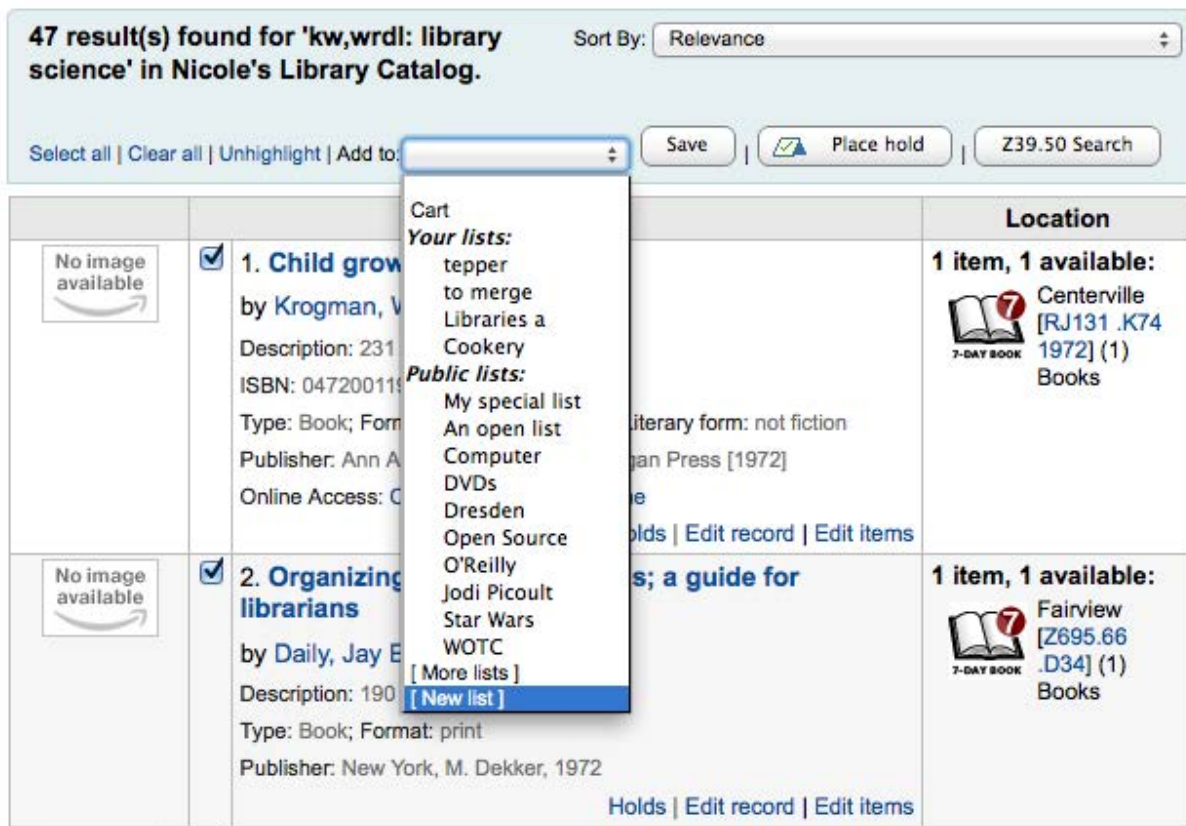

TIP

The owner of a list is always allowed to add entries, but needs permission to remove.

- anyone to remove other contributed entries

A list can also be created from the catalog search results

47 result(s) found for 'kw,wrld: library science' in Nicole's Library Catalog. Sort By: Relevance

Select all | Clear all | Unhighlight | Add to: [dropdown menu]

9.1.4 Merging Bibliographic Records Via Lists

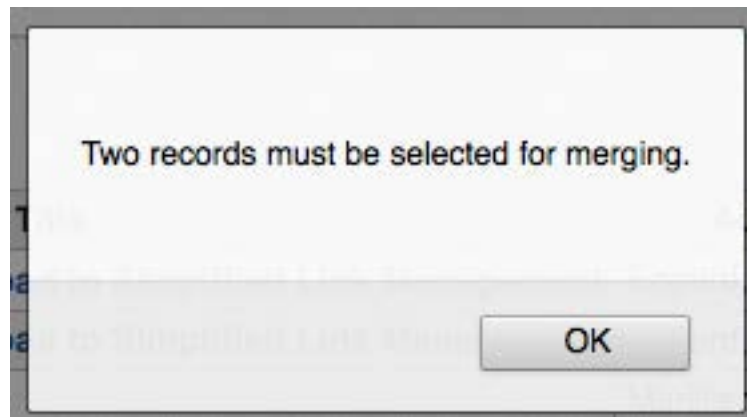

The easiest way to merge together duplicate bibliographic records is to add them to a list and use the Merge Tool from there.

Contents of to merge

Select all | Clear all

	Title	Author	Date added	
<input type="checkbox"/>	Following the Yellow Brick Road to Simplified Link Management	Engard, Nicole C.,	04/18/2012	Holds
<input type="checkbox"/>	Following the Yellow Brick Road to Simplified Link Management	Engard, Nicole C.,	04/18/2012	Holds
<input type="checkbox"/>	Seer of Sevenwaters /	Marillier, Juliet.	07/10/2012	Holds
<input type="checkbox"/>	Seer of Sevenwaters /	Marillier, Juliet.	07/10/2012	Holds
<input type="checkbox"/>	The reivers, a reminiscence.	Faulkner, William,	03/26/2012	Holds
<input type="checkbox"/>	The reivers.	Faulkner, William,	03/26/2012	Holds

From the list, check the two items you want to merge. If you choose more than or fewer than 2, you will be presented with an error:

Once you have selected the records you want to merge, click the 'Merge selected items' button. You will be asked which of the two records you would like to keep as your primary record and which will be deleted after the merge. If the records were created using different frameworks, Koha will also ask you what Framework you would like the newly merged record to use.

Merging records

Please choose which record will be the reference for the merge. The record chosen as reference will be kept, and the other will be deleted.

Merge reference

Seer of Sevenwaters / (5938)
 Seer of Sevenwaters / (6170)

Using framework:

You will be presented with the MARC for both of the records (each accessible by tabs labeled with the bib numbers for those records). By default the entire first record will be selected, uncheck the fields you don't want in the final (destination) record and then move on to the second tab to choose which fields should be in the final (destination) record.

Merging records

Source records

- 040
 - a / DLC
 - c / DLC
 - d / IG#
 - d / BTCTA

Should you try to add a field that is not repeatable two times (like choosing the 245 field from both record #1 and #2) you will be presented with an error

Once you have completed your selections click the 'merge' button. The primary record will now CONTAIN the data you chose for it as well as all of the items/holdings from both bib records, and the second record will be deleted.

IMPORTANT

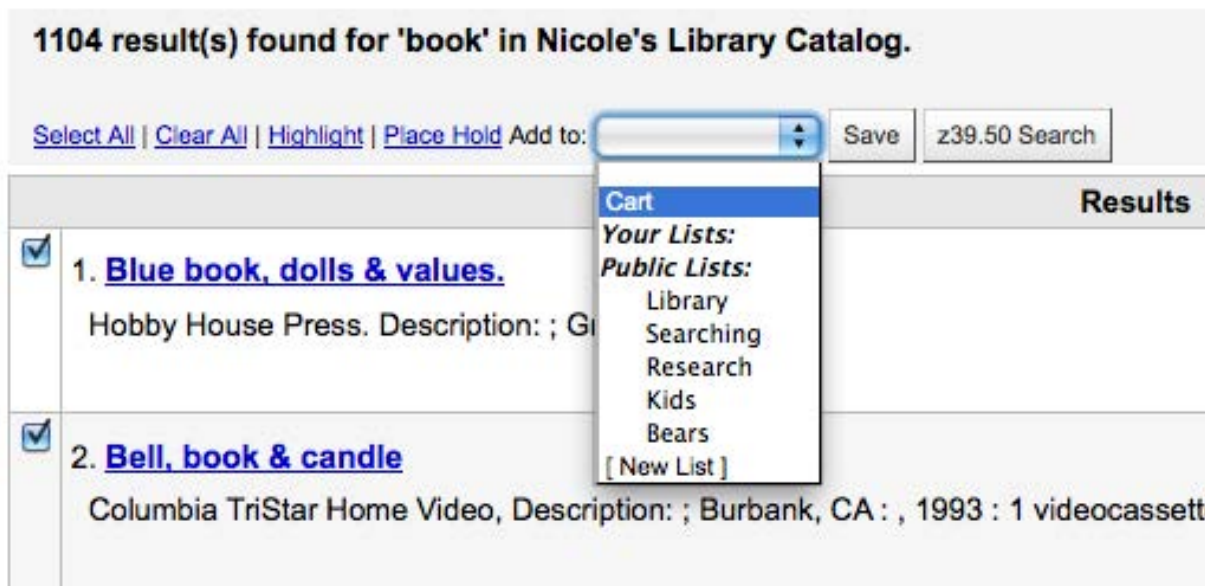

It is important to rebuild your zebra index immediately after merging records. If a search is performed for a record which has been deleted Koha will present the patrons with an error in the OPAC.

9.2 Cart

The cart is a temporary holding place for items in the OPAC and/or staff client. The cart will be emptied once the session is ended (by closing the browser or logging out). The cart is best used for performing batch operations (holds, printing, emailing) or for getting a list of items to be printed or emailed to yourself or a patron.

If you would like to enable the cart in the staff client, you need to set the **intranetbookbag** system preference to 'Show.' To add things to the cart, search the catalog and select the items you would like added to your cart and choose 'Cart' from the 'Add to' menu

A confirmation will appear below the cart button at the top of the staff client

Clicking on the Cart icon will provide you with the contents of the cart

Your Cart

- ‘Print’ will present you with a printable version of the cart
- ‘Empty and Close’ will empty the list and close the window
- ‘Hide Window’ will close the window

Chapter 10

Reports

Reports in Koha are a way to gather data. Reports are used to generate statistics, member lists, shelving lists, or any list of data in your database.

- *Get there:* More > Reports

10.1 Custom Reports

Koha's data is stored in a MySQL database which means that librarians can generate nearly any report they would like by either using the **Guided Reports Wizard** or writing their own **SQL query**.

10.1.1 Add Custom Report

10.1.1.1 Guided Report Wizard

The guided report wizard will walk you through a six step process to generate a report.

Step 1: Choose the module you want to report on. This will determine what tables and fields are available for you to query.

'Report is public' should be left to the default of 'No' in most cases. A report can be made public if you intend to allow access to it through the JSON webservice interface. This is a system that can be used by developers to make custom presentations of the data from the report, for example displaying it using a graphing API. To learn more speak to your local developer.

- A public report is accessible via a URL that looks like this: <http://MYOPAC/cgi-bin/koha/svc/report?id=REP>

+ New ▾

Build a report

Step 1 of 6: Choose a module to report on, and Choose report visibility

Choose:

Report is public:

Next >>

Step 2: Choose a report type. For now, Tabular is the only option available.

+ New ▾

Build A Report

Step 2 of 6: Pick a report type

Choose:

<< Back Next >>

Step 3: Choose the fields you want in your report. You can select multiple fields and add them all at once by using CTRL+Click on each item you want to add before clicking the Add button.

+ New ▾

Step 3 of 6: Select columns for display

Note: Be careful selecting when selecting columns. If your choice is too broad it could result in a very large report that will either not complete

borrowers Borrower number / borrowers.borrowernumber Card number / borrowers.cardnumber Surname / borrowers.surname First name / borrowers.firstname Salutation / borrowers.title Other name / borrowers.othernames Initials / borrowers.initials Street number / borrowers.streetnumber Street type / borrowers.streettype Address / borrowers.address Address 2 / borrowers.address2 City / borrowers.city State / borrowers.state Zip/postal code / borrowers.zipcode Country / borrowers.country Primary email / borrowers.email Primary phone / borrowers.phone Other phone / borrowers.mobile	<input type="button" value="Add"/> <input type="button" value="Delete"/>	Surname / borrowers.surname First name / borrowers.firstname
--	---	---

<< Back Next >>

Step 4: Choose any limits you might want to apply to your report (such as item types or branches). If you don't want to apply any limits, simply click Next instead of making an option.

+ New ▾

Step 4 of 6: Select criteria to limit on

<input type="checkbox"/> Home library	<<branchcode branches>>
<input type="checkbox"/> Category	<<categorycode categorycode>>

<< Back Next >>

Step 5: Perform math functions. If you don't want to do any calculations, simply click Next instead of making an option.

+ New ▾

Step 5 of 6: Pick which columns to total

<input type="checkbox"/> borrowers.surname	sum ▾
<input type="checkbox"/> borrowers.firstname	sum ▾

<< Back Next >>

Step 6: Choose data order. If you want the data to print out in the order it's found in the database, simply click Finish.

+ New ▾

Step 6 of 6: Choose how you want the report ordered

<input type="checkbox"/> borrowers.surname	asc ▾
<input type="checkbox"/> borrowers.firstname	asc ▾

Finish

When you are finished you will be presented with the SQL generated by the report wizard. From here you can choose to save the report by clicking 'Save' or copy the SQL and make edits to it by hand.

+ New ▾

Confirm custom report

Your report will be generated with the following SQL statement.

```
SELECT borrowers.surname,borrowers.firstname FROM borrowers
```

You will need to save the report before you can execute it

Save

If you choose to save the report you will be asked to name your report and enter any notes regarding it.

Save your custom report

Report name:

Notes:

Save Report

Once your report is saved it will appear on the 'Use Saved' page with all other saved reports.

Filter

Choose Group and Subgroup:

Useful resources

- Koha report library
- Koha database schema

+ New

Saved reports

Page(s): 1/1 Entries/page: 20

ID	Report name	Type	Area	Group	Subgroup	Notes	Author	Creation date	Public	Saved results	Saved SQL		
155	Items added by Cataloger	1		Catalog	Added	Will ask for borrowernumber	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
156	Lost Items	1		Catalog		Will show who lost the item	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
159	New Patrons	1		Patrons	Added	Will ask for month and year	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
157	Overdues w/ Holds Waiting	1		Circulation	Holds	Will ask for branch	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
158	Top 10 Titles Placed on Hold in the Last 6 Months	1		Circulation			Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete

From here you can make edits, run the report, or schedule a time to have the report run. To find the report you created you can sort by any of the columns by clicking the on the column header (creation date is the best bet for finding the report you just added). You can also filter your results using the filter menu on the left.

10.1.1.2 Report from SQL

In addition to the report wizard, you have the option to write your own queries using SQL. To find reports written by other Koha users, visit the Koha Wiki: http://wiki.koha-community.org/wiki/-SQL_Reports_Library. You can also find your database structure in /installer/data/mysql/kohastructure.sql or online at: <http://schema.koha-community.org>.

To add your query, click the link to 'Create from SQL' on the main reports module or the New button at the top of the Saved Reports page.

Fill in the form presented

Create report from SQL

Report name:

Report group: Catalog ▾

Report subgroup: (None) ▾

Report is public: No (default) ▾

Notes:

Type: Tabular ▾

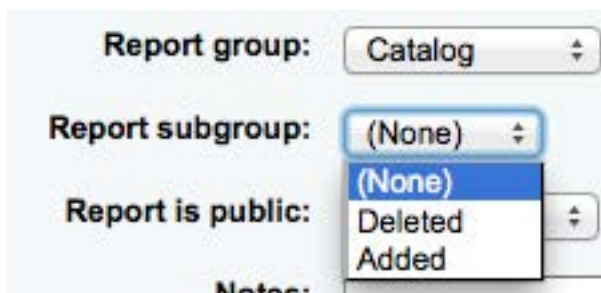

SQL:

Save Report
Cancel

- The 'Name' is what will appear on the Saved Reports page to help you identify the report later. It will also be searchable using the filters found the left of the Saved Reports page.
- You can use the 'Report group' to organize your reports so that you can easily filter reports by groups. Report groups are set in the **REPORT_GROUP** authorized value category.

- You can use 'Report subgroup' to further organize your reports so that you can easily filter reports by groups and subgroups. Report subgroups are set in the **REPORT_SUBGROUP** authorized value category.

- 'Report is public' should be left to the default of 'No' in most cases. A report can be made public if you intend to allow access to it through the JSON webservice interface. This is a system that can be used by developers to make custom presentations of the data from the report, for example displaying it using a graphing API. To learn more speak to your local developer.
 - A public report is accessible via a URL that looks like this: `http://MYOPAC/cgi-bin/koha/svc/report?id=REPO`
- 'Notes' will also appear on the Saved Reports page, this can be used to provide more details about the report or tips on how to enter values when it runs
- The type should always be 'Tabular' at this time since the other formats have not been implemented
- In the 'SQL' box you will type or paste the SQL for the report
- If you feel that your report might be too resource intensive you might want to consider using runtime parameters to your query. Runtime parameters basically make a filter appear before the report is run to save your system resources.

There is a specific syntax that Koha will understand as 'ask for values when running the report'. The syntax is `<<Question to ask | authorized_value>>`.

- The `<<` and `>>` are just delimiters. You must put `<<` at the beginning and `>>` at the end of your parameter
- The 'Question to ask' will be displayed on the left of the string to enter.
- The `authorized_value` can be omitted if not applicable. If it contains an authorized value category, or branches or itemtype or categorycode, a list with the Koha authorized values will be displayed instead of a free field Note that you can have more than one parameter in a given SQL Note that entering nothing at run time won't probably work as you expect. It will be considered as "value empty" not as "ignore this parameter". For example entering nothing for : `"title=<<Enter title>>"` will display results with `title=""` (no title). If you want to have to have something not mandatory, use `"title like <<Enter title>>"` and enter a % at run time instead of nothing

Examples:

- `SELECT surname,firstname FROM borrowers WHERE branchcode=<<Enter patrons library | branches>> AND surname like <<Enter filter for patron surname (% if none)>>`
- `SELECT * FROM items WHERE homebranch = <<Pick your branch | branches>> and barcode like <<Partial barcode value here>>`

TIP

To generate a date picker calendar to the right of the field when running a report you can use the 'date' keyword like this: `<<Enter Date|date>>`

Added: 

TIP

You have to put `"%"` in a text box to 'leave it blank'. Otherwise, it literally looks for `"` (empty string) as the value for the field.

IMPORTANT

In addition to using any authorized value code to generate a dropdown, you can use the following values as well: Branches (branches), Item Types (itemtypes) and Patron Categories (categorycode). For example a branch pull down would be generated like this <<Branch|branches>>

Owning branch:

NOTE

 There is a limit of 10,000 records put on SQL statements entered in Koha. To get around this you want to add 'LIMIT 100000' to the end of your SQL statement (or any other number above 10,000.

Once everything is entered click the 'Save Report' button and you'll be presented with options to run it. Once a report is saved you do not have to recreate it you can simply find it on the Saved Reports page and **run** or **edit** it.

10.1.2 Edit Custom Reports

Every report can be edited from the reports lists. To see the list of reports already stored in Koha, click 'Use Saved.'

Saved reports

Page(s): 1/1 Entries/page: 20

ID	Report name	Type	Area	Group	Subgroup	Notes	Author	Creation date	Public	Saved results	Saved SQL		
155	Items added by Cataloger	1		Catalog	Added	Will ask for borrowernumber	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
156	Lost Items	1		Catalog		Will show who lost the item	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
159	New Patrons	1		Patrons	Added	Will ask for month and year	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
157	Overdues w/ Holds Waiting	1		Circulation	Holds	Will ask for branch	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete
158	Top 10 Titles Placed on Hold in the Last 6 Months	1		Circulation			Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete

To find the report you'd like to edit you can sort by any of the columns by clicking the on the column header. You can also filter your results using the filter menu on the left.

From this list you can edit any custom report by clicking 'Edit SQL'

Edit SQL report

Report name:

Report group:

Report subgroup:

Report is public:

Notes:

```
SELECT branchcode,categorycode,COUNT(*)
FROM borrowers WHERE MONTH(dateenrolled) = <<Month enrolled (mm)>> AND
YEAR(dateenrolled)= <<Year enrolled (yyyy)>>
GROUP BY branchcode,categorycode
ORDER BY branchcode
```

10.1.3 Running Custom Reports

Once custom reports are saved to Koha, you can run them by going to the Saved Reports page and clicking the Run link to the right of the report.

ID	Report name	Type	Area	Group	Subgroup	Notes	Author	Creation date	Public	Saved results	Saved SQL		
159	New Patrons	1		Patrons	Added	Will ask for month and year	Engard, Nicole (51)	09/24/2012	No		Show Edit	Run Schedule	Delete

When you report runs you will either be asked for some values

Enter parameters for report New Patrons:

Month enrolled (mm):

Year enrolled (yyyy):

or you will see the results right away

New Patrons

Will ask for month and year

Total number of rows matching the (unlimited) query is 3.

```
SELECT branchcode,categorycode,COUNT(*)
FROM borrowers WHERE MONTH(dateenrolled) = '02' AND YEAR(dateenrolled)= '2011'
GROUP BY branchcode,categorycode
ORDER BY branchcode
```

branchcode	categorycode	COUNT(*)
FFL	J	2
NIC	PT	1
NIC	S	1

Download the report:

From the results you can choose to rerun the report by clicking 'Run report' at the top, edit the report by clicking the 'Edit' button or starting over and creating a new report by using the 'New' button. You can also download your results by choosing a file type at the bottom of the results next to the 'Download the report' label and clicking 'Download.'

TIP

A Comma Separated Text file is a CSV file and it can be opened by any spreadsheet application.

10.2 Statistics Reports

Statistic reports will show you counts and sums. These reports are all about numbers and statistics, for reports that return more detailed data, use the [Guided Report Wizard](#). These reports are limited in what data they can look at, so it's often recommended to use [custom reports](#) for official end of the year statistics.

10.2.1 Acquisitions Statistics

NOTE

These reports are limited in what data they can look at, so it's often recommended to use [custom reports](#) for official end of the year statistics.

Using the form provided, choose which value you would like to appear in the Column and which will appear in the Row.

Acquisitions statistics

Title	Row	Column	Filter
Placed On	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> <input type="calendar"/> To <input type="text"/> <input type="calendar"/>
	group by None <input type="button" value="v"/>		
Received On	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> <input type="calendar"/> To <input type="text"/> <input type="calendar"/>
	group by None <input type="button" value="v"/>		
Supplier	<input checked="" type="radio"/>	<input type="radio"/>	All Suppliers <input type="button" value="v"/>

Holding branch	<input type="radio"/>	<input type="radio"/>	<input type="text" value="Fairview"/>

Cell value

Count total items

Count unique items

Output

To screen into the browser:

To a file: Named: Into an application CSV

If you choose to output to the browser your results will print to the screen.

Circulation statistics

Filtered on

- Event return
- Display by 2

datetime / branch	FPL	MPL	SPL	TOTAL
August	1	0	0	1
October	1	0	0	1
November	1	0	0	1
December	10	4	1	15
TOTAL	13	4	1	18

You can also choose to export to a file that you can manipulate to your needs.

TIP

To get a complete picture of your monthly or daily circulation, you can run the report twice, once for 'Type' of 'Checkout' and again for 'Renewal.'

This report uses 'Period,' or date, filtering that allows you to limit to a month by simply selecting the first day of the first month through the first day of the next month. For example, 10/1 to 11/1 to find statistics for the month of October.

- To find daily statistics, set your date range.
 Example: "I want circulation data starting with date XXX up to, but not including, date XXX."
- For a whole month, an example range would be: 11/01/2009 to 12/01/2009
- For a whole year, an example range would be: 01/01/2009 to 01/01/2010
- For a single day, an example would be: 11/15/2009 to 11/16/2009 to find what circulated on the 15th

10.2.4.1 Tracking in house use

Using the Circulation statistics reporting wizard you can run reports on in house usage of items simply by choosing 'Local Use' from the 'Type' pull down:

Circulation statistics

Title	Row	Column	Filter
Period	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> To <input type="text"/> (MM/DD/YYYY)
Type:	<input type="radio"/>	group by <input type="radio"/>	Select Day: <input type="text"/> Select Month: <input type="text"/>
Patron	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Item Ty	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Library	<input type="radio"/>	<input type="radio"/>	Fairview <input type="text"/>
Collection	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Shelving Location	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Item Call Number	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> (inclusive) to <input type="text"/> (exclusive)
Patron sort1	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Patron sort2	<input type="radio"/>	<input type="radio"/>	<input type="text"/>

10.2.5 Serials Statistics

NOTE

These reports are limited in what data they can look at, so it's often recommended to use **custom reports** for official end of the year statistics.

Using the form provided, choose how you would like to list the serials in your system.

Serials subscriptions

Vendor:

Branch:

Include expired subscriptions:

Output

To screen into the browser:

To a file: Named: Into an application: ;

If you choose to output to the browser your results will print to the screen.

Serials subscriptions

10.2.13 Average Loan Time

This report will list the average time items are out on loan based on the criteria you enter:

Average checkout period statistics

Title	Row	Column	Filter
Issue date	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> To <input type="text"/>
	by <input type="text"/>		
Returns	<input type="radio"/>	<input type="radio"/>	From <input type="text"/> To <input type="text"/>
	by <input type="text"/>		
Patron category	<input checked="" type="radio"/>	<input type="radio"/>	<input type="text"/>
Item type	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Library	<input type="radio"/>	<input checked="" type="radio"/>	<input type="text"/>
Sort1	<input type="radio"/>	<input type="radio"/>	<input type="text"/>
Sort2	<input type="radio"/>	<input type="radio"/>	<input type="text"/>

Output

To screen into the browser:

To a file: Named: Into an application: EXCEL

If you choose to output to the browser your results will print to the screen.

Average Checkout Period

borrowers.categorycode / old_issues.branchcode	FPL	TOTAL
		0
IL		0
PT	34.25	34.25
S	19.38	19.38
TOTAL	17.88	0

You can also choose to export to a file that you can manipulate to your needs.

10.3 Report Dictionary

The report dictionary is a way to pre-define common filters you'd like to apply to your reports. This is a good way to add in filters that the report wizard doesn't include by default. To add a new definition, or filter, click 'New Definition' on the Reports Dictionary page and follow the 4 step process.

Step 1: Name the definition and provide a description if necessary

Add New Definition

Step 1 of 5: Name the new definition

Definition Name:

Definition Description:

Step 2: Choose the module that the will be queried.

Add New Definition

Step 2 of 5: Choose the area

Select table Circulation
 Catalog
 Patrons
 Acquisitions
 Accounts

Step 3: Choose columns to query from the tables presented.

Add New Definition

Step 3 of 5: Choose columns

items.stocknumber biblioitems Biblioitem Number Biblio Number Volume Number Number Biblio-level Item Type ISBN ISSN Publication Date Publisher Volume Date biblioitems.volumedesc biblioitems.collectiontitle biblioitems.collectionissn biblioitems.collectionvolume biblioitems.editionstatement biblioitems.editionresponsibility Timestamp Illustrator	Add << Delete	Publisher
---	------------------	-----------

Next

Step 4: Choose the value(s) from the field(s). These will be automatically populated with options available in your database.

Add New Definition

Step 4 of 5: Specify a value

Column: biblioitems.publishercode

Choose:

- Human Sciences Press
- Human Service Press
- Humanities Press,
- Hyperion,
- i Press; distributed by G. Braziller, New York,
- Image Books
- Indian Historian Press
- Indiana University Press
- Indiana University Press,
- Industrial Research Unit, Wharton School, University of Pennsylvania; distributed by University of Pennsylvania Press, Philadelphia
- Information Today,**
- Information Today, Inc.,
- Insurors Press,
- Integrated Education Associates,
- Interlink Books,
- International Arts and Sciences Press
- International Publishers
- International Textbook Co.
- International Universities Press
- Interscience Publishers

Next

Confirm your selections to save the definition.

Add New Definition

Step 5 of 5: Confirm details

Name: Info Today Publications

Description:

Area: Catalog

Data:

Columns	Values
biblioitems.publishercode	Information Today,

Your definitions will all appear on the Reports Dictionary page

Dictionary
Use the dictionary to define custom criteria for reporting.

Current Terms

Filter by area

Name	Description	Area	Definition	
zip		Patrons	AND borrowers.zipcode='44236'	<input type="button" value="Delete Definition"/>
last name		Patrons	AND borrowers.surname='en%'	<input type="button" value="Delete Definition"/>
testing2		Circulation	AND borrowers.dateofbirth >= '2011-07-17' AND borrowers.dateofbirth <= '2011-07-27'	<input type="button" value="Delete Definition"/>
Call Number	my call number rule	Catalog	AND items.itemcallnumber='PS3566.I372 N56 2007'	<input type="button" value="Delete Definition"/>
Info Today Publications		Catalog	AND biblioitems.publishercode='Information Today,'	<input type="button" value="Delete Definition"/>

Then when generating reports on the module you created the value for you will see an option to limit by the definition at the bottom of the usual filters.

Step 4 of 6: Select Criteria to Limit on

<input type="checkbox"/> Item-level Item Type	BK
<input type="checkbox"/> Item Number (koha internal)	from <input type="text"/> to <input type="text"/>
<input type="checkbox"/> Biblio Number (koha internal)	from <input type="text"/> to <input type="text"/>
<input type="checkbox"/> Barcode	from <input type="text"/> to <input type="text"/>
<input type="checkbox"/> Framework Code	Default

Chapter 11

OPAC

This chapter assumes that you have the following preferences set as follows:

- `opathemes` = prog
- `OPACXSLTResultsDisplay` = default
- `OPACXSLTDetailsDisplay` = default
- `DisplayOPACiconsXSLT` = show
- `TagsEnabled` = Allow
- `TagsInputOnDetail` = Allow
- `TagsInputOnList` = Allow
- `reviewson` = Allow
- `ShowReviewer` = Allow
- `ShowReviewerPhoto` = Allow
- `OPACFRBRizeEditions` = Show
- `OPACAmazonCoverImages` = Show
- `XISBN` = Use
- `OPACSearchForTitleIn` = Default set of links
- `OPACShowCheckoutName` = Don't show
- `RequestOnOpac` = Allow
- `AutoResumeSuspendedHolds` = Allow
- `OpacBrowseResults` = Enable
- `SuspendHoldsOpac` = Allow
- `OPACShowBarcode` = Don't show

If your system preferences are set differently your displays may differ.

11.1 Search Results

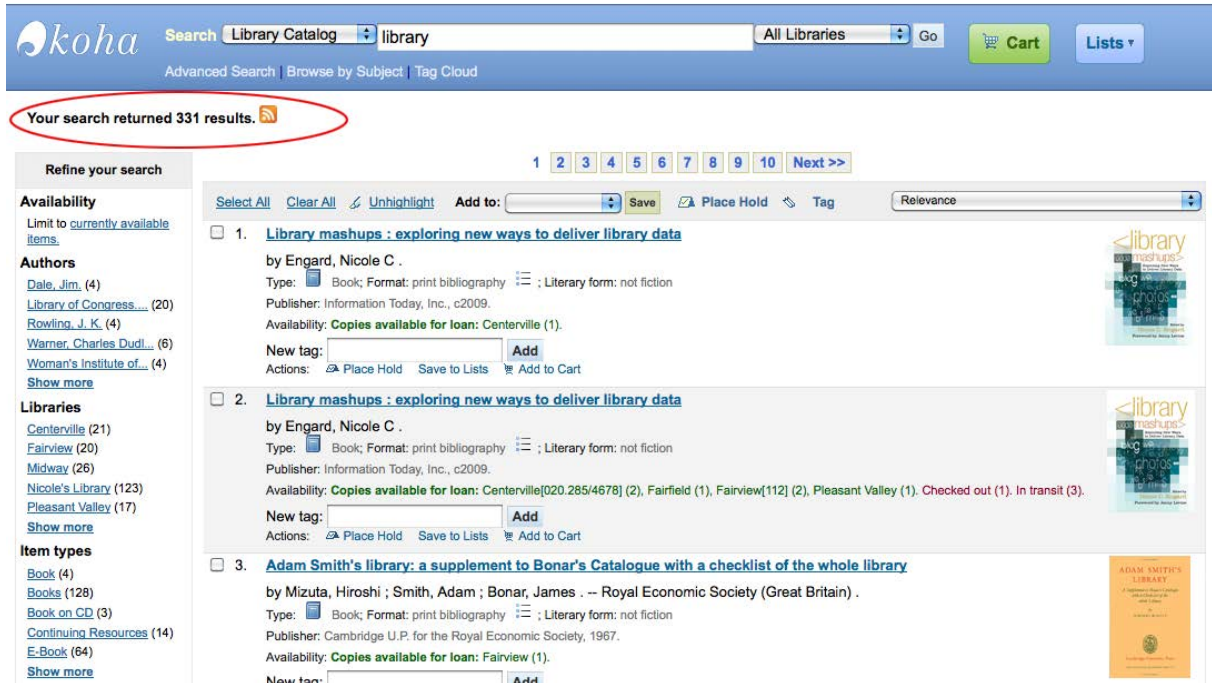

To search the OPAC you can either choose to enter your search words in the box at the top of the OPAC or click on the 'Advanced Search' link to perform a more detailed search.

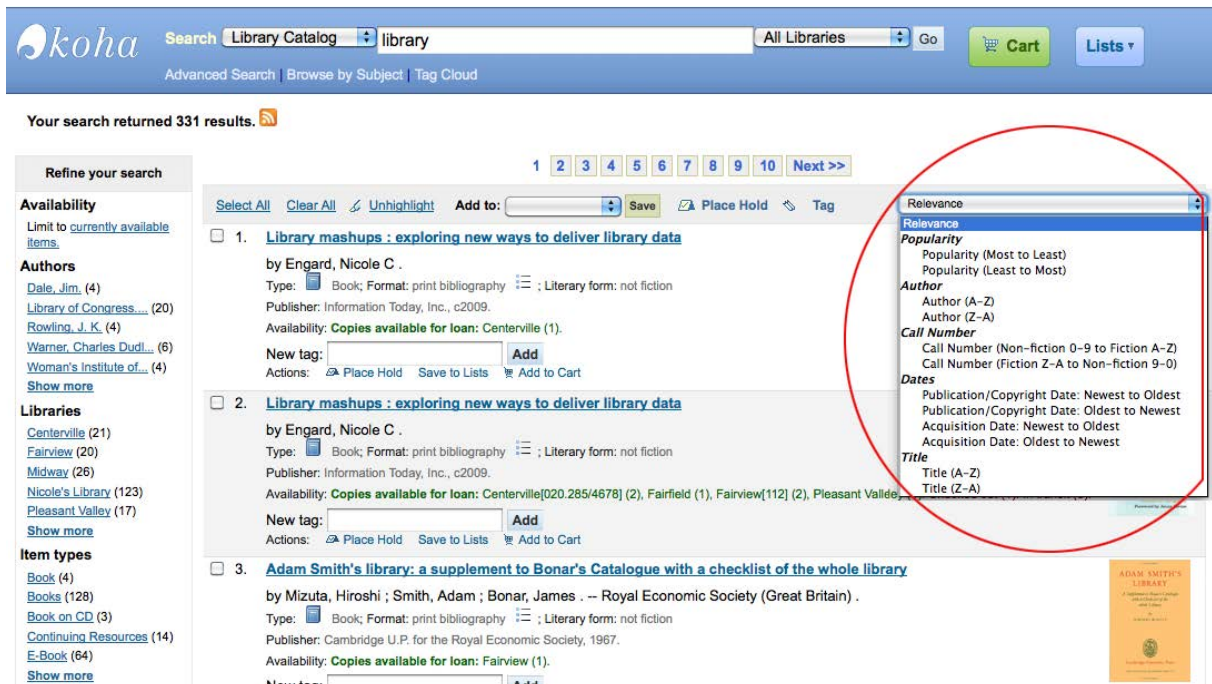

For more on searching check the '[Searching](#)' chapter in this manual.

11.1.1 Results Overview

After performing a search the number of results found for your search will appear above the results

By default your search results will be sorted based on your `OPACdefaultSortField` and `OPACdefaultSortOrder` system preference values. To change this you can choose another sorting method from the pull down on the right.

Under each title on your results list a series of values from your leader will appear. It is important to note that this has nothing to do with the item types or collection codes you have applied to your records, this data is all pulled from your leader.

Your search returned 331 results.

If the title you're viewing is in a public list then you'll see a list of those to the right of the 'List(s) this item appears in' label and if it has tags they will appear below the 'Tags from this library' label

The screenshot shows a Koha library catalog interface. At the top, there's a search bar with 'Library Catalog' selected. The page title is 'Harry Potter and the goblet of fire [sound recording]' by Rowling, J. K.; Dale, Jim. The item is a sound recording consisting of 17 discs. The page includes a 'Holdings (2)' table with two entries: one available at Fairview and one checked out at Nicole's Library Family Room. A 'List(s) this item appears in' section is circled in red, showing 'Harry Potter'. Below it, 'Tags from this library' includes 'magic (11)' and 'wizards (11)', also circled in red. The right sidebar contains options like 'Place Hold', 'Print', 'Save to Your Lists', and 'Add to Your Cart'.

11.3 Lists & Cart

A cart is a temporary holding place for records you’re interested in finding during this session. That means that once you log out of the OPAC or close the browser you lose the items in your cart. A list is a more permanent location for saving items. To learn more about lists, check the [Lists in the Staff Client](#) chapter of this manual.

11.3.1 Lists

Patrons can manage their own private lists by visiting the ‘my lists’ section of their account.

Lists

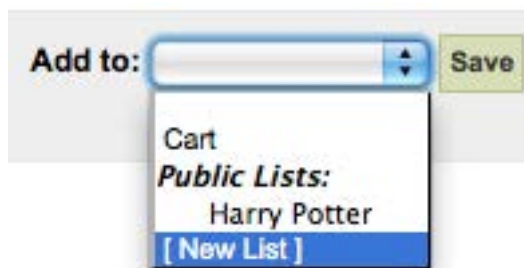

Your private lists | **Public lists**

[New List](#)

No private lists.

11.3.1.1 Creating Lists

Lists can also be created by choosing the ‘New List’ option in the ‘Add to’ menu on the search results

To create a list the patron simply needs to click the 'New List' link and populate the form that appears

Create a new list

List name:

Sort this list by:

Category:

Permissions: anyone else to add entries. (The owner of a list is always allowed to add entries, but needs permission to remove.)

anyone to remove his own contributed entries.

anyone to remove other contributed entries.

The only field required is the 'List Name,' but the patron can also choose how they want the list sorted and if the list is public or private.

- A Private List is managed by you and can be seen only by you (depending on your permissions settings below)
- A Public List can be seen by everybody, but managed only by you (depending on your permissions settings below)

IMPORTANT

If you aren't allowing patrons to create public lists with the [OpacAllowPublicListCreation](#) preference then patrons will only be able to create private lists.

- Finally decide what your permissions will be on the list. You can all or disallow:
 - anyone else to add entries
 - anyone to remove his own contributed entries

*

TIP

The owner of a list is always allowed to add entries, but needs permission to remove.

- anyone to remove other contributed entries

11.3.1.2 Adding titles to Lists

Titles can be added to lists from the search results and/or from the bibliographic record. On the search results options to add items to the list appear below each result and across the top of the results page

The screenshot shows the Koha library catalog interface. At the top, there is a search bar with the text "Library Catalog" and "library". Below the search bar, there are buttons for "Cart" and "Lists". The search results are displayed in a list format. The first result is "Library mashups : exploring new w..." by Engard, Nicole C. The second result is "Library mashups : exploring new w..." by Engard, Nicole C. The third result is "Adam Smith's library: a supplement to Bonar's Catalogue with a checklist of the whole library" by Mizuta, Hiroshi ; Smith, Adam ; Bonar, James . -- Royal Economic Society (Great Britain) .

A red circle highlights the "Add to:" dropdown menu at the top of the results list, which is open and shows options like "Your Lists: mashups", "New list", "Kids1", "Test", and "Public Lists: Family Drama", "Library", "Searching", "Research", "(New List)". Another red circle highlights the "Add" button in the "Actions" section of the first search result.

To add a single title to a list, click the 'Save to Lists' option and then choose the list you'd like to add the title to. To add multiple titles to a list check the boxes on the left of the titles you want to add and then choose the list you want to add the titles to from the 'Add too' pull down at the top of the screen.

11.3.1.3 Viewing Lists Contents

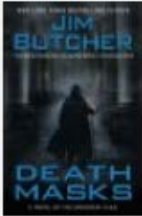

To view the contents of a list, click on the list name under the Lists button.

The contents of the list will look similar to your search results pages except that there will be different menu options across the top of the list.

Lists → Dresden

<input type="checkbox"/> Blood Rites (The Dresden Files, Book 6) by Butcher, Jim . Publisher: Roc, 2004. Availability: Copies available for loan: Nicole's Library (1). Tags: wizard (6) Log in to add tags. Actions:  Place Hold  Add to Cart	
<input type="checkbox"/> Death Masks: A Novel of the Dresden Files (The Dresden Files, Book 5) by Butcher, Jim . Publisher: Roc Hardcover, 2009. Availability: Copies available for loan: Nicole's Library (1). Tags: wizard (6) Actions:  Place Hold  Add to Cart	
<input type="checkbox"/> Fool Moon (The Dresden Files, Book 2) by Butcher, Jim . Publisher: Roc, 2001. Availability: No copies available Checked out (1). Tags: wizard (6) Actions:  Place Hold  Add to Cart	

Using the menu options above the list you can place multiple items on hold, download the list contents, email the list or print the list out.

- To place a hold on one or more list items check the box to the left of the item and click the 'Place Hold' link at the top
- To download the list contents click the 'Download List' link and choose the format you'd like to download the list in

-

TIP

iso2079 is MARC format

- To email the list contents to someone, click the 'Send List' link and enter in your email details in the form that pops up

Sending your list

- To print the contents of your list out click the 'Print List' link

11.3.1.4 Managing Lists

Once the list is saved patrons can begin adding items to it. From the 'my lists' tab on the patron record the patron can edit and delete the lists they have created by clicking the appropriate link to the right of the list name.

Jodi Picoult	15 items	Private	 Edit <input type="button" value="Confirm"/>

The list will not be deleted until the 'Confirm' button is clicked to the right of the list you'd like to delete.

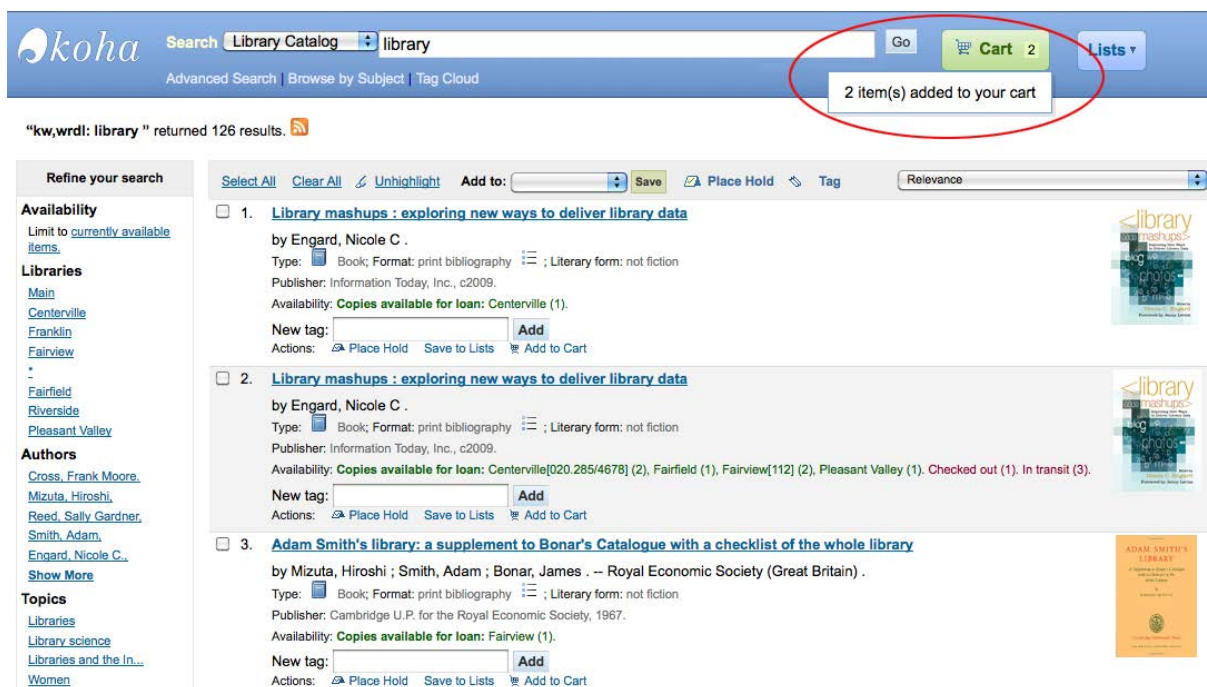

11.3.2 Cart

11.3.2.1 Adding titles to the Cart

Titles can be added to the cart from the search results and/or from the bibliographic record. On the search results options to add items to the cart appear below each result and across the top of the results page

Clicking the 'Add to Cart' button will add the one title to your cart. To add multiple titles at once, check the box to the left of each result and then choose 'Cart' from the 'Add to' pull down at the top of the screen. Once titles are added to the cart you will be presented with a confirmation

11.3.2.2 Managing the Cart

Once you have titles in your cart you can manage the contents by clicking on the 'Cart' button usually found at the top of the screen to the right of the search box. Your cart will open in a new window.

From this window you are presented with several options. Across the top of the cart are several buttons.

First is the 'More details' button. Clicking this will show you additional information about the titles in your cart (ISBNs, Subjects, Publisher Info, Notes and more).

Next is the option to send the contents of your cart to an email address. This is handy if you want to send the resources you found at the library to your home email account to refer to later or to send to a patron researching a specific topic. Clicking this link will open up a new window that asks for the email address and message to send.

Sending your cart

Email Address:

Comment:

[Cancel](#)

In addition to sending your cart you can download the contents of your cart in several pre-defined formats or using a [CSV Profile](#) that you defined in the Tools module.

Download cart:

[Close this window](#)

iso2709
RIS
BibTex
CSV - My Titles

Finally you can print out the contents of your cart by choosing the 'Print' link.

In addition to the various different ways to save the contents of your cart, there are ways to add value to the data in your cart. By selecting one or more titles from the cart you can add them to a list (click 'Add to a List'), place hold(s) (click 'Place hold'), or tag them (click 'Tag'). All of these operations follow the same procedure as they do when performing them in the OPAC.

11.4 Placing Holds

Patrons can place holds on items via the OPAC if they're logged in and you have the [RequestOnOpac](#) preference set to 'Allow'. If the item can be placed on hold the option to place it on hold will appear in several different places.

- When viewing a list or search results page you'll see the option to place hold on multiple items by checking the boxes to the left of the results and clicking 'Place Hold' at the top

No matter which of the above links you click to place your hold you'll be brought to the same hold screen.

Confirm holds for: Nicole Engard (9876543457)

Hold	Title	Priority	Hold Starts on Date	Hold Not Needed After	Place On	Pickup Location
<input checked="" type="checkbox"/>	Blood Rites (The Dresden Files, Book 6) , by Butcher, Jim.	1 out of 0	<input type="text"/> Clear Date	<input type="text"/> Clear Date	<input checked="" type="radio"/> Next available copy <input type="radio"/> A specific copy	Nicole's Library

Place Hold

- Check the box to the left of the items you'd like to place on hold
- The title includes a link back to the detail page for the record
- The priority shows where in the holds queue this hold will fall
- If allowed by your **OPACAllowHoldDateInFuture** preference, the 'Hold Starts on Date' column will show. This field allows the patron to have their hold start on a future date.
- By default holds placed in the system remain until canceled, but if the patron fills in a 'Hold Not Needed After' date then the hold has an expiration date.

IMPORTANT

Expired holds are removed by the **Expired Holds Cron Job**, this is not an automatic process and must be set up by your system administrator

- If allowed by your **OPACItemHolds** preference the patron will be allowed to choose whether to place the hold on the next available copy or a specific copy

Confirm holds for: Nicole Engard (9876543457)

Place Hold

- If allowed by your **OPACAllowUserToChooseBranch** preference the patron can choose where they'd like to pick up their hold

After clicking the Place Hold button the patron will be brought to their account page where they'll see all of the items they have on hold.

11.5 Enhanced Content

11.5.1 Tagging

Depending on your settings for the `TagsEnabled`, `TagsInputOnList` and `TagsInputOnDetail` preferences you may be able to add tags to bibliographic records from the search results and/or bibliographic records. If you are allowing patrons to add tags from the search results screen you will see an input box below each result and a 'Tag' option at the top of the screen.

The screenshot shows the Koha OPAC search results page. At the top, the search bar contains 'library' and the results are sorted by 'Relevance'. A 'Tag' button is circled in red. Below the first result, the 'New tag' input box is also circled in red.

To add a tag to one item, type the tags (separated by commas) in the 'New tag' box and click 'Add'. You will be presented with a confirmation of your tags being added.

The screenshot shows the Koha OPAC search results page. At the top, the search bar contains 'library' and the results are sorted by 'Relevance'. A 'Tag' button is circled in red. Below the first result, the 'New tag' input box contains the text 'library' and is circled in red.

From the results you can also tag items in bulk by clicking the checkboxes on the left and then clicking the 'Tag' button at the top. After clicking the button it will change into an input box for you to add tags to all of the items you have selected.

The screenshot shows the Koha OPAC search results for the query "kw,wrld: library". The search bar at the top contains "Library Catalog" and "library". The results page shows three items:

- Library mashups : exploring new ways to deliver library data** by Engard, Nicole C. Type: Book; Format: print bibliography; Literary form: not fiction. Availability: Copies available for loan: Centerville (1). New tag: Add
- Library mashups : exploring new ways to deliver library data** by Engard, Nicole C. Type: Book; Format: print bibliography; Literary form: not fiction. Availability: Copies available for loan: Centerville[020.285/4678] (2), Fairfield (1), Fairview[112] (2), Pleasant Valley (1). Checked out (1). In transit (3). New tag: Add
- Adam Smith's library: a supplement to Bonar's Catalogue with a checklist of the whole library** by Mizuta, Hiroshi ; Smith, Adam ; Bonar, James . -- Royal Economic Society (Great Britain) . Type: Book; Format: print bibliography; Literary form: not fiction. Availability: Copies available for loan: Fairview (1). New tag: Add

The "New Tag:" input field in the first two results is circled in red.

11.5.2 Comments

Patrons can leave comments in the OPAC if you have the **reviewson** preference set to allow this. Each bibliographic record has a comments tab below the bibliographic information.

The screenshot shows the Koha OPAC record page for the book "Learning Perl". The search bar at the top contains "Library Catalog". The record details are as follows:

- Learning Perl /** by [Schwartz, Randal L](#) ; [Phoenix, Tom](#) ; [Foy, Brian D](#) .
- Type: Book
- Publisher: Beijing ; Sebastopol : [O'Reilly](#), c2008 .
- Edition: 5th ed .
- Description: xviii, 328 p. : ill. ; 24 cm .
- ISBN: 9780596520106 .
- Subject(s): [Perl \(Computer program language\)](#)
- Online Resources: [Table of contents only](#)
- Contents: Introduction -- Scalar Data -- Lists and Arrays -- Subroutines -- Input and Output -- Hashes -- In the World of Regular Expressions -- Matching with Regular Expressions -- Processing Text with Regular Expressions -- More Control Structures -- Perl Modules -- File Tests -- Directory Operations -- Strings and Sorting -- Smart Matching and given-when -- Process Management
- List(s) this item appears in: [Web Development](#)
- Tags from this library: [perl](#) (1), [programming](#) (2), [web development](#) (8)

At the bottom of the record, there are three tabs: **Holdings (2)**, **Title Notes**, and **Comments (0)**. The "Comments (0)" tab is selected, showing the message: "There are no comments for this item." Below this message is a link: [Post or edit your comments on this item.](#)

If the patron is logged in they will see a link to add a comment to the item. Clicking this link will open a pop up window with a box for their comments.

Comments on Learning Perl /

Note: Your comment must be approved by a librarian.

Once the comment has been typed and the 'Submit' button clicked, the patron will see their comment as pending and other patrons will simply see that there are no comments on the item.

 Date:2000

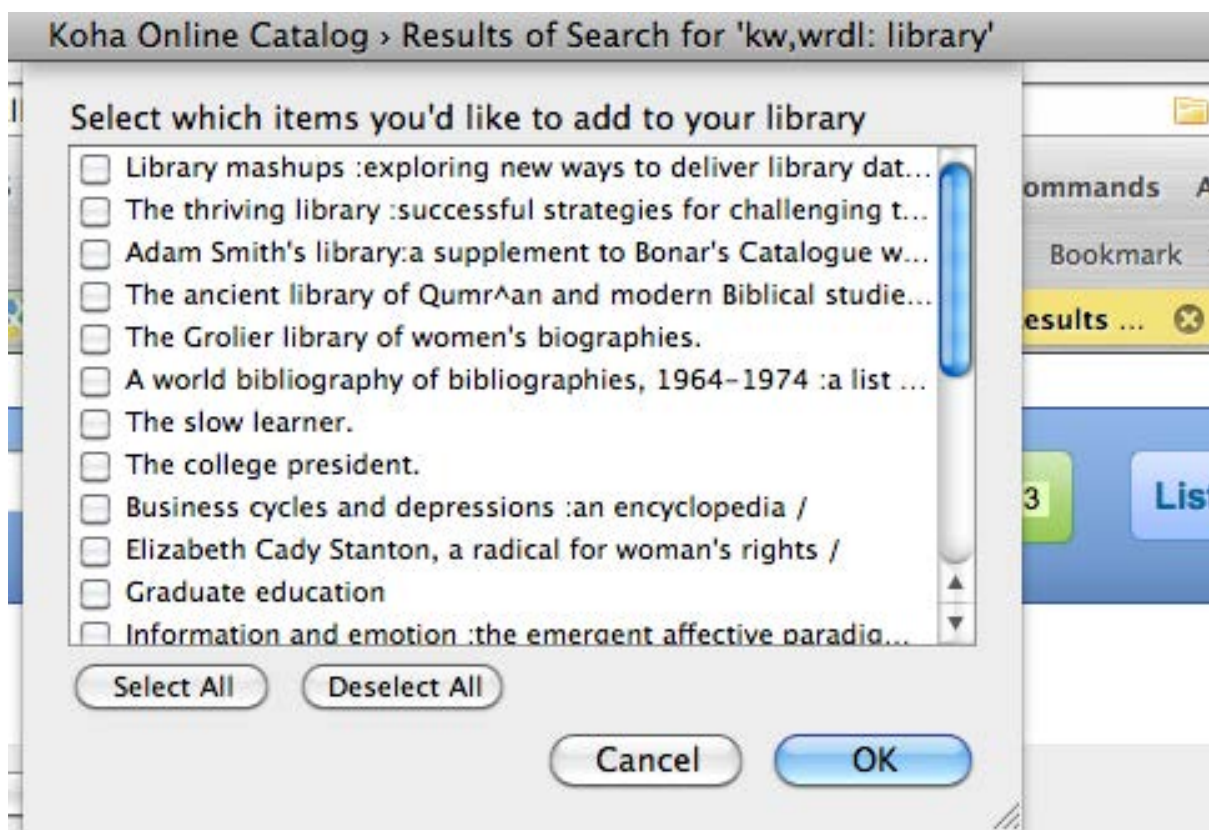

I love listening to the narrator reading me Harry Potter. Added 03/26/2011 by Nicole Engard

11.5.3 Zotero

Zotero is a Firefox add on that allows for the saving and generating of a bibliography. Learn more about and download Zotero at <http://zotero.org>.

When on the search results in the Koha OPAC, if you have Zotero installed, you will see a folder icon in the address bar to the right of the URL. Clicking that folder will open up a list of titles on the page for you to pick from to add to Zotero.

Select the titles you want to add to Zotero and then click the 'OK' button. This will add the title to Zotero. You can see the title by opening your Zotero library.

11.5.4 Custom RSS Feeds

Using `misc/cronjobs/rss/rss.pl` you can generate an RSS feed for any SQL query (for example a new acquisitions RSS feed). `rss.pl` is run on the command line to produce an RSS XML document.

The output should be placed in a directory accessible to the OPAC (or staff) web interface so that users can download the RSS feed.

An example of usage can be found at: `misc/cronjobs/rss.pl lastAcquired.conf`

Normally `rss.pl` should be run periodically (e.g., daily) to keep the feed up-to-date.

The configuration file (e.g., `lastAcquired.conf`) lists

- name of the template file to use
- path of output file
- SQL query

`rss.pl` runs the SQL query, then feeds the output of the query through the template to produce the output file.

IMPORTANT

To use custom RSS feeds you need to turn on the cron job.

11.6 My Account

From the OPAC patrons can log in and access their account if you have set the `opacuserlogin` preference to 'Allow'. Once logged in patrons are brought to their account summary. If you would like to get to your account in the OPAC, you can click on your name in the top right of any page in the OPAC.

[Renew All](#)

If your patrons would like to see the items barcodes on their list of checked out items you can set up a **patron attribute** with the value of SHOW_BCODE and **authorized value** of YES_NO.

Add patron attribute type

Patron attribute type code: SHOW_BCOI

Description: Show barcode on patron's check outs in OPAC

Repeatable: Check to let a patron record have multiple values of t

Unique identifier: If checked, attribute will be a unique identifier — if a v

Allow password: Check to make it possible to associate a password w

Display in OPAC: Check to display this attribute on a patron's details pa

Searchable: Check to make this attribute staff_searchable in the s

Authorized value category: Authorized value category; if one i

Authorized value categories:

- BOR_NOTES
- CCODE
- DAMAGED
- HINGS_AS
- HINGS_C
- HINGS_PF
- HINGS_RD
- HINGS_UT
- LOC
- LOST
- MANUAL_INV
- NOT_LOAN
- OPAC_SUG
- RESTRICTED
- SUGGEST
- WITHDRAWN
- YES_NO**

[Cancel](#)

Then on the **patron's record** set the **value** for SHOW_BCODE to yes.

Modify Staff patron Nicole Engard

Additional attributes and identifiers

Type	Value	
DL (Driver's License)	<input type="text" value="PA1234567890"/>	Clear
HBR (Home Branch)	<input type="text"/>	Clear
SHOW_BCODE (Show Barcode in OPAC)	<input type="button" value="Yes"/>	Clear

This will add a column to the check out summary in the OPAC that shows the patrons the barcodes of the items they have checked out.

Suspend all holds until [Clear Date](#)
[Resume all suspended holds](#)

Patrons can cancel their own holds if they are not in transit or already waiting for them. They can also suspend all of their holds (depending on the value of your **SuspendHoldsOpac** system preference) indefinitely or until a specific date if they choose by filling in the suspend options at the bottom of the

page.

NOTE

If you have your **AutoResumeSuspendedHolds** preference set to "Don't allow" then you will not have the option to put an end date on the hold suspension

11.6.2 Patron Flags

If you have **flagged your patron's account** they may see one of the following error messages at the top of their account.

- Card marked as lost

• **Please note:** Your library card has been marked as lost or stolen. If this is an error, please take your card to the circulation desk at your local library and the error will be corrected.

- Patron address in question

• **Please note:** According to our records, we don't have up-to-date **contact information** on file. Please contact your librarian, or use the **online update form** to submit current information (*Please note: there may be a delay in restoring your account if you submit online*)

–

NOTE

this error message will not include a link to the update form if you have **OPAC-PatronDetails** set to 'Don't allow'

- Patron marked restricted

• **Please note:** Your account has been frozen. Usually the reason for freezing an account is old overdues or damage fees. If **your account page** shows your account to be clear, please consult a librarian.

11.6.3 My Fines

If your library charges fines the next tab on the left is 'my fines.' Opening this tab will show the patron an entire history of their accounting at the library.

11.6.4 My Details

If you have your **OPACPatronDetails** preference set to 'Allow', your patrons will see a form filled in with their contacting information by clicking on the 'my personal details' tab.

[Nicole Engard's account](#) → Your Personal Details

<p>Name</p> <p>First Name: <input type="text" value="Nicole"/></p> <p>Other Name: <input type="text"/></p> <p>Last Name: <input type="text" value="Engard"/></p> <p>Contact Information</p> <p>Address: <input type="text"/> 123 My Street <input type="text"/></p> <p>City: <input type="text" value="Philadelphia, PA"/></p> <p>State: <input type="text"/></p> <p>Zip Code: <input type="text" value="19101"/></p> <p>Country: <input type="text"/></p> <p>Home Phone: <input type="text" value="555.111.2345"/></p> <p>Mobile Phone: <input type="text"/></p> <p>Work phone: <input type="text"/></p> <p>Fax: <input type="text"/></p> <p>Primary Email: <input type="text" value="magnus@enger.priv.no"/></p> <p>Secondary Email: <input type="text" value="nengard@bywatersoluti"/></p>	<p>Alternate Contact Information</p> <p>Alternate Address: <input type="text"/> <input type="text"/> <input type="text"/></p> <p>City: <input type="text"/></p> <p>State: <input type="text"/></p> <p>Zip Code: <input type="text"/></p> <p>Country: <input type="text"/></p> <p>Phone: <input type="text"/></p> <p>Email: <input type="text"/></p> <p>Date of Birth: <input type="text" value="06/27/1979"/></p> <p>Gender: <input type="text" value="Female"/></p> <p>Library Use:</p> <p>Card number: <input type="text" value="23529001223637"/></p> <p>Home library: <input type="text" value="Nicole's Library"/></p> <p>Patron Number: <input type="text" value="51"/></p> <p>Patron Category: <input type="text" value="Staff (S)"/></p> <p>Joined: <input type="text" value="02/18/2011"/></p> <p>Expires: <input type="text" value="05/18/2019"/></p> <p>Driver's License <input type="text" value="PA1234567890"/></p>
---	---

Please make any necessary changes to your record. Submitting the form will notify a library staff member, who will make the changes permanent.

[Submit Changes](#) [Cancel](#)

Patrons can edit their details in this form and click 'Submit Changes' to have their edits sent to the library for review before their record is updated. The email with the changes is sent to the library administration email address and lines that the patron changed will start with the field name in all caps.

If the **OPACPatronDetails** preference is set to 'Don't allow' then patrons will simply see their details in plain text.

Nicole Engard's account → **Your Personal Details**

To make changes to your record please contact the library.

The search history is a record of all searches run by the patron. Clicking on any of the search phrases will re-run the search for the patron. The search history can be deleted by the patron at any time by clicking the 'Delete your search history' link found at the top of this tab or by clicking the little red 'x' next to the 'Search history' link at the top right of the OPAC.

Welcome, Nicole Engard | Search history [x] | Log Out

11.6.8 My Reading History

Depending on your library’s setting for **opacreadinghistory** your patrons may see the ‘my reading history’ tab next. This will show the patron their entire reading history unless they have asked the library to not keep that information via the ‘my privacy’ tab which will appear if you have the **OPACPrivacy** preference set to ‘Allow.’

Nicole Engard's account → Checkout History

Show All Items | Showing Last 50 Items | Order by date

11.6.9 My Privacy

The ‘my privacy’ tab will appear if you have both the **opacreadinghistory** and the **OPACPrivacy** preferences set to ‘Allow.’ This tab will allow the patrons to decide how the library keeps their circulation history data.

Nicole Engard's account → Privacy policy

Privacy rule

We take great care in protecting your privacy. On this screen, you can define how long we keep your reading history.

Your options are:

- Forever: keep my reading history without limit. This is the option for users who want to keep track of what they are reading.
- Default: keep my reading history according to local laws. This is the default option : the library will keep your reading history for the duration permitted by local laws.
- Never: Delete my reading history immediately. This will delete all record of the item that was checked-out upon check-in.

Please note that information on any book still checked-out must be kept by the library no matter which privacy option you choose.

Please also note that the library staff can't update these values for you: it's your privacy!

Please choose your privacy rule:

Immediate deletion

Whatever your privacy rule you choose, you can delete all your reading history immediately by clicking here. **BE CAREFUL.** Once you've confirmed the deletion, no one can retrieve the list!

The patron can choose from three options:

- Forever: keep my reading history without limit. This is the option for users who want to keep track of what they are reading.
- Default: keep my reading history according to local laws. This is the default option : the library will keep your reading history for the duration permitted by local laws.

- Never: Delete my reading history immediately. This will delete all record of the item that was checked-out upon check-in.

Depending on the patron’s suggestions the contents of the ‘my reading history’ tab and the ‘Circulation History’ tab in the staff client may change.

Regardless of the patron’s choice they can delete their reading history in bulk at any time by clicking the ‘Immediate deletion’ button.

Immediate deletion

Whatever your privacy rule you choose, you can delete all your reading history immediately by clicking here. **BE CAREFUL.** Once you’ve confirmed the deletion, no one can retrieve the list!

Clicking this button will not delete items that are currently checked out, but will clear the patron’s past reading history.

11.6.10 My Purchase Suggestions

If your library allows patrons to make purchase suggestions the next tab will show all suggestions that the patron made to the library and their statuses. To disable this tab and the suggestion functionality set the **suggestion** preference to ‘Don’t allow.’

My Purchase Suggestions
[Select All](#) | [Clear All](#) | [New purchase suggestion](#)

- These notices are:
 - Advanced Notice : A notice in advance of the patron's items being due (The patron can choose the number of days in advance)
 - Item Checkout : A notice that lists all the of the items the patron has just checked out and/or renewed, this is an electronic form of the checkout receipt
 - Hold Filled : A notice when you have confirmed the hold is waiting for the patron
 - Item Due : A notice on the day and item is due back at the library
 - Item Checkin : A notice that lists all the of the items the patron has just checked in

11.6.12 My Lists

Finally, if your library has the **virtualshelves** set to 'Allow' then the last tab will by 'my lists.' From here your patrons can review public lists and create or edit their own private lists.

The screenshot shows a user interface for managing lists. On the left is a sidebar with links: Home, Catalog, my summary, my fines, my personal details, my tags, change my password, my reading history, my purchase suggestions, my messaging, and my lists. The main content area is titled 'Lists' and has two tabs: 'Your Lists' and 'Public Lists'. Below the tabs is a 'New List' button and a table of existing lists.

List Name	Contents	Sort by	Type	
Kids	4 item(s)	title	Private	Edit Delete
mashups	1 item(s)		Private	Edit Delete

11.7 Purchase Suggestions

If your library has the **suggestion** preference set to 'Allow' then patrons will have the option to make purchase suggestions in several areas in the OPAC.

There will be a link at the top of your OPAC under the search box.

The screenshot shows the search bar area of the OPAC. It features a search box with the text 'Library Catalog' and a dropdown arrow. Below the search box is a blue navigation bar with links: Advanced Search, Browse by Hierarchy, Tag Cloud, Most Popular, and Purchase Suggestions.

There will be a link when the patron finds nothing for their search.

Not finding what you're looking for?
Make a [purchase suggestion](#)

And there will be a link on the patron's **My Purchase Suggestions** tab.

Purchase Suggestions

The screenshot shows the 'Purchase Suggestions' form. It has a 'Search for:' field, a 'Suggested by:' dropdown menu set to 'Anyone', and a 'Search' button. Below the form are links: [Select All](#), [Clear All](#), and [New purchase suggestion](#).

Clicking any one of these links will open the purchase suggestion form.

Title:	<input type="text"/>
Author:	<input type="text"/>
Copyright Date:	<input type="text"/>
Standard Number (ISBN, ISSN or Other):	<input type="text"/>
Publisher:	<input type="text"/>
Collection Title:	<input type="text"/>
Publication Place:	<input type="text"/>
Item Type:	<input type="text" value="Default"/>
Branch:	<input type="text" value="Nicole's Library"/>
Reason for suggestion:	<input type="text" value="-- Choose --"/>
Notes:	<input type="text"/>

[Submit Your Suggestion](#) [Cancel](#)

- From the form on the 'Title' is required by the library.
- If you would like the 'Reason for suggestion' menu shown in the screenshot above to appear on your suggestions list you need to add an **authorized value** category titled 'OPAC_SUG' and include reasons as values in that list.
- If you would like the patron to be able to choose which branch they are making a suggestion for you need to set the **AllowPurchaseSuggestionBranchChoice** preference to 'Allow'

Once the form is submitted the data will be saved to the **Acquisitions** module for the librarians to manage.

11.8 Mobile OPAC

If you have chosen to use the CCSR theme (set in the **opathemes** preference) then you also have a mobile specific view for your OPAC.

The main page of your OPAC will be customized per your **OPAC system preferences** (always be sure to test in customizations on the desktop in multiple browsers and on as many mobile devices as possible. Your main page will look something like this:

Your search results will look something like this:

Patrons will be able to log in to their account and see what they have checked out

Once logged in they can click the menu button in the top left to see the usualy patron account menu

They will be able to renew items (if you allow renewals via the OPAC)

The image shows a mobile application interface for an Online Public Access Catalog (OPAC). At the top, there is a black status bar with icons for Wi-Fi, a mobile phone, a camera, a folder, and two mail icons. Below this, the interface displays a list of book items. Each item is presented in a card-like format with a white background and a thin border. Item 10 features a book cover for 'THE BOUNTY' by CAROLINE ALEXANDER. Below the cover, the title 'The Bounty : Alex' is displayed in blue, followed by the due date 'Date due : 02/05/' and call number 'Call No. : JNF 002'. A 'Renew' button with a checkbox and '(2 of 10)' is visible, along with 'Fines : No'. Item 11 features a book cover for 'THE BOOK OF RUTH' by IAN HAMILTON. Below the cover, the title 'The book of Ruth' is displayed in blue, followed by the due date 'Date due : 02/07/' and call number 'Call No. : FIC Ham'. A 'Renew' button with a checkbox and '(10 of 1)' is visible, along with 'Fines : No'. At the bottom of the list, there are two blue buttons: 'Renew Selected' and a partially visible 'R' button.

12.2 Guide to Searching

This brief guide will explain a chart that shows a sample of how a MARC21 database can be configured, as well as a brief introductory searching guide. The indexing fields described in this document relate to the bibliographic data and does not address authority database indexing.

12.2.1 Indexing and Searching Description

Koha's databases are indexed by the Zebra open-source software. The overview to the documentation describes Zebra as:

"...Zebra is a high-performance, general-purpose structured text indexing and retrieval engine. It reads records in a variety of input formats (eg. email, XML, MARC) and provides access to them through a powerful combination of Boolean search expressions and relevance-ranked free-text queries.

Zebra supports large databases (tens of millions of records, tens of gigabytes of data). It allows safe, incremental database updates on live systems. Because Zebra supports the industry-standard information retrieval protocol, Z39.50, you can search Zebra databases using an enormous variety of programs and toolkits, both commercial and free, which understands this protocol..." Zebra - User's Guide and Reference, p. 1, <http://www.indexdata.dk/-zebra/doc/zebra.pdf>

This brief guide will explain a chart that shows a sample of how a MARC21 database can be configured, as well as a brief introductory searching guide. The indexing fields described in this document relate to the bibliographic data and does not address authority database indexing.

NOTE

The indexing described in this document is the set used by SouthEastern University. Your local indexing may vary.

12.2.2 Indexing Configuration

There are three configuration files that Koha uses while indexing.

The first configuration file (`etc/zebradb/biblios/etc/bib1.att`) contains the Z39.50 bib-1 attribute list, plus the Koha local use attributes for Biblio Indexes, Items Index, and Fixed Fields and other special indexes. The Z39.50 Bib-1 profile is made up of several different types of attributes: Use, Relation, Position, Structure, Truncation, and Completeness. The bib-1 'Use' attribute is represented on the chart; the other attributes are used primarily when doing searches. While there are over 150+ use attributes that could be used to define your indexing set, it's unlikely that you will choose to use them all. The attributes you elect to use are those that become the indexing rules for your database. The other five attribute sets define the various ways that a search can be further defined, and will not specifically be addressed in this document. For a complete list of the standard Bib-1 attributes, go to <http://www.loc.gov/z3950/-agency/defs/bib1.html>.

The second file (`etc/zebradb/marc_defs/[marc21 | unimarc]/biblios/record.abs`) contains the abstract syntax which maps the MARC21 tags to the set of Use Attributes you choose to use. The rules established in this file provides a passable Bath level 0 and 1 service, which includes author, title, subject, keyword and exact services such as standard identifiers (LCCN, ISBN, ISSN, etc.)

The third file (`etc/zebradb/ccl.properties`) is the Common Command Language (CCL) field mappings. This file combines the bib-1 attribute set file and the abstract file and adds the qualifiers, usually known as index names. The qualifiers, or indexes, for this database are: pn, cpn, cfn, ti, se, ut, nb, ns, sn, lcn, callnum, su, su-to, su-geo, su-ut, yr, pubdate, acqdate, ln, pl, ab, nt, rtype, mc-rtype, mus, au, su-na, kw, pb, ctype, and an.

The [Koha Indexing Chart](#) summarizes the contents of all three of these files in a more readable format. The first two columns labeled Z39.50 attribute and Z39.50 name matches the Z39.50 bib-1 attributes file. The third column labeled MARC tags indexed is where you find which MARC tags are mapped to an attribute. The fourth column labeled Qualifiers identifies the search abbreviations used in the internal CCL query. The following description provides a definition for the word 'qualifiers'.

Qualifiers are used to direct the search to a particular searchable index, such as title (ti) and author indexes (au). The CCL standard itself doesn't specify a particular set of qualifiers, but it does suggest a few shorthand notations. You can customize the CCL parser to support a particular set of qualifiers to reflect the current target profile. Traditionally, a qualifier would map to a particular use-attribute within the BIB-1 attribute set. It is also possible to set other attributes, such as the structure attribute.

In the MARC tags indexed column, there are some conventions used that have specific meanings. They are:

- A three digit tag (100) means that all subfields in the tag can be used in a search query. So, if you enter a search for 'Jackson' as an author, you will retrieve records where Jackson could be the last name or the first name.
- A three digit tag that has a '\$' followed by a letter (600\$a) means that a search query will only search the 'a' subfield.

- A three digit tag that is followed by a ':' and a letter (240:w) means that a search query can be further qualified. The letter following the ':' identifies how to conduct the search. The most common values you'll see are 'w' (word), 'p' (phrase), 's' (sort), and 'n' (numeric).

The contents of the MARC tags, subfields, and/or fixed field elements that are listed in this chart are all indexed. You'll see that every attribute line is not mapped to a specific qualifier (index)-LC card number, line 9 is one example. However, every indexed word (a string of characters preceded and succeeded by a space) can be searched using a keyword (kw) search. So, although an LC card number specific index doesn't exist, you can still search by the LCCN since tag 010 is assigned to the LC-card-number attribute. To verify this, enter 72180055 in the persistent search box. You should retrieve *The gods themselves*, by Isaac Asimov.

Examples of fixed field elements indexing can be seen on the chart between Attribute 8822 and Attribute 8703. These attributes are most commonly used for limiting. The fixed field attributes currently represent the BK codes. Other format codes, if needed, could be defined.

12.2.3 Basic Searching

The search box that library staff and library patrons will see most often is the persistent search box at the top of the page. Koha interprets the searches as keyword searches.

Enter search keywords:

[Check Out](#) [Check In](#) [Search the Catalog](#)

To start a search, you enter a word or multiple words in the search box. When a single word is entered, a keyword search is performed. You can check this out by typing one word into the form and note the number of results located. Then, repeat the search with a minor change. In front of the search word, type 'kw=' followed by the same search term. The results will be identical.

When you have more than one word in the search box, Koha will still do a keyword search, but a bit differently. Each word will be searched on its own, then the Boolean connector 'and' will narrow your search to those items with all words contained in matching records.

Suppose you want to find material about how libraries are using mashups. You'll select the major words and enter them into the persistent search box.

Enter search keywords:

[Check Out](#) [Check In](#) [Search the Catalog](#)

The response to this search is:

4 result(s) found for 'library mashups' in Nicole's Library Catalog. Sort By: Relevance

The order of the words does not affect the retrieval results, so you could also enter the search as "mashups library". The response to this search is results

4 result(s) found for 'mashups library' in Nicole's Library Catalog.

Too many words in the search box will find very few matches, as the following example illustrates:

No results found z39.50 Search

No results match your search for **'library mashups mashing programming'** in Nicole's **Library Catalog.**

12.2.4 Advanced Searching

When you can't find the most appropriate material with a general search, you can move to the Advanced Search page by clicking on the Search option on the persistent toolbar.

Circulation Patrons Search  Cart More ▾

The Advanced Search page offers many ways to limit the results of your search. You can search using the Boolean operators AND, OR, and NOT; limit by item type; limit by year and language; limit by subtypes audience, content, format, or additional content types; by location and by availability.

The first limiting section on the Advanced Search page provides a quick and simple way to use the Boolean operators in your search. Note that this display depends on a system preference setting. This option can be found on the Administration > System Preferences > Searching page. The option called **expandedSearchOption** must be set to 'show' to see the following display.

Search For:

Keyword	<input type="text"/>	Scan Indexes <input type="checkbox"/>
and	Keyword	<input type="text"/>
and	Keyword	<input type="text"/> [+]

In this section you can choose among the many indexes by clicking on the arrow in the first box. The blank box that follows is where you enter your first search term or terms. On the second line, you can choose the Boolean operator you want to use in your search. The options are 'and', 'or', and 'not'. Then, you would again choose the index to search, followed by the second term or terms. If you have more concepts you want to include in your search, you can click the [\[+\]](#) to add another line for your search.

A sample search is shown next, followed by its results:

Search For:

Keyword	twain	Scan Indexes <input type="checkbox"/>
and	Title	huckleberry finn
or	Title	tom sawyer [+]

4 result(s) found for 'kw,wrld: twain and ti,wrld: huckleberry finn or ti,wrld: tom sawyer' in Nicole's Library Catalog.

When you use the Boolean operators to broaden or narrow a search, remember the action of each operator. The 'and' operator narrows the results you'll retrieve because the search will retrieve the records that include all your search terms. The 'or' operator expands the results because the search will look for occurrences of all of your search terms. The 'not' operator excludes records with the term that follows the operator.

Note: If you leave this **expandedSearchOption** set to 'don't show', this is the display you will see:

Search For:

Keyword	<input type="text"/>
Keyword	<input type="text"/>
Keyword	<input type="text"/>

The Advanced Search page then shows the multiple kinds of limits that can be applied to your search results. Either check a box or select from the drop down menus to narrow your search. You will type the year, year range, or a 'greater than (>)' or 'less than (<)' year.

Limit to any of the following:

<input type="checkbox"/> Book	<input type="checkbox"/> CD Book on CD	<input type="checkbox"/> Books	<input type="checkbox"/> CD	<input type="checkbox"/> Computer Files
<input type="checkbox"/> Continuing Resources	<input type="checkbox"/> DVD	<input type="checkbox"/> E-Book	<input type="checkbox"/> Maps	<input type="checkbox"/> Mixed Materials
<input type="checkbox"/> Music	<input type="checkbox"/> Nicole's special type	<input type="checkbox"/> Reference		

Limits

Year: (format: yyyy-yyyy)

Language:

Subtype limits

Location and availability

Only items currently available

Individual libraries:

OR

Groups of libraries:

Finally, you can choose how the results will be sorted. The pre-defined sort options are in the final area of the Advanced Search screen.

The default sort is by relevance, although you can choose to sort by author, by title, by call number, by dates, or by popularity. If you would prefer a different default sort, you can set `defaultSortField` to one of the other choices in Administration > System Preferences > Searching.

12.2.5 Common Command Language Searching

Koha uses the Common Command Language (CCL) (ISO 8777) as its internal search protocol. Searches initiated in the graphical interface use this protocol as well, although the searcher doesn't know which indexes, operators and limiters are available and being used to conduct their search. The searcher can use the Advanced Search when more precise results set are desired and where the search indexes are somewhat known. However, some library users and many library staff prefer using a command based structure. This part of the document will present and explain the use of the Koha command based structure. The indexes, operators, and limiters used are identical to those used in the graphical interface.

12.2.5.1 Indexes

The CCL standard itself doesn't specify a particular set of qualifiers (indexes), but it does suggest a few short-hand notations such as 'ti', 'au', and 'su'. Koha has a default set of indexes; it's possible to customize that set by adding needed indexes based on local requirements. A qualifier (index) maps to a particular use-attribute within the Z39.50 BIB-1 attribute set. The complete Z39.50 Bib-1 Attribute can be viewed at <http://www.loc.gov/z3950/agency/defns/bib1.html>.

The standard Koha set of indexes is a fairly common example of MARC21 indexing rules. The indexes that are defined in Koha are indexes typically used by other integrated library systems. The defined Z39.50 Bib-1 Attribute mapped to the indexes include:

Refer to the Koha Indexing Chart for the MARC21 tags mapped to each Bib-1 Attribute and index combination.

12.2.5.1.1 Audience Examples

- aud:a Preschool
- aud:b Primary
- aud:c Pre-Adolescent
- aud:d Adolescent
- aud:e Adult
- aud:f Specialized
- aud:g General
- aud:j Juvenile

12.2.5.1.2 Contents Examples

- fic:1 Fiction
- fic:0 Non Fiction
- bio:b Biography
- mus:j Musical recording
- mus:I Non musical record

Table 12.1 Attributes

Bib-1 Attribute	Qualifier (index)
Personal-name	pn

Any (keyword)	kw
Publisher	pb
Content-type	ctype
Koha-Auth-Number	an
Author-personal-bibliography	aub
Author-in-order	auo

12.2.5.2 Search Syntax

In the persistent search box, single words generally retrieve large sets. To narrow a search, you can use multiple words. Koha automatically uses the 'and' Boolean operator to create a set of records matching your input. When you want to narrow the search to an author or a title or a subject or some other specific field or use a Boolean operator, there isn't an obvious way to accomplish that specificity. The library user can, of course, go to the Advanced Search page; however, if you know how to construct a CCL search, you can achieve more specificity while using the persistent search box on any page.

There is a specific order to the CCL search syntax. Although it can be used for simple searches, it is an especially effective way to perform complex searches, as it affords you a great deal of control over your search results. To construct a CCL search, first enter a desired index code, then an equal sign, followed by your search word(s). Following are examples of simple CCL searches.

- ti=principles of accounting
- au=brown joseph
- su=poetry
- su-na=Shakespeare
- kw=marlin

You can refine your search by combining search terms with Boolean operators 'and', 'or', or 'not'. Following are examples of searches using Boolean operators.

- ti=principles of accounting and au=brown joseph
- su=poetry not su-na=Shakespeare
- kw=communication and su=debate

You can also choose to search for things that start with a character or series of characters

- `ti,first-in-subfield=C` (will show you all titles that start with the letter 'C')

Other string location searches can be performed with the following keywords:

- `rtrn` : right truncation
- `ltrn` : left truncation
- `lrtrn` : left and right truncation
- `st-date` : type date
- `st-numeric` : type number (integer)
- `ext` : exact search on whole subfield (does not work with `icu`)
- `phr` : search on phrase anywhere in the subfield
- `startswithnt` : subfield starts with

Using specific indexes and Boolean operators are not the only way a search can be refined. You can also refine your search as a phrase when looking for a title, author, or subject. The syntax for this search is `index,phr=search words`.

To illustrate the results of various search types, a search was done for the words 'supreme court'. The results illustrate that the search index and the word order make a difference in search results. Only the results count and the search itself is in these examples. The search executed will always be between the single quotes.

768 result(s) found for 'supreme court'.

768 result(s) found for 'court supreme'.

112 result(s) found for 'au=supreme court'.

496 result(s) found for 'cpn=supreme court'.

No results found

No results match your search for 'cfn=supreme court'.

430 result(s) found for 'ti=supreme court'.

430 result(s) found for 'ti,phr=supreme court'.

435 result(s) found for 'ti=supreme and ti=court'.

401 result(s) found for 'su=supreme court'.

You can also choose to use limiters in your search query. Some common limiters include dates, languages, record types, and item types. In the Advance Search, you can either click a box or key in data to limit your search. You can also apply the same limits with CCL by using the syntax in the following examples. In all

By Date: su=supreme court and yr,st-numeric=>2000

36 result(s) found for 'su=supreme court and yr,st-numeric>2000'.

When you limit by date, you can use the '>' (greater than), '<' (less than), '=' (equal), or 'yyyy-yyyy' (range) symbols.

By Item Type: su=nursing and itype:BK

17 result(s) found for 'su=nursing and mc-itype:BK' in Steelman Library, Southeastern University Catalog.

Each library will have a different set of item types defined in their circulation configuration. When you set up item types, you define a code and a name for each one. The name will appear on the Advance Search page. The code you assigned is used as a CCL search limit, formatted as 'itype:x', where 'x' is the assigned code. The initial set of item types in Koha will usually be edited to reflect your collections, so your item type limiters may be different than the initial ones. The initial item type limiters follow.

- itype:BKS Books, Booklets, Workbooks
- itype:SR Audio Cassettes, CDs
- itype:IR Binders
- itype:CF CD-ROMs, DVD-ROMs, General Online Resources
- itype:VR DVDs, VHS
- itype:KT Kit
- itype:AR Models
- itype:SER Serials

By format: su=supreme court not l-format:sr

401 result(s) found for 'su=supreme court not l-format:sr'.

The format limiters are derived from a combination of LDR, 006 and 007 positions. The formats that are currently defined are the following.

- l-format:ta Regular print
- l-format:tb Large print
- l-format:fk Braille
- l-format:sd CD audio
- l-format:ss Cassette recording
- l-format:vf VHS tape
- l-format:vd DVD video
- l-format:co CD software
- l-format:cr Website

By content type: su=supreme court not ctype:l

396 result(s) found for 'su=supreme court not ctype:l'.

The content types are taken from the 008 MARC tag, positions 24-27.

There are two other limiter types that are not described in this document. They are: Audience and Content. The only difference in the syntax of the CCL is the actual limiter. They are reproduced here just in case you would like to use these limiters.

12.3 Koha Search Indexes

By default, not all fields are indexed in the Zebra search engine, but many are. Below are the MARC21 fields that are indexed in Zebra.

Table 12.2 Indexes

Field	Description
001	Control-number
005	Date/time-last-modified
007	Microform-generation:n:range(data,11,1), Material-type,ff7-00:w:range(data,0,1), ff7-01:w:range(data,1,1), ff7-02:w:range(data,2,1), ff7-01-02:w:range(data,0,2)

Chapter 13

About Koha

The 'About Koha' area will give you important server information as well as general information about Koha.

- *Get there:* More > About Koha

13.1 Server Information

Under the 'Server Information' tab you will find information about the Koha version and the machine you have installed Koha on. This information is very important for debugging problems. When reporting issues to your support provider or to the various other support avenues (mailing lists, chat room, etc), it's always good to give the information from this screen.

About Koha

Server information	
Koha version:	3.08.01.002
OS version ('uname -a'):	Linux ModelServer 2.6.32-5-xen-amd64 #1 SMP Thu Mar 22 21:14:26 UTC 2012 x86_64 GNU/Linux
Perl interpreter:	/usr/bin/perl
Perl version:	5.010001
Perl @INC:	/home/koha/kohaclone /etc/perl /usr/local/lib/perl/5.10.1 /usr/local/share/perl/5.10.1 /usr/lib/perl5 /usr/share/perl5 /usr/lib/perl/5.10 /usr/share/perl/5.10 /usr/local/lib/site_perl .
MySQL version:	mysql Ver 14.14 Distrib 5.1.61, for debian-linux-gnu (x86_64) using readline 6.1
Apache version:	Server version: Apache/2.2.16 (Debian)
Zebra version:	Zebra 2.0.50 (C) 1994-2010, Index Data ApS Zebra is free software, covered by the GNU General Public License, and you are welcome to change it and/or distribute copies of it under certain conditions. SHA1 ID: 732870c555c7d32c5d2b6a4914c6fa7232eb26b2 Using ICU

13.2 Perl Modules

In order to take advantage of all of the functionalities of Koha, you will need to keep your Perl modules up to date. The 'Perl Modules' tab will show you all of the modules required by Koha, the version you have installed and whether you need to upgrade certain modules.

Warning	System preference 'nozebra' set. Deprecated!
Warning	System preference 'AutoCreateAuthorities' set, but needs 'BiblioAddsAuthorities' set as well.
Warning	System preference 'EasyAnalyticalRecords' set, but UseControlNumber preference is set to 'Use'. Set it to 'Don't use' or else the 'Show analytics' links in the staff client and the OPAC will be broken.

Chapter 14

Implementation Checklist

The following guide will walk you through the areas of Koha you need to look at in order to prepare to start using the system.

14.1 Data Migration

Before you can start using Koha you'll need to have some data. This can be done by entering it all by hand, but most people already have their data in electronic format of some sort and just need to reformat it a bit for importing into Koha.

- Create a list of libraries and enter their info and codes into **Libraries & Groups**
- Define your list of **Item Types**
- Define your patron categories and enter the categories and their codes into **Patron Categories**
- Enter any additional patron information fields you use in your library in the **Patron Attributes**
 - Requires that you first set the **ExtendedPatronAttributes** system preference if you have custom fields
- Define all of your **Authorized Values**
 - **Collection codes**
 - **Shelving locations**
 - Item statuses (**lost, not for loan, damaged, withdrawn**)
 - Plus any others that are needed in your library
- Optionally define **City/State/Postal Code** combos and **Road Types** for patron entry
- **Map your bibliographic data** from your legacy system to Koha fields and migrate (remembering to use the collection, shelving, item type and library codes you entered in the above setting areas)
- **Map your patron data** from your legacy system to the Koha fields and migrate (remembering to use the patron and library codes you defined above)
- Test your migrated data to be sure that everything is as you expect it to be, some things to test include:
 - Check some of your titles with diacritics and make sure that they migrated properly.
 - Check titles in a series and make sure that series information migrated properly.
 - Make sure that your patrons have their contact information in the right fields.
 - If your serials data was migrated search for these records in the catalog and confirm that they look right.
 - If your serials data was migrated search for these records in the serials module and confirm that they look right.

- Check marc records to verify a variety of items are cataloged correctly
- Check cataloging process to see if all necessary fields are available
- If fines are migrated, check to see that they are applied correctly
- If holds are migrated, check to see they are accurate in catalog and patron record

14.2 Admin Configuration

Most of these preferences won't need to be changed to use your Koha system, but there are a few that you might want to customize.

- If your library uses CAS Authentication, you'll want to set the various **CAS system preferences**
- Administration System Preferences
 - **KohaAdminEmailAddress** : This is the email address that will be used by the system in 'from' lines and to send errors to if there is no email set for the branch
 - **noItemTypeImages** : Decide if you want to show item type icons in the staff client and opac
 - **delimiter** : This value will be put in between fields when exporting data from Koha
 - **virtualshelves** : Decide if you want the staff and/or patrons to use lists in Koha
 - **insecure** : If your system is behind a local firewall, you can set it to no require log in for the staff client
 - **AutoLocation** : Require staff to log in to the staff client from a specific IP range
 - **IndependantBranches** : Prevent librarians from editing content that belongs to other branches
- Go through the **Log System Preferences** and decide which actions you want to keep track of in the logs

14.3 Localization Configuration

Koha is used worldwide and so you need to make sure you set your localization preferences so that options throughout Koha appear properly for your location/language.

- Localization/Internationalization System Preferences
 - **dateformat** : Decide how dates are displayed throughout Koha
 - **opaclanguagesdisplay** : Decide if patrons can choose what language the OPAC appears in
 - * **opaclanguages** : Decide which languages the patrons can choose from
 - **language** : Decide which languages appear in the staff client
 - **CalendarFirstDayOfWeek** : Define your first day of the week

14.4 Circulation Configuration

Before you start circulating your collection you'll need to set up your rules and preferences for circulation.

- Define you **Circulation/Fine rules**
- Enter the **days your library is closed** for fines and due date calculations
- Circulation System Preferences
 - **CircControl** : Define whether circ rules are based on item's location, patron's location or transaction location
 - **useDaysMode** : Define how due dates are calculated
 - **finesCalendar** : Define how fines are calculated (for every late date or only for days the library is open)

- **SpecifyDueDate** : Decide if staff are allowed to override due dates on checkout
- **AutomaticItemReturn** : Decide if items are sent back to the owning branch when checked in
- **todayIssuesDefaultSortOrder** : Decide how items checked out today display on the patron record
- **previousIssuesDefaultSortOrder** : Decide how items checked out prior to today display on the patron record
- **noissuescharge** : Define the maximum amount a patron can owe before checkouts are blocked
- **ReturnBeforeExpiry** : Decide if patrons need to return items before their accounts expire
- **AllowOnShelfHolds** : Decide if patrons can place holds on items that are marked as being available
 - * **AllowHoldPolicyOverride** : Decide if you want the staff to be able to override the setting for the above at checkout
- **AllowHoldsOnDamagedItems** : Decide if patrons can place holds on items that are marked as damaged
 - * **AllowHoldPolicyOverride** : Decide if you want the staff to be able to override the setting for the above at checkout
- **maxreserves** : Decide how many items a patron can have on hold at once
 - * **AllowHoldPolicyOverride** : Decide if you want the staff to be able to override the setting for the above at checkout
- **maxoutstanding** : Define the maximum amount a patron can owe before holds are blocked
 - * **AllowHoldPolicyOverride** : Decide if you want the staff to be able to override the setting for the above at checkout
- **ReservesMaxPickUpDelay** : Define the number of days before a hold expires
- **WebBasedSelfCheck** : Decide if you want to use the built in web-based self-checkout system
 - * **AutoSelfCheckAllowed** : Decide if the self-checkout system requires login
 - * **ShowPatronImageInWebBasedSelfCheck** : Decide if you want patron images to show on the self checkout screen
- **AllowNotForLoanOverride** : Decide if you want the staff to be able to checkout items marked as 'not for loan'
- **AllowRenewalLimitOverride** : Decide if you want staff to override the limit put on renewals
- **AllowFineOverride** : Decide if you want staff to be able to override fine limits
- **RenewalPeriodBase** : Decide what date renewals are based on
- **finesModule** : Switch to 'Calculate and Charge' before go live if you charge fines
- **OverdueNoticeBcc** : If you want to receive a copy of every overdue notice sent out, enter your email address here
- **emailLibrarianWhenHoldIsPlaced** : Decide if you want an email every time a hold is placed
- **ReservesControlBranch** : Decide which branch's hold rules are considered first
- **soundon** : Decide if you want to have sounds on for circulation actions
- **FilterBeforeOverdueReport** : If you have a large amount of overdues, you might want to turn this preference on so as to allow you to filter before results appear
- **DisplayClearScreenButton** : If you have a lot of staff members sharing one circ computer you might want to enable this so that staff can clear the screen in between checkouts to protect patron's privacy
- **CircAutoPrintQuickSlip** : Decide how you want Koha to react if you scan in a blank barcode on the checkout screen
- **SuspendHoldsIntranet** and/or **SuspendHoldsOpac** : Decide if you want patrons and/or staff to be able to suspend holds
 - * **AutoResumeSuspendedHolds** : If you allow holds to be suspended decide if you want them to automatically resume on the date entered by the staff and/or patron

- Customize your **Notices & Slips**
- Define your **Overdue Notice Triggers**
- Set up your **cron jobs**
 - Populate **your holds queue** (every 1-4 hours)
 - Decide **when holds expire** (daily)
 - **Calculate fines due** (daily)
 - * Fines on hourly loans will calculate when you check the items in
 - **Mark long overdue items as lost** (daily)
 - Decide when the system **sends out messages** (1-4 hours)
 - Decide when the system **queues overdue notices** (daily)
 - Set up **hold notices that didn't send for printing** (daily after overdues and message queue)
 - Decide when the system **queues the advanced notice of items due** (daily)
 - Find holds that need to be **resumed and remove suspension** (daily)

14.5 Patron Configuration

You have already imported patron data from your old system, but there are plenty of options available to you regarding patrons and their accounts.

- Enter your **staff members as patrons**
 - Define **staff members access permissions**
- Patron System Preferences
 - **AddPatronLists** : Decide how patron categories appear when creating a new patron
 - **autoMemberNum** : Decide if the patrons barcodes are auto-generated or if you enter them yourself
 - **MaxFine** : Determine the maximum amount that people can owe in fines
 - **NotifyBorrowerDeparture** : Decide when to warn staff that the patron account is about to expire
 - **intranetreadinghistory** : Decide if the staff can see the patron's reading/checkout history
 - **BorrowerMandatoryField** : List fields that you want to appear as mandatory on the patron add/edit form
 - **BorrowersTitles** : Add or change the titles for your patrons
 - **borrowerRelationship** : Add or change borrower relationships (child to adult and professional to organization)
 - **AutoEmailPrimaryAddress** : Determine if the patrons get an email confirming the creation of their account
 - **EnhancedMessagingPreferences** : Decide if patrons can choose from a series of notices (other than overdues)
 - **patronimages** : Decide if you want to save patron images in your system
 - **ExtendedPatronAttributes** : Decide if you want to enable custom patron fields
 - **minPasswordLength** : Enter the minimum number of characters you want passwords to have
 - **BorrowerUnwantedField** : Decide what fields your library doesn't need to see on the patron entry form

14.6 Cataloging Configuration

Before you start cataloging in Koha you'll want to set up your preferences and other rules.

- Define your cataloging templates aka **MARC Bibliographic Frameworks**
 - Run the **MARC Bibliographic Framework Test** to be sure your changes are valid
- Define any **authorized values** you might want to use in cataloging
- Set up **custom classification sources** (if you use something other than the defaults)
- Set up **MARC matching rules** for importing records from mrc files or Z39.50
- Set up **Koha to Keyword mapping** for deciding how to display marc fields to the screen (still in beta - only one field)
- Set up the **Z39.50 targets** you want to search for cataloging (and acquisitions)
- Cataloging System Preferences
 - **URLLinkText** : Enter text to display when 856 fields do not have pre-defined labels
 - **hide_marc** : If you are unfamiliar with MARC you can have the MARC fields number hidden
 - **LabelMARCView** : Choose how you want duplicate fields to appear on the editor
 - **DefaultClassificationSource** : Choose which classification source is the default in your library
 - **advancedMARCeditor** : Decide if you need labels to appear on your MARC editor
 - **marcflavour** : Choose your MARC format
 - **itemcallnumber** : Enter which field and subfields to look into for the call number
 - **MARCOrgCode** : Enter your MARC Organizational Code (not the same as your OCLC number)
 - **autoBarcode** : Decide if Koha generates item barcodes for you
 - **OpacSuppression** : Decide if you want to hide items marked as suppressed from the OPAC search results
- Set up your **cron jobs**
 - Decide when the system **checks URLs in catalog records** to see if they are still valid

14.7 Authorities Configuration

Koha has the ability to keep track of your authority records and how they're linked to your bibliographic records. Before using authorities you should configure several preferences.

- Set **Authority Frameworks** aka templates
- Authority System Preferences
 - **BiblioAddsAuthorities** : Decide if Koha creates authorities when cataloging
 - **dontmerge** : Decide if updates to authorities trigger updates to the bibliographic records that link to them
 - **AutoCreateAuthorities** : Decide when authorities are created
 - **LinkerModule** : Decide which match the authority linker should use
 - **LinkerOptions** : Decide if you want authority linking to be broader or more specific
 - **CatalogModuleRelink** : Decide if you want to enable authority linking while cataloging
- Set up your **cron jobs**
 - Choose when the system looks for authorities updates to **merge changes into bibliographic records**

14.8 Searching Configuration

There are several system preferences related to searching, it is not always recommended to make too many changes to these preferences since they are set to get you the most relevant results. If you would like to change the default way that Koha handles searching, view the [Searching system preferences](#) tab.

- Set up your [cron jobs](#)
 - Decide how often your [system rebuilds the search index](#) (4-10 min)
- Searching System Preferences
 - [AdvancedSearchTypes](#) : Decide which authorized value fields you want patrons and staff to be able to limit their advanced searches by
 - [UseAuthoritiesForTracings](#) : Decide how you want Koha to handle subject searches in the OPAC
 - * [TraceCompleteSubfields](#) : Decide how you want Koha to handle subject searches in the OPAC
 - * [TraceSubjectSubdivisions](#) : Decide how you want Koha to handle subject searches in the OPAC
 - [displayFacetCount](#) : Decide whether to show facet counts on search results

14.9 OPAC Configuration

There are a lot of ways you can customize your OPAC in Koha.

- Decide how you want your OPAC to look & what content you want on the main page
- Create a library branded stylesheet using CSS
 -

IMPORTANT

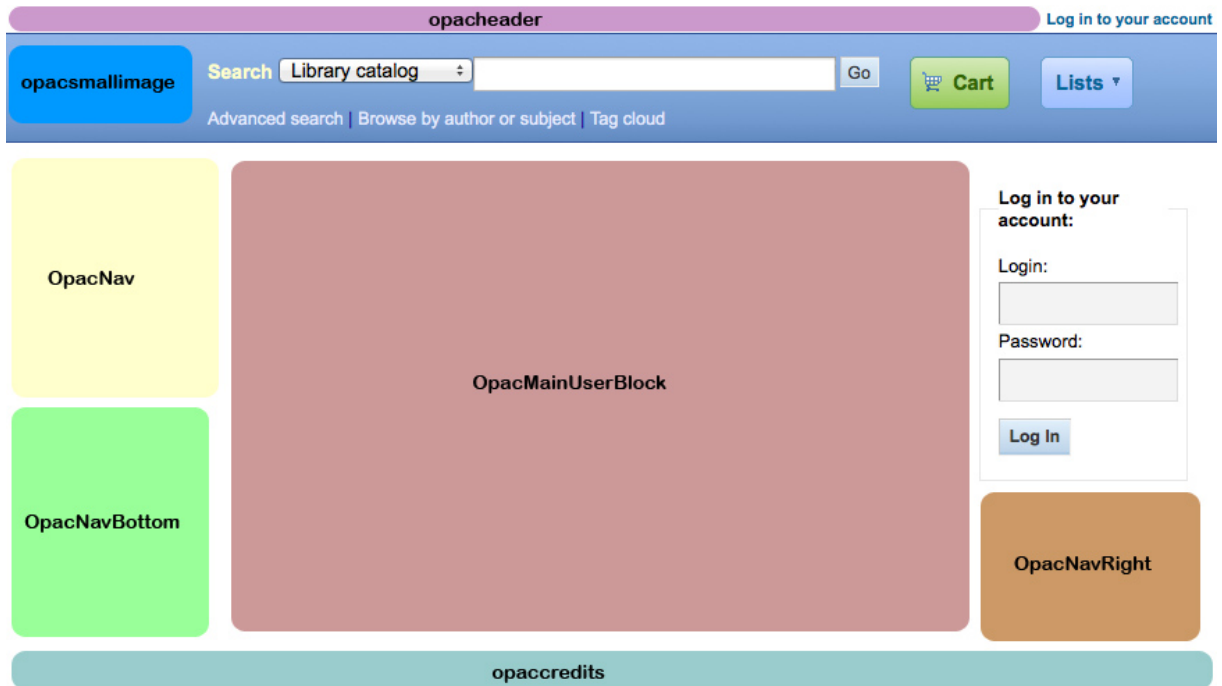

Do not edit the default CSS files, instead create a new one, that way the system can always fall back on the original CSS.

- Create a custom XSLT stylesheet to change the way search results and bib records appear in the OPAC
- OPAC System preferences
 - [opacuserlogin](#) : Decide if you want to allow patrons to login to the OPAC to access customized functionality (searching will be allowed without logging in)
 - * [RequestOnOpac](#) : Decide if patrons can place holds via the OPAC
 - * [OPACItemHolds](#) : Decide if patrons can place holds on specific items (instead of just the next available item)
 - * [OpacPasswordChange](#) : Decide if patrons can change their password (don't allow this if you're using LDAP)
 - * [OpacRenewalAllowed](#) : Decide if patrons can renew their checked out items via the OPAC
 - * [opacreadinghistory](#) : Decide if patrons can view their reading/checkout history via the OPAC
 - * [reviewson](#) : Decide if you want to allow patrons to comment on bib records via the OPAC
 - * [OpacStarRatings](#) : Decide if patrons can leave star ratings
 - * [virtualshelves](#) : Decide if you want patrons to be able to create Lists

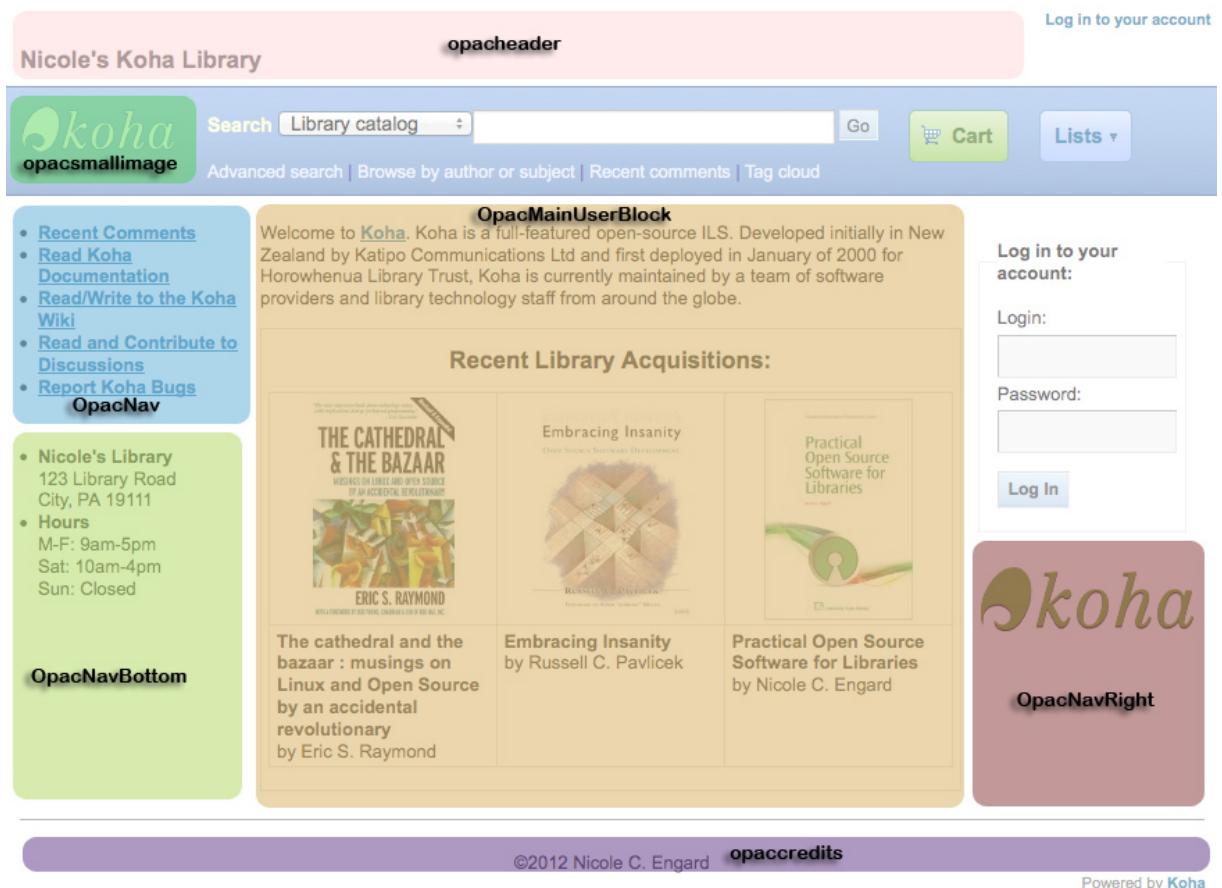

- * **OpacAllowPublicListCreation** : If patrons can create lists then decide if they are allowed to create public lists
- * **suggestion** : Decide if you want patrons to be able to submit purchase suggestions
- * **OPACViewOthersSuggestions** : Decide if you want patrons to be able to see purchase suggestions made by other patrons
- **opacbookbag** : Decide if patrons can save items into their cart
- **AnonSuggestions** : Decide if you want non logged in users to be able to make purchase suggestions
- **OPACXSLTResultsDisplay** : Decide if you want to use the XSLT stylesheets on the OPAC search results
- **OPACXSLTDetailsDisplay** : Decide if you want to use the XSLT stylesheets on the bib records in the OPAC
- **LibraryName** : Enter your library name for display in the <title> tag and on the top of the OPAC
- **opacsmallimage** : Choose a logo to replace the Koha logo
- **opaccredits** : Enter HTML to appear at the bottom of every page in the OPAC
- **OpacMainUserBlock** : Enter HTML that will appear in the center of the main OPAC page
- **OpacNav** : Enter HTML that will appear to the left on the main OPAC page
- **OpacNavBottom** : Enter HTML that will appear below OpacNav
- **OpacNavRight** : Enter HTML that will appear below the login box on the right
- **opacheader** : Enter the HTML that will appear above the search box on the OPAC
- **OPACNoResultsFound** : Enter the HTML that will appear when no results are found
- **OPACResultsSidebar** : Enter the HTML that will appear below the facets on your search results
- **OPACMySummaryHTML** : Enter the HTML that will appear in the far right of the circulation summary in the OPAC
- Customize your stylesheets:
 - * **OPACUserCSS** : Enter any additional fields you want to define styles for
 - * **opaclayoutstylesheet** : Point to a CSS file on your Koha server
 - * **opaccolorstylesheet** : Point to a CSS file on your Koha server
- **OpacHighlightedWords** : Decide if you want search terms to be highlighted on the search results
- **hidelostitems** : Decide if you want to show patrons items you have marked as lost
- **BiblioDefaultView** : Decide what view is the default for bib records on the OPAC
- **OPACShelfBrowser** : Decide if you want to enable the shelf browse functionality
- **opacthemes** : Choose which theme you would like to use. If you would like a mobile interface you want to choose CCSR.
- **OPACURLOpenInNewWindow** : Decide if URLs clicked in the OPAC are opened in a new window
- **SearchMyLibraryFirst** : If you have a multi-branch system decide if you want patrons to search their library first
- **OpacAuthorities** : Decide if you want patrons to be able to search your authority file
- **OpacBrowser** : Decide if you want patrons to browse your authority file
- **OPACSearchForTitleIn** : Choose which libraries you want patrons to be able to re-run their search in
- **OpacAddMastheadLibraryPullDown** : If you're a multi-branch system you can add a pull down to the search bar for patrons to search which library to search
- **EnableOpacSearchHistory** : Decide if you want the system to keep a search history
- Set up your **cron jobs**
 - If you have the **OpacBrowser** preference set decide **when you want the contents to rebuild**
 - If you have **custom RSS feeds**, decide when you want the **feed to be populated**

14.9.1 Editable OPAC Regions

Using the OPAC system preferences you can customize various regions, the following graphics will define what preferences update each regions in the PROG theme.

An example of a way to customize the page is included as well:

14.10 Enhanced Content Configuration

Koha allows you to pull in content from outside sources to enhance your bib records. All of this content can be toggled on and off using the enhanced content system preferences.

- **FRBR/Editions**
 - If you would like to have your OPAC and/or staff client show an 'Editions' tab on the bib record, you want to enable one or the other FRBR preferences and then either one or both of the ISBN services (XISBN and ThingISBN).
- **Amazon**: This service is free and just requires that you visit <http://aws.amazon.com> to sign up
 - Using the Amazon preferences you can choose to show cover images from Amazon.
- **Babelthèque**
 - This is a pay service. Contact Babelthèque to learn how to enable this content in the OPAC.
- **Baker and Taylor**
 - This is a pay service from Baker & Taylor. Contact Baker & Taylor for the information to enter into these preferences.
- **Google**
 - This service is free and does not require registration, simply enable GoogleJackets and you're set to go.
- **LibraryThing**
 - With the exception of ThingISBN, you will need to contact LibraryThing for the information to enter into these preferences
 - Enabling ThingISBN will help to populate the editions tab on the bib record display if you have enabled FRBR.
- **Novelist**
 - This is a pay service from Ebsco. Contact Ebsco for the information to enter into these preferences
- **OCLC**
 - XISBN is used to populate the editions tab on the bib record display if you have enabled FRBR. This service is free for up to 999 queries a day.
- **Open Library**
 - Open Library project is an open system that you can pull cover images (and in the future additional content) from
- **Syndetics**
 - This is a pay service from Syndetics to add content for your bib records. Contact Syndetics for the information to enter into these preferences.
- **Tagging**
 - Choose whether or not you want to allow patrons to add tags to records in Koha.

14.11 Acquisitions Configuration

When using acquisitions in Koha you first need to define some defaults.

- Set up your **funds & budgets**
- Choose your **default currency** and enter others if you order from multiple countries
- Enter in your **vendor information**
- Create an **Framework with the code ACQ** (if you're going to enter item records at the time of ordering or receiving)
- Acquisitions System preferences
 - **AcqCreateItem** : Decide if an item record is created during acquisition
 - **CurrencyFormat** : Decide how you want monetary amounts to display
 - **gist** : Enter your sales tax (if you are billed for tax)
 - **OrderPdfFormat** : Decide what format you want your print orders to use

14.12 Serials Configuration

When you use serials there are a few options you can set before hand.

- Serials System Preferences
 - **RenewSerialAddsSuggestion** : Decide if you want renewing serials to add a suggestion for easy purchasing
 - **RoutingSerials** : Decide if you want to route serials around your library
 - **RoutingListAddReserves** : Decide if holds are placed on serials when there is a routing list in place
- Cataloging System Preferences
 - **StaffSerialIssueDisplayCount** : Decide how many of the most recent issues to display in the staff client
 - **OPACSerialIssueDisplayCount** : Decide how many of the most recent issues to display in the OPAC
 - **SubscriptionHistory** : Decide how you want the subscription information to display in the OPAC

14.13 Planning for Go-Live

Once you have all of your settings ready, you need to prepare for making your system live:

- Decide if you need training by an outside service or if your staff can do the training themselves.
- Make sure that there is time for your staff to play with your test system and get comfortable with it
- If this is a migration, work with your previous company to extract data right before you go live
- Come up with URLs for your new Koha OPAC & Staff Client
- Make sure that if you're hosting your own system you have a backup plan

Chapter 15

SOPAC2 Installation

15.1 SOPAC2 Introduction

NOTE

The following documentation was translated using Google Translate from French to English and may have some language errors.

15.2 Introduction

This is an installation guide and the connector SOPAC2 Koha. It has been tested on Debian Lenny and Ubuntu Jaunty, with 6.12 and Koha Drupal 3.0.x It does not cover the installation of Koha and Drupal, but SOPAC, its dependencies and the connector.

15.3 Installation of Locum and Insurge

Locum and Insurge are the two libraries used primarily by SOPAC. They serve as a layer of abstraction to the data. Insurge manages the social aspect (tags, reviews, ratings), while Locum manages the connection to the ILS via the connector. Both libraries use a different database from that of Drupal.

15.3.1 Dependencies

There are no packages for Debian MDB2 yet, you can install it via pear:

```
# apt-get install php-pear
# pear install MDB2
# pear install MDB2#mysql
```

15.3.2 Download

Download the Locum and Insurge libraries from SVN:

```
# cd /usr/local/lib
# svn co http://dobby.darrienlibrary.org/svn/locum/trunk/ locum
# svn co http://dobby.darrienlibrary.org/svn/insurge/trunk/ insurge
```

15.3.3 Creation of the Database

```
$ mysql -u root
mysql> create database scas;
mysql> grant all privileges on scas.* to scas_user@'localhost' identified by ' ←
    scas_pass';
mysql> flush privileges;
mysql> exit
```

15.3.4 Sync DSN

This file will provide the connection information to a DB libraries:

```
# nano /usr/local/etc/locum_insurge_dsn.php
```

It should contain:

```
<?php
$dsn = 'mysql://scas_user:scas_pass@localhost/scas';
```

15.3.5 Installation of Insurge

If you customize the name of the database, consider editing the sql file:

```
# nano /usr/local/lib/insurge/sql/scas_insurge.sql
```

Import Insurge:

```
$ mysql -u root -p < /usr/local/lib/insurge/sql/scas_insurge.sql
```

Configure Insurge:

```
# nano /usr/local/lib/insurge/config/insurge.ini
```

The variables in `insurge.ini` are empty. The default values are too long and cause MySQL errors. Here is a sample of `insurge.ini`

```
; This is the Locum configuration file
; General configuration options for your installation of Insurge.
[insurge_config]
dsn_file = "/usr/local/etc/locum_insurge_dsn.php"
; This is where you configure your repository membership information.
;
; parent_server is the server name of the repository parent server you have been
; told to use.
; group_id = The group ID you have been given by your repository admin.
; These configuration points are OPTIONAL and are only necessary if you are
; participating in a repository relationship.
[repository_info]
parent_server = ""
group_id = ""
group_key = ""
```

15.3.6 Installation of Locum

The same procedure applies to Locum

```
# nano /usr/local/lib/locum/sql/scas_locum.sql
# mysql < /usr/local/lib/locum/sql/scas_locum.sql
# nano /usr/local/lib/locum/sql/locum_init.sql
# mysql < /usr/local/lib/locum/sql/locum_init.sql
# nano /usr/local/lib/locum/config/locum.ini
# mkdir /usr/local/var
# mkdir /usr/local/var/log
```

Configure the DSN:

```
[locum_config]
dsn_file = "/usr/local/etc/locum_insurge_dsn.php"
```

And the coordinates of your Koha installation:

```
[ils_config]
ils = "koha";
ils_version = "30x"
ils_server = "localhost"
ils_harvest_port = "80"
```

The rest depends on your configuration of Koha.

15.4 Installation of Koha Connector

Enter the connector Koha from SVN:

```
# cd /usr/local/lib/locum/connectors/
# svn co http://dobby.darrienlibrary.org/svn/connectors/koha/ locum_koha_30x
```

15.5 Harvest Records

Now that the connector is in place, we will be able to launch `harvest.php`, a tool that will reap Locum DB Koha and fill the locum.

Start by configuring `harvest.php`:

```
# nano /usr/local/lib/locum/tools/harvest.php
```

Here are the variables you must change:

```
$first_record = 1;
$last_record = 30;
```

These are the minimum and maximum biblionumbers from your Koha install.

Then start the harvest:

```
# chmod +x /usr/local/lib/locum/tools/harvest.php
$ /usr/local/lib/locum/tools/harvest.php
```

15.6 Installation of Sphinx

Sphinx is the indexer for the database used by Locum and Insurge.

15.6.1 Dependencies

There is no Debian package for Sphinx so you'll have to compile the source directly:

```
# apt-get install g++ make libmysql++-dev
```

15.6.2 Download and Compile

```
$ wget http://sphinxsearch.com/downloads/sphinx-0.9.8.tar.gz
$ tar zxvf sphinx-0.9.8.tar.gz
$ cd sphinx-0.9.8
$ ./configure --prefix=/usr/local/sphinx
$ make
# make install
# mkdir /usr/local/sphinx
```

```
# mkdir /usr/local/sphinx/lib
# cp api/sphinxapi.php /usr/local/sphinx/lib/
$ rm -R sphinx-0.9.8*
```

15.6.3 Creation of User and Group

Creating a Sphinx user and change the owner:

```
# adduser sphinx
# addgroup sphinx
# usermod -G sphinx sphinx
# mkdir /usr/local/sphinx/var/run
# chown -R sphinx.sphinx /usr/local/sphinx/var
```

15.6.4 The demon Sphinx

Download:

```
# cd /etc/init.d
# wget http://www.thesocialopac.net/sites/thesocialopac.net/files/sphinx
# chmod +x /etc/init.d/sphinx
```

Add Sphinx in the service at boot:

```
# update-rc.d sphinx defaults
```

15.6.5 Configuration

Copy the configuration file supplied with the source of Sphinx before the change:

```
# cp /usr/local/lib/locum/sphinx/sphinx.conf /usr/local/sphinx/etc/
# sed 's/locum_db_user/scas_user/g' /usr/local/sphinx/etc/sphinx.conf > tmpfile;
mv tmpfile /usr/local/sphinx/etc/sphinx.conf
# sed 's/locum_db_pass/scas_pass/g' /usr/local/sphinx/etc/sphinx.conf > tmpfile; ←
mv tmpfile /usr/local/sphinx/etc/sphinx.conf
```

And if you personalize the name of the BDD:

```
# sed 's/scas/Ma_BDD/g' /usr/local/sphinx/etc/sphinx.conf > tmpfile; mv tmpfile / ←
usr/local/sphinx/etc/sphinx.conf
```

15.6.6 Indexing documents

Indexing is necessary if you want to use the search features of SOPAC.

You must first complete the Insurge table index

```
# chmod +x /usr/local/lib/insurge/tools/update-index.php
$ /usr/local/lib/insurge/tools/update-index.php
```

Then start indexing Sphinx

```
$ /usr/local/sphinx/bin/indexer --all
```

Finally, we must start the demon:

```
# /etc/init.d/sphinx start
```

When the demon is already en route, you can update the index with:

```
$ /usr/local/sphinx/bin/indexer --all --rotate
```

15.7 Installation of SOPAC2

Now to the SOPAC software itself:

15.7.1 Download

Download from SVN:

```
$ cd /chemin/vers/drupal/sites/all/  
$ mkdir modules  
$ cd modules/  
$ svn co http://dobby.darientlibrary.org/svn/sopac/trunk/ sopac
```

15.7.2 Installation

Going in the administration of Drupal to activate the module. Enable also the dependencies:

- Profile
- PHP Filter
- Path

The Drupal menu should now list these entries.

15.7.3 Configuration

Then go into the settings of SOPAC.

- Configure the paths to the Locum and Insurge libraries
- Choose a URL prefix SOPAC, in my "catalog". Create a node with content like:

```
<?php  
print sopac_search_form('both');  
print theme('pages_catalog');
```

- Check the Input Format "PHP Code"
- Check Move to front page
- In URL path settings, set the SOPAC URL prefix you have chosen.

Go to the root of Drupal, a search form will appear.

Thinking to empty the cache of Drupal when something does not work.

Drupal offers a few blocks, not configured by default. Must specify on which page they should appear.

Chapter 16

Cron Jobs

16.1 Cron Jobs

The locations below assume a dev install which puts the crons in misc/, if you have a standard install you may want to look in bin/ for these files if you cannot find them in misc/

16.1.1 Search

16.1.1.1 Rebuild Index

Script path: misc/migration_tools/rebuild_zebra.pl

Does: Updates Zebra indexes with recently changed data.

Required by: Zebra

Frequency suggestion: every x minutes, (between 5-15 minutes) depending on performance needs

16.1.2 Circulation

16.1.2.1 Holds Queue

Script path: misc/cronjobs/holds/build_holds_queue.pl

Does: Updates holds queue report

Required by: **Holds Queue Report**

Frequency suggestion: every 1-4 hours

Description:

- A script that should be run periodically if your library system allows borrowers to place on-shelf holds. This script decides which library should be responsible for fulfilling a given hold request.

It's behavior is controlled by the system preferences **StaticHoldsQueueWeight** and **RandomizeHoldsQueueWeight**.

If you do not want all of your libraries to participate in the on-shelf holds fulfillment process, you should list the libraries that *do* participate in the process here by inputting all the participating library's branchcodes, separated by commas (e.g. "MPL,CPL,SPL,BML" etc.).

By default, the holds queue will be generated such that the system will first attempt to hold fulfillment using items already at the pickup library if possible. If there are no items available at the pickup library to fill a hold, build_holds_queue.pl will then use the list of libraries defined in StaticHoldsQueueWeight. If RandomizeHoldsQueueWeight is disabled (which it is by default), the script will assign fulfillment requests in the order the branches are placed in the StaticHoldsQueueWeight system preference.

For example, if your system has three libraries, of varying sizes (small, medium and large) and you want the burden of holds fulfillment to be on larger libraries before smaller libraries, you would want StaticHoldsQueueWeight to look something like "LRG,MED,SML".

If you want the burden of holds fulfillment to be spread out equally throughout your library system, simply enable RandomizeHoldsQueueWeight. When this system preference is enabled, the

order in which libraries will be requested to fulfill an on-shelf hold will be randomized each time the list is regenerated.

Leaving `StaticHoldsQueueWeight` empty is contraindicated at this time. Doing so will cause the `build_holds_queue` script to ignore `RandomizeHoldsQueueWeight`, causing the script to request hold fulfillment not randomly, but by alphabetical order.

16.1.2.1.1 Perl Documentation `GetBibsWithPendingHoldRequests`

```
my $biblionumber_oref = GetBibsWithPendingHoldRequests();
```

Return an arrayref of the biblionumbers of all bibs that have one or more unfilled hold requests.

GetPendingHoldRequestsForBib

```
my $requests = GetPendingHoldRequestsForBib($biblionumber);
```

Returns an arrayref of hashrefs to pending, unfilled hold requests on

the bib identified by `$biblionumber`. The following keys are present in each hashref:

- `biblionumber`
- `borrowernumber`
- `itemnumber`
- `priority`
- `branchcode`
- `reservedate`
- `reservenotes`
- `borrowerbranch`

The arrayref is sorted in order of increasing priority.

GetItemsAvailableToFillHoldRequestsForBib

```
my $available_items =
```

```
GetItemsAvailableToFillHoldRequestsForBib($biblionumber);
```

Returns an arrayref of items available to fill hold requests for the bib identified by `$biblionumber`.

An item is available to fill a hold request if and only if:

- it is not on loan
- it is not withdrawn
- it is not marked `notforloan`
- it is not currently in transit
- it is not lost
- it is not sitting on the hold shelf

MapItemsToHoldRequests

```
MapItemsToHoldRequests($hold_requests, $available_items);
```

CreatePickListFromItemMap

AddToHoldTargetMap

_get_branches_to_pull_from

Query system preferences to get ordered list of branches to use to fill hold requests.

16.1.2.2 Expired Holds

Script path: `misc/cronjobs/holds/cancel_expired_holds.pl`

Does: By default, this cron job will only automatically cancel holds where the user has set an expiration date. If the library is using the `ExpireReservesMaxPickUpDelay` and `ExpireReservesMaxPickUpDelayCharge` preferences then this script will also cancel holds that have been sitting on the hold shelf for too long and will (if the library does) charge the patron for not picking up the hold.

Frequency suggestion: daily

16.1.2.3 Unsuspend Holds

Script path: misc/cronjobs/holds/auto_unsuspend_holds.pl

Does: This script checks to find holds that should no longer be suspended and removes the suspension if the **AutoResumeSuspendedHolds** preference is set to 'allow'. This puts the patron back in to the queue where they were when the hold was suspended.

Frequency suggestion: daily

16.1.2.4 Fines

Script path: misc/cronjobs/fines.pl

Does: Calculates and posts fines to patron accounts.

Required by: **finesMode** system preference

Frequency suggestion: nightly

16.1.2.5 Long Overdues

Script path: misc/cronjobs/longoverdue.pl

Does: allows one to specify delays for changing items to different lost statuses, and optionally charge for them using the replacement price listed on the item record.

Frequency suggestion: nightly

16.1.2.5.1 Perl Documentation NAME

longoverdue.pl cron script to set lost statuses on overdue materials. Execute without options for help.

16.1.2.6 Track total checkouts

Script path: misc/cronjobs/update_totalissues.pl

Does: updates the biblioitems.totalissues field in the database with the latest tally of checkouts.

Frequency suggestion: nightly

16.1.2.6.1 Perl Documentation NAME

update_totalissues.pl

SYNOPSIS

update_totalissues.pl --use-stats

update_totalissues.pl --use-items

update_totalissues.pl --commit=1000

update_totalissues.pl --since='2012-01-01'

update_totalissues.pl --interval=30d

DESCRIPTION

This batch job populates bibliographic records' total issues count based on historical issue statistics.

--help Prints this help

-v | --verbose

Provide verbose log information (list every bib modified).

--use-stats

Use the data in the statistics table for populating total issues.

--use-items

Use items.issues data for populating total issues. Note that issues data from the items table does not respect the --since or --interval options, by definition. Also note that if both --use-stats and --use-items are specified, the count of biblios processed will be misleading.

-s | --since=DATE

Only process issues recorded in the statistics table since DATE.

-i | --interval=S

Only process issues recorded in the statistics table in the last N units of time. The interval should consist of a number with a one- letter unit suffix. The valid suffixes are h (hours), d (days), w (weeks), m (months), and y (years). The default unit is days.

--incremental

Add the number of issues found in the statistics table to the existing total issues count. Intended so that this script can be used as a cron job to update popularity information during low-usage periods. If neither `--since` or `--interval` are specified, incremental mode will default to processing the last twenty-four hours.

`--commit=N`

Commit the results to the database after every N records are processed.

`--test`

Only test the popularity population script.

WARNING

If the time on your database server does not match the time on your Koha server you will need to take that into account, and probably use the `--since` argument instead of the `--interval` argument for incremental updating.

CREDITS

This patch to Koha was sponsored by the Arcadia Public Library and the Arcadia Public Library Foundation in honor of Jackie Faust-Moreno, late director of the Arcadia Public Library.

AUTHOR

Jared Camins-Esakov <jcamins AT cpbibliography DOT com>

16.1.2.7 Generate Patron File for Offline Circulation

Script path: `misc/cronjobs/create_koc_db.pl`

Does: Generates the `borrowers.db` file for use with the [Koha Offline Circulation](#) tool

Frequency suggestion: weekly

16.1.3 Patrons

16.1.3.1 Anonymize Patron Data

Script path: `misc/cronjobs/batch_anonymise.pl`

Does: Used to anonymize patron data. This will remove borrowernumbers from circulation history so that the stats are kept, but the patron information is removed for privacy reasons.

16.1.3.2 Update Child to Adult Patron Type

Script path: `misc/cronjobs/j2a.pl`

Does: Convert juvenile/child patrons from juvenile patron category and category code to corresponding adult patron category and category code when they reach the upper age limit defined in the Patron Categories.

Frequency suggestion: nightly

16.1.3.2.1 Perl Documentation NAME

`juv2adult.pl` - convert juvenile/child patrons from juvenile patron category and category code to corresponding adult patron category and category code when they reach the upper age limit defined in the Patron Categories.

SYNOPSIS

```
juv2adult.pl [ -b=<branchcode> -f=<categorycode> -t=<categorycode> ]
```

Options:

`--help` brief help message

`--man` full documentation

`-v` verbose mode

`-n` take no action, display only

`-b <branchname>` only deal with patrons from this library/branch

`-f <categorycode>` change patron category from this category

`-t <categorycode>` change patron category to this category

`=head1` OPTIONS

`--help` Print a brief help message and exits.

`--man` Prints the manual page and exits.

`-v` Verbose. Without this flag set, only fatal errors are reported.

-n No Action. With this flag set, script will report changes but not actually execute them on the database.

-b changes patrons for one specific branch. Use the value in the branches.branchcode table.

-f **required** defines the juvenile category to update. Expects the code from categories.categorycode.

-t **required** defines the category juvenile patrons will be converted to. Expects the code from categories.categorycode.

DESCRIPTION

This script is designed to update patrons from juvenile to adult patron types, remove the guarantor, and update their category codes appropriately when they reach the upper age limit defined in the Patron Categories.

USAGE EXAMPLES

"juv2adult.pl" - Suggests that you read this help. :)

"juv2adult.pl" -b=<branchcode> -f=<categorycode> -t=<categorycode> - Processes a single branch, and updates the patron categories from fromcat to tocat.

"juv2adult.pl" -f=<categorycode> -t=<categorycode> -v -n - Processes all branches, shows all messages, and reports the patrons who would be affected. Takes no action on the database.

16.1.4 Notices

16.1.4.1 Message Queue

Script path: misc/cronjobs/process_message_queue.pl

Does: processes the message queue to send the check out, check in and hold filled emails and SMS message to users and sends outgoing emails to patrons. requires [EnhancedMessagingPreferences](#) to be on

Frequency suggestion: 1-4 hours

IMPORTANT

Item due and Advanced due notices are controlled by the [advance_notices cron](#).

16.1.4.2 Advanced Notice

Script path: misc/cronjobs/advance_notices.pl

Does: prepares "pre-due" notices and "item due" notices for patrons who request them prepares notices for patrons for items just due or coming due soon. requires [EnhancedMessagingPreferences](#) to be on

Frequency suggestion: nightly

NOTE

This script does not actually send the notices. It queues them in the [message queue](#) for later

16.1.4.2.1 Perl Documentation NAME

advance_notices.pl - cron script to put item due reminders into message queue

SYNOPSIS

./advance_notices.pl -c

or, in crontab: 0 1 * * * advance_notices.pl -c

DESCRIPTION

This script prepares pre-due and item due reminders to be sent to patrons. It queues them in the message queue, which is processed by the process_message_queue.pl cronjob. The type and timing of the messages can be configured by the patrons in their "My Alerts" tab in the OPAC.

METHODS

parse_letter

16.1.4.3 Overdue Notice

Script path: misc/cronjobs/overdue_notices.pl

Does: prepares messages to alert patrons of overdue messages (both via email and print)

Frequency suggestion: nightly

NOTE

This script does not actually send the notices. It queues them in the **message queue** for later or generates the HTML for later printing

16.1.4.3.1 Perl Documentation NAME

overdue_notices.pl - prepare messages to be sent to patrons for overdue items

SYNOPSIS

```
overdue_notices.pl [ -n ] [ -library <branchcode> ] [ -library <branchcode>... ] [ -max <number of
days> ] [ -csv [ <filename> ] ] [ -itemscontent <field list> ]
```

Options:

-help brief help message

-man full documentation

-n No email will be sent

-max <days> maximum days overdue to deal with

-library <branchname> only deal with overdues from this library (repeatable : several libraries can be given)

-csv <filename> populate CSV file

-html <filename> Output html to file

-itemscontent <list of fields> item information in templates

-borcat <categorycode> category code that must be included

-borcatout <categorycode> category code that must be excluded

OPTIONS

-help Print a brief help message and exits.

-man Prints the manual page and exits.

-v Verbose. Without this flag set, only fatal errors are reported.

-n Do not send any email. Overdue notices that would have been sent to the patrons or to the admin are printed to standard out. CSV data (if the -csv flag is set) is written to standard out or to any csv filename given.

-max Items older than max days are assumed to be handled somewhere else, probably the longoverdues.pl script. They are therefore ignored by this program. No notices are sent for them, and they are not added to any CSV files. Defaults to 90 to match longoverdues.pl.

-library

select overdues for one specific library. Use the value in the branches.branchcode table. This option can be repeated in order to select overdues for a group of libraries.

-csv Produces CSV data. if -n (no mail) flag is set, then this CSV data is sent to standard out or to a filename if provided. Otherwise, only overdues that could not be emailed are sent in CSV format to the admin.

-itemscontent

comma separated list of fields that get substituted into templates in places of the <<items.content>> placeholder. This defaults to issuedate,title,barcode,author

Other possible values come from fields in the biblios, items, and issues tables.

-borcat Repeatable field, that permit to select only few of patrons categories.

-borcatout

Repeatable field, permis to exclude some patrons categories.

-t | --triggered

This option causes a notice to be generated if and only if an item is overdue by the number of days defined in a notice trigger.

By default, a notice is sent each time the script runs, which is suitable for less frequent run cron script, but requires syncing notice triggers with the cron schedule to ensure proper behavior. Add the `--triggered` option for daily cron, at the risk of no notice being generated if the cron fails to run on time.

`-list-all`

Default `items.content` lists only those items that fall in the range of the currently processing notice. Choose `list-all` to include all overdue items in the list (limited by `-max` setting).

DESCRIPTION

This script is designed to alert patrons and administrators of overdue items.

Configuration

This script pays attention to the overdue notice configuration performed in the "Overdue notice/status triggers" section of the "Tools" area of the staff interface to Koha. There, you can choose which letter templates are sent out after a configurable number of days to patrons of each library. More information about the use of this section of Koha is available in the Koha manual.

The templates used to craft the emails are defined in the "Tools: Notices" section of the staff interface to Koha.

Outgoing emails

Typically, messages are prepared for each patron with overdue items. Messages for whom there is no email address on file are collected and sent as attachments in a single email to each library administrator, or if that is not set, then to the email address in the "KohaAdminEmailAddress" system preference.

These emails are staged in the outgoing message queue, as are messages produced by other features of Koha. This message queue must be processed regularly by the `misc/cronjobs/process_message_queue.pl` program.

In the event that the `-n` flag is passed to this program, no emails are sent. Instead, messages are sent on standard output from this program. They may be redirected to a file if desired.

Templates

Templates can contain variables enclosed in double angle brackets like `<<this>>`. Those variables will be replaced with values specific to the overdue items or relevant patron. Available variables are:

`<<bib>>`

the name of the library

`<<items.content>>`

one line for each item, each line containing a tab separated list of title, author, barcode, issuedate

`<<borrowers.*>>`

any field from the borrowers table

`<<branches.*>>`

any field from the branches table

CSV output

The `-csv` command line option lets you specify a file to which overdues data should be output in CSV format.

With the `-n` flag set, data about all overdues is written to the file. Without that flag, only information about overdues that were unable to be sent directly to the patrons will be written. In other words, this CSV file replaces the data that is typically sent to the administrator email address.

USAGE EXAMPLES

`"overdue_notices.pl"` - In this most basic usage, with no command line arguments, all libraries are processed individually, and notices are prepared for all patrons with overdue items for whom we have email addresses. Messages for those patrons for whom we have no email address are sent in a single attachment to the library administrator's email address, or to the address in the `KohaAdminEmailAddress` system preference.

`"overdue_notices.pl -n -csv /tmp/overdues.csv"` - sends no email and populates `/tmp/overdues.csv` with information about all overdue items.

`"overdue_notices.pl -library MAIN max 14"` - prepare notices of overdues in the last 2 weeks for the MAIN library.

SEE ALSO

The `misc/cronjobs/advance_notices.pl` program allows you to send messages to patrons in advance of their items becoming due, or to alert them of items that have just become due.

INTERNAL METHODS

These methods are internal to the operation of `overdue_notices.pl`.

`parse_letter`

parses the letter template, replacing the placeholders with data specific to this patron, biblio, or item named parameters:

letter - required hashref

borrowernumber - required integer

substitute - optional hashref of other key/value pairs that should be substituted in the letter content returns the "letter" hashref, with the content updated to reflect the substituted keys and values.

prepare_letter_for_printing

returns a string of text appropriate for printing in the event that an overdue notice will not be sent to the patron's email address. Depending on the desired output format, this may be a CSV string, or a human-readable representation of the notice.

required parameters:

letter

borrowernumber

optional parameters:

outputformat

16.1.4.4 Print Hold Notices

Script path: misc/cronjobs/gather_print_notices.pl

Does: looks through the message queue for hold notices that didn't go through because the patron didn't have an email address and generates a print notice

Frequency suggestion: nightly

16.1.4.5 Talking Tech

To learn more about setting up this third party product view the [Talking Tech Appendix](#).

16.1.4.5.1 Sending Notices File

Script path: misc/cronjobs/thirdparty/TalkingTech_itiva_outbound.pl
Does: Script to generate Spec C outbound notifications file for Talking Tech i-tiva phone notification system.

Required by: [TalkingTechItivaPhoneNotification](#)

Frequency suggestion: nightly

16.1.4.5.1.1 Perl Documentation USAGE

TalkingTech_itiva_outbound.pl

TalkingTech_itiva_outbound.pl --type=OVERDUE -w 0 -w 2 -w 6 --output=/tmp/talkingtech/outbound.csv

TalkingTech_itiva_outbound.pl --type=RESERVE --type=PREOVERDUE --lang=FR

Script to generate Spec C outbound notifications file for Talking Tech i-tiva phone notification system.

--help -h

Prints this help

-v Provide verbose log information.

--output -o

Destination for outbound notifications file (CSV format). If no value is specified, output is dumped to screen.

--lang

Sets the language for all outbound messages. Currently supported values are EN, FR and ES. If no value is specified, EN will be used by default.

--type

REQUIRED. Sets which messaging types are to be used. Can be given multiple times, to specify multiple types in a single output file. Currently supported values are RESERVE, PREOVERDUE and OVERDUE. If no value is given, this script will not produce any outbound notifications.

--waiting-hold-day -w

OPTIONAL for --type=RESERVE. Sets the days after a hold has been set to waiting on which to call. Use switch as many times as desired. For example, passing "-w 0 -w 2 -w 6" will cause calls to be placed on the day the hold was set to waiting, 2 days after the waiting date, and 6 days after. See example above. If this switch is not used with --type=RESERVE, calls will be placed every day until the waiting reserve is picked up or canceled.

--library-code --code -c

OPTIONAL The code of the source library of the message. The library code is used to group notices together for consortium purposes and apply library specific settings, such as prompts, to those notices. This field can be blank if all messages are from a single library.

16.1.4.5.2 Receiving Notices File

Script path: misc/cronjobs/thirdparty/TalkingTech_itiva_inbound.pl

Does: Script to process received Results files for Talking Tech i-tiva phone notification system.

Required by: [TalkingTechItivaPhoneNotification](#)

Frequency suggestion: nightly

16.1.4.5.2.1 Perl Documentation USAGE

TalkingTech_itiva_inbound.pl

TalkingTech_itiva_inbound.pl -v --input=/tmp/talkingtech/results.csv

Script to process received Results files for Talking Tech i-tiva phone notification system.

--help -h

Prints this help

-v Provide verbose log information.

--input -i

REQUIRED. Path to incoming results file.

16.1.5 In Processing/Book Cart

Script path: misc/cronjobs/cart_to_shelf.pl

Does: Updates all items with a location of CART to the item's permanent location.

Required by: [NewItemDefaultLocation](#), [InProgressingToShelvingCart](#), & [ReturnToShelvingCart](#) system preferences

Frequency suggestion: hourly

16.1.5.1 Perl Documentation

NAME

cart_to_shelf.pl cron script to set items with location of CART to original shelving location after X hours. Execute without options for help.

16.1.6 Catalog

16.1.6.1 Check URLs

Script path: misc/cronjobs/check-url.pl

Does: checks URLs in 856\$u field. Script output can now be formatted in CSV or HTML. The HTML version links directly to MARC biblio record editor.

Frequency suggestion: monthly

Learn more: http://wiki.koha-community.org/wiki/Check-url_enhancements

16.1.6.1.1 Perl Documentation NAME

C4::URL::Checker - base object for checking URL stored in Koha DB

SYNOPSIS

```
use C4::URL::Checker;

my $checker = C4::URL::Checker->new( );
$checker->{ host_default } = 'http://mylib.kohalibrary.com';
my $checked_urls = $checker->check_biblio( 123 );
foreach my $url ( @$checked_urls ) {
    print "url:          ", $url->{ url          A }, "\n",
          "is_success:   ", $url->{ is_success  }, "\n",
          "status:       ", $url->{ status     }, "\n";
}
```

FUNCTIONS

new

Create a URL Checker. The returned object can be used to set default host variable :

```
my $checker = C4::URL::Checker->new( );
    $checker->{ host_default } = 'http://mylib.kohalibrary.com';
```

check_biblio

Check all URL from a biblio record. Returns a pointer to an array containing all URLs with checking for each of them.

```
my $checked_urls = $checker->check_biblio( 123 );
```

With 2 URLs, the returned array will look like that:

```
[
  {
    'url' => 'http://mylib.tamil.fr/img/62265_0055B.JPG',
    'is_success' => 1,
    'status' => 'ok'
  },
  {
    'url' => 'http://mylib.tamil.fr//img/62265_0055C.JPG',
    'is_success' => 0,
    'status' => '404 - Page not found'
  }
],
```

NAMEcheck-url.pl - Check URLs from 856\$u field.**USAGE**

check-url.pl [--verbose|--help] [--host=http://default.tld]

Scan all URLs found in 856\$u of bib records and display if resources are available or not.**PARAMETERS**

--host=http://default.tld

Server host used when URL doesn't have one, ie doesn't begin with 'http:'. For example, if --host=http://www.mylib.com, then when 856\$u contains 'img/image.jpg', the url checked is: http://www.mylib.com/img

--verbose|-v

Outputs both successful and failed URLs.

--html

Formats output in HTML. The result can be redirected to a file accessible by http. This way, it's possible to link directly to biblio record in edit mode. With this parameter --host-pro is required.

--host-pro=http://koha-pro.tld

Server host used to link to biblio record editing page.

--help|-h

Print this help page.

16.1.6.2 Merge Authorities

Script path: misc/migration_tools/merge_authorities.pl

Does: Updates biblio data with changes to authorities records

Required by: **dontmerge** system preference

Frequency suggestion: nightly

16.1.6.3 Serials Update

Script path: misc/cronjobs/serialsUpdate.pl

Does: checks if there is a "late" issue on active subscriptions, and if there is, the script will set it as late, and add the next one as expected.

Frequency suggestion: nightly

16.1.7 OPAC

16.1.7.1 RSS Feeds

Script path: misc/cronjobs/rss/rss.pl

Does: Produces an RSS XML document for any SQL query (not used for search results RSS feed).

[Learn more.](#)

Frequency suggestion: hourly

16.1.7.2 Authorities Browser

Script path: misc/cronjobs/build_browser_and_cloud.pl

Does: Generate content for authorities browse in OPAC

Required by: **OpacBrowser** system preference

IMPORTANT

This preference and cron job should only be used on French systems.

16.1.7.3 Subject/Author Clouds

Script path: misc/cronjobs/cloud-kw.pl

Does: Generates HTML keywords clouds from Koha Zebra indexes. misc/cronjobs/cloud-sample.conf has a sample of how this script operates.

Frequency: This is the type of script you can run once a month or so, the content generated isn't going to change very much over time.

16.1.7.3.1 Perl Documentation NAME

cloud-kw.pl - Creates HTML keywords clouds from Koha Zebra Indexes

USAGE

cloud-kw.pl [--verbose | --help] --conf=cloud.conf

Creates multiple HTML files containing keywords cloud with top terms sorted by their logarithmic weight. cloud.conf is a YAML configuration file driving cloud generation process.

PARAMETERS

--conf=configuration file

Specify configuration file name

--verbose | -v

Enable script verbose mode.

--help | -h

Print this help page.

CONFIGURATION

Configuration file looks like that:

```
---
# Koha configuration file for a specific installation
# If not present, defaults to KOHA_CONF
KohaConf: /home/koha/mylibray/etc/koha-conf.xml
# Zebra index to scan
ZebraIndex: Author
# Koha index used to link found keywords with an opac search URL
KohaIndex: au
# Number of top keyword to use for the cloud
Count: 50
# Include CSS style directives with the cloud
# This could be used as a model and then CSS directives are
# put in the appropriate CSS file directly.
Withcss: Yes
# HTML file where to output the cloud
```

```

Output: /home/koha/mylibrary/koharoot/koha-tmpl/cloud-author.html
---
KohaConf: /home/koha/yourlibray/etc/koha-conf.xml
ZebraIndex: Subject
KohaIndex: su
Count: 200
Withcss: no
Output: /home/koha/yourlibrary/koharoot/koha-tmpl/cloud-subject.html

```

IMPROVEMENTS

Generated top terms have more informations than those outputted from the time being. Some parameters could be easily added to improve this script:

WithCount

In order to output terms with the number of occurrences they have been found in Koha Catalogue by Zebra.

CloudLevels

Number of levels in the cloud. Now 24 levels are hardcoded.

Weighting

Weighting method used to distribute terms in the cloud. We could have two values: Logarithmic and Linear. Now it's Logarithmic by default.

Order

Now terms are outputted in the lexical order. They could be sorted by their weight.

16.1.8 System Administration

16.1.8.1 Clean up Database

Script path: misc/cronjobs/cleanup_database.pl

Does: Truncates the sessions table, cleans out old zebraqueue entries, action logs and staged MARC files.

16.1.9 Acquisitions

16.1.9.1 Clean up old suggestions

Script path: misc/cronjobs/purge_suggestions.pl

Does: Removes old (defined by you) suggestions from the suggestion management area.

16.1.10 Deprecated scripts

These should not be run without modification:

Script path: misc/cronjobs/update_items.pl

Script path:misc/cronjobs/smsoverdues.pl

Script path:misc/cronjobs/notifyMailsOp.pl

Script path:misc/cronjobs/reservefix.pl

Script path:misc/cronjobs/zebraqueue_start.pl

Chapter 17

Web Services

17.1 OAI-PMH

17.1.1 Sample OAI Conf File

```
format:

Chapter 18

Using the SRU server

18.1 Using the SRU server

Koha implements the Search/Retrieve via URL (SRU) protocol. More information about the protocol itself can be found at <http://www.loc.gov/standards/sru/>. The version implemented is version 1.1.

18.1.1 Explain

If you want to have information about the implementation of SRU on a given server, you should have access to the Explain file using a request to the server without any parameter. Like `<http://myserver.com:9999/biblios/`. The response from the server is an XML file that should look like the following and will give you information about the default settings of the SRU server.

```
<zs:explainResponse>
  <zs:version>1.1</zs:version>
  <zs:record>
    <zs:recordSchema>http://explain.z3950.org/dtd/2.0/</zs: recordSchema>
    <zs:recordPacking>xml</zs:recordPacking>
    <zs:recordData>
      <explain xml:base="zebradb/explain-biblios.xml">
        <!--

18.1.2 Search

This url : <http://myserver.com:9999/biblios?version=1.1&operation=searchRetrieve&query=reefs> is composed of the following elements:

- base url of the SRU server : <http://myserver.com:9999/biblios?>
- search part with the 3 required parameters : version, operation and query. The parameters within the search part should be of the key=value form, and can be combined with the & character.

One can add optional parameters to the query, for instance maximumRecords indicating the maximum number of records to be returned by the server. So <http://myserver.com:9999/biblios?version=1.1&operation=searchRetrieve&query=reefs&maximumRecords=5> will only get the first 5 results results from the server.

<http://www.loc.gov/standards/sru/sru1-1archive/search-retrieve-operation.html> gives more details about the search operations and in particular the list of optional parameters for searching.

18.1.2.1 More details about Search

The "operation" key can take two values: scan or searchRetrieve.

If operation=searchRetrieve, then the search key should be query. As in : operation=searchRetrieve&query=reefs

If operation=scan, then the search key should be scanClause. As in : operation=scan&scanClause=reefs etc/zebradb/biblios/etc/bib1.att defines Zebra/3950 indexes that exist on your system. For instance you'll see that we have indexes for Subject and for Title: att 21 Subject and att 4 Title respectively.

In the pqf.properties file located under etc/zebradb/pqf.properties I see that an access point already uses my Subject index (index.dc.subject = 1=21) while another uses my Title index (index.dc.title = 1=4) I know this is my Subject index because as I've seen just before in my bib1.att file, it's called with =1=21 in Z3950: so index.dc.subject = 1=21 correctly points to my Subject index. And Title was called with 1=4 so index.dc.title = 1=4 correctly points to my Title index. I can now construct my query just like I would in a search box, just preceding it with the "query" key: query=Subject=reefs and Title=coral searches "reefs" in the subject and "coral" in the title. The full url would be <http://myserver.com:9999/biblios?version=1.1&operation=searchRetrieve&query=Subject=reefs&Title=coral> If I want to limit the result set to just 5 records, I can do <http://myserver.com:9999/biblios?version=1.1&operation=searchRetrieve&query=Subject=reefs&Title=coral&maximumRecords=5>

I can also play with truncate, relations, etc. Those are also defined in my pqf.properties file. I can see for instance the position properties defined as:

```

position.first           = 3=1 6=1
# "first in field"
position.any            = 3=3 6=1
# "any position in field"

```

So as an example if I want "coral" to be at the beginning of the title, I can do this query : <http://myserver.com:9999/first>

18.1.3 Retrieve

My search for http://univ_lyon3.biblioire.com:9999/biblios?version=1.1&operation=searchRetrieve&query=coralreefs&maximumRecords=1 retrieves just on record. The response looks like this:

```

Appendix B

Configuring Receipt Printers

The following instructions are for specific receipt printers, but can probably be used to help with setup of other brands as well.

B.1 For Epson TM-T88III (3) & TM-T88IV (4) Printers

B.1.1 In the Print Driver

For these instructions, we are using version 5,0,3,0 of the Epson TM-T88III print driver; the EPSON TM-T88IV version is ReceiptE4. Register at the [EpsonExpert Technical Resource Center website](#) to gain access to the drivers; go to Technical Resources, then choose the printer model from the Printers drop-down list.

Click Start > Printers and Faxes > Right click the receipt printer > Properties:

- Advanced Tab, click Printing Defaults button
- Layout Tab: Paper size: Roll Paper 80 x 297mm
- TM-T88III: Layout Tab: Check Reduce Printing and Fit to Printable Width
- TM-T88IV: Check Reduced Size Print; Click OK on the popup window that appears. Fit to Printable Width should be automatically selected.
- OK your way out of there.

B.1.2 In Firefox

Under File > Page Setup:

- Shrink to fit page on Format & Options tab
- 0,0,0,0 for Margins on Margins & Header/Footer Tab. This makes the receipts use all available space on the paper roll.
- Set all Headers/Footers to -blank-. This removes all of the gunk you might normally find on a print from Firefox, such as the URL, number of pages, etc.
- Click OK

Set the default printer settings in Firefox so you don't see a "Print" dialog:

- Go to File > Print
- Set the Printer to the receipt printer.
- Click the Advanced (or Properties) button
- Layout Tab: Paper size: Roll Paper 80 x 297mm
- TM-T88III: Layout Tab: Check Reduce Printing and Fit to Printable Width

- TM-T88IV: Check Reduced Size Print; click OK on the popup window that appears. Fit to Printable Width should be automatically selected.
- OK your way out, go ahead and print whatever page you are on.
- Type about:config, in the address bar. Click "I'll be careful, I promise!" on the warning message.
- Type, print.always in Filter.
- Look for print.always_print_silent.
 - If the preference is there then set the value to true.
- If the preference is not there (and it shouldn't be in most browsers) you have to add the preference.
 - Right click the preference area and select New > Boolean
 - Type print.always_print_silent in the dialog box and set the value to True. This sets the print settings in Firefox to always use the same settings and print without showing a dialog box.

WARNING

Setting the print.always_print_silent setting in about:config **DISABLES** the ability to choose a printer in Firefox.

B.2 For Epson TM-T88II (2) Printers

Register at the [EpsonExpert Technical Resource Center website](#) to gain access to the drivers; go to Technical Resources, then choose the printer model from the Printers drop-down list.

B.2.1 In Firefox

Under File > Page Setup:

- Shrink to fit page on Format & Options tab
- 0,0,0,0 for Margins on Margins & Header/Footer Tab. This makes the receipts use all available space on the paper roll.
- Set all Headers/Footers to -blank-. This removes all of the gunk you might normally find on a print from Firefox, such as the URL, number of pages, etc.
- Click OK

Set the default printer settings in Firefox so you don't see a "Print" dialog:

- Go to File > Print
- Set the Printer to the receipt printer.
- Print whatever page you are on.
- Type about:config, in the address bar. Click "I'll be careful, I promise!" on the warning message.
- Type, print.always in Filter.
- Look for, print.always_print_silent.
 - If the preference is there then set the value to true.
- If the preference is not there (and it shouldn't be in most browsers) you have to add the preference.

- Right click the preference area and select New > Boolean
- Type, print.always_print_silent in the dialog box and set the value to True. This sets the print settings in Firefox to always use the same settings and print without showing a dialog box.

WARNING

Setting the print.always_print_silent setting in about:config **DISABLES** the ability to choose a printer in Firefox.

B.3 For Star SP542 Printers

B.3.1 Installing the Printer

While the following comments are based on the Star SP542 receipt printer, they probably apply to all printers in the SP5xx series.

The Star SP542 receipt printer works well with Koha and **Firefox on Windows XP SP3**. This printer, with either the parallel or USB interface, is fairly easy to install and configure. You will need the following executable file which is available from numerous places on the Internet:

linemode_2k-xp_20030205.exe

This executable actually does all of the installation; you will not need to use the Microsoft Windows "Add Printer" program. We recommend that when installing, the option for the software monitor not be selected; we have experienced significant pauses and delays in printing with it. Instead, simply choose to install the receipt printer without the monitor.

Additionally, the install program may not put the printer on the correct port, especially if using the USB interface. This is easily corrected by going to "Start -> Printers and Faxes -> Properties for the SP542 printer -> Ports", then check the appropriate port.

A reboot may be required, even if not indicated by the installation software or the operating system.

Windows 7 users should refer to this page: <http://www.starmicronics.com/supports/win7.aspx>.

B.4 Configuring Firefox to Print to Receipt Printer

- Open File > Page Setup
- Make all the headers and footers blank
- Set the margins to 0 (zero)
- In the address bar of Firefox, type about:config
- Search for print.always_print_silent and double click it
- Change it from false to true
 - This lets you skip the Print pop up box that comes up, as well as skipping the step where you have to click OK, automatically printing the right sized slip.
- If print.always_print_silent does not come up
 - Right click on a blank area of the preference window
 - Select new > Boolean
 - Enter "print.always_print_silent" as the name (without quotes)
 - Click OK
 - Select true for the value
- You may also want to check what is listed for print.print_printer
 - You may have to choose Generic/Text Only (or whatever your receipt printer might be named)

Appendix C

Example Notice

Nicole Engard

410 Library Rd.

Philadelphia, PA 19107

Dear Nicole Engard (23529000035726),

According to our records, at the time of this notice, you have items that are overdue. Please return or renew them as soon as possible to avoid increasing late fines.

If you have registered a password with the library, you may use it with your library card number to renew online.

If you believe you have returned the items below please call at and library staff will be happy to help resolve the issue.

The following item(s) are currently overdue:

07/08/2008 Creating drug-free schools and communities : 502326000054 Fox, C. Lynn.

06/27/2008 Eating fractions / 502326000022 McMillan, Bruce.

Sincerely, Library Staff

Appendix D

Sample Serials

D.1 Reader's Digest (0034-0375)

- Published 12 times a year (monthly)

- The Volume number changes every 6 months and the numbers continues on (requires an advanced pattern).

Serials planning

First issue publication date:

Frequency: Required

Manual history:

Numbering pattern:

	Volume	Number
Starting with:	<input type="text" value="173"/>	<input type="text" value="1035"/>
Rollover at:		<input type="text" value="1040"/>

Subscription start date: Required

Subscription length: (enter amount in numerals) Required

Subscription end date:

Numbering formula:

Show/Hide Advanced Pattern

Advanced Prediction Pattern			
	X	Y	Z
Add	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text"/>
once every	<input type="text" value="1040"/>	<input type="text" value="1"/>	<input type="text"/>
When more than	<input type="text" value="9999999"/>	<input type="text" value="1040"/>	<input type="text"/>
inner counter	<input type="text" value="173"/>	<input type="text" value="1035"/>	<input type="text"/>
Set back to	<input type="text" value="0"/>	<input type="text" value="1"/>	<input type="text"/>
Begins with	<input type="text" value="173"/>	<input type="text" value="1035"/>	<input type="text"/>

D.2 People Weekly (1076-0091)

- Published weekly
 - The website says "on Saturday except the first week of August, Thanksgiving week, the first and last weeks of the year" but this does not match the pattern for 2007 or 2008
- In the Jul-Dec there are 26 issues
- In the Jan-Jun there are 25 issues (no issue for the first week of January)

Since the irregularity on the first # 26 does not skip a week, this would be set up as to roll over on issue 25. The 26th issue in the second half of the year would have to be received as a supplemental.

The irregularity check will complain that 52 issues were expected, but 25 entered. The current irregularity check can only check that the first position of the numbering pattern matches the expected issue count of the periodicity. But we do need to trigger the rollover on the volume, so we need to define the last two weeks of the year as irregularities. So we receive 50 issues the first 50 weeks, then one supplemental issue in week 51, which we have to define the enumeration for, then the next predicted issue will be the following year's first week.

D.3 Et-Mol

This journal is published with the following rules:

- 6 issues a year (every 2 months)
- year changes every 6 issues
- we start in 2011
- the issue number goes up indefinitely
- starting from issue 215

The planning would look like this:

Serials planning

First issue publication date:

Frequency: *Required*

Manual history:

Numbering pattern:

Subscription start date: *Required*

Subscription length: (enter amount in numerals) *Required*

Subscription end date:

Numbering formula:

Advanced Prediction Pattern			
	X	Y	Z
Add	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text" value="0"/>
once every	<input type="text" value="6"/>	<input type="text" value="1"/>	<input type="text" value="0"/>
When more than	<input type="text" value="99999"/>	<input type="text" value="99999"/>	<input type="text" value="0"/>
inner counter	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
Set back to	<input type="text" value="0"/>	<input type="text" value="1"/>	<input type="text" value="0"/>
Begins with	<input type="text" value="2011"/>	<input type="text" value="215"/>	<input type="text" value="0"/>

D.4 Backpacker (0277-867X)

Published 9 times a year irregularly. The issues continues while the volume and number rolls over every 9 issues. If you're holding Volume 41, Number 3, Issue 302 in your hand the prediction would look like

Advanced prediction pattern			
	X	Y	Z
Add	1	1	1
once every	9	1	1
When more than	9999999	9	9999999
inner counter	2	2	0
Set back to	0	1	1
Begins with	41	3	302

this:

And the received issues would number like this:

- v. 41, no. 3, iss. 302
- v. 41, no. 4, iss. 303
- v. 41, no. 5, iss. 304
- v. 41, no. 6, iss. 305
- v. 41, no. 7, iss. 306
- v. 41, no. 8, iss. 307
- v. 41, no. 9, iss. 308
- v. 42, no. 1, iss. 309
- v. 42, no. 2, iss. 310
- v. 42, no. 3, iss. 311
- v. 42, no. 4, iss. 312

D.5 Keats-Shelley Journal (0453-4387)

This journal is published once per year in July. The numbering follows this pattern:

- Vol. 61 2013
- Vol. 62 2014
- Vol. 63 2015

Setup should look like this (if you're starting in July 2013):

Serials planning

First issue publication date:

Frequency:

Manual history:

Numbering pattern:

	Year	Number
Starting with:	<input type="text" value="2013"/>	<input type="text" value="61"/>
Rollover at:		<input type="text" value="99999"/>

Warning irregularity detected
 1 issues expected, 9999999 were entered

You seem to have indicated more issues p

Advanced prediction pattern			
	X	Y	Z
Add	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text"/>
once every	<input type="text" value="1"/>	<input type="text" value="1"/>	<input type="text"/>
When more than	<input type="text" value="9999999"/>	<input type="text" value="9999999"/>	<input type="text"/>
inner counter	<input type="text" value="60"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
Set back to	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text"/>
Begins with	<input type="text" value="2013"/>	<input type="text" value="61"/>	<input type="text"/>

Subscription start date: *Required*

Subscription length: (enter amount in numerals) *Required*

Subscription end date:

Numbering formula:

TIP

The prediction test will not show the right pattern, but once you receive you will see that the above does generate the right pattern.

Appendix E

Using Koha as a Content Management System (CMS)

E.1 Setup

These are instructions for taking a default install of Koha and allowing it to function as a little content management system. This will allow a library to publish an arbitrary number of pages based on a template. This example uses the template for the main opac page, but you could just as well use any template you wish with a bit more editing. This may be appropriate if you have a small library, want to allow librarians to easily add pages, and do not want to support a complete CMS.

- Copy `/usr/share/koha/opac/cgi-bin/opac/opac-main.pl` to `/usr/share/koha/opac/cgi-bin/opac/pages.pl` (in the same directory)
- Edit `pages.pl` in an editor
- At approximately line 36 change this code:

```
template_name => "opac-main.tt",
```

- To this code:

```
template_name => "pages.tt",
```

- At approximately line 54 after this code:

```
$template->param(  
    koha_news      => $all_koha_news,  
    koha_news_count => $koha_news_count  
);
```

- Add these lines:

```
my $page = "page_" . $cgi->param('p');           # go for "p" value ←  
    in URL and do the concatenation  
my $preference = C4::Context->preference($page); # Go for ←  
    preference  
$template->{VARS}->{'page_test'} = $preference   # pass variable to ←  
    template pages.tt
```

- Note `pages.pl` file must have Webserver user execution permissions, you can use `chmod` command if you are actually logged in as such user:

```
$chmod 711 pages.pl
```

- Copy `/usr/share/koha/opac/htdocs/opac-tmpl/prog/en/modules/opac-main.tt` to `/usr/share/koha/opac/htdocs/opac-tmpl/prog/en/modules/pages.tt`

- Edit `/usr/share/koha/opac/htdocs/opac-tmpl/prog/en/modules/pages.tt`
- At approximately line 38, change this:

```
[% IF ( OpacMainUserBlock ) %]<div id="opacmainuserblock" class="container" ←
">[% OpacMainUserBlock %]</div>[% END %]
```

To this:

```
[% IF ( page_test ) %]<div id="opacmainuserblock" class="container">[% ←
page_test %]</div>[% END %]
```

- In the browser go to Home > Administration > System Preferences > Local Use and add a New Preference called "page_test"
- Fill it out as so
 - Explanation: test page for pages tiny cms
 - Variable: page_test
 - Value: Lorem ipsum
 - Click the TextArea link (or enter "TextArea" into the input field below it)
 - variable options (last field): 80|50
- In a browser go to `http://youraddress/cgi-bin/koha/pages.pl?p=test` The page should come up with the words "Lorem ipsum" in the main content area of the page. (replace "youraddress" with localhost, 127.0.0.1, or your domain name depending on how you have Apache set up.)
- To add more pages simply create a system preference where the title begins with "page_" followed by any arbitrary letters. You can add any markup you want as the value of the field. Reference the new page by changing the value of the "p" parameter in the URL.

To learn more visit the Koha wiki page on this topic: http://wiki.koha-community.org/wiki/Koha_as_a_CMS

E.1.1 Troubleshooting

If you have problems check file permissions on `pages.pl` and `pages.tmpl`. They should have the same user and group as other Koha files like `opac-main.pl`.

E.1.2 Bonus Points

Instead of using the address `http://youraddress/cgi-bin/koha/pages.pl?p=test` you can shorten it to `http://youraddress/pages.pl?p=test` Just open up `/etc/koha/koha-httpd.conf` and add the follow at about line 13:

```
ScriptAlias /pages.pl "/usr/share/koha/opac/cgi-bin/opac/pages.pl"
```

Then restart Apache.

E.2 Usage

After setting up Koha as a CMS you can create new pages following these instructions:

E.2.1 Adding Pages

To add a new page you need to add a system preference under Local Use.

- Get there: More > Administration > Global System Preferences > Local Use
- Click 'New Preference'
- Enter in a description in the Explanation field

- Enter a value that starts with 'page_' in the Variable field
- Enter starting HTML in the Value field

Add a system preference

Explanation:

Variable:

Value:

[Cancel](#)

- Set the Variable Type to Textarea
- Set the Variable options to something like 20|20 for 20 rows and 20 columns

Koha internal

Note: you should have no reasons to modify the following default values

Variable type:

(Choice, YesNo, Integer, Textarea, Float, Themes, Languages, or ClassSources)

Variable options:

(a choice list for Choice (separated by |) or cols|rows for Textarea)

E.2.2 Viewing your page

You can view your new page at <http://YOUR-OPAC/cgi-bin/koha/pages.pl?p=PAGENAME> where PAGENAME is the part you entered after 'page_' in the Variable field.

E.2.3 Example

This process can be used to create recommended reading lists within Koha. So once the code changes have been made per the instructions on 'Koha as a CMS' you go through the 'Adding a New Page' instructions above to great a page for 'Recommended Reading Lists'

Modify a system preference

Explanation:

Variable: page_recommend

Value:

[Cancel](#)

Koha internal

Note: you should have no reasons to modify the following default values

Variable type:

(Choice, YesNo, Integer, Textarea, Float, Themes, Languages, or ClassSources)

Variable options:

(a choice list for Choice (separated by |) or cols|rows for Textarea)

Next we need to create pages for our various classes (or categories). To do this, return to the 'Adding a New Page' section and create a preference for the first class.

Add a system preference

Explanation:

Variable:

Value:

[Cancel](#)

Koha internal

Note: you should have no reasons to modify the following default values

Variable type:

(Choice, YesNo, Integer, Textarea, Float, Themes, Languages, or ClassSources)

Variable options:

(a choice list for Choice (separated by |) or cols|rows for Textarea)

Next you'll want to link your first page to your new second page, go to the `page_recommend` preference and click 'Edit.' Now you want to edit the HTML to include a link to your newest page:

Local Use preferences

Preference	Explanation	Value	Edit	Delete
page_recommend	For recommended Reading Links	<pre> Class 101 Class 110 </pre>	Edit	Delete

E.2.4 Live Examples

- The Crawford Library at Dallas Christian College is using this method for their recommended reading lists: <http://opac.dallas.edu/>

Appendix F

Resetting the Koha Database

These notes on how to reset the database for Koha 3 were derived from the following email thread: <http://lists.koha-community.org/pipermail/koha-devel/2009-January/008939.html>

Resetting the database may be useful if you install Koha with the sample data, and then wish to use real data without reinstalling the software.

F.1 Truncate Tables

Use your preferred MySQL client to **truncate** the following tables:

- bibio
- biblioitems
- items
- auth_header
- sessions
- zebraqueue

F.2 Reset the Zebra Index

Run the following commands to reset the authorities and biblios Zebra indices.

```
$ zebraidx -c /etc/koha/zebradb/zebra-authorities-dom.cfg -g iso2709 -d ↵  
  authorities init  
$ zebraidx -c /etc/koha/zebradb/zebra-biblios.cfg -g iso2709 -d biblios init
```

Koha XSLT Item Types

When you have any of the XSLT system preferences ([OPACXSLTDetailsDisplay](#), [OPACXSLTResultsDisplay](#), [XSLTDetailsDisplay](#), and/or [XSLTResultsDisplay](#)) along with the [DisplayOPACIconsXSLT](#) preference turned on you will see item type icons on the related screen.

IMPORTANT

These images are coming from values found in your leader, if your leader is not cataloged properly it might be best to turn off the [DisplayOPACIconsXSLT](#) preference (which can be done while leaving the other XSLT preferences turned on).

Type:  Book;

- Book [BK]
 - leader6 = a (and one of the leader7 values below)
 - * leader7 = a
 - * leader7 = c
 - * leader7 = d
 - * leader7 = m
 - leader6 = t

Type:  Computer File;

- Computer File [CF]

- leader6 = k
- leader6 = r

Type:  Kit

- Kit

- leader6 = o

Appendix I

MarcEdit

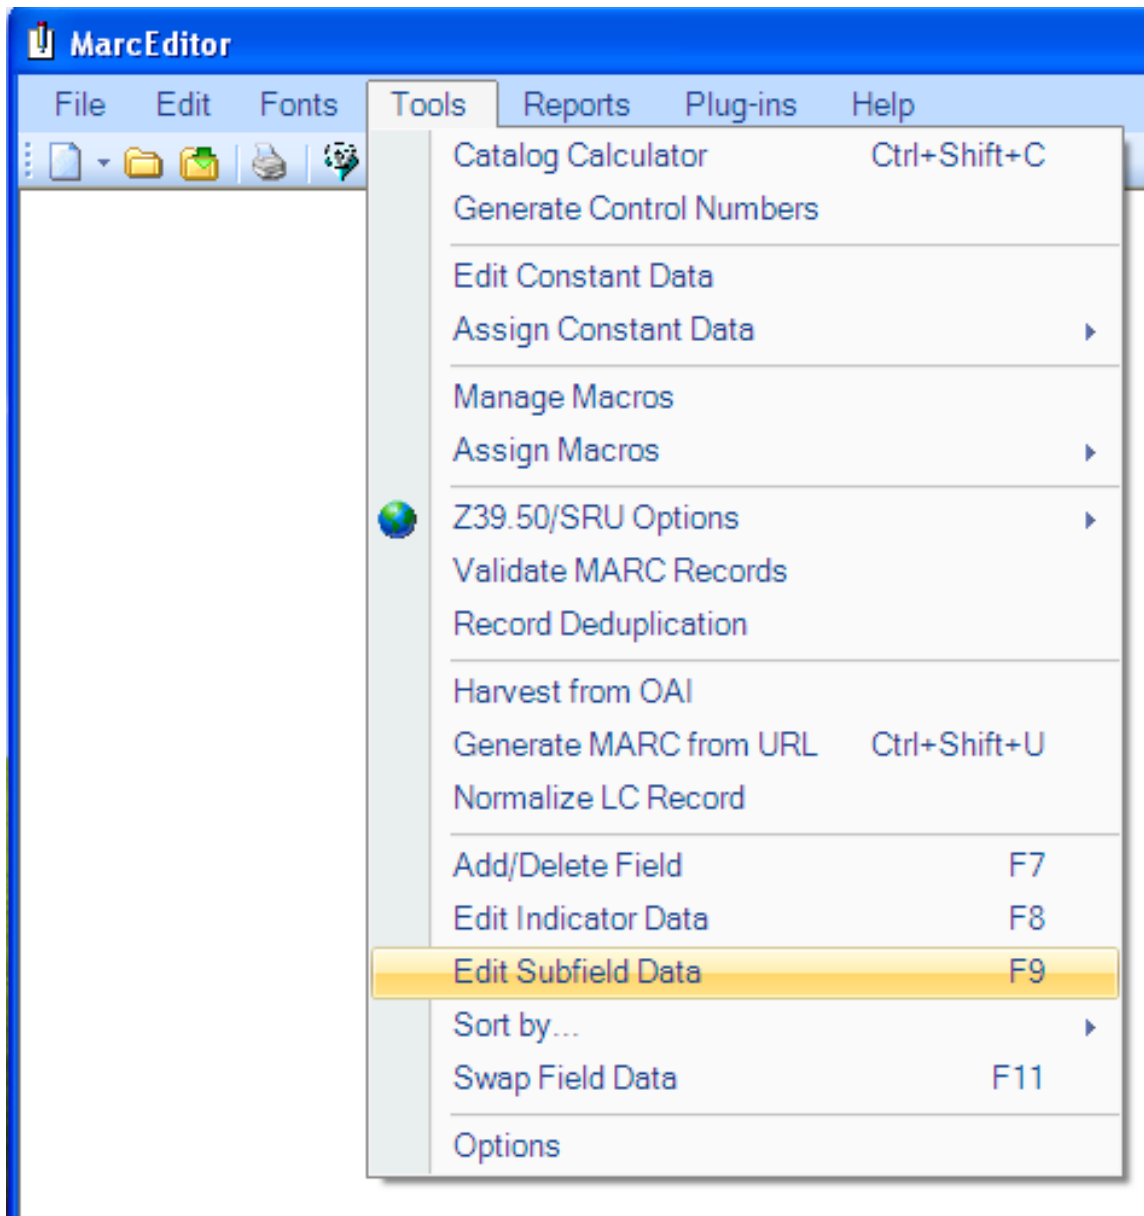

I.1 Adding a prefix to call numbers

When bringing data into Koha, you may want to first clean it up. One common action among Koha users is to add a prefix to the call number.

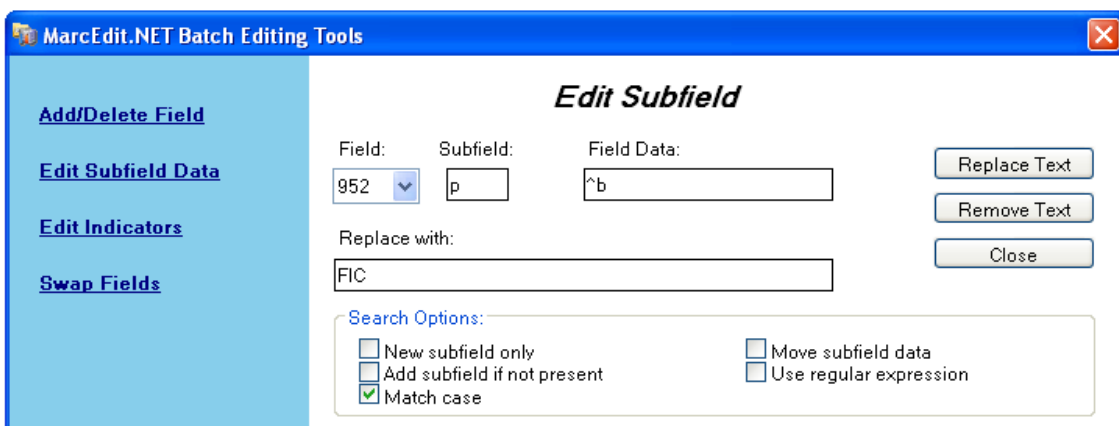

- Open MarcEdit

- Click 'MarcEditor'
- Go to Tools > Edit Subfield Data

- To prepend data the special character is: ^b To simply prepend data to the beginning of a subfield, add ^b to the Field Data: textbox and the data to be appended in the Replace

- To prepend data to the beginning of the subfield while replacing a text string, add ^b[string to replace] to the Field Data textbox and the data to be appended in the Replace With textbox.

I.2 Importing Excel data into Koha

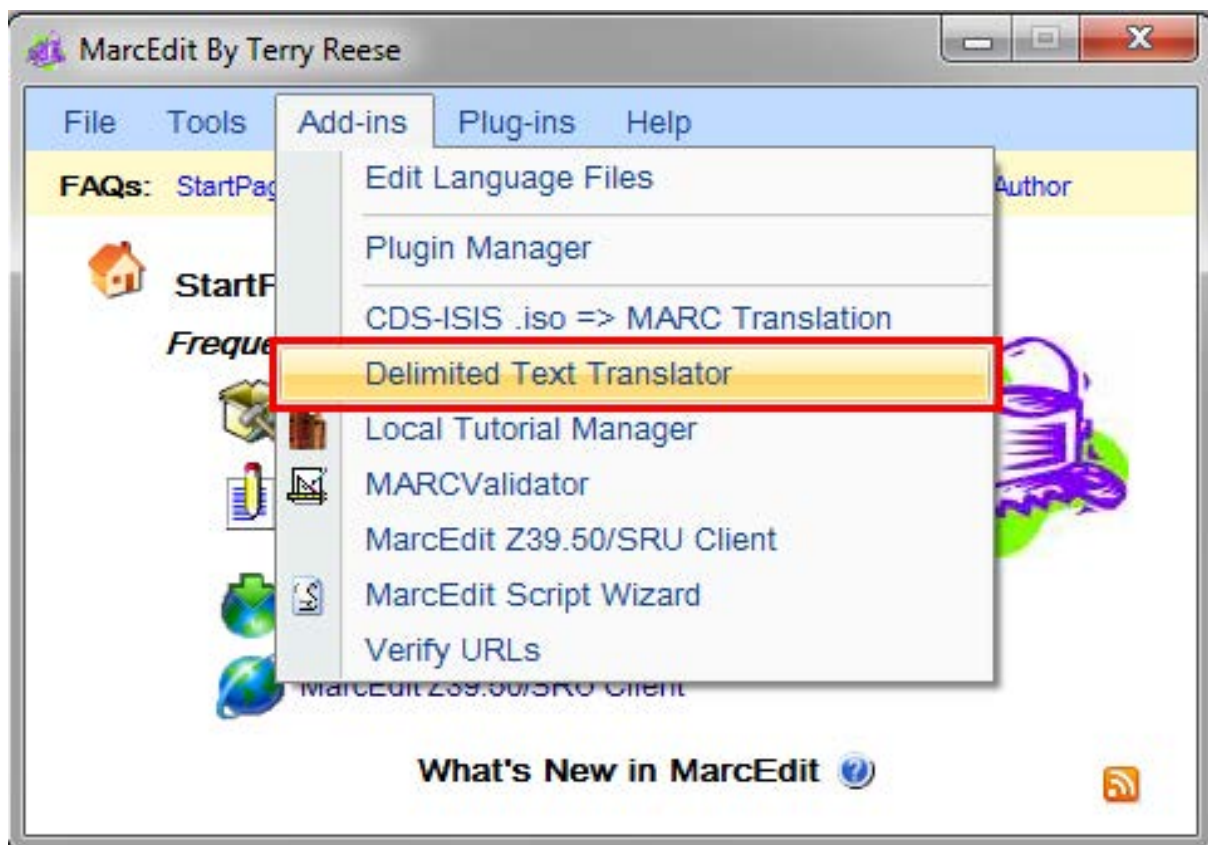

Suppose you have records of your library in excel data sheet format and want them to import into Koha. But how will you do this? Koha will not let you import excel records directly. Well here is a very simple solution for you which will let you import your excel records in Koha easily. First, we will convert excel file into Marc file and then will import it into Koha.

Follow the given steps to import your excel records into Koha

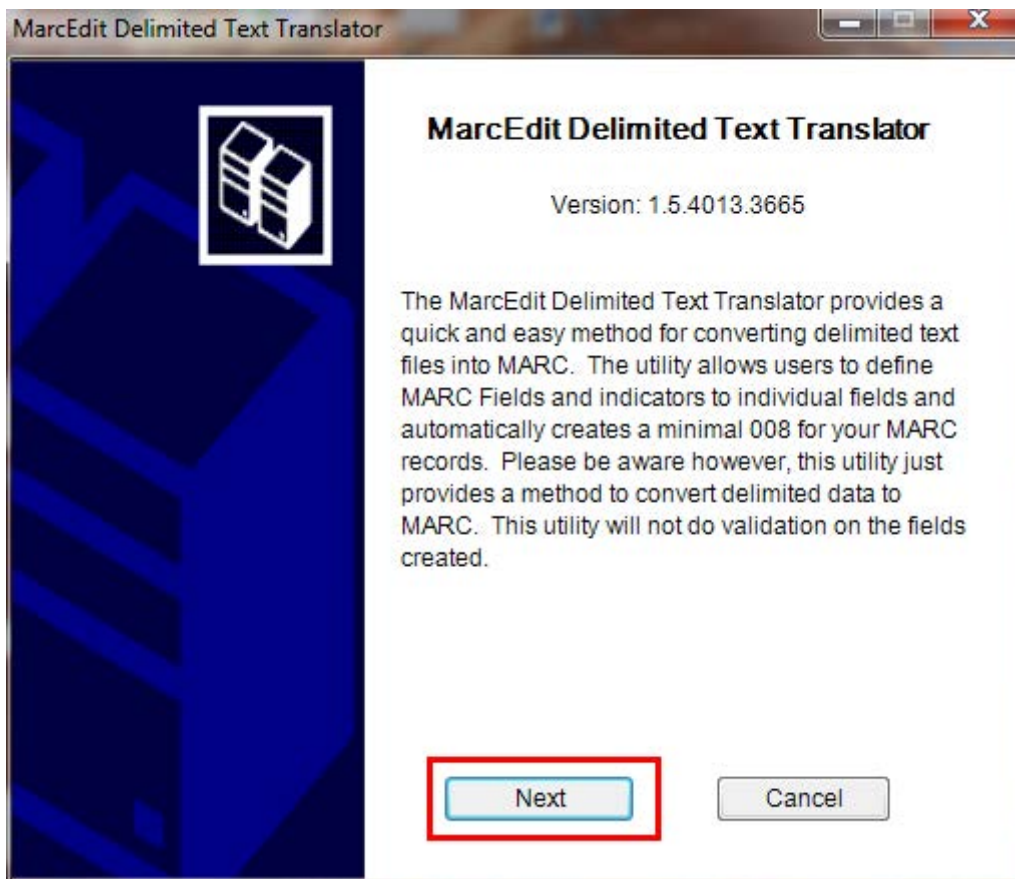

I.2.1 Converting from Excel format into .mrk format

First, we will convert excel format into .mrk format. For this we will use MarcEdit. You can download it from <http://people.oregonstate.edu/~reese/marcedit/html/downloads.html>.

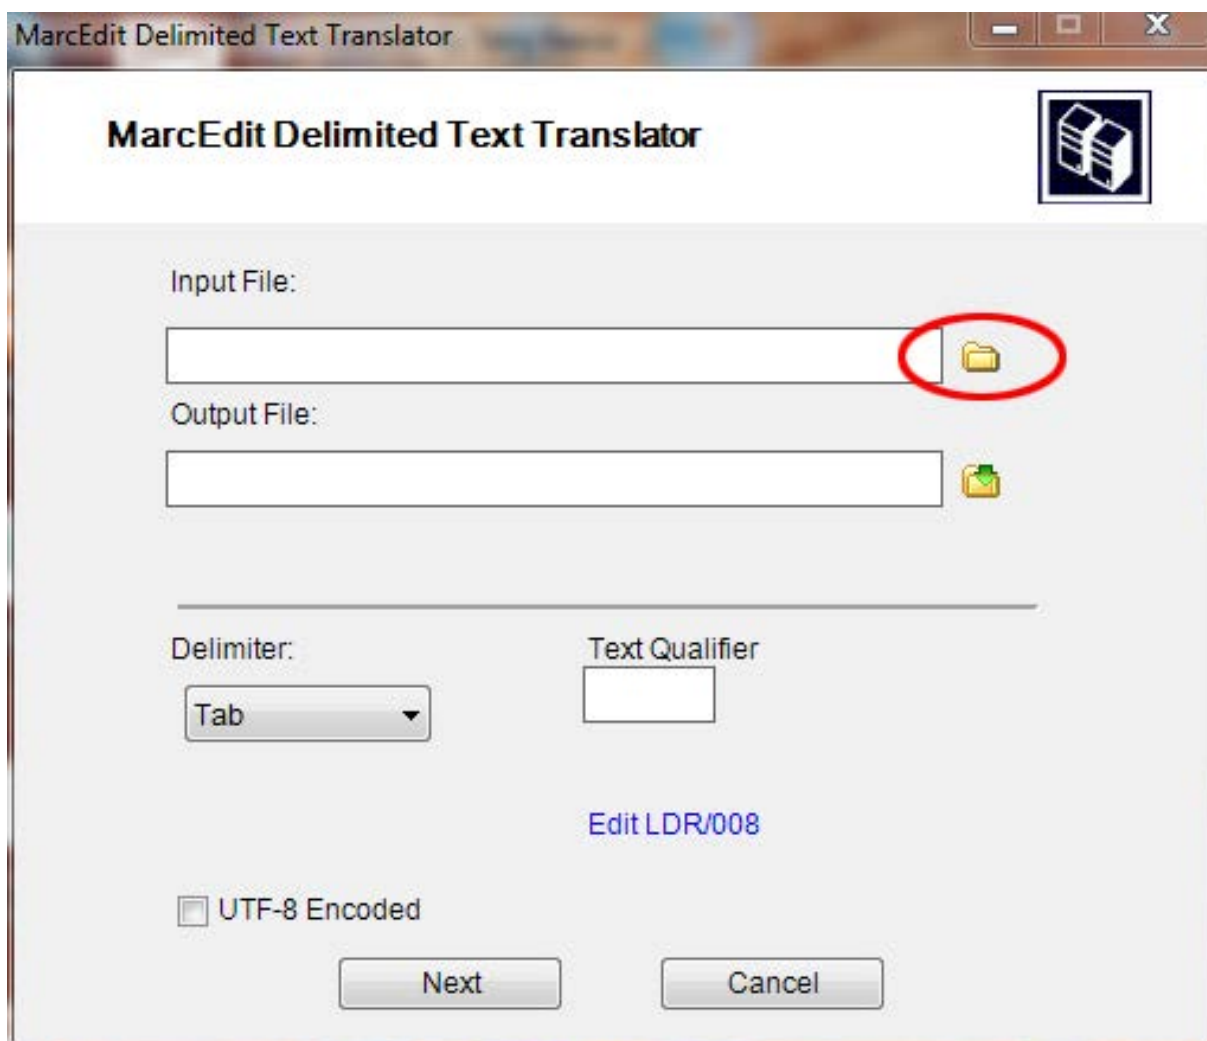

Now open it and select Add-ins-->Delimited Text Translator.

Click Next when the following window appears.

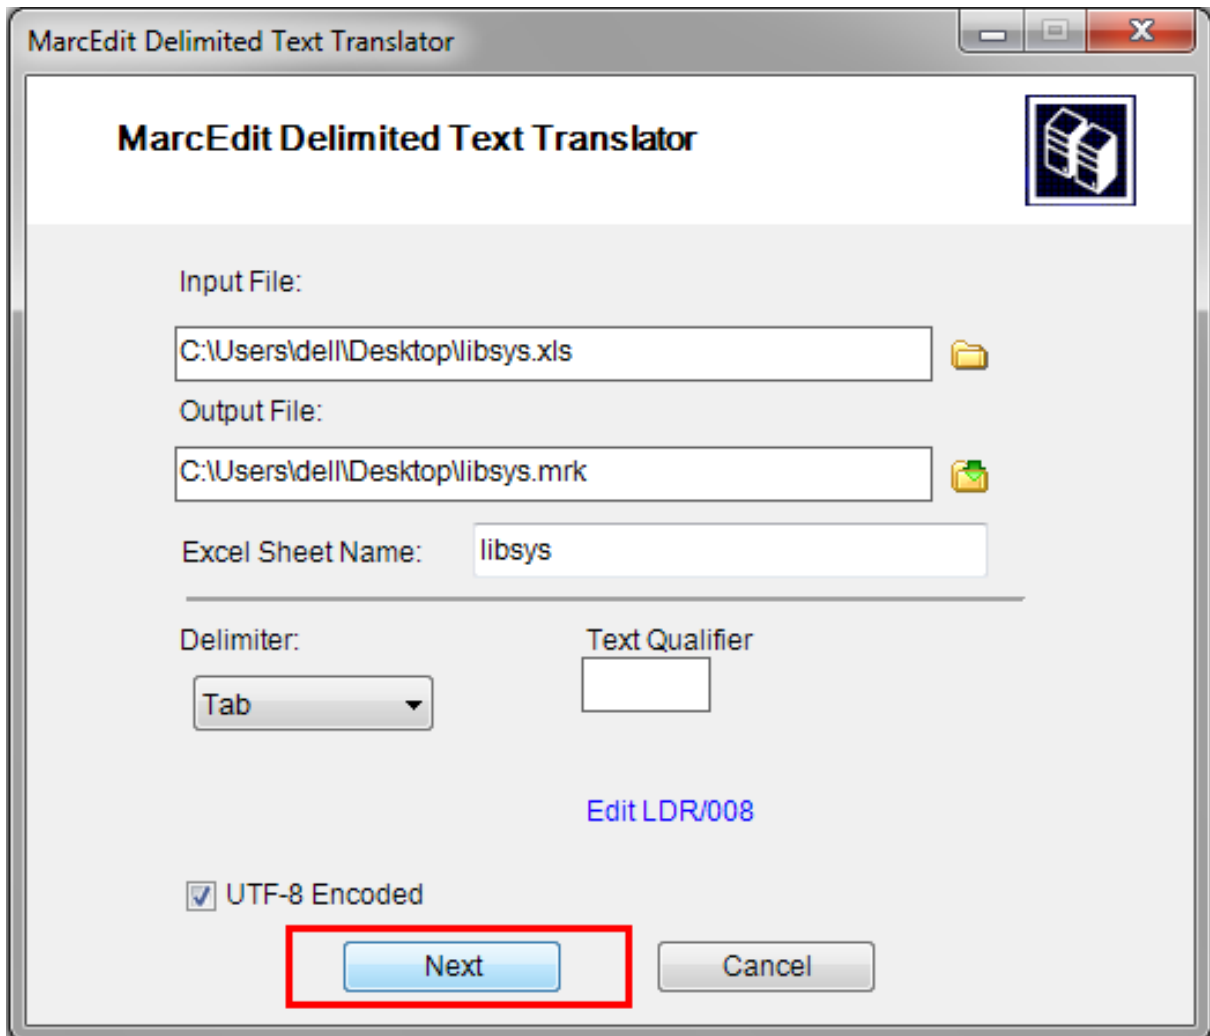

Browse for your excel file.

Locate your excel file by choosing the format Excel File(*.xls).

Similarly, fill all the other entries such as Output File, Excel Sheet Name and check UTF-8 Encoded (if required) and Click Next.

Now you will be prompted for mapping the fields to recognise the fields by standard marc format.

Suppose for Field 0 that is first column I entered Map to: 022\$a(Valid ISSN for the continuing resource) and then click on Apply.

MarcEdit Delimited Text Translator

MarcEdit Delimited Text Translator

Field 0	Field 1	Field 2	Field 3	Field 4	Field 5	Field 6	Field
110000	MULTI...	FUCH...	1998	658.56...		RS	MAR

Select:

Field 0
Field 1

Map To:
022\$a

Indicators:
\\

Term. Punctuation:

Constant Data
 Repeatable Subfield

Arguments

Apply Load Template

Save Template
 Sort Fields

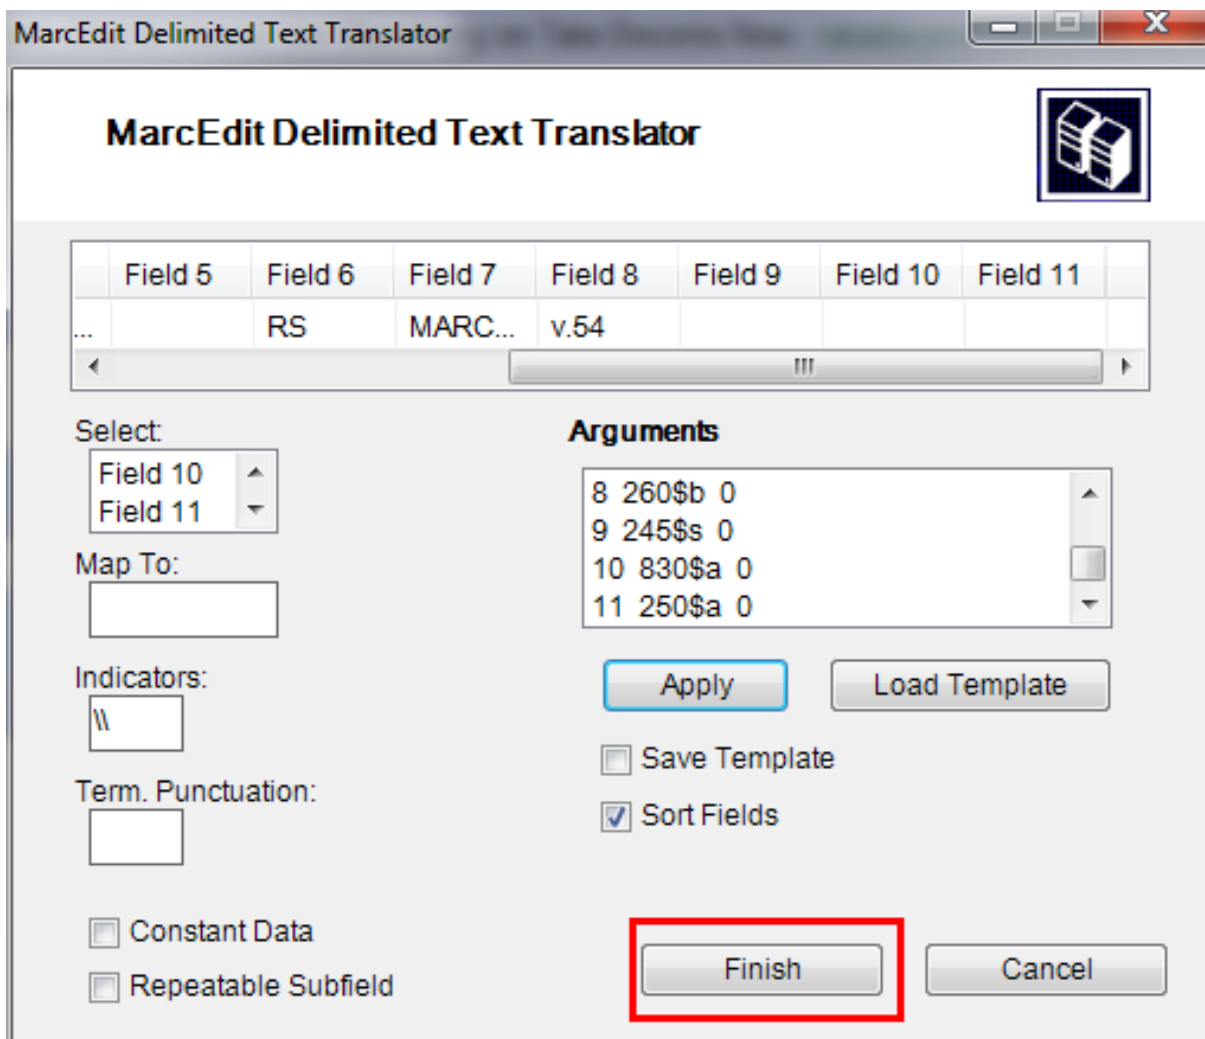

Finish Cancel

NOTE

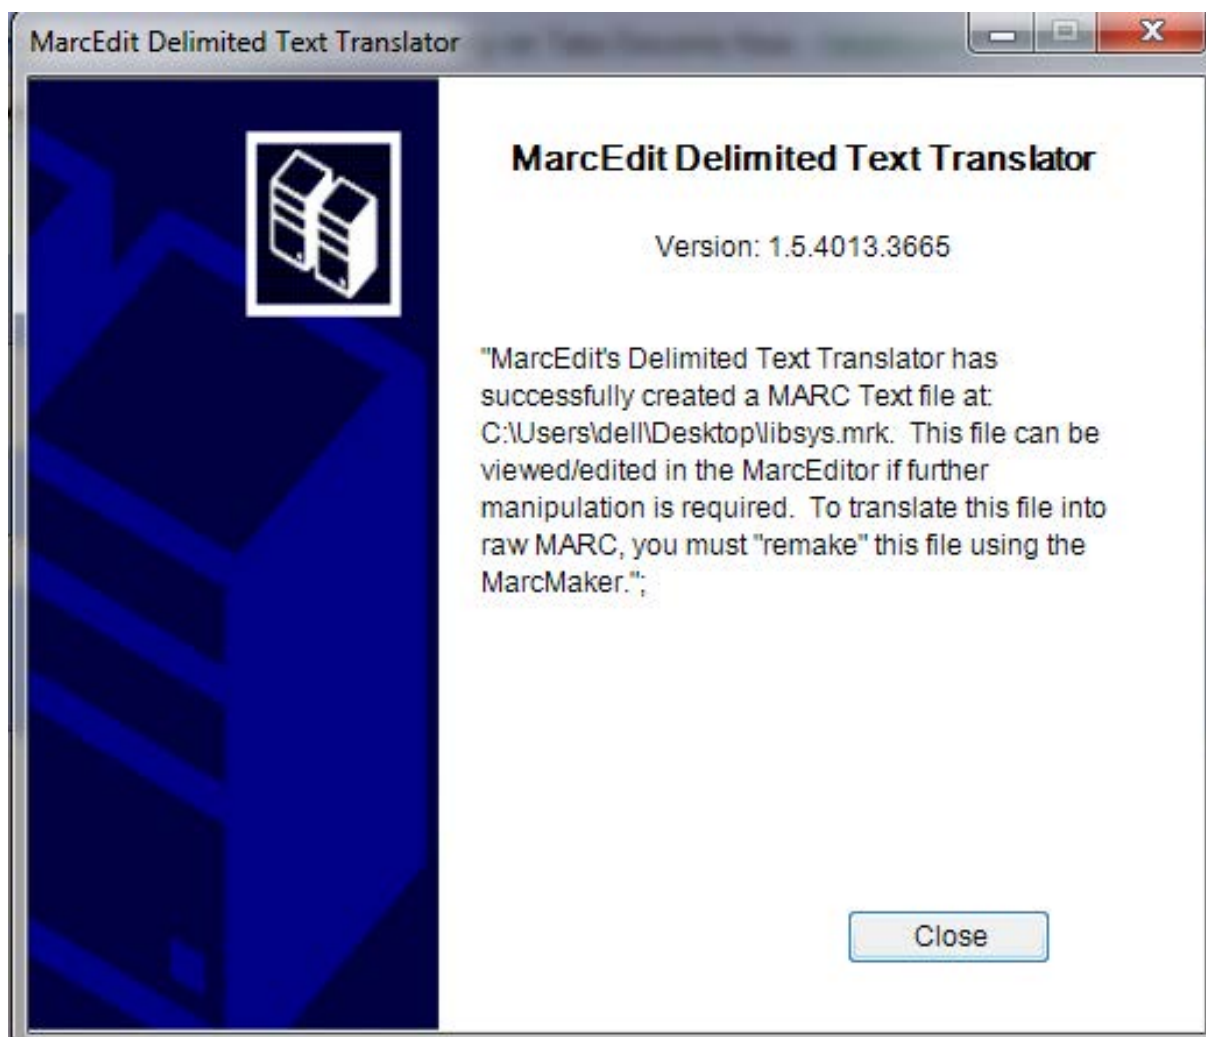

You can customize Indicators and all other things, for more information on marc21 format visit the [official library of congress site](#).

Similarly map all other fields and then Click on Finish.

And then a window will appear indicating that your Marc Text File(*.mrk) has been created.

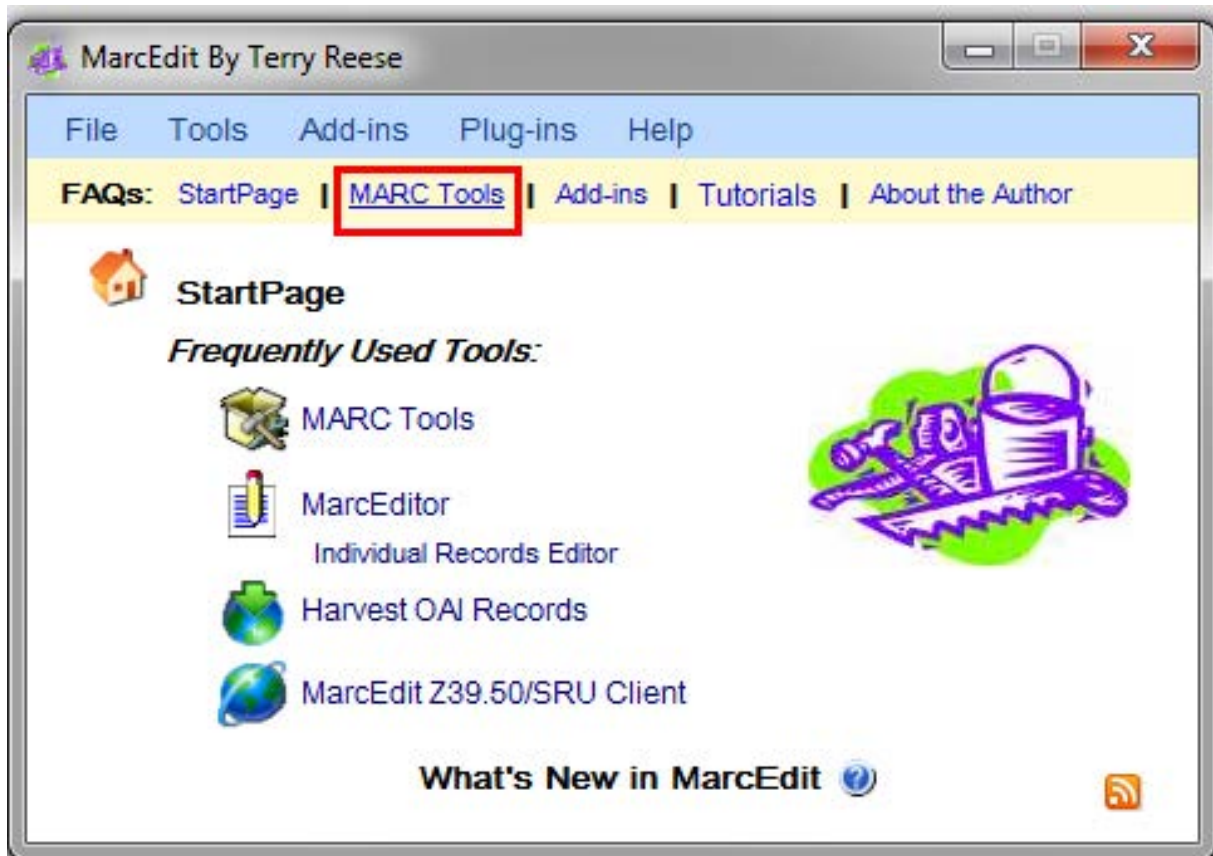

Click Close and we have created a .mrk file from .xls file in this step. You can view the file by double clicking on it.

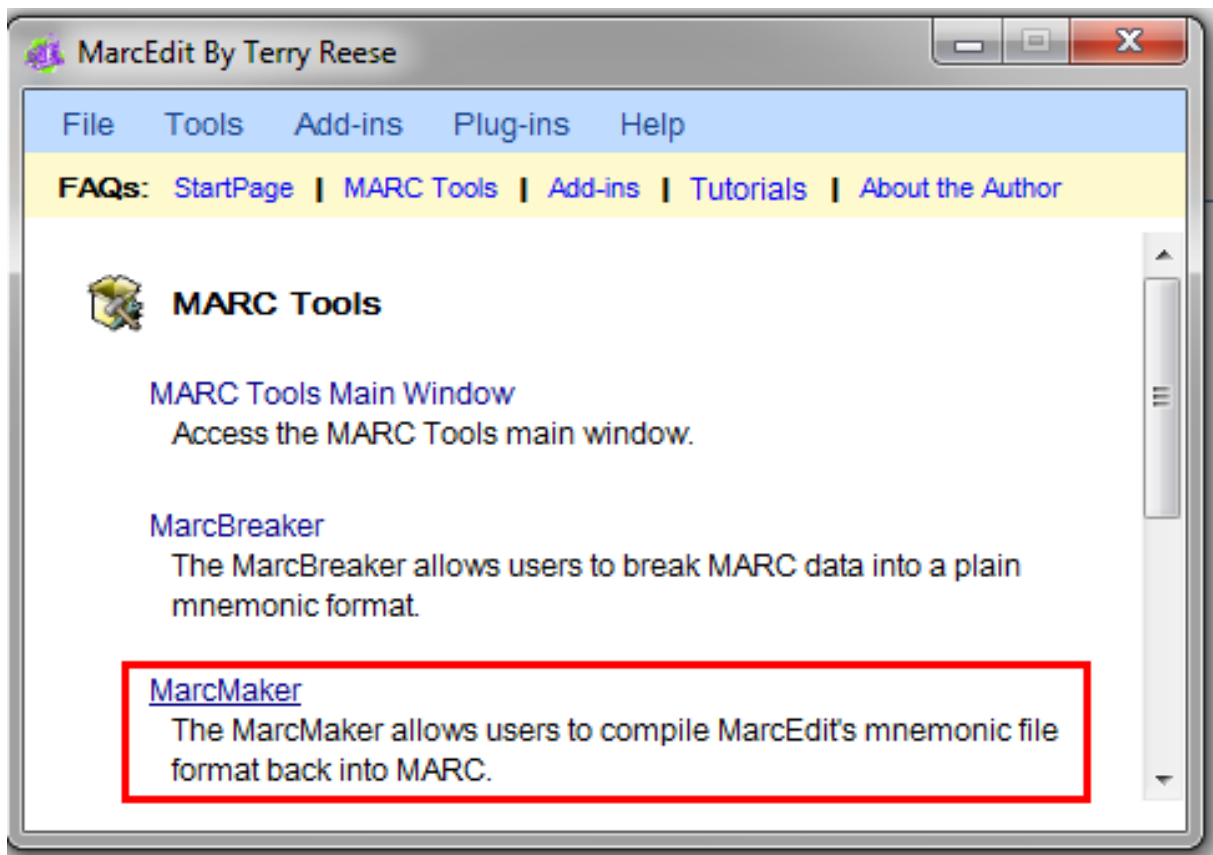

I.2.2 Convert .mrk file to .mrc

We will convert .mrk file that we have created in the above step into raw Marc format that can be directly imported into Koha.

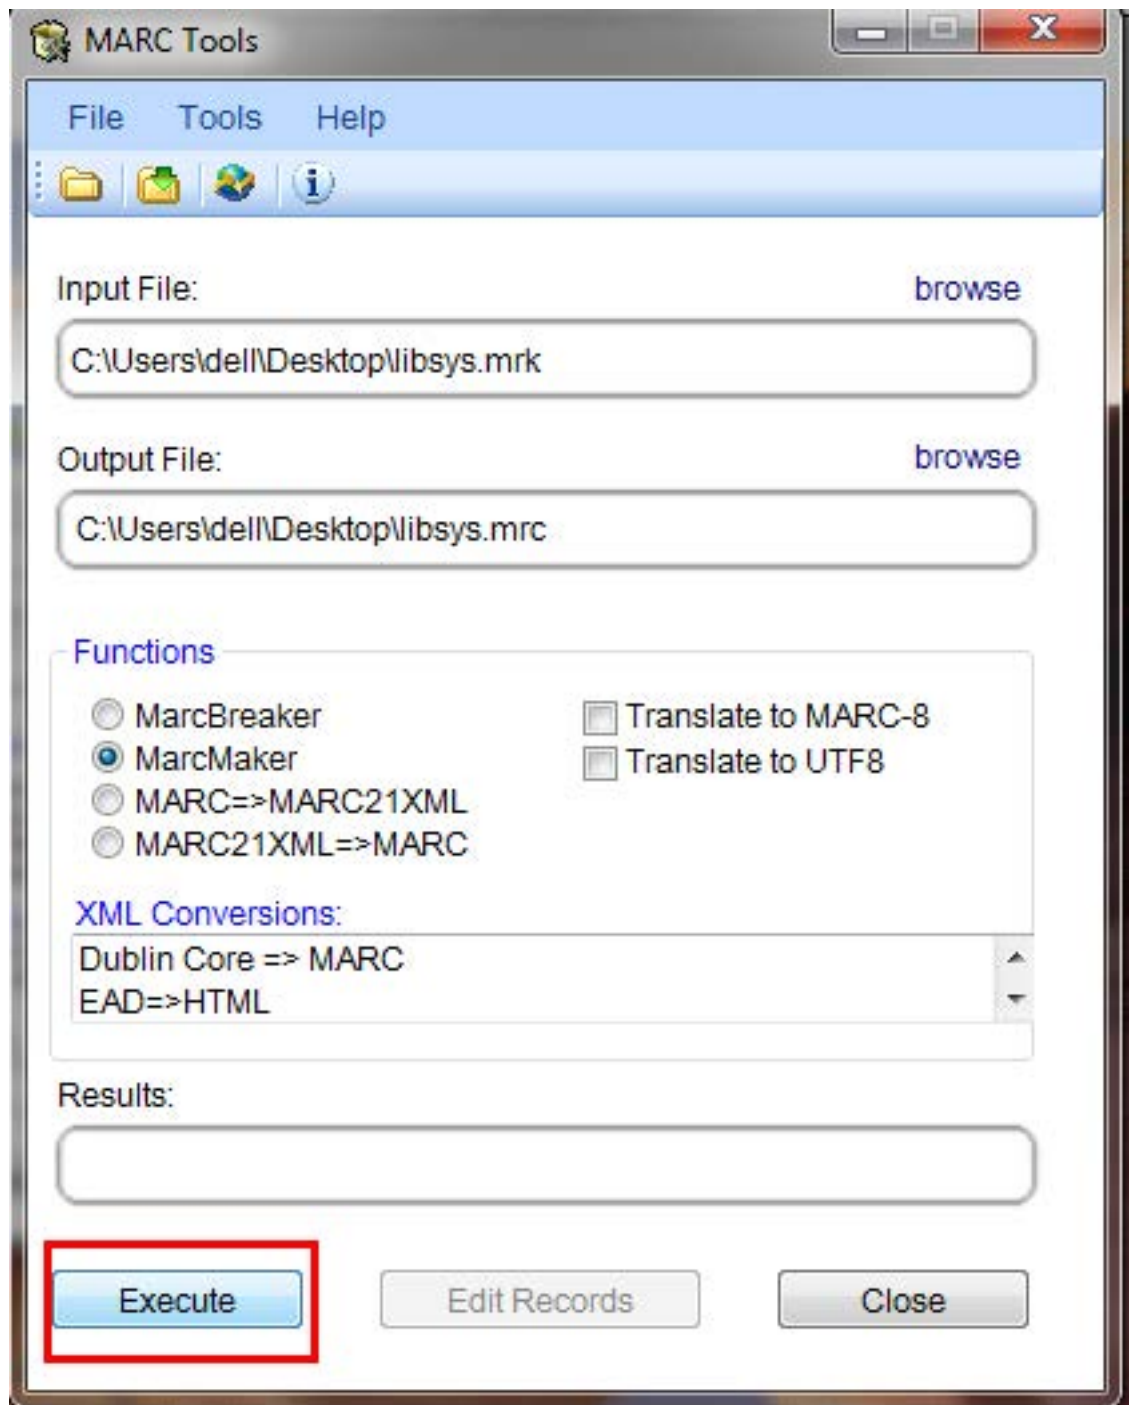

For this again open MarcEdit and Select MARC Tools.

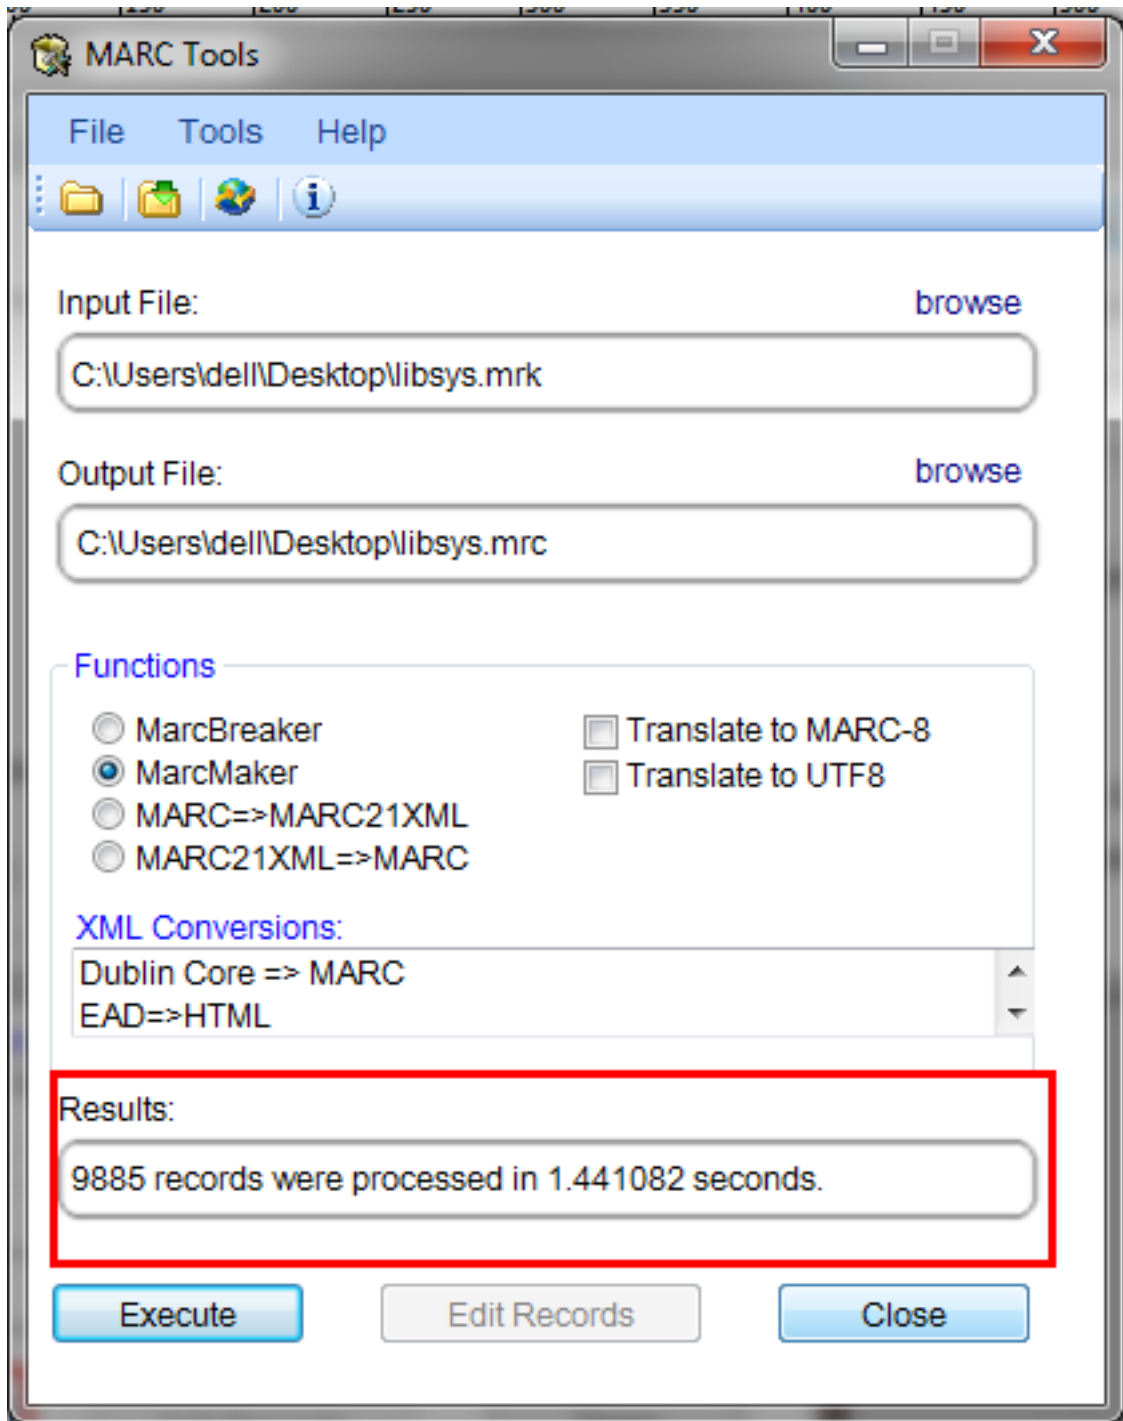

Next Select MarcMaker to convert .mrk file into .mrc format.

Locate your input file and name your output file. Then Click Execute.

And it will show you the Result.

Click Close and now we have raw Marc records with us (.mrc file).

I.2.3 Import .mrc into Koha

More information on importing records into Koha can be found in the ['Stage MARC Records for Import'](#) section of this manual.

Finally we will import above created .mrc file into Koha.

Click on Tools in your Koha staff client.

This screenshot shows the top navigation bar of the Koha system with the following items: Circulation, Patrons, Search, Cart, and More. Below this, there are several menu sections:

- Circulation**
 - Check out to: [input] OK
 - Check in
 - Transfers
- Patrons**
 - Search: [input] OK
- Search**
 - Search catalog: [input] OK
- Lists**
- Cataloging**
 - Add MARC Record
 - Authorities
- Serials**
- Acquisitions**
- Reports**
- Koha administration**
 - System preferences
- Tools**
- About Koha**

Next Click on Stage MARC Records for Import.

This screenshot shows the 'Tools' page in Koha. The navigation bar includes Home, Tools, and a search field. The main content area is divided into two columns:

- Patrons and circulation**
 - Comments: Moderate patron comments
 - Import patrons: Import patron data
 - Notices: Define notices (print and email notification messages for overdues, etc.)
 - Overdue notice/status triggers: Set notice/status triggers for overdue items
 - Patron card creator: Create printable patron cards
 - Patrons (anonymize, bulk-delete): Delete old borrowers and anonymize circulation history (deletes borrower reading history)
 - Tags: Moderate patron tags
 - Upload patron images: Upload patron images in batch or one at a time
- Catalog**
 - Batch item deletion: Delete a batch of items
 - Batch item modification: Modify items in a batch
 - Export bibliographic and holdings: Export bibliographic and holdings data
 - Inventory/stocktaking: Perform inventory (stocktaking) of your catalog
 - Label creator: Create printable labels and barcodes from catalog data
 - Quick spine label creator: Enter a barcode to generate a printable spine label. For use with dedicated label printers
 - Stage MARC records for import: Stage MARC records into the reservoir.
 - Staged MARC record management: Managed staged MARC records, including completing and reversing imports

After this, choose your previously created .mrc file and click on Upload.

This screenshot shows the 'Stage MARC Records For Import' page. The navigation bar includes Home, Tools, and a search field. The main content area is titled 'Stage MARC Records For Import' and includes the following instructions:

- Select a MARC file to stage in the import reservoir. It will be parsed, and each valid record staged for later import into the catalog.
- You can enter a name for this import. It may be useful, when creating a biblio, to remember where the suggested MARC data comes from!

Below the instructions, there is a section titled 'Stage records into the reservoir' with a form containing:

- Select the file to stage: Choose File | libsys.mrc
- Upload file

The left sidebar contains a list of tools, with 'Stage MARC for import' and 'Staged MARC management' highlighted.

You can also add comment about file and finally click on Stage For Import.

Upload progress:
100%

Comments about this file:

Character encoding:

Look for existing records in catalog?

Record matching rule:

Action if matching bibliographic record found:

Action if no match is found:

Check for embedded item record data?

Yes
 No

How to process items:

Stage for import

Job progress:
15%

When the import is done, you will get a result something like this

Stage MARC Records For Import

MARC Staging results :

- 9885 records in file
- 0 records not staged because of MARC error
- 9885 records staged
- Did not check for matches with existing records in catalog
- 0 item records found and staged
- [Manage staged records](#)
- [Back](#)

Next, click on Manage staged records.

Here you can even change matching rules.

25	THERMOPHYSICAL PROPERTIES OF PHENOL ALTUNIN V.V. (110024)	imported	no_match	25

You can even undo the Import operation.
 And within few minutes, we have imported around 10,000 records in Koha

Appendix J

Talking Tech

Talking Tech I-tiva is a third party, proprietary, product that libraries can subscribe to. Learn more here: <http://www.talkingtech.com/solutions/library>.

J.1 Installation and Setup Instructions

Be sure you've run `installer/data/mysql/atomicupdate/Bug-4246-Talking-Tech-itiva-phone-notifications.pl` to install the required data pack (new syspref, notice placeholders and messaging transport preferences)

To use, `TalkingTechItivaPhoneNotification` syspref must be turned on.

If you wish to process PREOVERDUE or RESERVES messages, you'll need the `EnhancedMessaging-Preferences` system preference turned on, and patrons to have filled in a preference for receiving these notices by phone.

For OVERDUE messages, overdue notice triggers must be configured under Koha -> Tools -> `Overdue Notice Triggers`. Either branch-specific triggers or the default level triggers may be used (script will select whichever is appropriate).

J.2 Sending Notices File

1. Add the `TalkingTech_itiva_outbound.pl` script to your crontab
2. Add an FTP/SFTP or other transport method to send the output file to the I-tiva server
3. If you wish, archive the sent notices file in another directory after sending

Run `TalkingTech_itiva_outbound.pl --help` for more information

J.3 Receiving Results File

1. Add an FTP/SFTP or other transport method to send the Results file to a known directory on your Koha server
2. Add the `TalkingTech_itiva_inbound.pl` script to your crontab, aimed at that directory
3. If you wish, archive the results file in another directory after processing

Run `TalkingTech_itiva_inbound.pl --help` for more information

Appendix K

OCLC Connexion Gateway

Koha can be set to work with the OCLC Connexion Gateway. This allows libraries to use OCLC Connexion as their cataloging tool and simply send those records to Koha with a single click. The following instructions will help you set up the OCLC Connexion Gateway, if you have a system administrator you will want to consult with them on this process.

K.1 Setting up OCLC service on Koha

First, you'll need to create a file somewhere on your system with configuration information. You could put this anywhere that is visible to the account that will be running the service.

The file contains 11 lines. The first 6 will be about your Koha system:

```
host: ~The IP address of your Koha server
port: ~The port you want to use for the Connexion service. This port must be ←
      different from your SIP port, or any other service
koha: ~The full URL of your staff client
log: ~The location (full file specification) of your log for the service
user: ~The default Koha username to use for importing
password: ~The password that goes with that username
```

The remaining lines describe how to do the staging:

```
match: The name of the matching rule from your system to use
overlay_action: "replace", "create_new", or "ignore"-- what to do if there is a ←
      match
nomatch_action: "create_new" or "ignore"-- what to do if there is no match
item_action: "always_add", "add_only_for_matches", "add_only_for_new", or "ignore" ←
      -- what to do with embedded 952 item data
import_mode: "direct" or "stage"
```

A sample file would look like this:

```
host: 1.2.3.4
port: 8000
log: /home/koha/koha-dev/var/log/connexion.log
koha: http://kohastaff.myuniversity.edu
user: koha_generic_staff
password: password
match: 001
overlay_action: replace
nomatch_action: create_new
item_action: ignore
import_mode: direct
```

When choosing an 'import_mode' if you use "direct" then the staged record will be immediately imported into Koha, and should be searchable after your indexes catch up. If you choose "stage", then the record will be placed in a staged batch for you to later go the [Managed Staged MARC Records](#) tool to finish the import.

If you import multiple records, they'll be in the same batch, until that batch is imported, then a new batch will be created.

In "direct" mode, each record will be in its' own batch.

To start the service, run the script:

```
/location/of/connexion/import/daemon/connexion_import_daemon.pl -d -c /location/ ←  
of/config/file.cnf
```

K.2 Setting up your OCLC desktop client

To set up the OCLC Connexion desktop client to connect to Koha, go to Tools/Options, then choose the Export tab.

- Click the "Create..." button to set up a new destination, then choose "OCLC Gateway Export" and click OK.
- Enter the host name or IP address (host: from your config file) and the port (port: **from above**).
- Make sure that the "Notify Host Before Disconnect" box is checked, and that "Permanent Connection" and "Print Results to Default Printer" are not.
- Set the three numeric parameters: Timeout: 100 Retries: 3 Delay: 0
- In the "Local System Authorization" box, click the "Send Local System Login Id and Password" box, then enter the Koha login and password you want to use.
- Click "OK" to save this connection.
- Click on "Record Characteristics" and make sure that the bibliographic records are using MARC21, UTF-8 Unicode, and click OK to save.

You should be ready to go! To export a record from OCLC Connexion Client to Koha, just press F5 while the record is on-screen. The export dialog will pop up, and you'll see Connexion attempting to talk to Koha. You should get a message that the record was added or overlaid, including its biblio number, and a URL that you can copy into your web browser to jump straight to the record.

Appendix L

FAQs

L.1 Display

L.1.1 Custom Item Type/Authorized Value Icons

Question: Can I have my own set of item type images (or authorized value icons)?

Answer: Absolutely. To add additional icons to your system you simply add a new directory to `koha-tmpl/intranet-tmpl/prog/img/itemtypeimg/` and to `koha-tmpl/opac-tmpl/prog/itemtypeimg` and put your icons in the new directory. Your icons will show up in a new tab as soon as they are in the folders.

•

TIP

Remember to put the icons in both places (on the OPAC and the intranet).

L.1.2 Customizing Koha Images

Question: Can I customize the images in the OPAC?

Answer: Absolutely. Koha comes with a series of original images that you can alter to meet your needs. The originals can be found in the `misc/interface_customization/` directory.

L.1.3 OPAC Display Fields

Question: What MARC fields print to the different OPAC screens in Koha?

Answer: The XSLT preference must be set as follows for the following fields to show

- `OPACXSLTResultsDisplay` = using XSLT stylesheets
- `OPACXSLTDetailsDisplay` = using XSLT stylesheets
- `DisplayOPACiconsXSLT` = show

The OPAC Results page shows:

- 245
- 100, 110, 111
- 700, 710, 711
- 250
- 260

- 246
- 856

The OPAC Details page shows:

- 245
- 100, 110, 111
- 700, 710, 711
- 440, 490
- 260
- 250
- 300
- 020
- 022
- 246
- 130, 240
- 6xx
- 856
- 505
- 773
- 520
- 866
- 775
- 780
- 785
- plus all of the 5xx fields in the Notes tab at the bottom

L.1.4 Subtitle Display on Bib Records

Question: How do I get the subtitle to display on the detail pages for my bib records?

Answer: Subtitle display now depends on there being a **keyword mapping** for the MARC field in question. Adding a mapping for "subtitle" -> "245b" for an item's framework results in display of the subtitle in OPAC and staff client search and detail pages (although not in all instances where subtitles might be displayed, e.g. the Cart).

L.1.5 Customize Logo on Staff Client

Question: How do I change the Koha logo on the Staff Client login page?

Answer: **Opacsmallimage** controls the display of the Koha logo in the OPAC, but there is no system preference controlling the logo on the staff client login page. Luckily the logo is displayed via CSS so it can be easily customized through some custom CSS.

These are the relevant parts of the staff client default CSS:

```
#login h1 {
  background:url("../../img/koha-logo.gif") no-repeat scroll center
top transparent;
  margin-bottom:0.5em;
  margin-top:0;
}

#login h1 a {
  border-bottom:medium none;
  display:block;
  height:74px;
  text-indent:-100px;
}
```

If you have access to the file system on your Koha server you can add a custom CSS file and specify that file using the [intranetcolorstylesheet](#) system preference.

There is no analogue to the [OPACUserCSS](#) preference in the staff client, but you can get around this by putting this in the [intranetuserjs](#) preference:

```
///]]>
</script>
<style type="text/css">
  /* inline styles */
</style>
<script type="text/javascript">
//</pre>
</div>
<div data-bbox="138 443 907 474" data-label="Text">
<p>In the above snippet where it says <code>/* inline styles */</code> we'll redeclare the relevant properties from the styles of the login image:</p>
</div>
<div data-bbox="138 480 750 689" data-label="Text">
<pre>///]]&gt;
&lt;/script&gt;
&lt;style type="text/css"&gt;
  /* inline styles */

#login h1 {
  background:url("../../img/koha-logo.gif") no-repeat scroll center
top transparent;
}

#login h1 a {
  height:74px;
}
&lt;/style&gt;
&lt;script type="text/javascript"&gt;
//<![CDATA[</pre>
</div>
<div data-bbox="138 699 907 759" data-label="Text">
<p>I've only reproduced the properties necessary to make the change we want. You can see that the "background:" property sets the path to the default logo. You can change this to point to any image you want, on the Koha server or anywhere else. Then you just need to change the #login h1 a's "height" property to match the height of the image you choose.</p>
</div>
<div data-bbox="162 758 266 773" data-label="Text">
<p>For example:</p>
</div>
<div data-bbox="138 780 782 924" data-label="Text">
<pre>///]]&gt;
&lt;/script&gt;
&lt;style type="text/css"&gt;
  /* inline styles */

#login h1 {
  background:url("http://www.myaopl.org/sites/all/themes/npl/logo.png")
no-repeat scroll center top transparent;
}

#login h1 a {</pre>
</div>
<div data-bbox="506 942 537 958" data-label="Page-Footer">643</div>
```

```
height:71px;
}
</style>
<script type="text/javascript">
//<![CDATA[
```

L.1.6 Show patrons the barcodes of items they have checked out

Question: Can patrons see the barcodes for the items they have checked out.

Answer: Not by default, but with a few edits to the patron record you can make a barcode column appear on the patron’s check out summary in the OPAC. You can set up a **patron attribute** with the value of SHOW_BCODE and **authorized value** of YES_NO to make this happen.

Add patron attribute type

Patron attribute type code:

Description:

Repeatable: Check to let a patron record have multiple values of t

Unique identifier: If checked, attribute will be a unique identifier — if a v

Allow password: Check to make it possible to associate a password w

Display in OPAC: Check to display this attribute on a patron's details pa

Searchable: Check to make this attribute staff_searchable in the s

Authorized value category: Authorized value category; if one i

BOR_NOTES
 CCODE
 DAMAGED
 HINGS_AS
 HINGS_C
 HINGS_PF
 HINGS_RD
 HINGS_UT
 LOC
 LOST
 MANUAL_INV
 NOT_LOAN
 OPAC_SUG
 RESTRICTED
 SUGGEST
 WITHDRAWN
YES_NO

[Cancel](#)

Then on the **patron's record** set the value for SHOW_BCODE to yes.

Modify Staff patron Nicole Engard

Additional attributes and identifiers

Type	Value	
DL (Driver's License)	PA1234567890	Clear
HBR (Home Branch)		Clear
SHOW_BCODE (Show Barcode in OPAC)	Yes	Clear

Save [Cancel](#)

Yes/No dropdown menu

This will add a column to the check out summary in the OPAC that shows the patrons the barcodes of the items they have checked out.

Hello, Nicole Engard ([Click here](#) if you're not Nicole Engard)

Checked Out Overdue Credits Holds

3 Item(s) Checked Out

	Title	Barcode	Call No.	Due	Renew	Fines	Links
	Picture perfect Picoult, Jodi,	100006	PS3566.I372 P49 2002	06/16/2011	<input type="checkbox"/> Renew (1 of 2 renewals remaining)	No	Share TWEET THIS
	Harry Potter and the sorcerer's stone Rowling, J. K.	100025	PZ7.R79835 Har 1998	05/19/2011	Not renewable (0 of 2 renewals remaining)	No	Share TWEET THIS
	Harry Potter and the sorcerer's stone Rowling, J. K.	100020	PZ7.R79835 Har 1999ab	05/19/2011	Not renewable (On hold)	No	Share TWEET THIS

[Renew Selected](#) [Renew All](#)

Clicking on the 'Overdue' tab will show only the items that are overdue.

L.2 Circulation/Notices

L.2.1 Dropbox Date

Question: How is the dropbox date is determined? Is it the last open date for the checkout branch? Is it today's date minus one? Can the dropbox checkin date be set?

Answer: If the library is closed for four days for renovations, for example, there would be more than one day needed for the dropbox date. You will only have one dropbox date and that will be the last day that the library open (determined by the holiday calendar) because there is no real way to know what

day the books were dropped into the box during the 4 closed days. The only way to change the effective checkin date in dropbox mode is to modify the calendar.

L.2.2 Holds to Pull and Holds Queue

Question: What is the difference between the **Holds Queue** and **Holds to Pull**?

Answer: The holds to pull report gives a simple list of what holds need to be filled with available items. It should only be used in Koha installations where there is only one library.

The holds queue tries to do the same thing, but in a 'smarter' way. This allows it to split up the list by library, consult the **transport cost matrix** and refresh regularly to provide different pull lists to each library.

L.2.3 Duplicate Overdue Notices

Question: Why are patrons getting two overdue notices?

Answer: This tool takes all branches in the overdue rules and sent notifications to them. So, if you have a default rule & a branch rule, the notification will be generated twice. A quick fix is to discard "default rule" for instance.

L.2.4 Printing Overdue Notices

Question: Can I print overdue notices for patrons without email addresses on file?

Answer: Yes. The **overdue notice cron job** has a setting to generate the overdue notices as HTML for printing. An example of this usage would be:

```
overdue_notices.pl -t -html /tmp/noticedir -itemscontent issuedate,date_due,title ←
,barcode,author
```

In this example, we wanted to use only certain item fields in our notices, so we specified `itemscontent` fields in the cron entry; that's not a requirement for the feature.

The command line needs to specify a web-accessible directory where the print notices will go -- they get a filename like `notices-2009-11-24.html` (or `holdnotices-2009-11-24.html`). The overdue notice itself can be formatted to fit a Z-mailer. Within the notice file, the text is spaced down or over to where it will print properly on the form. The script has code that wraps around the notice file to tell the HTML to obey the formatting, and to do a page break between notices. That's so that when staff print it out, they get one per page. We had to add an extra `syspref` (**PrintNoticesMaxLines**) to specify page length because our client allows a `_lot_` of checkouts which meant some notices were running onto multiple pages. That `syspref` says to truncate the print notice at that page length and put in a message about go check your OPAC account for the full list.

The print and email overdues use the same notice file. The print notices for holds are different -- there's a separate `HOLD_PRINT` notice file and the system uses it if there's no email address. Then a nightly cron job runs to gather those up from the message queue and put them in an HTML file in the notice directory, as above.

The cron entry is `gather_print_notices.pl /tmp/noticedir`

L.2.5 Unable to Renew Items

Question: We're trying to renew some items for our patron. One of the items is on hold and ineligible for renewal, but the other two items refuse to renew even though they should be eligible. When I try to use the override renewal limit, it just returns a little message that says "renewal failed". Any idea what's going on here?

Answer: At the very least you will need to set an absolute **default circulation rule**. This rule should be set for the default itemtype, default branchcode and default patron category. That will catch anyone who doesn't match a specific rule. Patrons who do not match a specific rule will get blocked from placing holds, since there was no baseline number of holds to utilize.

BiblioAddsAuthorities to 'Allow'.

TIP

Fields affected by this preference will show a lock symbol in them

100 ? - MAIN ENTRY--PERSONAL NAME  

4	Relator code	<input type="text"/>		
a	Personal name	<input style="background-color: #f0f0f0;" type="text"/>		

L.3.2 Koha to MARC Mapping

Question: What's the relationship between 'Koha to MARC Mapping' and 'MARC Bibliographic Frameworks'?

Answer: Mapping can be defined through 'MARC Bibliographic Frameworks' OR 'Koha to MARC Mapping'. 'Koha to MARC Mapping' is just a shortcut to speed up linkage. If you change a mapping in one of these modules, the mapping will change in the other as well. (In other words, the two modules 'overwrite' each other in order to prevent conflicts from existing in Koha).

L.3.3 Number of Items Per Bib Record

Question: Is there a limit on the number of items I can attach to a bib record?

Answer: There is no explicit limit to the number of items you can attach to a bibliographic record, but if you attach enough of them, your MARC record will exceed the maximum file size limit for the ISO 2709 standard, which breaks indexing for that record. I've found this occurs somewhere between 600 and 1000 items on a 'normal' bibliographic record.

L.3.4 Analytics

Question: I am using the **EasyAnalyticalRecords** feature, but my links in the OPAC and Staff Client to 'Show Analytics' are not working.

Answer: If you plan on using **EasyAnalyticalRecords** you will want to make sure to set your **UseControlNumber** preference to "Don't use," this will prevent broken links.

L.4 Acquisitions

L.4.1 Planning Categories

Question: What is a planning category?

Answer: When you plan in advance for the way your budget is going to be spent, you initially plan for how it's going to be spent over time, that's the most natural thing to do.

So you plan for \$1000 in Jan. \$1000 in Feb., \$3000 in March, etc. You can basically do the same thing with a list of values in lieu of the months.

Say you have a list like this one:

- < 1 month
- < 6 months
- < 1 year
- < 3 years
- < 10 years
- > 10 years

The list is meant to represent when the books acquired were published. Then you plan for it, saying: we went to spend at list 40% of our budgets on books published less than a year ago, 10% on books more than 10 years old, etc.

Upon acquiring new material, you'll be able to select, for a given item, a value from this list in a drop down. Then, after the material has been acquired, at the end of the year, you'll be able to compare the goals set, with what's been achieved.

L.5 Serials

L.5.1 Advanced Patterns

Question: What is the 'inner counter' on the advanced serials pattern interface?

Answer: I think it is better to give an example to understand this :

Example for a monthly subscription :

- First issue publication date : April 2010
- Numbering : No {X}, year {Y}
- First issue : No 4, year 2010

For the year Y : you will want the year change on January 2011

So, the advanced pattern for Y will be :

- Add : 1
- once every : 12
- When more than 9999999
- inner counter : 3
- Set back to 0
- Begins with 2010

Year is going to change after 12 received issues from April 2010, that is in April 2011 if you don't set inner counter. Set inner counter to 3 will say to Koha : change year after $12-3 = 9$ received issues.

Inner counter says to Koha to take into account the first issues of the year, even if they are not received with Koha. If you begin with first issue of the year write nothing or 0.

L.6 Reports

L.6.1 Define Codes Stored in DB

L.6.1.1 Fines Table

Question: What do the codes in the accounttype field in the accountlines table stand for?

Answer:

- A = Account management fee
- C = Credit
- F = Overdue fine
- FOR = Forgiven
- FU = Overdue, still accruing
- L = Lost item
- LR = Lost item returned/refunded
- M = Sundry

- N = New card
- PAY = Payment
- W = Writeoff

L.6.1.2 Statistics Table

Question: What are the possible codes for the type field in the statistics table?

Answer:

- localuse
 - Registers if an item that had been checked out to a statistics patron (category type = 'X') is returned
- issue
- return
- renew
- writeoff
- payment
- CreditXXX
 - The XXX stores different types of fee credits, so a query to catch them all would include a clause like "type LIKE 'Credit%'"

L.6.1.3 Reserves Table

Question: What are the possible codes for the found field in the reserves and old_reserves tables?

Answer:

- NULL: means the patron requested the 1st available, and we haven't chosen the item
- T = Transit: the reserve is linked to an item but is in transit to the pickup branch
- W = Waiting: the reserve is linked to an item, is at the pickup branch, and is waiting on the hold shelf
- F = Finished: the reserve has been completed, and is done

L.6.1.4 Reports Dictionary Table

Question: What are the possible codes for the area field in the reports_dictionary table?

Answer:

- 1 = Circulation
- 2 = Catalog
- 3 = Patrons
- 4 = Acquisitions
- 5 = Accounts

L.6.1.5 Messages Table

Question: What are the possible codes for the message_type field in the messages table?

Answer:

- L = For Librarians
- B = For Patrons/Borrowers

L.6.1.6 Serial Table

Question: What are the possible codes for the status field in the serial table?

Answer:

- 1 = Expected
- 2 = Arrived
- 3 = Late
- 4 = Missing
- 5 = Not Available
- 6 = Delete
- 7 = Claimed
- 8 = Stopped

L.6.1.7 Borrowers Table

Question: What are the possible codes for the privacy field in the borrowers table?

Answer:

- 0 = Forever
- 1 = Default
- 2 = Never

L.6.2 Runtime Parameters

Question: Is there a way to filter my custom SQL reports before they run?

Answer: If you feel that your report might be too resource intensive you might want to consider using runtime parameters to your query. Runtime parameters basically make a filter appear before the report is run to save your system resources.

There is a specific syntax that Koha will understand as 'ask for values when running the report'. The syntax is <<Question to ask|authorized_value>>.

- The << and >> are just delimiters. You must put << at the beginning and >> at the end of your parameter
- The 'Question to ask' will be displayed on the left of the string to enter.
- The authorized_value can be omitted if not applicable. If it contains an authorized value category, or branches or itemtype or categorycode, a list with the Koha authorized values will be displayed instead of a free field Note that you can have more than one parameter in a given SQL Note that entering nothing at run time won't probably work as you expect. It will be considered as "value empty" not as "ignore this parameter". For example entering nothing for : "title=<<Enter title>>" will display results with title="" (no title). If you want to have to have something not mandatory, use "title like <<Enter title>>" and enter a % at run time instead of nothing

Examples:

- `SELECT surname,firstname FROM borrowers WHERE branchcode=<<Enter patrons library | branches>> AND surname like <<Enter filter for patron surname (% if none)>>`
- `SELECT * FROM items WHERE homebranch = <<Pick your branch | branches>> and barcode like <<Partial barcode value here>>`

TIP

To generate a date picker calendar to the right of the field when running a report you can use the 'date' keyword like this: <<Enter Date|date>>

Added: 

TIP

You have to put "%" in a text box to 'leave it blank'. Otherwise, it literally looks for "" (empty string) as the value for the field.

IMPORTANT

In addition to using any authorized value code to generate a dropdown, you can use the following values as well: Branches (branches), Item Types (itemtypes) and Patron Categories (categorycode). For example a branch pull down would be generated like this <<Branch|branches>>

Owning branch:

L.6.3 Results Limited

Question: When I download my report it's limited to 10,000 results, how do I get all of the results to download?

Answer: There is a limit of 10,000 records put on SQL statements entered in Koha. To get around this you want to add 'LIMIT 100000' to the end of your SQL statement (or any other number above 10,000).

L.7 Searching**L.7.1 Advanced Search****L.7.1.1 Scan Indexes**

Question: What does 'scan indexes' on the advanced search page mean?

Answer: When you choose an index, enter a term, click 'scan indexes' and do the search, Koha displays the searched term and the following terms found in this index with the number of corresponding records That is search is not made directly in the catalog, but first in the indexes It works only for one index at once, and only with no limit in Location (All libraries needed)

L.7.1.2 Searching for Terms that Start With a Character

Question: How do I search for all titles that start with the letter 'C'?

Answer: You can choose to search for things that start with a character or series of characters by using the CCL 'first-in-subfield'

- example: ti,first-in-subfield=C

L.7.2 Wildcard Searching

Question:What is the difference between a keyword search using the '*' (asterisk) versus a keyword search using the '%' (percent)? Both work in the catalog, but return different sets. Why?

Answer: A wildcard is a character (*,?,%,.) that can be used to represent one or more characters in a word. Two of the wildcard characters that can be used in Koha searches are the asterisk ('*') and the percent sign ('%'). However, these two characters act differently when used in searching.

The '*' is going to force a more exact search of the first few characters you enter prior to the '*'. The asterisk will allow for an infinite number of characters in the search as long as the first few characters designated by your search remain the same. For example, searching for authors using the term, Smi*, will return a list that may include Smith, Smithers, Smithfield, Smiley, etc depending on the authors in your database.

The '%' will treat the words you enter in the terms of "is like". So a search of Smi% will search for words like Smi. This results in a much more varied results list. For example, a search on Smi% will return a list containing Smothers, Smith, Smelley, Smithfield and many others depending on what is your database.

The bottom line in searching with wildcards: '*' is more exact while '%' searches for like terms.

L.7.3 Title Searching

Question: Why does my Zebra title search for 'Help' not turn up 'The help' in the first pages of results?

Answer: When doing a title search, you actually want to search for the title (i.e., 'the help' rather than just 'help'), and it will bubble right up to the top. If you're just searching for 'help' then the relevance ranking is going to affect the results you see.

When it comes to relevance in Zebra, here's what's happening. First, the search is done. If you search for the title "help", then any title that has "help" in it comes back. Then from those records, separately, it does relevance on the *whole* record. The more your word appears, the more relevant, and some MARC tags are worth more points than others. So a self-help book with 505 notes where "help" appears a *lot* will be at the top, regardless of keyword or title.

But when you add a *second word*, that helps it figure things out, as it's weighing the relevance of both words and the phrase. Because of the way relevance works, if you search "the help", then "the help" or "the help I need" are more relevant than "the way to help", because they appear together in order. Likewise, "help the girl" would be lower relevance, because it's out of order, and "help for the homeless" would be lower still, as they're out of order, and apart.

The moral of the story is that single word searches, particularly on common words, will always struggle a bit; it can't evaluate relevance well, because you've not given it enough input.

L.8 Enhanced Content

L.8.1 FRBRizing Content

Question: At our public library we are running a Koha installation and we've tried to turn on all the nice functionalities in Koha such as the frbrising tool, but do not get the same result as Nelsonville public library.

Answer: In fact, this feature is quite tricky to make that right. First it looks at XISBN service. And then search in your database for that ISBN. So both XISBN and your internal ISBN (in biblio table) have to be normalized. You could therefore use the script misc/batchupdateISBNs.pl (it removes all the - in your local ISBNs)

L.8.2 Amazon

L.8.2.1 All Amazon Content

Question: I have all of the Amazon preferences turned on and have entered both of my keys, but none of the content appears in my system, why is that?

Answer: Amazon's API checks your server time on all requests and if your server time is not set properly requests will be denied. To resolve this issue be sure to set your system time appropriately. Once that change is made Amazon content should appear immediately.

On Debian the the command is `date -s "2010-06-30 17:21"` (with the proper date and time for your timezone).

L.9 System Administration

L.9.1 Errors in Zebra Cron

Question: I am noticing some errors in the `koha-zebradaemon-output.log` file. When new records are added it takes a bit longer to index than we think they should. Running `rebuild_zebra` is often faster. Zebra ends up indexing and search works, but I am concerned about the errors. Any ideas?

Answer: `Rebuild_zebra.pl -r` deletes all of the files in the Zebra db directories (such as `reci-0.mf`) and then recreates them. Thus, permissions will be lost, and the files will be owned by the user who ran `rebuild_zebra.pl`. If one rebuilds the zebra indexes as root, the daemons, which typically run under the user Koha, will not be able to update the indexes. Thus, it's important then that the zebra rebuilds are put in the cronjob file of the user Koha, and not root. Also important is that other users, such as root, don't manually execute rebuilds.

If one desires that another user be able to execute `rebuild_zebra.pl`, he should be given the permission to execute `'sudo -u Koha .../rebuild_zebra.pl'` (if you want to do this, you also have to edit the `sudoers` file to pass the `PERL5LIB` variable with the `env_keep` option as by default `sudo` strips away almost all environment variables). Or, as root user, one can use a simple `'su koha'` and then the `rebuild_zebra.pl` command.

I've also tried to set the sticky bit on `rebuild_zebra.pl`, but for whatever reason it didn't seem to work due to some problem with the `PERL5LIB` variable that I wasn't able to figure. That seems to me the easiest thing to do, if anybody has any idea how to make it work. If it worked and were the default, I think it would help folks to avoid a great deal of the problems that come up with zebra.

L.9.2 Making Z39.50 Target Public

Question: Could someone tell me the exact steps I need to take to configure Zebra to expose my Koha 3 db as a public Z39.50 service?

Answer: Edit the `KOHA_CONF` file that your Koha is using. Uncomment the `publicserver` line like:

```
<!-- <listen id="publicserver" >tcp:@:9999</listen> -->
```

to be:

```
<listen id="publicserver" >tcp:@:9999</listen>
```

Then restart `zebasrv` and connect on the port specified (9999).

L.9.3 Shelving Location Authorized Values

Question: When editing an item, the new shelving location I created is not showing up by default in the items where I assigned it to.

Answer: This is because you created the new shelving location with a code value of 0 (zero) Just FYI the system interprets authorized values of 0 as equaling a null so when you edit a record in cataloging where the authorized value in a field was assigned where the code was 0, the value displays as null in the item editor (or MARC editor) instead of the value the library meant it to be.

L.9.4 Why do I need Authorized Values?

Question: Why would I want to define authorized values for MARC tags?

Answer: Authorized Values create a 'controlled vocabulary' for your staff. As an example, let us assume that your Koha installation is used by several libraries, and you use MARC 21. You might want to restrict the 850a MARC subfield to the institution codes for just those libraries. In that case, you could define an authorized values category (perhaps called "INST") and enter the institution codes as the authorized values for that category.

TIP

Koha automatically sets up authorized value categories for your item types and branch codes, and you can link these authorized values to MARC subfields when you set up your MARC tag structure.

L.9.5 How do I clean up the sessions table?

Question: Is there a periodic job that can be run to cull old sessions from the table? We don't want to backup all the useless session data every night.

Answer: You can run **cleanup database cron job**.

Or just before doing a backup command (mysqldump), you can truncate session table:

```
mysql -u<kohauser -p<password <koha-db-name -e 'TRUNCATE TABLE sessions'
```

L.10 Hardware

L.10.1 Barcode Scanners

Question: What barcode scanners have been known to work with Koha?

Answer: The simple rule of thumb is, does it act like a keyboard device?, if so, it will work. (i.e. can you take the scanner, scan a barcode and have it show up in a text editor, if so, it will work.)

The main points to check are that it connects to your PC conveniently (can be USB or "keyboard wedge" which means it connects in line with the keyboard, which is useful with older computers), and that it scans the barcode type that you are using.

It is a good idea to test some 'used' barcodes if you have any, to see whether the scanner can read scuffed or slightly wrinkled ones successfully. Most scanners are capable of reading several barcode types - there are many, and the specification should list the ones it can read. You may need to adjust settings slightly, such as prefix and suffix characters, or whether you want to send an 'enter' character or not.

One more tip - some can be set 'always on' and may come with a stand, some have triggers under the handle, some have buttons on top, some are held like a pen. Think about the staff working with the hardware before choosing, as a button in the wrong place can be very awkward to use.

L.10.2 Printers

L.10.2.1 Printers used by Koha libraries

- POS-X receipt printer
- Star Micronics printer (exact model unknown) with a generic/plain text driver.
- Star SP2000 (Nelsonville)
- Star TSP-100 futurePRINT (Geauga)
 - "I know there have been a lot of questions on receipt printers so I thought I'd pass on my findings. We have been testing the Star TSP-100 futurePRINT. I found this print to be VERY easy to configure for Koha. I was even able to customize the print job by adding our system logo (a .gif) to the top of every receipt. Also with a bitmap created in Paint was able to add a message at the bottom of each receipt with the contact information, hours and website for the library that the materials were checked out at."
- Epson TM 88 IIIIP thermal receipt printers
- Epson TM-T88IV
- 1x1 labels using a Dymolabelwriter printer

L.10.2.2 Braille Support

Question: Are there any braille embosser or printer which has inbuilt braille converter and it is accessible with UNIX environment?

Answer: You may want to look into BRLTTY (http://www.emptech.info/product_details.php?ID=1232).

L.10.2.3 Additional Support

- <http://www.nexpresslibrary.org/go-live/configure-your-receipt-printers/>

Appendix M

Extending Koha

M.1 Amazon lookup script for Koha libraries

We order most of our materials from Amazon, so I've been looking for a convenient way to tell if a book under consideration is in our catalog already.

Greasemonkey & a custom user script fit the bill nicely:

- <https://addons.mozilla.org/en-US/firefox/addon/748>
- <http://userscripts.org/scripts/show/56847>

A few caveats:

- Like most scripts, this one was designed to work with Firefox; I haven't explored getting it to work with other browsers.
- I'm not a JavaScript programmer -- this was adapted from others' work. Just a few lines would have to be changed to get the script to work with your catalog.
- It depends on the existence of ISBN for the item in question, so movies, older books, etc. would not work.

Others have added all sorts of bells & whistles: XISBN lookups to search for related titles, custom messages based on the status of items (on order, on hold, etc.), ... just search the UserScripts site for Amazon + library. For a later date!

M.2 Keyword Clouds

In addition to the traditional tag cloud available in Koha, there is a way to generate clouds for popular subjects within Koha.

The **Author/Subject Cloud cron job** is used to help with this process. This cron job sends its output to files.

- `/home/koha/mylibrary/koharoot/koha-tmpl/cloud-author.html`
- `/home/koha/yourlibrary/koharoot/koha-tmpl/cloud-subject.html`

This means that you can produce clouds for authors, collective author, all kind of subjects, classifications, etc. And since it works on zebra indexes, it is quick, even on large DBs. Tags clouds are sent to files. It's up to library webmaster to deal with those files in order to include them in **OPACMainUserBlock**, or include them into their library CMS.

Some libraries even send the file into a Samba shared folder where webmaster take them, eventually clean them a little bit before integrating them into navigation widgets or pages.

M.3 Newest Titles Pulldown

Often we want to add a way for our patrons to do searches for the newest items. In this example I'll show you how to create a pull down menu of the newest items by item type. These tips will work (with a couple changes) for collection codes or shelving locations as well.

First, it's important to note that every link in Koha is a permanent link. This means if I do a search for everything of a specific item type sorted by the acquisitions date and bookmark that URL, whenever I click it I'll see the newest items of that type on the first few pages of the results.

I took this knowledge and wrote a form that takes this functionality into consideration. It basically just does a search of your Koha catalog for a specific item type and sorts the results by acquisitions date.

The first thing I did was write a MySQL statement to generate a list of item types for me - why copy and paste when you can use the power of MySQL?

```
select concat('<option value="\mc-itype:', itemtype, '\>',description,'</option <
>') from itemtypes
```

The above looks at the itemtypes table and slaps the necessary HTML around each item type for me. I then exported that to CSV and opened it in my text editor and added the other parts of the form.

```
<p><strong>New Items</strong></p>
<p><form name="searchform" method="get" action="/cgi-bin/koha/opac-search.pl">
<input name="idx" value="kw" type="hidden">
<input name="sort_by" value="acqdate_dsc" type="hidden">
<input name="do" value="OK" type="hidden">
<select name="limit" onchange="this.form.submit()" >
<option>-- Please choose --</option>
<option value="mc-itype:BOOK">Book</option>
<option value="mc-itype:BOOKCD">Book on CD</option>
<option value="mc-itype:DVD">DVD</option>
<option value="mc-itype:LRG_PRINT">Large print book</option>
<option value="mc-itype:MAGAZINE">Magazine</option>
<option value="mc-itype:NEWSPAPER">Newspaper</option>
<option value="mc-itype:VIDEO">Videocassette</option>
</select>
</form>
</p>
```

Now, what does all of that mean? The important bits are these:

First the starting of the form.

```
<p><form name="searchform" method="get" action="/cgi-bin/koha/opac-search.pl">
```

This tells the browser to take any value selected and put it at the end of this `http://YOURSITE/cgi-bin/koha/opac-search.pl`. If you want to embed this form on your library website (and not on your OPAC) you can put the full OPAC URL in there.

Next, there is a hidden value that is telling the search to sort by acquisitions date descending (newest items at the top):

```
<input name="sort_by" value="acqdate_dsc" type="hidden">
```

And finally you have an option for each item type you want people to search.

```
<option value="mc-itype:BOOK">Book</option>
```

These options each include the string "mc-itype:" which tells Koha to do an item type search.

Once you have all of that in place you can copy and paste the form to somewhere on your OPAC. The [Farmington Public Libraries OPAC](#) has a few examples of this on the left.

M.4 Cataloging and Searching by Color

One of the icon sets installed in Koha includes a series of colors. This set can be used to catalog and search by color if you'd like. This guide will walk you use changing collection code to color in Koha so that you can do this.

The following SQL could be used to add these colors to the CCODE authorized value category in a batch. If you wanted to use these colors for another authorized value you'd have to edit this to use that category:

```

insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','000000','Black','','colors/000000.png') ←
;
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','66cc66','Bright Green','','colors/66 ←
cc66.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','99cc33','Olive','','colors/99cc33.png') ←
;
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','3333cc','Dark Blue','','colors/3333cc. ←
png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','006600','Dark Green','','colors ←
/006600.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','6600cc','Plum','','colors/6600cc.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','6666cc','Purple','','colors/6666cc.png ←
');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','9999cc','Light Purple','','colors/9999 ←
cc.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','660000','Burgundy','','colors/660000. ←
png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','663333','Brown','','colors/663333.png ←
');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','990000','Red','','colors/990000.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','996633','Tan','','colors/996633.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','999999','Gray','','colors/999999.png') ←
;
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cc66cc','Pink','','colors/cc66cc.png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cc99cc','Bubble Gum','','colors/cc99cc. ←
png');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cc3333','Orange','','colors/cc3333.png ←
');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cc6666','Peach','','colors/cc6666.png ←
');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cc9999','Rose','','colors/cc9999.png') ←
;
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','cccc00','Gold','','colors/cccc00.png') ←
;
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','ffff33','Yellow','','colors/ffff33.png ←
');
insert into authorised_values (category, authorised_value, lib,
  lib_opac, imageurl) values ('CCODE','ffffcc','Cream','','colors/ffffcc.png') ←
;
insert into authorised_values (category, authorised_value, lib,

```

```
lib_opac, imageurl) values ('CCODE','ffffff','White','','colors/ffffff.png') ←
;
```

If you would like to choose the colors manually you can do that via the **Authorized Values** administration area.

Next you'll want to **update the frameworks** so that the 952\$8 (if you're using collection code) label to says Color.

Once you have that in place you can start to catalog items by color.

Finally you'll want to add the following JQuery to your preferences so that it will relabel 'Collection' to 'Color'

intranetuserjs

```
$(document).ready(function() {
  $("#advsearch-tab-ccode a:contains('Collection')").text("Color");
  $("#holdings th:contains('Collection')").text("Color");
});
```

opacuserjs

```
$(document).ready(function() {
  $("#advsearch-tab-ccode a:contains('Collection')").text("Color");
  $('#item_ccode').text("Color");
});
```

Appendix N

Koha and Your Website

This appendix will include tips for integrating Koha in to your library website.

N.1 Koha search on your site

Often you'll want to add a Koha search box to your library website. To do so, just copy and paste the following code in to your library website and update the YOURCATALOG bit with your catalog's URL and you're set to go.

```
<form name="searchform" method="get" action="http://YOURCATALOG/cgi-bin/koha/opac- ↵  
  search.pl" id="searchform">  
<input id="transl1" name="q" type="text"><p>  
<select name="idx" id="masthead_search">  
<option value="kw">Keyword</option>  
<option value="ti">Title</option>  
<option value="au">Author</option>  
<option value="su">Subject</option>  
<option value="nb">ISBN</option>  
<option value="se">Series</option>  
<option value="callnum">Call Number</option>  
</select>  
<input value="Search" id="searchsubmit" type="submit">  
</p></form>
```

Appendix O

GNU General Public License version 3

Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited per-

mission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a. The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b. The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c. You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d. If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the

compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a. Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b. Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c. Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d. Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e. Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third

party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a. Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b. Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c. Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d. Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e. Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f. Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option

of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
one line to give the program's name and a brief idea of what it does.  
Copyright (C) year name of author
```

```
This program is free software: you can redistribute it and/or modify  
it under the terms of the GNU General Public License as published by  
the Free Software Foundation, either version 3 of the License, or
```

```
(at your option) any later version.
```

```
This program is distributed in the hope that it will be useful,  
but WITHOUT ANY WARRANTY; without even the implied warranty of  
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the  
GNU General Public License for more details.
```

```
You should have received a copy of the GNU General Public License  
along with this program. If not, see http://www.gnu.org/licenses/.
```

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

```
program Copyright (C) year name of author  
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.  
This is free software, and you are welcome to redistribute it  
under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.
